Mr. HELMS. Mr. President, this amendment would get the United States out of supporting land reform in El Salvador in any way, shape, or form. As most Senators are aware, present law prohibits U.S. aid funds from supporting planning for compensation or compensation for land reform in El Salvador. However, that prohibition would be deleted by the committee amendments. In the opinion of the Senator from North Carolina, that deletion is a grave error; in fact, we should be going in the other direction and make the prohibition broader. That is exactly what my present proposal would do, Mr. President; it would reinstate present law in the bill and make it stronger.

I know that there are many Senators in this Chamber who are sympathetic to the idea of land reform—that is, if the land reform is taking place in some other country. Somehow, we seem to think that the rules of justice and personal rights are suspended when we are dealing with countries where we do not have to run for reelection. We seem ready to believe that every other country in the world is somehow benighted and that its people are oppressed if the standard of living is not exactly on a par with the United States. We also seem to think that fundamental economic laws can be suspended, abrogated, or ignored in the desire to apply instant social justice.

Mr. President, El Salvador is a country which has been the victim of land reform. I use the word "victim" advisedly, even though land reform may have been applied in all good faith. But the unhappy reality of land reform's failure now stares us in the face. Why does the Reagan administration continue to cling to the romantic promises of land reform in the face of such evidence, Mr. President? Perhaps it would help to look at the reasoning used by its supporters.

The arguments in favor of land reform in El Salvador may be divided into two kinds: The arguments proposed by the Carter administration in making land reform the cornerstone of U.S. policy in that beleaguered country, and the arguments proposed by the Reagan administration after land reform had wrecked the economy, undermined the social system, instituted widespread instability and thoroughly polarized the social classes. The arguments of the Carter administration were inspirational; they were visionary; and they depended on a unique understanding of three basic concepts which justified a policy which, when approached in the light of commonsense, was totally unjustifiable. History, they argued, demanded land reform; justice demanded it; and politics demanded it.

History demanded land reform, according to the Carter administration, because the winds of change were blowing, always to the left. No longer did we have to harbor an inordinate fear of communism: communism was now the wave of the future. In fact, according to James Cheek, who served as Chargé in El Salvador in 1979 and 1980, just prior to the arrival of Ambassador Robert White, Central America needs a system of moderate Marxism to achieve stability and avoid violence.

I am gratified, Mr. President, that someone was willing to call this system of so-called reforms by its proper name. With the support which the Carter administration gave the Marxist Sandinistas and in the light of the many initiatives of then-U.N. Ambassador Andrew Young in Africa, this sense of the his-

torical necessity of Marxism in lesser-developed countries was broadly and consistently espoused by the Carter administration.

But justice, too, demanded land reform, according to the Carter logic. When Robert White testified before the Foreign Relations Committee last year, he said that:

> Capitalism in El Salvador is an alliance between large landholders, business interests and the Army, designed to reap maximum profits, give minimum benefits and minimum salaries, prevent any kind of organization of the peasantry or the workers, and pay as little as possible in taxes into the public treasury, and to permit corruption that was rampant in the government of El Salvador.

The Marxist interpretation of capitalism levels such charges against capitalism whenever Marxist parties cannot exercise total control over the society. Furthermore, advocates of the Carter policy pointed to a mythical 14 families who ruled Salvador with an iron hand. State Department spokesman Hodding Carter boasted—boasted—that the U.S. policy in El Salvador was well known, and that it consisted of supporting basic reforms that will give all of the people a more adequate share in the wealth of the country. So, in the view of the Carter administration, past injustices demanded radical reforms to bring about future justice.

I want to address the questionable assumptions of the Carter logic, Mr. President, but first, let me mention the third pillar of the reform ideology. It is based on a political judgment; namely, that the peasants would support the guerrillas if the Government of El Salvador did not deliver the radical land reform that the guerrillas were promising them. As they say in El Salvador, we had to "steal the banners" of the leftist guerrillas, so they would no longer attract the peasants to their ranks. Ambassador White stated the political argument in terms of stability:

"No Salvadoran government can stay in power," he told our Committee, "unless it embarks on a broad program of reform."

Mr. President, I am sorry to be the bearer of the bad news to this Chamber. But the situation in El Salvador must be understood clearly in this country in order for us to focus our policy as much as possible on the remedies which will most effectively deal with the problems there. The bad news, Mr. President, is that the assumptions of the Carter administration were sadly misinformed, even deformed.

Mr. Cheek thought that the wave of history was moving inexorably to the left; when he was replaced by Robert White in El Salvador, Mr. Cheek returned to the State Department to guide U.S. policy in Central America, and that benign, even benevolent view of Marxism which he and others have sown has now reaped a harvest of what the present administration correctly perceives as a Marxist threat to Central America which the United States cannot ignore.

History is not on the side of the Marxists, Mr. President, although Marxists think it is; and it ill serves the policy of the United States for our policymakers to steal that banner from the Marxist lexicon. History is on no one's side, Mr. President, except those humble enough to learn from it.

What about the allegation that El Salvador's system of land tenure was unjust? To substantiate that charge, Mr. White pointed to figures which showed that the top 10 percent of Salvadoran landowners owned 78 percent of the land. Is that unjust, Mr. President? Perhaps Americans will not find it so. The Library of Congress tells me, for example, that in Illinois, only 5 percent of the landowners own 57 percent of all the land; in North Carolina, the top 5 percent of the landowners own 69 percent of the land. Indeed, if we compare the total for the U.S. figures to those of El Salvador, Mr. President, we find that they actually exceed the concentration of land ownership in that country.

Mr. President, I have the official statistics from the Natural Resources Economics Division, Economic Research Service, U.S. Department of Agriculture. The pattern of land ownership varies, as we might expect. In almost every State, less than 5 percent of the landowners own more than 50 percent of the land. In fact, the national average for the United States is that 75.1 percent of the land is owned by only 5 percent of the landowners. In fact, 48 percent of the land is owned by less than 1 percent of the landowners. That means that nearly one-half of the United States is owned by 1 percent of the landowners.

I want to emphasize that this is 5 percent and 1 percent of the landowners, not the population as a whole. If the statistics were worked up on ownership as a percentage of the population, the results would be even more dramatic.

But what if you consider only farm and ranch land? The statistics show that over half of all U.S. farm and ranch land is owned by only 5 percent of the landowners—in fact, 52 percent. Finally, 30 percent of the farm and ranch land is owned by 1 percent of the landowners.

The bottom line, Mr. President, is that 75.1 percent of the land in the United States is owned by 5 percent of the landowners, while in El Salvador, the figures cited are 78 percent of the land owned by 10 percent of the landowners. So I think it is fair to assume that the situation is worse in the United States—providing we agree that such statistical analyses tell us anything about social justice. Perhaps we should have land reform in the United States before we impose it on hapless smaller nations.

Mr. President, I ask unanimous consent that the two tables showing the concentration of landownership and farmland ownership in the United States be printed at this point in the RECORD.

There being no objection, the tables were ordered to be printed in the RECORD, as follows:

TABLE 2.—*Concentration of landownership in the United States for farm and ranch land by region and State*

Mr. HELMS. Mr. President, I am not about to suggest that we send a proconsul to Illinois to initiate radical reforms there. I would also beg of the Senators in this Chamber that they refrain from doing so with the land in the great State of North Carolina. What I am saying,

Mr. President, is that we should not support these policies anywhere—in North Carolina, in Illinois, or in El Salvador. Indeed, there were no "14 families" affected by the land reform in El Salvador; there were hundreds of families, expropriated and allowed to leave with only the clothes on their backs.

Thousands more are threatened by the impending phase two. They are afraid to plant their crops because of the very real danger that, should they be expropriated, they will be left responsible for paying off the loans they took out. They secured these loans with crops which they can no longer harvest; but they would have to keep on paying interest and paying property taxes, all on the land which was taken from them by decree.

Mr. President, what sense of justice does this portray to a nation in search of rule by laws and not by men—guerrillas or otherwise? Right now, the United States has committed tens of millions of dollars to private sector aid in El Salvador, while with the same breath we embrace a set of programs which defies every fundamental principle which a private sector needs for its very survival.

Last, Mr. President, the Carter doctrine embraced land reform as a political necessity; without it, we were told, no government could withstand the guerrilla pressure from the left. In fact, Mr. President, these reforms have played into the guerrillas' hands. Listen to what Peter Bauer, reknowned economist at the London School of Economics and authority on foreign aid, has to say about the matter: Mr. Bauer cannot believe that:

> Large-scale aid still goes to governments whose policies directly impoverish their subjects, for instance by forced collectivization of farming, expulsion of the most productive groups, suppression of private trade and industry and restriction of the inflow of capital.

Mr. President, the land expropriations and the nationalization of the banking, export and agricultural processing industries in El Salvador have combined to impoverish the economy of El Salvador. We are now at the point where the guerrillas have realized that their best opportunity lies in terrorism which exacerbates that economic collapse. Just last week the guerrillas, aided, we are told, by Cuban experts, destroyed the key bridge that connects western El Salvador, including the capital, with the eastern third of the country closest to Marxist Nicaragua.

The economy of El Salvador cannot long function without that vital link, and the leftists know it, and they know that land reform has already destabilized the economy of that country. The guerrillas realize that the promised benefits of land reform evaporate in the harsh light of the reality of its failure to produce. And they know that such failure will cause the peasants to turn in their hunger to the left in unprecedented numbers. In short, Mr. President, land reform in El Salvador has been a made-to-order prescription for the guerrilla victory there.

It is not only the former landowners who consider this program a failure, Mr. President. The guerrillas, of course, think they could do the job better. Both radical and traditional church spokesmen point to the many shortcomings of the programs.

Representatives of the private sector—not on the right, Mr. President, but at the very center of El Salvador's potential for productivity—recently demanded that the agrarian reform laws be thoroughly revised to correct the injustice, insecurity, and disruption they had caused. And the list goes on, Mr. President. In the Cayetano cooperative, unemployment and poverty have set in, and the new peasant "owners" of the land are renting it out to small farmers as pasture. At the nearby San Francisco Guajoyo cooperative, which was formed some 6 years ago, peasants complain that the nationalized banks are favoring the government-run co-ops with the credit which is so necessary—but so scarce—for planting.

The irony of the situation, Mr. President, is that U.S. aid funds go to both private- and government-run co-ops, and our aid to the private sector goes by necessity through nationalized banks. In a touch of humor, perhaps, the Government of El Salvador tells us that the newly formed government cooperatives are really private sector entities, since they are owned by the peasants.

Mr. President, to consider these once-productive farms that have been expropriated by national decree, which are guided by government technicians and political directors, which depend on the nationalized banks for their credit, and which must sell their product through nationalized export companies—to consider these collectives as "private sector"—and thus technically eligible for the U.S. aid loans which are targeted to the private sector in El Salvador—is ludicrous.

Thus, Mr. President, the Carter administration argued: "bring on land reform. History, justice, and politics demand it." Let the record show, Mr. President, that the so-called reforms have been historical failures; that they have made impossible any sense of justice for workers, producers, property owners, and investors; and that they have driven a political wedge into the productive heart of the Salvadoran society.

Mr. President, we have discussed thus far the assumptions which informed the Carter policies whose consequences we know all too well: in Central America alone, we have Marxist Sandinistas firmly established in Nicaragua, continually consolidating their power and sending aid to revolutionaries throughout Latin America. Those countries who are friends of the United States are isolated, cut off from American aid, and threatened by insurgents, backed by Cuba and Moscow, who perceived in the Carter doctrine a green light for the red tide. These guerrillas agree that Marxism is necessary for Central America—indeed, for all the Americas.

Mr. President, it is puzzling that the Reagan administration has accepted at face value the policy of land reform which the Carter administration peddled in Central America. Certainly, the new administration does not agree with the peculiar sense of history, justice, and political judgment that motivated the Carter policy. Then, what could have caused the Reagan State Department to embrace and subsidize socialism? Unfortunately, it seems that this administration is motivated by a single principle in supporting, in the words of Assistant Secretary Enders, land reform "now and in the future" in El Salvador. The Reagan policy aspires to only one goal: pragmatism.

Mr. Enders is an articulate and persuasive spokesman, Mr. President. He has represented us firmly and clearly in the challenging combination of circumstances which face our hemisphere. It thus causes a twinge of curious unfamiliarity to hear the rather hollow ring of his justification for this administration's seal of approval for the land reform program. Listen to how he addressed the problem in his highly touted speech on El Salvador of July 16, 1981:

> How can a country beset by so many troubles get from here to there? The first thing to say is that promises must be kept. One can debate endlessly about El Salvador's land reform—whether the takeover of the big farms might have a high penalty in lost production for export, whether one can give clear title to over 200,000 individual peasant workers, and so forth. But the changes that have already taken place are real. The issue is no longer whether land reform is advisable or not. The issue now is how to consolidate and perfect what has been done.

Mr. President, I am afraid Mr. Enders has missed the point—a critical point—in coming to this conclusion. Oh, it would be so welcome if it were possible merely to sweep all the past under the rug and, as he puts it, "consolidate and perfect what has been done." Unfortunately, Mr. President, such an approach would obliterate not only the past, but the future. Had our Founding Fathers rejected the notion of independence, trying instead to "consolidate and perfect" what had been done under George III, things would have been quite different in our part of the world.

Instead, they had the courage to address certain fundamental self-evident truths, on the basis of which they made some fundamental but far-reaching conclusions. In the opinion of the Senator from North Carolina, the time has come to consider some fundamental realities of our policy toward El Salvador. We should not shirk such a responsibility merely because it is another country, not our own, which is being ravaged by programs of ruinous nationalization and expropriation. We should not avoid the hard questions only because we find it more convenient to overlook the painful realities which they reveal.

Mr. President, I am afraid that Mr. Enders has chosen the path that seems to spell an easy way out for the United States. If he were right, if we could accept even the faintest promise of an eventual happy ending to the scandal of land reform in El Salvador, then I would find it very hard indeed to differ with his judgment. But I cannot accept a conclusion which every principle of history, social justice, and economics shows to be invalid. And, Mr. President, the verdict has been rendered on land reform and

socialism throughout the world and in El Salvador. They do not work. They are failures. It is impossible to follow the suggestion of Mr. Enders that we ignore the arguments pro and con and, as he says, "consolidate and perfect what has been done." It would be no more responsible than a physician discovering cancer in a patient, noting the damage that had been wrought by that dread disease, and then sewing him back up without treating it. The only result of consolidation and perfection of socialism, is the ever-wider, ever more efficient, distribution of misery and poverty. The facts in El Salvador are plain to see.

The first stage of the land reform in El Salvador, the expropriation of all farms over 1,236 acres in size, was consummated in March 1980. Although our State Department pushed to have the second phase, which would have confiscated all farms larger than 250 acres, completed by November 1980, according to Salvadoran officials, that phase has not yet been initiated because of the total chaos resulting from phase I.

Phase III, which makes all rented land the property of the tenant, involving thousands of expropriations, is inching along 16 months after its implementation by decree in April of 1980. And the ruinous results can be seen in the agricultural sector. Since the onset of the reforms, overall agricultural production in El Salvador has decreased, although the planting of corn, a subsistence crop, has increased, since those who can no longer expect to plant cotton for export and cash plant corn to eat. The area planted in beans, rice, sorghum and cotton in 1981 is lower than 1980 levels.

President Duarte told us during his visit here that sugar production had increased, but he neglected to add the sad fact that much of it will go unprocessed because the newly nationalized sugar mills are too incompetent to handle the load; consequently, exports this year are expected to reach only 30,000 tons, 58 percent below the levels of 1978–79. Of course, that export function has been nationalized as well, and sugar is not the only export crop to have suffered.

The Coffee Producers' Association has complained strenuously that the redtape and mismanagement of the Government-run export markets have aggravated the problems brought on by the low world price for coffee. Even the government's very production figures are disputed by the independent associations of growers of various crops. For instance, the official government figures for estimated cotton production for 1981–82 are 40 percent higher than those of the Cotton Growers' Association of El Salvador, which has attacked the depressed conditions which the reforms have brought to that dimension of agricultural production.

Mr. President, I am sorry to nudge aside a very romantic, very appealing concept of "reforms," with all the good and wholesome things that word connotes, and put before you the unhappy, unlovely reality of the Salvadoran experiment in expropriation and redistribution, which Mr. Duarte himself acclaims as the most radical, the most thorough ever to have been attempted in Latin America. The point is, and I think Mr. Enders understands this now, it would not take "endless debate" to determine the failure of the Salvadoran reforms. His comments acknowledge the woeful situation, but, he says, "stiff upper lip. We have to muddle through, make the best go of it we can."

Mr. President, I think that might be very useful, even valid advice—for the Government of El Salvador. Indeed, they must play the pragmatist—they consider the reforms to be the basis of their policy, and feel wedded to them, warts and all. I do not think that applies to the Government of the United States, however, with the same force. In fact, it would be false pragmatism for us to pursue such logic, and it would be a grave mistake.

Frankly, Mr. President, there is a lot of money at stake here. Two years ago, in fiscal year 1980, the United States sank $22.5 million into the land reform program in El Salvador; in fiscal year 1981, that figure fell to about $10.5 million; and next year the projected amount is almost $22 million. At the same time, the United States intends to give a total of about $30 million to the private sector in El Salvador. We plan to try to stimulate the sagging economy of the country by giving them a shot in the arm, in the form of credit with which to purchase needed goods of U.S. origin.

Mr. President, no one disputes El Salvador's need for economic vitality. Indeed, it is clear that the economy there is on the brink of collapse. Is this the time for the United States to devote $30 million to private sector development, while it contributes $22 million to programs which are designed to expropriate, intimidate, and debilitate the private sector?

Let us put aside, for the moment, the unique difficulty which the land reform program presents to the accountability function; the inability to audit the cooperatives adequately; the invitation to corruption which accompanied the creation of a vast new government bureaucracy to oversee production, organization, export sales, and banking; forget the worm-infested cotton at La Carrera, once the showcase of the private sector; forget the unemployed owners of the San Caetano cooperative; forget the cattle at the Santa Clara cooperative that have disappeared.

Let us focus on the fundamental contradiction in a policy which dedicates $30 million to helping the private sector in El Salvador and $22 million to destroying it. Is there any logic in such a policy, Mr. President? Is there any justification, other than that of the sheer zealotry of devotion to socialism as a goal of development economics?

Mr. President, our constituents do not always understand foreign aid. They know that development cannot be exported to another country; it must come from within. How can we go to them and explain the contradictions of the economic policy of the present administration in El Salvador? I think Ronald Reagan spelled out his position quite clearly in his recent speech at the World Bank, where he said:

> Only when the human spirit is allowed to invent and create, only when individuals are given a personal stake in deciding economic policies and benefiting from their success—only then can societies remain economically alive, dynamic, prosperous, progressive and free.
>
> Trust the people. This is the one irrefutable lesson of the entire postwar period contradicting the notion that rigid government controls are essential to economic development.
>
> The societies which have achieved the most spectacular, broad-based economic progress in the shortest period of time are not the most tightly controlled, nor necessarily the biggest in size, or the wealthiest in natural resources. No, what unites them all is their willingness to believe in the magic of the market place.
>
> Everyday life confirms the fundamentally human and democratic ideal that individual effort deserves economic reward. Nothing is more crushing to the spirit of working people and to the vision of development itself than the absence of reward for honest toil and legitimate risk. So let me speak plainly: We cannot have prosperity and successful development without economic freedom. Nor can we preserve our personal and political freedoms without economic freedom.
>
> Governments that set out to regiment their people with the stated objective of providing security and liberty have ended up losing both. Those which put freedom as the first priority also find they have also provided security and economic progress.
>
> The domestic policies of developing countries are likewise the most critical contribution they can make to development. Unless a nation puts its own financial and economic house in order, no amount of aid will produce progress. Many countries are recognizing this fact and taking dramatic steps to get their economies back on a sound footing. I know it's not easy—but it must be done.
>
> Only with a foundation of sound domestic policies can the international economic system continue to expand and improve. My own Government is committed to policies of free trade, unrestricted investment and open capital markets. The financial flows generated by trade investment and growth capital flows far exceed official development assistance funds provided to developing countries.

Mr. President, if there is one thing that Ronald Reagan's election symbolizes, it is a return to sound economic principles. In recent months we have seen this primarily in terms of domestic policy, but it lies at the foundation of our approach to foreign policy and development economics as well. Consider the words of Secretary of State Alexander Haig, taken from the address which he recently delivered to the General Assembly of the United Nations:

> Growth for development is best achieved through reliance on incentives for individual economic performance. The individual is the beginning, the key element, and the ultimate beneficiary of the development process.
>
> Suppression of economic incentives ultimately suppresses enthusiasm and invention. And the denial of personal freedom can be as great an obstacle to productivity as the denial of reward for achievement.
>
> History cautions against regimes that regiment their people in the name of ideals yet fail to achieve either economic or social progress. Those governments that have been more solicitous of the liberties of their people have also been more successful in securing both freedom and prosperity.
>
> The United States can offer what it knows best from its own experience. We have seen the policies which encourage private initiatives will promote better resource allocation and more rapid economic growth.

Mr. President, I agree with President Reagan and Secretary Haig. And I do not understand why, when they embrace such sound economic and social principles, their policies in El Salvador reject those very principles in favor of Socialist structures, where signs are posted to read, like the one at the Santo Tomas cooperative, "We do not want any individualism here." Is it logical, Mr. President, that the team of technicians that posted such signs is financed by U.S. taxpayers' dollars?

Mr. President, when the representatives of AID testified before our committee last May 4, I asked for an explanation of the ways in which they spent American funds on the land reform. I ask unanimous consent that the reply be printed in the RECORD, along with other AID documents on El Salvador's land reform programs.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

EL SALVADOR: THE AGRARIAN REFORM PROGRAM

In March 1980, the Salvadoran Revolutionary Government issued Decree Number 153 or the Basic Law of Agrarian Reform. The following month Decree 207 was issued. The latter has come to be known as the "Land to the Tillers" law. Those two Decrees provide the legal basis for a three-phased transfer of the ownership of large estates to those individuals who had previously been associated with the estates as hired laborers or sharecroppers. What follows is a brief decription of those three phases and some of the progress and problems that have been associated with their implementation.

I. PHASE I:

The first phase of the agrarian reform began on March 6, 1980 when the Basic Law of Agrarian Reform was proclaimed. That same day, the Salvadoran Land Transformation Institute (ISTA) began intervening properties. ISTA is the principal implementing entity of the agrarian reform and is specifically charged with land expropriation, purchase, and indemnification. The large farms are being transferred to beneficiaries in the form of cooperatives at present jointly managed with ISTA.

Under Phase I, 282 farms have been transferred to 38,000 cooperative members and their families. The amount of land involved in these transfers totals 214,033.9 hectares or 528,877.77 acres. (See Table I). The cooperatives have been formed by offering to those individuals living on or near the affected farms, who were regular or seasonal employees of the operation, the opportunity to join in the cooperative ownership and management of the farm. In each case of cooperative formation, the members have selected a president and board of directors who are responsible for establishing operating policies and the provision of general guidance to farm management, technicians, and fellow cooperative members.

Reserve rights of previous owners (See table 2)

Decree 153 established reserve rights for prior owners of affected lands. The reserve rights determines and protects the legal maximum amount of land any individual or legal entity may own. The ceiling is between 247 and 370 acres depending upon the quality of the land and may be increased by 20% if the owner maintained or increased productivity or otherwise improved his land between the effective date of Decree 153 and the date of intervention and also complied with labor and social security laws.

Affected land owners were given one year from the date their property was intervened to claim their reserve rights.

Determination of reserve rights are established in the following manner:

a. The land owner initially files a claim indicating the lands and assets he would like to retain;

b. The cooperative indicates its concurrence with the ex-landowner or whether it has an alternate proposal;

c. ISTA's Board of Directors acts as final arbitrator, reconciling differences between landlord and cooperative and approving a final binding definition of the reserve rights;

d. Appeals by previous owners are referred to ISTA's Board of Directors;

e. All final definitions of reserve rights require on-site inspections to determine the quality of land (which determines the size of the reserve right); equitable division of farm lands and assets required to create two independent, viable farm units with access to roads, water utilities, etc.; and delimit the physical boundaries of the reserve right.

Indemnification of former landowners (See table 3)

The indemnification process commences once the extent of the owner's reserve rights have been determined and the net land and assets to be surrendered to the cooperative have been identified.

The law specifies that compensation shall be based on:

The 1976/77 property tax value as declared by the owner;

Where no declared tax value exists, owners may estimate the value, which ISTA may accept or reject. ISTA Board's arbitration of the assigned value is final.

The form of compensation (cash and/or bonds) depends on the size of the holding and the type of asset. The following compensation schedule has been established:

Land, 100 percent of the value to be cancelled with agrarian reform bonds for properties over 1235 acres.

Livestock and machinery, 25 percent in cash and 75 percent in five-year bonds bearing 7 percent interest.

Agro-industry and processing plants, 20 year agrarian reform bonds bearing 6 percent interest.

There are 3 classes of agrarian reform bonds; the class awarded in a given instance depends on land use and tenurial patterns.

II. PHASE II:

Phase II of the reform (the application of Decree 153 to land holdings between 247 and 1235 acres) has not been implemented.

III. PHASE III: DECREE 207 (LAND-TO-THE-TILLER)

A. Background: As was mentioned earlier, Decree 207 was proclaimed by the Government of El Salvador on April 28, 1980. Its purpose was to broaden the reform, to include tenants, sharecroppers, and other small farmers who had worker parcels of land without the benefit of title. These campesinos have been given preferential right to acquire up to a limit of 17 acres of land that they had previously worked. The effect of Decree 207 is to legally establish secure ownership rights for an estimated 125,000 small farmers who cultivate approximately 444,600 acres and are the potential beneficiaries of this program.

B. Implementation: Implementation began in December, 1980, with the establishment of FINATA (National Financial Institute for Agricultural Lands). FINATA now has approximately 300 employees in 81 field offices throughout the country.

Democratic farmer organizations, who were influential in establishing the Land-To-The-Tiller reform, now play an active role in its promotion and implementation.

The actual preparation of application documents are carried out in the FINATA field offices.

Once completed, a beneficiary receives a receipt that confirms user rights and access to production credit.

To verify the information contained in the application FINATA must:

1. Identify "tillers" who have the legal right to claim a particular parcel of land;
2. Identify that parcel and prepare a legal description;
3. Identify the current owner;
4. Determine the land's value;
5. Negotiate agreements or administratively resolve any disputes;
6. Record the action into the cadastral system;
7. Register this transaction in the land registry records;
8. Issue a provisional title;
9. Publicize these provisional transactions to assure that the rights of others who believe they have rights to the affected lands have an opportunity to contest;
10. Establish financial records to permit the beneficiary to make amortization payments and pay applicable taxes;
11. Establish records to compensate former land owners;
12. Issue bonds and make cash payments.

Upon verification of the application (8 above), the beneficiary receives his provisional title. Definitive titles will be issued when valuations are determined for compensating former owners and scheduling land payments by beneficiaries.

In the period between February 16 and June 19, 1981, FINATA received from potential beneficiaries 14,007 applications for land titles. Over the next year, conditions permitting, FINATA estimates it will process 60,000 to 70,000 additional applications. The applications received to date represent 10,981 new beneficiaries (an applicant can file on more than one plot, up to the 17 acres limit) and 40,478 acres.

These beneficiaries represent a portion of El Salvador small tenant farmers, sharecroppers and renters. To date, due to legal property identifications procedures which require site visits, only 380 provisional titles have been issued. Extensive work with cadaster maps will shortly resolve some of the property identification problems. The granting of an additional 3,000 provisional titles is planned by the end of July 1981. Work on property registration publication and valuation (not AID assisted) which will permit the conversion of these provisional titles to permanent land titles continues.

PROBLEMS AND PROSPECTS

During 1980 and 1981, the agrarian reform process in El Salvador has had to contend with the violence and economic problems that have afflicted the country. Crops and farm machinery have been burned. Cooperative leaders and members have been killed or have disappeared. As a result of the intense violence or insecurity in some parts of the country, 22 cooperatives have been abandoned. Other cooperatives have encountered operating and social-political problems. In a recent report prepared by ISTA, it was reported that 55 cooperatives have encountered operating problems and another 22 have had to contend with socio-economic problems that have affected their operations in one form or another. Few of those cooperatives, however, have been abandoned. Other cooperatives have encountered operating and social-political problems. In a recent report prepared by I.S.T.A., it was reported that 55 cooperatives have encountered operating problems and another 22 have had to contend with socio-economic problems that have affected their operations in one form or another. Few of those cooperatives, however, have been abandoned and all managed despite those problems, to harvest crops during the 1980–1981 crop year and to initiate preparations for 1981–1982.

The Salvadoran agrarian reform has had the misfortune of coming into existence at the same time that the country has had to contend with serious and continuing declines in the prices earned by its principal agricultural export commodities. This has been especially true of coffee, sesame, and basic grains. While this has placed a burden on the entirety of the national economy, it has been especially difficult for the newly organized and largely inexperienced agrarian reform cooperatives. In the final analysis, commodity prices could prove the most critical factor in the success or failure of the Salvadoran agrarian reform effort.

The timely delivery of production inputs, particularly credit, to the reformed sector has been problematic, but there the record is marked with some important achievements. During 1980 the national financial system extended in the form of production credit an estimated $95,000,000 to the reformed sector.

Over half that amount was repaid through the earnings made on the sale of last year's crops. Of the other half approximately $20,000,000 will need to be refinanced because of low commodity prices or because short term loans were acquired for purposes that would have been better served with medium or long term credit. In the I.S.T.A. report that was mentioned above, the agrarian reform cooperatives earned high marks for their management of the production credit that was lent to them. Had market conditions been more favorable for producers, their performance might have been more impressive.

TABLE 1.—EL SALVADOR: IMPACT OF THE LAND REFORM PHASE I

[June 29, 1981]

Department	Number of farms	Area (acres)
Ahuachapan	26	39,773.22
Santa Ana	23	46,205.97
Sonsonate	31	59,297.33
Chalatenango	5	16,600.18
La Libertad	45	89,307.87
San Salvador	11	25,995.91
Cuscatlán	3	8,507.65
La Paz	38	63,498.20
Cabañas	1	1,598.24
San Vincente	21	21,601.06
Usulután	43	66,699.95
San Miguel	16	46,987.55
La Unión	17	39,597.28
Morazán	2	3,207.36
Total	282	528,877.77

Note.—(1) The estimated total number of Phase I beneficiaries is 480,000; (2) Area affected represents 14.9 percent of total farm area in El Salvador; (3) Average size of intervened haciendas is 1,875.45 acres.

Source: ISTA.

TABLE 2.—EL SALVADOR: STATUS OF RESOLUTION OF PHASE I—RESERVE RIGHTS

[June 29, 1981]

Reserve rights	Number of cases	As percent of phase I intervened farms
A. Claimed reserve rights	166	58.86
In process	54	19.15
Approved	83	29.43
Forfeited (1)	29	10.28
Denied	0	0.00
B. Reserve rights not claimed	116	41.14
Total	282	100.0

Note.—(1) After claiming the reserve right, landowners decided not to make use of it.

Source: ISTA (Department of Planning).

TABLE 3.—COMPENSATION STATUS OF THE LAND REFORM—PHASE I

[U.S. dollars (June 29, 1981)]

	Cases already approved	Compensation (actually paid)	Cases pending compensation
Number or farms	59	23	36
A. Bonds	$25,981,720.00	[1] $14,806,920.00	$11,174,800.00
A.1 Preferential "A" bonds	1,949,080.00	905,200.00	1,043,880.00
A.2 "A" bonds	18,527,720.00	11,674,880.00	6,852,840.00
A.3 "B" bonds	896,520.00	145,600.00	750,920.00
A.4 "C" bonds	4,608,400.00	2,081,240.00	2,527,160.00
B. Cash payment	2,287,450.00	1,113,366.00	1,174,084.00
C. Total compensation	28,269,170.00	15,920,286.00	12,348,884.00
D. Deduction from the cash payment	18,641.20	9,326.80	9,314.40
E. Net cash payment	2,268,808.80	1,104,039.20	1,164,769.90

[1] This amount of compensation to be paid in bonds is actually done with "Certificados Provisionales" (provisional bonds).
Source: ISTA.

TABLE 4.—EL SALVADOR: ESTIMATED AREA AND FARMS AFFECTED BY THE LAND REFORM PROCESS

[(June 29, 1981) (acres)]

	Phase I	Phase II	Land to the tiller
Size of ownership holding subject by law to intervention (acres)	1,235.50 and over	247.10 to 1,235.50	[1]
Area affected by the land reform:			
Total (acres)	528,877.77	[2] 847,249.07	444,780.00
As percent of total farm area	14.9	23.6	12.4
Farms affected by the land reform:			
Number	282	1,739	[3] 125,000
Average size (acres)	1,868.08	N.A	3.46
As percent of all operational units	0.1	0.6	46.1

[1] Properties of any size which are indirectly exploited: The maximum area by law which an individual farmer beneficiary may acquire is 17.29 acres. However, this limit is not applicable to agricultural cooperatives, community campesino associations, or other agricultural workers' association registered in the Ministry of Agriculture. The average size of parcel to which beneficiaries will receive title to is estimated to be 3.46 acres.
[2] This total will be reduced because of the former land owner's reserve right to retain 247.10 to 370.65 acres, depending on the quality of land retained.
[3] This is the number of beneficiaries; as they may rent more than one plot, the total number of parcels farmed may considerably exceed the number of beneficiaries.

El Salvador Agrarian Reform Monthly Report, August 26, 1981

1. BACKGROUND

The following is the second of a continuing series of monthly reports detailing the Salvadoran Agrarian Reform's implementation progress. These reports are being prepared in an effort to inform AID/W in a timely and systematic fashion regarding the Reform's progress. Data cited here have been supplied by GOES officials responsible for the implementation of the Reform's component activities. Additional information and appropriate definitions may be obtained through the previous monthly report and two Mission briefing documents dated 5/27/81 and 6/25/81. Those documents are on file with LAC/CEN and LAC/DR/RD.

2. PHASE I (DECREE 153)

a. Total number of properties intervened under the authority of Decree 153: 315.

Cooperative members: 32,116.

Estimated total beneficiaries, including family members: 224,812.

Land area affected: 547,556 acres.

b. Property owners compensated as of last reporting period (i.e., as of 7/24/81): 47.

Total compensation paid as of 7/24/81 for 47 properties: $27,866,810.

c. Property owners compensated during this reporting period (7/24/81 to 8/25/81): 5.

Amount paid: $6,530,683.

Form of payment: Cash, $75,923; bonds, $6,454,760.

d. A total of 52 properties have been purchased as of 8/25/81, costing $34,397,493: Cash, $2,866,733; bonds, $31,530,760.

e. An additional 73 properties have been approved for compensation settlement, which are expected to total $46,403,038 of which $4,356,355 will be in the form of cash payment and $42,046,683 in agrarian reform bonds.

f. Number of properties presently pending compensation approval: 190.

g. Property titles issued to cooperatives: 1.

As of last period (7/24/81): 0.

During this period: 1.

Cumulative as of 8/25/81: 1.

Note: Additional property title transfers to co-ops are being processed. Issues which have to be resolved prior to the issuance of titles and their transfers to co-ops include the scheduling of final mortgage payments, determining the size and nature of outstanding bank loans against affected properties, and the drawing up of state co-op participatory management contracts. The issuance and transfer of Phase I titles is a priority item in the GOES Agrarian Reform agenda.

3. PHASE II

As stated in previous report, Phase II implementation has been postponed indefinitely.

4. PHASE III (DECREE 207)

a. Number of direct beneficiaries: 17,862.

Direct beneficiaries are defined as those individuals who have submitted petitions under the terms of Decree 207 for title to the lands they have worked under some sort of sharecrop, rental, or service arrangement.

Total beneficiaries: 107,172.

The number representing total beneficiaries is derived by multiplying the number of direct beneficiaries by six (6), a procedure intended to account for the direct beneficiaries and their family members.

b. Land area affected under Decree 207: 68,212 acres.

c. Title petitions filed: As of last period (7/24/81): 19,015.

During this period (7/25/81 to 8/25/81): 4,286.

Cumulative to date (8/25/81): 23,301.

Under the provisions of Decree 207, an individual may submit petitions for title to more than one parcel of land so long as the total intended transfer does not exceed the seven (7) hectares (17.3 acres) limit established under Decree 207.

d. Provisional titles granted: As of previous reporting period (7/24/81): 1,440.

During this period (7/24/81 to 8/25/81): 3,442.

Cumulative as of 8/25/81: 4,882.

e. Definitive titles granted:

As of 7/24/81: 0.

As of 8/25/81: 0.

Cumulative: 0.

f. Property owners compensated as of 8/25/81: 0.

Explanatory Note: The administrative and legal conditions that must be satisfied prior to the issuance of a definitive title are complex and lengthy. Among other things, the value of the land to be transferred must be assessed in a manner consistent with terms set forth in Decree 207 and the value of any mortgage associated with the affected property must be determined.

EL SALVADOR AGRARIAN REFORM MONTHLY REPORT, JULY 30, 1981

A. BACKGROUND

The following is the first of monthly progress reports for AID/W information. Data cited are official GOES figures. The purpose is to provide a mechanism for responding to inquiries regarding progress of El Salvador's agrarian reform program. Background definitions and data can be found in two reports hand carried to AID/W dated 5/27/81 and 6/25/81. Both should be available through LAC/CEN of LAC/DR/RD backstops.

B. PHASE I (DECREE 153)

1. Total number of Phase I properties: 282.

Cooperative members: 31,800.

Total beneficiaries: 217,784 (includes family members).

Land area affected: 528,878 acres.

2. Property owners compensated as of last period: 33 (6/24/81). Compensation paid: Cash: $1,518,497; Bonds: $16,091,560.

3. Property owners compensated this period: 14 (7/24/81). Compensation paid: Cash: $1,272,313; Bonds: $8,984,440.

4. Total compensation paid to date, 47 properties: $27,866,810.

5. Additional properties approved for compensation settlement: 64 (7/24/81)—Cash: $3,790,368; Bonds: $35,642,044.

6. Properties pending compensation approval: 171.

7. Property titles issued to cooperatives:

As of last period: 0 (6/24/81).

This period: 0 (6/24/81 to 7/24/81).

Cumulative to date: 0 (7/24/81).

Note: Initial issuance of property titles to co-ops is still pending. Issues to be resolved include final mortgage arrangements, outstanding bank loans against properties and co-op/state participatory management contract. GOES continues to plan for earliest possible issuance of Phase I titles.

C. PHASE II

Indefinitely postponed.

D. PHASE III (DECREE 207)

1. Number of direct beneficiaries: 14,735.

Total beneficiaries: 88,410 (includes family members).

2. Land area affected: 54,961 acres.

3. Applications for titles filed: As of last period: 12,815 (6/12/81). This period: 6,200 (6/12/81 to 7/24/81). Cumulative to date: 19,015 (7/24/81).

4. Provisional titles granted: As of last period: 52 (6/12/81). This period: 1,388 (6/12/81 to 7/24/81). Cumulative to date: 1,440 (7/24/81).

5. Definitive titles granted: As of last period: 0 (6/12/81). This period: 0 (6/12/81 to 7/24/81). Cumulative to date: 0 (7/24/81).

Note: Definitive titling pending determination of values for compensation and mortgage values of affected properties.

Mr. HELMS. Mr. President, the restrictions of section 721 are deleted in the present bill as it emerged from committee. My amendment would restore the restrictions of section 721 and would clarify the intent of the legislation to restrict any U.S. funds from going to the land reform process at any stage of planning, implementation, direct or indirect technical assistance, and support services, as well as restricting credits and other financial mechanisms which are meant for the private sector from being diverted to the nationalized land reform properties.

There is one dimension of the situation in El Salvador which must be understood here: Within the ruling junta, there are many tendencies; some members are inclined to pursue "dialogue," as they choose to call it, with the left, with whom they feel much more at home than with the center forces who constitute the majority of Salvador's population. It is at their insistence, spurred on at critical points by zealous in the American Embassy in San Salvador during the last administration, that the radical nature of these so-called reforms was driven home; and I assure you, Mr. President, that there are more moderate forces within the forces of opinion in that country who recognize the need for a voice of reason during this time of crisis. We can give those forces of moderation critical and much-needed support at this decisive moment in Salvadoran history, Mr. President, if we only reach to the foundation of principles which have nurtured the search for freedom and peace in our own history.

It is sad to note that many cynics in Latin America think that if they but utter the sacred phrase "private sector," they can take the taxpayers of the United States for all they can get. I am sorry that we sometimes encourage such behavior; for instance, in Nicaragua, those firms eligible for aid which we have earmarked for the "private sector" are defined by our own AID officials as any firms of which the Government does not own a controlling interest. So, to be on the safe side, and to encourage even those Socialists who affect public policy decisions in El Salvador which will be paid for with U.S. funds, this amendment requires that no nationalized or redistributed properties can qualify for the U.S. aid which is intended to help the private sector.

Mr. President, it is bad enough that much of our aid to the private sector in El Salvador must be channeled through nationalized banks; but this amendment makes clear the understanding that nationalized properties redistributed in the land reform program are not to be considered "private sector" entities for the purposes of determining eligibility for U.S. private sector loans, which are also contained in our overall program for El Salvador.

Mr. President, it is clear that many of these grave concerns have not been adequately addressed, as I have already illustrated. It is time that we stopped sending ambiguous and confusing signals to the international community: My amendment is in harmony with the principles ennunciated by President Reagan and responsible economists worldwide and in the major policy speeches of the President and the Secretary of State quoted above.

It is time that we stopped asking the American taxpayer to foot the bill for socialist experiments in foreign countries which need to liberate their markets, not nationalize them. It is time that we stop financing the breakdown of the Salvadoran economy and concentrated our efforts instead on the rebuilding of the foundation of a growth-oriented productive sector based on private ownership, the defense of human rights, including property rights, and the protection of law-abiding citizens from the terrorist guerrillas who have vowed to bring El Salvador to its knees.

Throughout Latin America, throughout the world, the world should know where we stand, Mr. President. Do we stand for growth or stagnation? State control or individual initiative? Freedom or socialism? A strong, vibrant economy or a collapse which can only aid the guerrillas? Mr. President, I believe the choice is clear.

Mr. President, I think this was an amendment on which the distinguished chairman of the committee will have a substitute amendment—meaning the land reform amendment—and I would be willing to yield back my time so it may expedite matters and so that he can be in order in sending his substitute to the desk.

UP AMENDMENT 513

Mr. PERCY. Mr. President, I send to the desk an amendment in the nature of a substitute and ask that it be stated.

The PRESIDING OFFICER. The amendment will be stated.

The Chair wishes to inquire, has all time been yielded back on both sides so that we may proceed with the consideration of the substitute amendment? It is the Chair's understanding that the proponents have yielded back, but they are not clear as to the position of the other side.

Mr. PERCY. Mr. President, I have just one explanation. The substitute amendment is now current law. Let us make that clear.

Mr. President, I yield back my time on the original Helms amendment No. 512.

The PRESIDING OFFICER. All time having been yielded back, the clerk will state the substitute amendment.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 513 as a substitute to the unprinted amendment numbered 512.

In lieu of the language proposed to be inserted, insert the following:

"Sec. . None of the funds authorized to be appropriated by this Act may be made

available for the provision of assistance to El Salvador for the purpose of planning for compensation, or for the purpose of compensation, for the confiscation, nationalization, acquisition, or expropriation of any agricultural or banking enterprise, or of the properties or stock shares which may be pertaining thereto."

Mr. PERCY. Mr. President, I believe we have had an explanation of the amendment and the reading of the amendment. We are ready for a vote, and I yield back the remainder of my time.

Mr. HELMS. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the substitute amendment.

The substitute amendment (UP No. 513) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the first degree amendment, as amended.

The amendment (UP No. 512), as amended, was agreed to.

UP AMENDMENT NO. 514

(Purpose: To express the sense of the Congress with respect to Japan and security in Asia)

Mr. HELMS. Mr. President, I send to the desk an unprinted amendment.

The PRESIDING OFFICER. The amendment will be stated.

The Chair inquires if the Senator from North Carolina wishes to have his first amendment continued to be set aside temporarily.

Mr. HELMS. Mr. President, I believe that the distinguished chairman and his staff are still working on their modification of that amendment.

The PRESIDING OFFICER. The Chair needs such a request before we can proceed with this amendment.

Mr. HELMS. I make such a request.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment will be stated.

The legislative clerk read as follows:

The Senator from North Carolina (Mr. HELMS) proposes an unprinted amendment numbered 514.

Mr. HELMS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, between lines 2 and 3, insert the following:

JAPAN AND SECURITY IN ASIA

SEC. 716. (a) The Congress finds that—

(1) current trends in the course of international relations require greater efforts on the part of the United States and its allies in defending democratic values and ideals;

(2) Japan is a vital member of the democratic family of nations and has the economic means to devote a greater share of its government expenditures to defense;

(3) efforts to enhance international peace and security, particularly in the northeast Asian region, will require credible defense efforts by the United States and Japan; and

(4) in the joint communique signed by Japan's Prime Minister and the President of the United States in Washington on May 8, 1981, the Government of Japan and the Government of the United States agreed on the necessity of increasing defense efforts.

(b) It is the sense of the Congress that—

(1) consistent with the Treaty of Mutual Cooperation and Security Between the United States of America and Japan, signed at Washington on January 19, 1960, both Japan and the United States should redouble their efforts to resist the challenges of the Soviet Union to security in Asia;

(2) as a tangible sign of commitment to international peace and security, the Government of Japan should increase its defense expenditures; and

(3) the President should as soon as practicable announce plans to enter into negotiations with the Government of Japan to update the terms of the Treaty of Mutual Cooperation and Security Between the United States of America and Japan, with the objective of establishing a full partnership and closer cooperation in sharing the burden of the common defense.

Mr. HELMS. Mr. President, I am concerned about the lack of responsiveness of the Government of Japan to the repeated requests made of Japan to increase their share of the collective defense burden of the West.

Today, the Japanese economy and the Japanese people enjoy a degree of security that is bought and paid for in large measure by the American taxpayers. I believe that the Japanese spend something in the order of $11 billion annually for defense, while the United States pays $160 billion.

This was appropriate at a time when the Japanese economy was a small fraction of the American counterpart. But thanks, in part, to a generous sharing of American technology and the American market for Japanese products, and the willingness of the American people to carry the overwhelming burden of collective defense, Japan was able to make maximum benefit of her own industrious and inventive work force to construct one of the world's most powerful economies.

Events in Afghanistan and other signs of growing Soviet adventuresomeness around the globe have convinced many people that a greater collective defense effort is required by the West. The feeling was that a few more dollars spent today might discourage the Soviets from engaging in even more dangerous activities that could spiral out of control into war.

The Carter administration requested of the Government of Japan that they too make a significantly greater contribution to the collective Western defense effort, particularly in view of the very low base from which Japan is starting.

The Reagan administration has made similar requests. And to date, the response has been most disappointing. Delays, evasiveness, vague hints at future possible efforts in the defense area have characterized much of the official Japanese response.

And in the meantime, the Japanese trade deficit with the United States has grown to staggering levels—most recently in the order of 15 billions of dollars.

Thus, the Japanese continue to have the benefit of the best of both possible worlds: Expanded access to the American market and continued shifting of the defense burden to the American taxpayer. Clearly this cannot continue in this light.

I think the time has come to go right to the heart of the matter of United States–Japanese security arrangements, and renegotiate the Japanese-American Security Treaty. The purpose of this would be to get formal Japanese concurrence to provide the manpower and hardware to carry out specific functions. I have in mind an expansion of the Japanese Navy to protect the sea lines from the Persian Gulf to the Japanese Islands. And I have in mind an expansion of Japanese air power to provide protection of a specific area around Japan.

The United States presently has a need to concentrate more of our military power to theaters other than East Asia. Yet, a power vacuum would invite the Soviets to fill it, which would not be in either American or Japanese interests.

For this reason, it is important for our Japanese friends to face up to their own responsibilities, and make a modest sacrifice on behalf of defense. It will, in any case be a small sacrifice compared to that which the American people make year in and year out.

But, the stalling and evasiveness by the Japanese Government on this critical matter of mutual interest must end. We need to see some significant and tangible results, and we need to see them soon.

This amendment would call upon Japan to increase its defense expenditures as a tangible sign of commitment to international peace and security, and calls upon the President to enter into negotiations with Japan to update the mutual security treaty with the objective of establishing a full partnership for the common defense.

Mr. President, the distinguished chairman and I have discussed this amendment, and it is my purpose to withdraw the amendment, provided he will be willing to give me assurance that hearings will be held on this subject at the appropriate time.

Mr. PERCY. Mr. President, I commend the distinguished Senator for raising this issue. He joined me when we sent a joint letter, signed by 37 other Senators, to Prime Minister Ohira, simply indicating that Japan should and must do more for its self-defense, for the common defense, and in the area of humanitarian assistance. The Japanese have responded in a very forthright way. At that time, they sent 50,000 tons of rice to Kampuchea, and they started to talk earnestly about the modernization of their self-defense force.

I believe that the question of U.S. security interests in Asia should be the topic of hearings and that such hearings can be held in an expeditious manner. The issue of U.S. security interests in the Far East will be considered as one of the primary topics in our upcoming hearings on East-West relations. I hope Senator HELMS will participate actively in those hearings.

I oppose this amendment because I believe it will be counterproductive.

We would all like Japan to increase its defense capability. But we should not overlook some of the significant advances Japan is now making in strengthening its security posture:

An ambitious program for modernizing Japan's self-defense force includes acquisition of such major U.S. equipment as the F–15, P–3C, and E–2C. The Japan Defense Agency's proposed 1982 budget will accelerate procurement of these systems.

Japan has steadily increased its host nation support for U.S. forces in Japan. Such support comes to about $1 billion, with increasing amounts being spent each year for U.S. facilities and costs of our labor force in Japan. We are discussing further expansion of Japan's cost-sharing programs.

Under the guidelines for United States-Japan defense cooperation adopted in 1978, United States and Japanese military staffs meet regularly to work out joint contingency plans and cooperation in fields such as logistics, communications and intelligence. They have made substantial progress.

Japan has also made some progress in security-related areas. In the wake of the brutal Soviet invasion of Afghanistan, Japan made generous aid offers to Turkey and Pakistan to bolster their ability to stem internal economic disintegration as well as external aggression. Japan has increased its aid to Thailand and has taken on a large portion of the financial burden generated by the refugee crisis in Southeast Asia. Japan did not send a team to the Moscow Olympics and increased its purchase of U.S. grain to help offset American losses during our grain embargo of the Soviet Union. Japan has also decided to purchase U.S. grain for distribution overseas as food aid—an important undertaking I have suggested for years—opening up the possibility of larger sales for this purpose in the future.

But we would like Japan to do more. Japan's spending on defense as a percentage of gross national product is extraordinarily low. There is no question Japan could do more to improve its defense capability. I have personally made these points to former Prime Minister Ohira—now deceased—and Prime Minister Suzuki.

The Reagan administration has also urged Japan to do more. At a meeting in Hawaii last summer of the security consultative committee, administration officials spoke quite frankly about U.S. hopes for improvement in Japan's defense readiness and overall capability. There is no question that the U.S. position is clear on this point.

This amendment, however, would be counterproductive in our efforts to convince Japan to improve its defense capability. It calls for an "updating" of the mutual security treaty and would focus debate in Japan on the wrong issue. It implies that, if Japan does not increase its defense spending, the United States will withdraw its security commitment.

First, the threat is not credible. The treaty is as much in our interest as it is in Japan's. And, second it would convince the Japanese that they were being urged to increase defense because it is in the U.S. interest. We must persuade the Japanese that it is in Japan's self-interest to react to changing circumstances such as the Soviet military buildup in the Far East.

Mr. President, I am confident that this administration, with the combined persuasive talents of Secretaries Haig and Weinberger, will prove successful in eliciting increased commitments from our allies to the common defense. I also believe that the Japanese, as well as the Europeans, are well aware of U.S. sentiment on the issue of allied contributions to the common defense. For these reasons, I would respectfully request the Senator from North Carolina to withdraw his amendment.

Mr. HELMS. I thank the able chairman of the Foreign Relations Committee.

I will withdraw the amendment, in light of his assurances. But I say to him and other Senators that sentiment on this matter is growing among our colleagues, and I doubt that they are going to be all that patient for a very long period.

So I welcome his assurance that hearings will be held in an expeditious manner. I expect that next year we will see a lively debate on this issue, and I hope the Japanese will take note.

I yield back the remainder of my time.

The PRESIDING OFFICER. The Chair understands that it is the request of the Senator to withdraw his amendment (UP No. 514).

Mr. HELMS. I do withdraw it.

Mr. PERCY. I thank my distinguished colleague for withdrawing his amendment.

The PRESIDING OFFICER. The question now recurs on UP amendment No. 511.

Mr. BAKER. Mr. President, can we vacate the order for the yeas and nays on this amendment?

Mr. HELMS. Not quite yet, I say to the distinguished majority leader, but he can anticipate that sort of action.

Mr. BAKER. I thank the Senator.

Mr. HELMS. Mr. President, I think it is essential that I see the amendment before I proceed. I suggest the absence of a quorum, with the time to be charged to neither side.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside so that the Chair may recognize the chairman of the committee to offer another amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Senator from Illinois.

UP AMENDMENT NO. 515

(Purpose: To provide for the use of certain Polish currencies)

Mr. PERCY. Mr. President, I send an amendment to the desk.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) proposes an unprinted amendment numbered 515.

Mr. PERCY. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 84, insert the following new section between lines 2 and 3:

"USE OF CERTAIN POLISH CURRENCIES

"SEC. 716. (a) Notwithstanding section 1415 of the Supplemental Appropriation Act, 1953, section 508 of the General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962, or any other provision of law, the currencies or credits received by the United States from the April 1981 sale of United States Government-held surplus dairy products to Poland shall, to such extent as may be provided in advance in an appropriation Act, be used by the President in Poland to serve United States interests, including use for activities of common benefit to the people of the United States and the people of Poland, such as joint programs in energy, agriculture, education, science, health, and culture, or for humanitarian activities.".

Mr. PERCY. Mr. President, the Commodity Credit Corporation recently sold Poland $70 million worth of U.S. surplus dairy products as part of a program to help Poland during its current difficulties. In order not to further erode that country's delicate balance-of-payments situation, the United States agreed to take payment in Polish zlotys. Given the current inflation rate in Poland, if these funds are not put to some productive use quickly, they will rapidly erode in value.

I am, therefore, offering an amendment which would authorize the use of such funds for purposes of mutual benefit to the American and Polish people in such fields as energy, agriculture, education, science, health, and culture. I believe there are a variety of undertakings in which American and Polish citizens, working together, could bring about advances in knowledge in such areas as energy and medicine, and in mutual understanding through work in culture and education. Such funds might also be used to help with local costs of U.S. sponsored humanitarian activities.

I should note that the House Committee on Foreign Affairs has included a similar provision in its foreign assistance bill, and that according to my amendment funds would only be made available if also provided for in an appropriations act. I believe this amendment makes sense financially, and will allow activities to get underway which will bring our two people even closer together.

Mr. President, I believe we are ready for a vote on the amendment. I yield back the remainder of my time.

Mr. PELL. Mr. President, this is an excellent amendment. I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment.

The amendment (UP No. 515) was agreed to.

Mr. HELMS. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask unanimous consent that it may be in order to suggest the absence of a quorum, without the time being charged against the time allocated under the order.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I understand that the Percy substitute to the Helms amendment dealing with the cut in funding levels is now ready to be represented to the Senate. Could I inquire of the author of the substitute and of the original amendment if that is indeed the case?

Mr. PERCY. That is the case.

Mr. BAKER. Will both Senators be willing to agree to vitiate the yeas and nays?

Mr. PERCY. This Senator will.

Mr. HELMS. Yes.

Mr. BAKER. Mr. President, I ask unanimous consent that the yeas and nays be vitiated on the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 516

Mr. PERCY. Mr. President, at this time I send to the desk a substitute for the Helms amendment and I believe my distinguished colleague will join me as a cosponsor of this substitute.

The PRESIDING OFFICER. All time having been yielded back, the amendment will be stated.

The legislative clerk read as follows:

The Senator from Illinois (Mr. PERCY) for himself and Mr. HELMS, proposes an unprinted amendment numbered 516 to UP No. 511.

Mr. HELMS. I ask unanimous consent that the reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

In lieu of the language proposed to be inserted insert the following:

"LIMITATION ON THE OBLIGATION OR EXPENDITURE OF FUNDS

"SEC. 716. (a) Notwithstanding any other provision of this Act, the funds authorized to be appropriated by this Act shall be reduced by $67.6 million.

"(b) In order to comply with the limitation contained in subsection (a), the head of each agency to which funds are appropriated pursuant to this Act shall determine the extent to which funds available to such agency for any activity, program, project, type of materiel assistance, or country will not be obligated or expanded.

"(c) Nothing in this section authorizes an increase in the amount available for any activity, program, project, type of materiel assistance, or country.".

Mr. HELMS. May I ask the distinguished chairman one question?

Mr. PERCY. Yes.

Mr. HELMS. What we are talking about is saving the taxpayers another $67.6 million; is that correct?

Mr. PERCY. That is exactly right and that is also in conformity with the wishes of the administration. The administration supports this amendment, the substitute amendment.

Mr. HELMS. I am delighted to join in the cosponsorship of it and ready to vote, Mr. President, and yield back the remainder of my time.

Mr. PERCY. Mr. President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Illinois.

The amendment (UP No. 516) was agreed to.

Mr. PERCY. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. HELMS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from North Carolina as amended by the amendment of the Senator from Illinois.

The amendment (UP No. 511), as amended, was agreed to.

The PRESIDING OFFICER. The Senator from Wisconsin is recognized.

UP AMENDMENT NO. 517

(Purpose: To provide for up to $75,000,000 to be made available as a special requirements fund)

Mr. KASTEN. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN), for himself and Mr. INOUYE, proposes an unprinted amendment numbered 517.

Mr. KASTEN. Mr. President, I ask unanimous consent that the reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 21, line 23, insert "(1)" immediately after "(a)".

On page 22, line 2, strike out "$2,473,500,000" and insert in lieu thereof "$2,548,500,000".

On page 22, between lines 2 and 3, insert the following:

"(2) Section 531(b) of such Act is amended by adding at the end thereof the following:

"'(3) Of the funds appropriated pursuant to paragraph (1), up to $75,000,000 may be made available as a special requirements fund, except that none of such funds may be obligated unless the Committee on Foreign Relations of the Senate, the Committee on International Relations of the House of Representatives, and the Committee on Appropriations of each House of the Congress are notified fifteen days in advance of such obligation.'".

Mr. KASTEN. Mr. President, this amendment, which is cosponsored by Senator INOUYE, would authorize a special requirements fund as part of the economic support fund as sought by the administration. The need for such a fund, which is simply a contingency fund similar to previous contingency funds, stems from the simple fact that it is impossible in January of any year to predict all needs that may arise during a fiscal year beginning 9 months in the future. In the past, supplementals or reprogramings have been the only means of responding to unanticipated needs where small amounts of ESF assistance would promote U.S. foreign policy and security objectives. As chairman of the Foreign Operations Appropriations Subcommittee, and I know that the senior Senator from Illinois as chairman of the Foreign Relations Committee has had the same experience, these procedures have shown themselves to be entirely unsatisfactory.

Supplementals are time consuming and because of delay, lessen the political and economic impact of our assistance. Likewise, reprograming is cumbersome since it requires the administration to take funds intended to serve one clearly identified foreign policy objective and shift them to another. This has resulted in situations where the administration has been forced to determine whether it can risk damaging important relationships with one country or group of countries in order to respond to bring foreign policy and security needs vis-a-vis another country. An example of this occurred just a few months ago when in order to provide emergency assistance to El Salvador and Liberia, the administration was forced to "borrow" funds from the programs of Israel, Egypt, and Cyprus.

Mr. President, it is ludicrous for the United States to have to in effect beg one set of countries for our own money in order to give it to another. The fund authorized by my amendment would eliminate this situation.

Mr. President, we have been assured by administration officials that the dollars authorized for the special requirements fund would be used only in situations of high priority. Even so, I am mindful of the concern by some of my colleagues that Congress must retain a meaningful voice over the use of these funds. Therefore, I have included language in my amendment which requires the administration to notify the Senate Foreign Relations Committee, the House Foreign Affairs Committee, and the Committees on Appropriations of both Houses 15 days in advance of obligation of any of these funds—the same requirement for reprogramings which now exists. This provision, together with our ability to review this yearly, I believe, gives Congress adequate control and input.

A no better example for the need for such a fund exists than in the current situation we face in the Middle East. The major threat to stability in the Sudan is that country's precarious economic situation where a lack of foreign exchange has resulted in shortages of basic commodities and long lines for them. Obviously this situation provides furtile territory for Libyan trained and financed agents to stir up unrest against the government. Presently we have no means of reacting quickly to this situation. If this

special requirements fund were in place, we would have.

Mr. President, this proposal is a nonpartisan one, not only here in Congress, but is nonpartisan as reflected by the policies of the past several administrations, all of whom have suggested similar special requirement funds.

Mr. President, I strongly urge adoption of this amendment.

Mr. PELL. Mr. President, I understand the reasons that the Senator from Wisconsin and the Senator from Hawaii have sponsored this amendment. However, we should not lose sight of the fact that the last amendment we voted on reduced $67.6 million across the board from this bill.

What this measure does is to put back into it almost exactly the same amount. We go up the hill, take out $67.6 million, and then we go down the hill and put $75 million back in.

We also ought to recognize, when we go to conference with the House, that the money will be in the House bill. That would seem to me to be the time when we can see if it seems advisable to do it, if necessary.

In view of the current tight budgetary restrictions, in view of the fact we have got the foreign assistance budget now at exactly the level requested by the President in his September budget revisions, now is not the time to add $75 million in foreign aid while we are reducing spending levels for important domestic programs. I hope my colleagues will reject this amendment. I yield to the Senator from California.

Mr. CRANSTON. Mr. President, I would like to join the distinguished Senator from Rhode Island in opposing the amendment. We have cut school lunches, we have cut aid to senior citizens in various ways. We have cut all sorts of programs, and I see no reason to add $67 million for unspecified foreigners in various unspecified countries.

I suggest particularly in view of the fact that we have deep concerns about so much money that is allocated to various countries being wasted, I see no reason to give a blank check to the administration, and I urge the amendment be rejected in the interest of economy and in the interest of knowing what we are doing with our money.

Mr. PELL. Mr. President, I yield back the remainder of our time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the amendment of the Senator from Wisconsin.

Mr. PELL. I ask for the yeas and nays.

The PRESIDING OFFICER. The yeas and nays have been requested. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. CRANSTON. Mr. President, I ask unanimous consent that the order for the yeas and nays be vacated.

The PRESIDING OFFICER. There has not yet been a response.

Mr. CRANSTON. I ask unanimous consent that the order for the yeas and nays be vacated.

The PRESIDING OFFICER. Is there objection to the request that the order for the yeas and nays be withdrawn? There being no objection——

Mr. KASTEN. Mr. President, has the Chair ruled as to whether or not the yeas and nays have been——

The PRESIDING OFFICER. The parliamentary situation is as follows: The yeas and nays were ordered, and the clerk commenced to call the roll. There had not been a response and, therefore, the Chair could entertain a request for recognition of a Senator from the floor. This has been done. The question has been to ask unanimous consent to vacate the yeas and nays, and there has been no objection, and the Chair has ruled——

Mr. KASTEN. I do not object to a voice vote if that is what is about to occur.

The PRESIDING OFFICER. The yeas and nays have now been vacated.

The question now recurs on a voice vote on agreeing to the amendment of the Senator from Wisconsin. (Putting the question.)

The PRESIDING OFFICER. The "Noes" have it.

Mr. KASTEN. Mr. President, I ask for the yeas and nays.

Mr. LONG. The Chair has announced the result.

Mr. BAKER. Mr. President, I move to reconsider the vote.

The PRESIDING OFFICER. The question is on agreeing to the motion to reconsider the vote by which the amendment was rejected.

Mr. BAKER. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from California (Mr. HAYAKAWA), the Senator from Nevada (Mr. LAXALT), the Senator from South Dakota (Mr. PRESSLER), the Senator from Wyoming (Mr. SIMPSON), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from Massachusetts (Mr. TSONGAS), the Senator from Louisiana (Mr. JOHNSTON), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Colorado (Mr. HART) are necessarily absent.

I further announce that, if present and voting, the Senator from Tennessee (Mr. SASSER) would vote "nay."

The PRESIDING OFFICER. Are there any other Senators in the Chamber desiring to vote?

The result was announced—yeas 49, nays 24, as follows:

[Rollcall Vote No. 328 Leg.]

YEAS—49

Abdnor	Hawkins	Nickles
Armstrong	Heinz	Nunn
Baker	Hollings	Packwood
Boren	Huddleston	Percy
Boschwitz	Humphrey	Quayle
Chafee	Inouye	Roth
Chiles	Jackson	Rudman
Cochran	Jepsen	Schmitt
Cohen	Kassebaum	Specter
Danforth	Kasten	Stafford
Do.e	Leahy	Thurmond
Domenici	Lugar	Tower
East	Mathias	Wallop
Gorton	Mattingly	Warner
Grassley	McClure	Zorinsky
Hatch	Moynihan	
Hatfield	Murkowski	

NAYS—24

Baucus	Exon	Mitchell
Bentsen	Ford	Pell
Biden	Glenn	Proxmire
Byrd, Harry F., Jr.	Heflin	Pryor
	Helms	Randolph
Cannon	Levin	Riegle
Cranston	Long	Stennis
Dixon	Matsunaga	
Eagleton	Melcher	

NOT VOTING—27

Andrews	Durenberger	Pressler
Bradley	Garn	Sarbanes
Bumpers	Goldwater	Sasser
Burdick	Hart	Simpson
Byrd, Robert C.	Hayakawa	Stevens
D'Amato	Johnston	Symms
DeConcini	Kennedy	Tsongas
Denton	Laxalt	Weicker
Dodd	Metzenbaum	Williams

So the motion to reconsider was agreed to.

The PRESIDING OFFICER. The question recurs on agreeing to the amendment of the Senator from Wisconsin (Mr. KASTEN).

The amendment (UP No. 517) was agreed to.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. KASTEN. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, if I may have the attention of the Senate for one moment.

The PRESIDING OFFICER. The majority leader is recognized.

Mr. BAKER. Mr. President, there are no other amendments with the exception of one I am about to speak of and then I expect final passage.

Mr. President, when the list of amendments that we knew of was being filed, and when the Senate agreed to an order which provided against any other amendments except second-degree

amendments enumerated, through inadvertence an amendment to be offered by the Senator from Oregon was omitted. It deals with Pakistan. Mr. President, I ask unanimous consent that it be in order for the Senator from Oregon to offer the amendment with a time limitation of 10 minutes equally divided.

The PRESIDING OFFICER. Is there objection?

Mr. PERCY. Reserving the right to object, is it the understanding of the manager of the bill that it is 5 minutes on a side?

Mr. BAKER. That is correct.

Mr. PERCY. I have no objection.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 518

(Purpose: To strike $100 million in U.S. assistance to Pakistan)

Mr. HATFIELD. Mr. President, I wish to thank the leadership for providing for this opportunity to present an amendment.

Mr. WALLOP. Mr. President, I ask for order in the Senate.

The PRESIDING OFFICER. There will be order in the Senate.

Mr. HATFIELD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Oregon (Mr. HATFIELD) proposes an unprinted amendment numbered 518.

Mr. HATFIELD. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 22, line 2, of the bill strike "$2,548,500,000" and insert in lieu thereof "$2,448,500,000".

On page 23 strike lines 20 through 22.

Mr. HATFIELD. Mr. President, this cuts $100 million out of this bill which is a downpayment on a $3 billion package of economic and military aid to Pakistan. There remains over $50 million which passed the Agriculture Committee under Public Law 480 assistance.

To provide a nation with credentials as questionable as Pakistan's with the first installment of a $3.2 billion aid package without the benefit of a single hearing would be the height of fiscal irresponsibility. Less than 2 years ago the Government of Pakistan stood by in passive indifference while two American personnel were killed, the U.S. Embassy was burned to the ground, and other U.S. Government facilities were destroyed.

The administration's goal of strengthening U.S. security objectives in the region is commendable, but the viability of attaining this goal through the bestowal of allied status to Pakistan is, at a minimum, deserving of congressional input and examination prior to the implementation of long-range commitments. Indeed, not only does Congress not know the details of this aid package, but it has absolutely no assurance on a number of key policy matters of longstanding concern.

Key areas which must be examined before precipitous action is taken include:

What is the nature of Pakistan's effort to work out a political accommodation with the Soviet Union and the Karmal regime in Afghanistan? As recently as 3 months ago, Pakistan's Foreign Minister announced that the Soviet Union was not a central threat to Pakistan.

If Soviet expansionism is the key impetus behind the aid package, why has there been no redeployment of Pakistani forces since the invasion of Afghanistan? Why is some two-thirds of the Pakistan military deployed, not along the Afghanistan border, but rather on the Indian border?

Furthermore, what assurances does the administration have that Pakistan's new-found capability will be used not to further United States-Pakistan efforts against the Soviet Union, but rather against its historic enemy, India?

Few experts believe that the $3 billion aid package will be sufficient to bolster Pakistan's defenses to the point where they are sufficient to deter a Soviet advance. How much funding is necessary?

What is the nature of the Pakistan-Libya nuclear relationship? Respected sources report that Libya has supplied Pakistan with uranium ore. It is also believed that Colonel Qadhafi looks to Pakistan to satisfy his keen interest in obtaining an Islamic bomb. Even State Department cables report that Pakistan is moving toward the development of an offensive nuclear capability.

The American people have yet to be provided with an apology, let alone an explanation or full reimbursement for the damage to the American Embassy in Islamabad less than 2 years ago. The Pakistani Government can never replace the lives of the personnel who were killed in that incident while serving as officials of the U.S. Government. Why was the Government of Pakistan not moved to punish those who conducted the attack? Finally, serious questions remain unanswered regarding the possible involvement of the Pakistani Government in this act of terrorism.

In light of our recent experience in Iran, Congress deserves hard analyses on the question of the stability of the Zia regime, with or without the proposed security package. General Zia has refused to hold elections in Pakistan. The top leaders of the PPP—the party it is generally agreed would win free elections—has warned that if we support Zia now, the PPP government would terminate the relationship when, and if, it comes to power.

What is the basis of accusations by the rebels in Afghanistan that Pakistan has been hindering efforts to supply arms and other goods to them?

The list of questions regarding the Pakistan security package is a long one. At a time when we are stressing the importance of commitment and rewards for friendship, we will be signaling the opposite by failing to thoroughly examine whether Pakistan deserves such preferential treatment. To proceed with the creation of a new relationship with the Zia government before the terms of that relationship are clear could necessitate a backpeddling from our commitments in the future, as well as gross waste of the taxpayers' money.

I would remind the Senate once again tonight that it has been less than 2 years that the Government of Pakistan stood idly by and watched the American Embassy burn to the ground.

I also remind the Senate once again that Pakistan has been reported to be engaging in building an Islamic bomb with Libya.

There are all kinds of implications and innuendos here that I think deserve a hearing.

I also would like to indicate that this is going to create further problems between India and Pakistan, and that will create political problems for us not only for the present but for the future.

Mr. President, I only have 5 minutes. I would like to distribute a letter to my colleagues that outlines this in detail, and also indicate that I have here for the RECORD, and I ask unanimous consent to insert in the RECORD at this point, a letter from the Ripon Society to all the Members urging support of this amendment; one from the "Religious Action Center of the Commission on Social Action of Reform Judaism" in support of the amendment, and one from the "Americans For Democratic Action" in support of the amendment. I ask unanimous consent that they be printed in the RECORD at this point and I reserve the remainder of my time.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

THE RIPON SOCIETY,
Washington, D.C., October 22, 1981.

DEAR SENATOR: On behalf of the Ripon Society, I am writing to encourage your support of Senator Hatfield's amendment to the FY 1982 Foreign Aid Authorization Bill. Designed to delete $100 million in Economic Support Funds to Pakistan for FY 1982, this measure would provide an opportunity to hold public discussion about our relationship with Pakistan.

There is not much doubt that Pakistan needs some form of aid from the United States. However, the critical question comes in determining the nature and amount of such aid. It is our belief that before such decisions can be made, ample opportunity must be given to hold public hearings. In addition, we must be concerned about the potential spread of nuclear weapons. As we all know, this presents a grave peril to the future of our civilization. This most unfortunate issue must be a part of this debate as well. I would therefore urge you to consider the merits of Senator Hatfield's amendment and support the deletion in Economic Support Funds for FY 1982. It is in the spirit of participatory democracy and common sense that we do so.

Sincerely,

D. BARTON DOYLE,
President.

RELIGIOUS ACTION CENTER,
Washington, D.C., October 21, 1981.

DEAR SENATOR: I am deeply dismayed that the vote on the aid package to Pakistan may

well take place without adequate examination of the complex considerations regarding such aid. The Pakistani government has repeatedly failed to explain alleged violations of internationally accepted human rights standards. There has yet to be an accounting of the actions of the Pakistani government prior to, during and after the unforgiveable attack on our embassy. The failure of the Pakistani government to reimburse the United States for monetary damages (it is impossible to replace the tragic loss of human life) and the overall lack of cooperation with our government in investigating that series of events should not now go rewarded.

Most importantly, the Senate should be gravely concerned about the willingness of the Pakistani government to work in conjunction with the Libyan regime of Col. Qadhafi in developing an Islamic nuclear bomb. This connection has now been attested to by our own diplomatic sources as well as international news sources. Nothing could be more destabilizing to this region, nothing could be more harmful to the interests of the United States than the realization of Qadhafi's dream to possess nuclear weapons. A stipulation which provides an aid cutoff should Pakistan explode a nuclear device is not sufficient. There must be a thorough exploration of this situation.

That decisions affecting the Pakistani aid package may be made without a thorough examination of these troubling trends—at least by the Foreign Relations Committee which has yet to deal with these matters—is most distressing. I would hope that a full review of these considerations will take place before a final decision is made in the Senate.

Cordially,

Rabbi DAVID SAPERSTEIN.

AMERICANS FOR DEMOCRATIC ACTION,
Washington, D.C., October 22, 1981.

DEAR SENATOR: ADA strongly urges you to support Senator Hatfield's amendment to the FY 1982 Foreign Aid Bill which would delete $100 million from the economic support funds intended for Pakistan. As there are many unanswered questions about our relationship with Pakistan, we believe that Congress should give close scrutiny to the military and economic assistance package that the United States will provide Pakistan over the next six years.

Among the important issues which must be examined is the suitability of the proposed aid package to Pakistan. Certain key Pakistani officials do not perceive the Soviet Union as the major threat to their country. As evidence of this, there has been no redeployment of Pakistani forces in the past two years, despite the presence of Soviet troops in Afghanistan. Two-thirds of the troops already deployed are stationed along the Indian, not the Afghan border.

Another important issue is that of human rights. President Zia has imprisoned and tortured hundreds of his political opponents. He had his predecessor, Zulfikar Ali Bhutto, hanged in 1980. We should thoroughly examine Pakistan's human rights violations.

In addition, the narcotics traffic from Pakistan should be a major concern. Pakistan produces about 125 metric tons of heroin annually; a significant amount of this goes to the United States. Pakistan has made little effort to curb its drug flow.

Still another concern that has to be raised is the question of a possible nuclear connection between Pakistan and Libya. We should substantiate or disapprove the allegations that Pakistan and Libya are working together in this field, before aid is committed.

We are now engaged in a period of fiscal restraint. I hope you will give full consideration to these important questions before we commit scarce resources to a country whose policies may not completely be in our nation's interests.

Sincerely,

LEON SHULL,
National Director.

Mr. HATFIELD. I ask unanimous consent to include Senator RANDOLPH as cosponsor of the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The Chair is informed that the amended figure was just amended by the amendment offered by the Senator from Wisconsin. Accordingly, it will require unanimous consent to amend that figure.

Mr. HATFIELD. I so request.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. HATFIELD. I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Illinois.

Mr. PERCY. Mr. President, with all due respect to my beloved and distinguished colleague, I would simply have to, on behalf of the administration, on behalf of myself and I believe many members of the Foreign Relations Committee, object strenuously to this amendment. In the eyes of the President, the Secretary of State, and the Secretary of Defense, they would look upon this amendment as an utter disaster.

Of course we do not have a Pakistan created in our image. It is an entirely different type of country. But what we do know is this: Pakistan, when the chips were down and the Soviet Union invaded Afghanistan and brutalized that country, opened its doors and it has taken in 2 million refugees. Those are the refugees that the International Commission on Refugees have said are the most noble looking refugees they have ever seen. And the conditions under which they live—they prepare whatever they do, the wives are there, the children are there, the men go out and the men come back. They are never going to give up this fight in Afghanistan because they know alongside of them they have a friend standing with them.

It is true that we have a difference of opinion with Pakistan on a nuclear development. We are working intimately on that with Pakistan, hoping to give them the reassurance that, surrounded by enemies, they are not going to stand alone. We must remember that Pakistan was a close ally of ours for many years. We then cut off all aid and assistance to them. Alone, besieged on several sides, with an invading army in the neighboring country, sure, the pressure was tremendous on the military, and we disagreed with certain other things they did, in the assassination of Prime Minister Bhutto.

But this administration is working closely to establish a relationship with Pakistan. We have had briefing after briefing with our former colleague, now under Secretary Buckley, who has been out to Pakistan, has met with Zia, who feels that we can begin a new relationship now.

Certainly, we have many things in common. We have to remember that it was, after all, Pakistan that was the conduit for Secretary Kissinger to be able to go through Pakistan on a secret mission to the People's Republic of China and open up a whole new relationship there, which has served and has been in our interests, and I think in the interest of peace in the world.

Therefore, I would have to, on behalf of the administration, strongly oppose this amendment. I would, myself, vigorously oppose it as contrary to our own national security interest.

There is no leeway in this budget. If we cut out this $100 million, it cannot come from anyplace else.

We have cut, in the Pell-Percy original amendment, $900 million from the Reagan administration budget request and we have held to that and cut another $67 million.

We have only added back a portion of the contingency fund the administration has requested.

I urge my colleagues to vote against this amendment. I hope we can have a voice vote on the amendment but, of course, we will accede to whatever request the distinguished chairman of the Appropriations Committee wishes to have in this regard.

Mr. HATFIELD. Mr. President, how much time have I left?

The PRESIDING OFFICER. Two minutes 34 seconds.

Mr. HATFIELD. I yield 1 minute to the Senator from Rhode Island.

Mr. PELL. I thank the Senator from Oregon.

The $100,000,000 is the first installment of a $3.2 billion 6-year aid package to Pakistan. At a time of severe budget cutbacks, I believe we should consider carefully any new program. Yet, so far, the Senate Foreign Relations Committee has not held a single hearing on the Pakistan aid package. Indeed, we do not yet know the details of this enormous aid package.

The present military dictatorship in Pakistan appears to be an extraordinarily risky investment. It is unpopular with virtually all the political parties, as well as other important forces in Pakistan such as labor, students, and a good part of the clergy. Continued military rule is especially unpopular in the provinces of Sind and Baluchistan and there are disturbing signs of separatism there.

The aid package is generally seen in Pakistan as U.S. support for the military dictatorship. Because the assistance is seen as helping Zia, much of the opposition opposes the assistance. The top leaders of the PPP—the party it is generally agreed would win free elections—has warned that if we support Zia now, the PPP government would terminate the relationship when, and if, it comes to power. Surely it is unwise to pour great sums of the taxpayers dollars into a country where the regime has such a narrow base and where there is no consensus in the country in favor of the assistance.

Human rights violations in Pakistan have escalated in the last year. Prominent politicians continue to be held in

prison without charge and under difficult circumstances. There have been credible reports of beatings and torture of political prisoners. As the most recent State Department human rights report grimly notes, "Restriction on dissent and individual freedom have grown during the past year, while citizens rights have diminished."

Military assistance to Pakistan, including the sale of sophisticated F-16 aircraft, raises the specter of a new arms race between India and Pakistan, countries which have fought three wars in the last 34 years. It would be obscene if this aid package caused two of the world's poorest countries—India and Pakistan—to divert billions desperately needed for development to weapons.

Mr. President, the $100,000,000 in the bill is the downpayment on a $3.2-billion package. Before we spend this much money, especially in these times, we ought to be very sure that the money will indeed promote our national interest and security. In the case of Pakistan, this is highly questionable. But at a minimum, we should have the full Pakistan aid package and the benefit of a full set of hearings on Pakistan before we act.

I would consider this as a sensible amendment and urge my colleagues to support it.

Mr. KENNEDY. Mr. President, some in the Senate are urging that we should earmark $100 million for Pakistan because of strategic concerns vital to U.S. interests. It is precisely because I believe that there are important strategic concerns vital to our national interest that I support this amendment to delete $100 million.

This $100 million is the first installment of a $3.2 billion, 6-year aid package to Pakistan. The package is supposed to address Pakistan's increased security needs as a result of the Soviet invasion of Afghanistan. It is supposed to provide economic assistance to the people of Pakistan to assist them in their efforts to improve their lives. And certainly, it is supposed to form a basis for a new relationship between our two countries and our two peoples.

I strongly support each of these objectives. But the administration has failed to describe what its 6-year package is to contain. The administration talks of a $3.2 billion program over 6 years; but it has not told the Senate what the $3.2 billion will be used for.

Mr. President, the administration's vague proposal for a new assistance program to Pakistan raises a number of key questions.

Does our assistance program with Pakistan meet United States as well as Pakistani security objectives?

What is the best way to address Pakistan's economic and development needs?

Will the Government of Pakistan abandon its dangerous and destabilizing pursuit of a nuclear weapons capability, and accept international safeguards on all its nuclear facilities?

Will the aid package facilitate or impede a return to democratic government and full respect for human rights in Pakistan?

Will our assistance program promote dialog and an improvement in relations between India and Pakistan or will it fuel the traditional suspicions and animosities which have led to three wars?

Will the aid package promote better relations and become the foundation for a long-term friendship between the people of Pakistan and the United States, or will it represent ever-increasing U.S. support for a narrowly based military regime?

These are only some of the questions that require the most careful consideration—consideration that will come once the administration presents its proposal. Until the Senate reviews the proposal, we should not take action which could be considered congressional endorsement. Therefore, we should delete from the bill any reference to $100 million or the first installment of this assistance package.

There is an added and important reason to strike this $100 million earmark of funds at this time. This is a lean year for budgets and Americans themselves are being asked to sacrifice. It is even more incumbent on us in these times that we closely scrutinize all requests for funds. For this Senator, it is unacceptable to approve $100 million even before the administration has presented its program to Congress and the Senate Foreign Relations Committee has held its customary review. We are being asked, after all, to authorize $100 million—not just on a onetime basis—but as a first installment on $3.2 billion. Certainly we owe it to the taxpayers of this country to take such an action only after due and serious consideration.

Mr. HATFIELD. Mr. President, I will tarry only a few seconds longer to indicate that I see no evidence of pro-American feeling, attitude, or allegiance from Pakistan. We heard about the so-called aid to Afghanistan refugees. Let me remind you that two-thirds of Pakistan's Army is not on the Afghanistan border but it is on the Indian border. I think it indicates pretty clearly what their particular military interests are.

I can show you here a piece of the American Embassy that was put to rubble by the Pakistanis without much effort being shown on their part to restrain the mobs that attacked our Embassy.

The PRESIDING OFFICER. The Senate will be in order.

Mr. HATFIELD. Consequently, it seems to me—

The PRESIDING OFFICER. There will be order in the Chamber.

Mr. HATFIELD. Instead of saying that we have here a newfound ally with any form of allegiance to the United States, I think we ought to indicate pretty clearly by this vote we would like to have further hearings and understand exactly what kind of weapons are in the pipeline in this whole $3.2 billion package that is being started here tonight.

SEVERAL SENATORS. Vote!

Mr. HATFIELD. I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Oregon. The yeas and nays have been ordered and the clerk will call the roll.

The legislative clerk called the roll.

Mr. BAKER. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Utah (Mr. HATCH), the Senator from California (Mr. HAYAKAWA), the Senator from Nevada (Mr. LAXALT), the Senator from South Dakota (Mr. PRESSLER), the Senator from Wyoming (Mr. SIMPSON), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Idaho (Mr. SYMMS) would vote "nay."

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Louisiana (Mr. JOHNSTON), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from Massachusetts (Mr. TSONGAS), and the Senator from New Jersey (Mr. WILLIAMS) are necessarily absent.

I further announce that, if present and voting, the Senator from Massachusetts (Mr. KENNEDY) would vote "yea."

The PRESIDING OFFICER. Are there any other Senators in the Chamber wishing to vote?

The result was announced—yeas 28, nays 45, as follows:

[Rollcall Vote No. 329 Leg.]

YEAS—28

Baucus	Ford	Moynihan
Biden	Hatfield	Murkowski
Byrd, Harry F., Jr.	Hawkins	Pell
Cannon	Heflin	Proxmire
Chiles	Huddleston	Pryor
Cranston	Levin	Randolph
Dixon	Long	Riegle
Eagleton	Matsunaga	Stennis
Exon	Melcher	Zorinsky
	Mitchell	

NAYS—45

Abdnor	Grassley	McClure
Armstrong	Hart	Nickles
Baker	Heinz	Nunn
Bentsen	Helms	Packwood
Boren	Hollings	Percy
Boschwitz	Humphrey	Quayle
Chafee	Inouye	Roth
Cochran	Jackson	Rudman
Cohen	Jepsen	Schmitt
Danforth	Kassebaum	Specter
Dole	Kasten	Stafford
Domenici	Leahy	Thurmond
East	Lugar	Tower
Glenn	Mathias	Wallop
Gorton	Mattingly	Warner

NOT VOTING—27

Andrews	Durenberger	Pressler
Bradley	Garn	Sarbanes
Bumpers	Goldwater	Sasser
Burdick	Hatch	Simpson
Byrd, Robert C.	Hayakawa	Stevens
D'Amato	Johnston	Symms
DeConcini	Kennedy	Tsongas
Denton	Laxalt	Weicker
Dodd	Metzenbaum	Williams

So the amendment (UP No. 518) was rejected.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. PERCY. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

RESERVATIONS ON MILITARY ASSISTANCE TO GUATEMALA

Mr. PERCY. I want to take this opportunity to acknowledge and identify myself with the concerns Senator ZORINSKY has on Guatemala. Senator ZORINSKY is perfectly correct in his desire to carefully monitor the U.S. military relationship with the Guatemalan Government. I know that Senator ZORINSKY has been deeply concerned about the serious human rights situation in that Central American nation and is especially concerned by the Amnesty International charge that the Guatemalan Presidency is involved in the activities of rightwing death squads.

For these reasons, I want to give Senator ZORINSKY my own personal assurances as chairman of the Foreign Relations Committee that I will request that the State Department consult with the committee prior to any and every increment of military assistance, including private sales, to Guatemala. The administration has not requested military assistance to Guatemala and certainly I would insist that the very poor and serious human rights situation in that country be taken into account before any such request were made.

I offer Senator ZORINSKY my personal commitment that I will oppose any military assistance, including export licenses for private sales, to Guatemala until the committee has had the opportunity to thoughtfully review the individual proposals.

I understand that this morning, the administration made available to Senator ZORINSKY the information which it has available on the specific issue raised by Amnesty International. I felt Senator ZORINSKY was very justified, as ranking member of the Subcommittee on Western Hemisphere Affairs, in wanting to be fully informed about the situation in Guatemala. I hope that the senior Senator from Nebraska is now fully satisfied that the administration has made a good faith effort in complying with his request. If any time in the future, Senator ZORINSKY feels that there is justification for further inquiries on the matter, I will strongly support his request for information and will take the administration's response into account in deciding whether to support or oppose any future military sales or assistance to Guatemala.

I can assure the Senator that the administration has told me that it wants to do all possible to fully inform the committee with regard to the question of military assistance to Guatemala. Assistant Secretary of State Tom Enders himself has told me that the State Department will keep us fully informed.

Mr. PELL. I want to echo Senator PERCY in his support of the concerns about Guatemala expressed by the senior Senator from Nebraska. Senator ZORINSKY is reflecting the concerns of many Americans who look with much trepidation at the prospect of military assistance to the Guatemalan military at this particular time. I am grateful that the administration agrees that the committee should be fully informed through prior consultation by the Department of State. Like the chairman, I will also support Senator ZORINSKY's request for further information should the need arise, and I, too, will take the administration's responsiveness into account with regard to any further military assistance or sales for Guatemala.

Mr. ZORINSKY. I appreciate the comments of the floor managers of the bill. It is gratifying to be supported by the leadership of the committee on this subject. I appreciate the assurances of the State Department made to the committee chairman that there will definitely be prior consultation before increments of military assistance, including private sales, are sent to Guatemala. This would include assistance under chapters 2, 5, or 6 of part II of the FAA, sales of defense articles or services under the Arms Export Control Act, credits and loans under the Arms Export Control Act and export licenses under section 38 of the Arms Export Control Act.

I also appreciate the administration's good-faith effort, made this morning, to provide me with the information I requested on the Amnesty International charge that the Guatemalan presidency is involved in the activities of the rightwing death squads. I have been assured by administration officials that I have all the information it has on the subject. I am pleased that the committee leadership will stand in support of my efforts to obtain further information on the matter should the need arise.

With this as our mutual understanding, I therefore will not propose an amendment which would have placed conditions on military assistance to Guatemala.

Mr. PERCY. I concur with the Senator's exposition of the understanding. I assure him of my utmost cooperation on both the issue of further inquiries on the Amnesty International charge and military assistance to Guatamala. I thank the Senator for his cooperation in seeking a means to resolve his concerns without pressing for an amendment.

Mr. KENNEDY. Mr. President, since 1977, the United States has wisely refused to supply military assistance to the military government of Guatemala, a government which since the military coup of 1954 has practiced widespread human rights violations against its own people. Regrettably, last spring the administration gave the first sign that it was going to change U.S. policy toward Guatemala when it allowed the sale of $3.2 million of military trucks and jeeps to that country.

The situation in Guatemala is dismal. Democratic institutions and constitutional rights, while still officially in force, are a sham. Since 1954, the military has made all important political decisions. In the last two elections, election fraud and the threat of military intervention has decided the outcome of the voting that has taken place.

Furthermore, the present regime has institutionalized violence as a means of oppressing political parties, government officials, labor leaders, and peasants who express dissatisfaction with the present regime. To carry out this oppression the government has at its call both its official security forces and paramilitary "death squads."

Responsibility for assassinations, massacres, and other acts of violence against opposition figures can be traced directly to the Presidential palace. Under these conditions, those favoring moderate reforms have been the hardest hit since they are the most visible and accessible, and the least protected targets. As a result the political situation in Guatemala has become dangerously polarized. If there is no change soon, only the extreme right and the extreme left will remain to vie for political control.

This situation is described very well by Flora Lewis in commentary in the October 2 issue of the New York Times when she states:

> The cynical atmosphere seems worse than the passions of conflict, but it is bound to burst aflame one day. People are killed by the hundreds each week, sometimes decapitated. Nobody really knows how many. Often, nobody knows why.
>
> Lawyers, teachers, moderate politicians are becoming in short supply. Those who remain live in a numb, almost thoughtless fear. Officials boast chillingly that there are no political prisoners in Guatemala. It seems to be too true. When there is an arrest, a trial, people are sure it's a common criminal because politicians are simply "disappeared" without further ado.
>
> Nonetheless, the U.S. silence and a fair amount of American-supplied military equipment—trucks and jeeps—are seen by others here and by most in the rest of the world as a sign of support for the regime. Inevitably, the U.S. is coming to appear as an accomplice.

Mr. President, we do not want to be an accomplice. With this in mind, I agree with the point made by the Senator from Nebraska, Mr. ZORINSKY, and I would hope that no future U.S. military assistance to Guatemala would be offered until the government of Guatemala acts in accordance with important human rights provisions, including controlling human rights abuses by the armed forces, upholding constitutional guarantees of due process, freedom of speech, press and religion, and dedicating themselves to holding free and democratic elections.

KEEPING LEVERAGE IN GUATEMALA

Mr. HELMS. Mr. President, I fear for the future of stability in Guatemala. The major terrorist guerrilla groups there have stepped up their activities, murdering hundreds of innocent citizens a month.

Now Belize has received its independence. Guatemalans, Mr. President, consider Belize historically to be an integral part of their own country and would like to have it back. Great Britain, the colonial power there, had other ideas; and now has granted Belize its independence.

Belize is Guatemala's neighbor to the east. Many Guatemalans believe that

Belize has served as a springboard for some of the terrorists infiltrating into Guatemala. They feel that Belize also has served as a conduit for weapons and supplies for terrorists operating in Guatemala. They note that there has been a substantial Cuban presence in Belize, and point out that Fidel Castro was the guest of honor at the independence ceremony for Belize, as was a delegation of high ranking Sandinistas from Nicaragua.

Mr. President, the United States is committed to maintaining stability in Central America. It is our goal to promote peaceful solutions to disputes among friends. Both Belize and Guatemala wish to be friends of the United States. It is in our national interest to insure that no war breaks out between Belize and Guatemala.

In this regard, I have urged the State Department to send a fully accredited U.S. Ambassador to Belize, to show that country that the United States wishes to be its friend; to let the Cubans know that the United States has a substantial interest there: and to send a signal to our friends in Guatemala that the United States considers Belize a friend as well.

But the United States must do more. We must not encourage the anti-U.S. sentiment—based on nationalism—in Guatemala. We must not allow Guatemala's military leaders the expedience of blaming all their woes on the United States. We must not lose our leverage there.

The Senate also must understand that Guatemala is engaged in a war to the death with an increasingly vicious terrorist element.

Mr. President, Guatemala is a key country in Central America. A pro-Communist group tried to take it over back in 1954. That effort failed, but since the fall of Nicaragua to a pro-Marxist Sandinista regime, Cuba and its Soviet bloc allies have again been working to take over Guatemala by promoting guerrilla warfare there.

With the Central American region in ferment in large part due to Cuban-Soviet expansionism, Guatemala must remain a stable bastion for freedom in the area. El Salvador is in danger of falling to a terrorist guerrilla army backed by Cuba and its Soviet bloc allies. Guatemala is under attack. Honduras and Costa Rica will be next, I fear, unless the United States gives moral and material support to those in the region who are struggling against Communist expansion.

Mr. President, who can say with certainty that Mexico will not experience guerrilla warfare should Central America fall to communism? The wave of guerrilla terrorism not only can head north into Mexico from Central America, but it very well may spread southward to Venezuela and Colombia, too. Both Venezuela and Colombia, Mr. President, have experienced stepped up guerrilla activity in recent years.

The terrorist onslaught against Guatemala has been unrelenting over the last 2 years. Today, innocent Guatemalans—men, women, and children—are being slaughtered by Cuban-backed terrorist guerrillas. It is estimated that some 60 percent of the deaths in Guatemala have been caused by the terrorist guerrilla forces, contrary to the disinformation spread by groups sympathetic with the goals of the antigovernment groups there.

Terrorist guerrillas operating out of Mexico have stepped up attacks on farmworkers and peasants on the Guatemalan side of the Mexican border. Terrorist revolutionaries have begun exploding bombs in popular tourist areas—in hotels and restaurants, along the roads leading to them, and have even gone so far as to round up tourists to give them propaganda lectures.

I cite just one recent example of this type of terrorist activity, Mr. President—an incident that occurred on September 18 of this year at the world famous Tikal National Park. Tikal National Park is one of the major sites of ancient Mayan ruins in Central America, and has a large display of cultural items in its museum.

On September 18, two truckloads of guerrillas, men and women, arrived in the national park at Tikal. The guerrilla group numbered about 60. According to press reports in Guatemala the guerrillas proceded to round up the tourists, local airline employees, guards, hotel employees, and park employees. They were all herded into the town plaza for a propaganda speech by the terrorists, who were dressed in olive green uniforms and heavily armed with automatic weapons. The terrorist guerrillas then destroyed park buildings and park offices and in the process they burned and looted one building which contained plans for the restoration of Mayan temples in the area.

Priceless jade treasures were stolen by the guerrillas; artifacts of Mayan culture which can never be replaced were either stolen or destroyed.

After the guerrillas left the area, a tour guide rushed to place 20 of the tourists in his charge aboard a tour bus in order to flee to safety. But, Mr. President, the bus was stopped by the guerrillas and gunfire commenced. The bus driver was killed, a tour guide was wounded, and the mother of several children who was driving a truck following the bus was killed.

Mr. President, it is time that we recognize the hard facts of the situation in Central America. It is time that we recognize the fact that Cuba and its allies in the Soviet bloc are spreading terrorism into the very heart of this hemisphere. It is time that the United States support those in this hemisphere, and in Central America particularly, who are fighting to preserve their freedoms against Communist tyranny.

Mr. President, I fear that American public opinion is being misled about the extent and nature of the terrorist atrocities conducted by the Cuban-backed guerrilla forces in Central America. Unfortunately, there are those who have been making every effort to cover up the direct responsibility of the leftist guerrilla forces for these acts of violence.

I fear that this effort to mislead American public opinion has had its effects in Congress as well.

Just 2 days ago, Mr. President, during the evening of October 19 leftist guerrillas in Guatemala launched a number of terrorist attacks and massive bombings in the capital city. Yesterday, I received a telephone call from a friend in Guatemala who described several of the evening's incidents to me.

I was told that the home of Mr. Mario Sandoval, the leader of the MLN Party—the largest political party in Guatemala—was sprayed by automatic rifle fire by leftist terrorists. The terrorists strafed Mr. Sandoval's home from two vehicles and used FAL and Galil automatic weapons. A security guard was gravely injured but Mr. Sandoval was unharmed.

That same evening leftist guerrilla attacked a number of police patrols and shot up several government buildings.

Even more tragic, however, were several massive bomb explosions that the leftist guerrillas set off. Let me just mention two which my friend had personally seen after the fact.

The leftist guerrillas exploded a very powerful bomb which severely damaged the Industrial Bank located in zone 4 of Guatemala City. Many innocent citizens were injured and a number were killed as a result of this guerrilla attack. I was told that 5 private homes near the bank were completely destroyed and 15 other homes in the neighborhood were severely damaged. This was a very powerful bomb, Mr. President; so powerful that it blew the windows out of the buildings in a three-block radius from the bank.

The second bomb blast which my friend described was even more tragic. The Red Cross building in Guatemala City was also severely destroyed by a leftist guerrilla bomb blast that same evening. Let me describe what I heard about this incident.

A group of leftist terrorists commandeered a bus and at gunpoint forced off those riding on the bus. The guerrillas weighted the accelerator pedal, and tied the steering wheel to head it directly toward the Red Cross building. A local detective noted the approaching bus without a driver and, suspecting trouble, shot out one of its tires. The bus swerved a bit and came to a stop not far from the Red Cross building.

The high explosive charges went off as planned and the Red Cross building was devastated.

I was told, Mr. President, that there were patients on the operating table when that blast went off. The Red Cross radio communications system was destroyed. The telephone system was destroyed. The medical facilities, medical equipment, and stockpiles of medicine were destroyed. Sixteen ambulances were damaged, many beyond repair.

A number of injuries have been reported and it is a miracle that apparently no one was killed.

Mr. President, so that Senators can better understand the strategic significance of Guatemala, I ask unanimous consent that the article entitled "Strategic Guatemala," published in National Defense: The Journal of the American Defense Preparedness Association, in its October issue, be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

STRATEGIC GUATEMALA

(By Edward J. Walsh)

Guatemala is a small, mountainous nation at the neck of the Central American Isthmus. Like its neighbors in Central America, it was for many years ignored by the United States government, although American agricultural companies have long been present in the country. Nonetheless, few regions of the world are currently receiving more attention from the U.S. than Central America. The signing of the Panama Canal treaties, and the fall of the Somoza regime in Nicaragua to the Marxist-led Sandinista Front for the Liberation of Nicaragua (FSLN) in July 1979, were undoubtedly the catalysts in the process of rethinking the strategic significance of the Isthmus, a process that is continuing today. Such rethinking must necessarily begin with Guatemala, which, although still underdeveloped, is yet the richest and most populous country in the region.

Much debate has already taken place on the subject of the Marxist threat to Central America, especially since the Nicaraguan revolution and the coup d'état in El Salvador of October 1979. It has already been suggested many times that terrorism in the region is the result of a combination of "local conditions" and Soviet-guided, Cuban-assisted agitation. I will not continue that discussion here. Instead, I will focus on the strategic importance of Guatemala to the United States as the cornerstone of opposition to the continuing growth of Soviet influence in Central America.

A glance at the map of the Central American-Caribbean region reveals Guatemala's position as the link between Mexico and the rest of the Isthmus. Guatemala shares with its neighbors (except El Salvador) access to both oceans. There are few good harbors in Central America, however, and the coastlines are thinly peopled. The sea has therefore been the obvious route for subversives into the Isthmus, mainly from Cuba, dating from early in Castro's tenure. In 1972, a gun battle took place in a remote forest area on Guatemala's Caribbean coast near Belize; the dead were identified as Czechs. Since then, Marxist agents and arms have been funneled into Central America. In March 1980, the Carter administration accused Cuba of moving arms from the Honduran coast into El Salvador and in February 1981, the State Department revealed documents captured from Salvadoran guerrillas that verified the weapons traffic from Soviet bloc nations into El Salvador through Cuba.

ANTAGONISMS OVER BELIZE

The Pacific littoral of Guatemala is similarly isolated, from the more developed south-central highlands, by rugged volcanic peaks as high as 14,000 feet above sea level. On the Caribbean side, Puerto Barrios is the sole population center. To the north of this city lies the perennial problem of Belize, the British colony long claimed by Guatemala. In late March, an agreement was reached in London by the British and Guatemalan governments that provides for independence for Belize, but gives Guatemala the right to a corridor through Belize's territorial waters, and the right to build two oil pipelines through to Belize's harbors. Belize's opposition party, the United Democrats, is adamantly against the plan and has withdrawn from further discussions. Hostility towards Guatemala in Belize is deepset, in the fear that Guatemala's long-standing claim may prompt it to invade Belize. The antagonism between these two neighbors will not end soon.

Guatemala's view of its own history provides the principal basis for its claim on Belize; however, a more immediate reason is the recent discovery of oil. Getty, Texaco-Amoco, Basic Resources Ltd., and Spanish, French and Brazilian firms are exploring a narrow belt that extends from the Mexican border to the Caribbean coast at the center of Guatemala and additional tracts in the extreme northwestern quadrant. In 1978, when Guatemala's President Romeo Lucas Garcia invited foreign oil companies to bid on leases, oil production was 220,000 barrels. By 1980, total production reached 1.4 million barrels.

A 125-mile long pipeline links Rubelsanto in the west with a shipping terminal at Santo Thomas on the Caribbean. On April 13, 1980, the tanker NEFELI left Santo Thomas with 120,000 barrels of crude, bound for New Orleans, Guatemala's first petroleum export. Today, reserves in the Rubelsanto tract alone are conservatively estimated at 33 million barrels. Needless to say, the Belize right-of-way will increase greatly the capacity to transport and load oil.

It hardly needs to be pointed out that Guatemala's oil reserves are in the same petroleum basin as those of Mexico; the rich oil fields of Campeche, Chiapas, and Tabasco, with estimated reserves of more than 60 billion barrels of recoverable crude oil and natural gas equivalent, lie hard on the Guatemalan border.

The proximity of Guatemala's oil fields to Mexico's is a geological phenomenon that is widely, and I think mistakenly, considered the key to a grand Communist strategy that aims at Mexico in a kind of "soft underbelly" threat to the United States. This theory assumes that the Central American dominoes will fall inexorably northward. It glosses over the significant political differences between Guatemala and Mexico on one hand, and the broad cultural contrasts between Mexico and the five Central American nations on the other. Both Mexico and Guatemala are resource-rich but underdeveloped countries with semi-authoritarian governments, large Indian populations, and the same official language. But politically, they are at opposite ends of the spectrum, with a leftist, one-party government in Mexico oriented strongly to the "Third World," and a conservative, staunchly anti-Communist regime in Guatemala. Mexican presidents come from the educated elite, while in Guatemala the head of state has usually been a career military man who has risen through the ranks in the Latin American tradition. Political relations between the two countries are distant, and friction is the rule. Relations with the United States are a good barometer of the political perspective of the two governments: Mexico is wary of "domination" by the U.S., and there is a residue of distrust of the United States that dates from the Mexican-American war. Guatemala, in contrast, recognizes and welcomes a special role for American interests.

Much conventional wisdom assumes that Mexico could simply enter the Communist camp if Guatemala and the rest of Central America fell to Marxist-Leninist "peoples' movements." But it is more likely that Mexico's long tradition of supporting popular revolution makes it less vulnerable to Communist subversion. Although Marxism is entrenched in Mexico's political and intellectual circles, the reality of closeness to the United States has conditioned Mexico's culture profoundly, and generally mutes the anti-Americanism in official contacts. Mexico's leftism is a peculiarly Mexican kind, a complacent, corrupt socialism that seems immune to change, either by capitalists or communists. It may be that Mexico's habit of echoing the slogans of revolutionaries has created among leftists in Mexico and elsewhere a sort of tolerance of the stagnant Mexican political atmosphere.

CENTRAL AMERICAN TARGETS

Recent history indicates that targets of Communist agitation lie south of Mexico rather than north of Guatemala. The political climate of the Central American nations, after all, has been anything but stagnant. As in nearly all Latin countries, instability has been chronic. Today, generals rule in Guatemala and Honduras, and El Salvador is governed by a fragile civilian-military junta. Nicaragua, after 46 years of rule by the Somozas, is already a Marxist puppet state. Only Costa Rica has enjoyed a measure of calm in the past years, but that is now threatened by a declining economy and a growing Communist presence. Nevertheless, the Central American countries share a legacy of closeness to the United States through military and economic ties—one might even say economic domination—that Mexico has not experienced.

On this score, it is important to note that U.S. involvement in Central America has been a two-sided coin. American agribusinesses and military assistance have contributed the lion's share of progress in the region. U.S. companies provided investment that built factories, roads, hospitals, and schools, and today provides jobs for thousands of Central Americans. American military aid and training has buttressed the armed forces of Central America, the traditional source of trained administrators and bureaucrats in the Latin American government infrastructure. The reverse side of the coin has been that the U.S. presence has provided a target of opportunity for leftist organizations that have been infiltrated and coopted by Communists.

At the same time, it is by no means true that Central American governments have been no more than puppets of the United States. It is reasonable to surmise that the Somoza regime could have survived with less American aid than it received over the years, by virtue of Anastasio Somoza's political abilities and the intense loyalty of his National Guard, which he had cultivated. Before he fell, Somoza had arranged to purchase weapons from Israel, which were never received because of pressure on the Israeli government by the Carter Administration, as U.S. Ambassador to the United Nations Jean Kirkpatrick has pointed out. Had he obtained them, or weapons from another source, the outcome of the Sandinista revolution might well have been different—without American aid.

Guatemala today is a good example of the hypothesis that American economic aid and investment have been major factors in the nation's development and growth. U.S. military assistance and training over the years have produced a highly competent, seasoned cadre of officers well-versed in guerrilla warfare and counterinsurgency techniques. They command an army of 18,000 men. The political consciousness of the government and the business elite is enthusiastically, some would say definitely, conservative and pro-Western. Consequently, the economic and political institutions, developed on the U.S. model, are the target of Communist subversion and terrorist attack.

Today, however, Guatemala purchases weapons from Israel, since American aid was discontinued by the Carter Administration. The lack of American assistance has not weakened the Lucas government's determination to continue the fight, however, and the battle against the Marxist-led guerrillas continues. Currently, the guerrillas are limited to assassinations and kidnappings in the urban areas, and ambushes of army patrols in the countryside. Government officials and supporters are murdered, and leftists assaults on individuals and property are answered by private rightist groups which attack leftist students, intellectuals, union leaders, and clergymen who criticize the government.

Consequently, Guatemala has become a "pariah" state, a member of a club of internationally disliked countries that includes two other major Latin nations, Argentina and Chile, as well as South Africa, South Korea, and Taiwan.

STRATEGIC GUATEMALA

Like those countries, Guatemala is of strategic value to the United States because it is of strategic value to the Soviet proxies who threaten it. Guatemala shares with nearly all the above-mentioned nations certain characteristics which make them attractive to the Soviets: it commands a privileged geopolitical position adjacent to a vital waterway (the Caribbean straits); it is close to one or more countries controlled by an aggressive pro-Soviet regime (Cuba, Nicaragua); it possesses valuable natural resources (oil, nickel), and a robust free-market oriented economy. In addition, Guatemala is governed by an authoritarian regime that has been attacked from within by "indigenous forces" that include pro-Soviet elements. Furthermore, these countries have in common economic and political elites that are fiercely anti-communist, though not unqualifiedly pro-American, and have been the subject of repeated condemnations by international human rights organizations.

Of these states, Guatemala is unique in its proximity both to the United States and to weak non-communist countries with strong leftist factions. No other Central American or Caribbean nation has the same combination of assets and liabilities in terms of strategic importance, and no other nation in the region reflects the same embattled attitude toward Marxist subversion.

Today, despite the closeness of the United States and Mexico, no country in the region evidences noticeably strong political ties to either. A power vacuum of sorts exists in terms of regional leadership, in which two local centers of political and military power, Cuba and Guatemala, are contending through indirect, ideological warfare. Cuba has established valuable footholds in Nicaragua, Guyana, and in Grenada, where it is assisting the leftist government in building a modern airport with a runway capable of accommodating wide-bodied jets. Marxist elements also have made significant inroads in El Salvador, Costa Rica, and Panama. Until the election of Edward Seaga as prime minister of Jamaica last October, that country, with its rich bauxite reserves, had teetered in the Cuban orbit.

Conversely, Guatemala has no important friends in the region. Its isolation is in part due to criticism by human rights organizations that have often bypassed human rights abuses in Marxist states. Mexico, Costa Rica, and Venezuela have added their voices to those of the rights advocates, while steering clear of, for example, the issue of political prisoners in Cuba. The principal reason for Guatemala's beleaguered international position, though, is that in no other Central American or Caribbean country has the war against Marxist subversion been drawn so starkly. In El Salvador, the United States has most recently borne the brunt of criticism for supplying arms and advisers to the junta. In Guatemala, the shadow of the United States no longer falls over decisionmaking in the National Palace. Guatemalans see themselves in a battle for their nation that only they can win. Mexico and Venezuela, the two major economic powers in the region, have asserted their role by agreeing to convert the oil debts of nine small Caribbean countries into long term loans: both powers have confined themselves to speechmaking in the ideological war.

Despite claims by numerous diplomats and journalists that the United States no longer occupies the central political role in the Caribbean-Central American region, the U.S. will inevitably be a major player in the region's affairs. Our economic ties are too extensive, and our historical interest too deep to detach ourselves from political events there, especially when so many governments in Central America and the Caribbean hope for a stronger American hand. In seeking to reassert opposition to continually expanding Soviet influence, the U.S. must identify its logical allies and assist them as much as possible in fending off Communist agitation that originates in Cuba or other Soviet puppets. This task, of course, is separate and distinct from cooperating with authoritarian governments in repressing any domestic group it perceives to be in opposition to its policies. The first target of such U.S. attention is Guatemala. If we are to defend our interests in the region, the way to do it is to buttress the strong links in order to protect the weaker ones. Guatemala is the only stalwartly anti-communist country in the Central American-Caribbean theater with a relatively healthy economy, a capable army, and a key geopolitical position.

STRONG U.S. TIES

For these reasons, Guatemala is enduring a bloody terrorist campaign conducted by pro-Soviet guerrilla tacticians. At the same time, Guatemala has a tradition of closeness to the United States: children of wealthy Guatemalans are educated in the U.S., and senior Guatemalan officers were trained in American military colleges. This longtime affection for the U.S. suffered when the country was put on trial for human rights violations in recent years, but it is as deep-rooted as America's interest in Central America. Guatemalans hope their admiration for the United States will be reciprocated. But if it is not, they are prepared to forge closer ties with the other "pariah" nations (and, in fact, have received weapons and military advice from Argentina).

It is important to note that closer cooperation between the United States and Guatemala should be based on mutual recognition and understanding of the strategic priorities in the Central American-Caribbean region. It does not mean that human rights abuses should be ignored or condoned. Still, the United States has few reliable allies in this critically important region. We cannot help Guatemala build a more prosperous economy or refine its practice of democracy while the nation is fighting an internal war. The war should be won, and then the social problems given prompt attention, both with American assistance.

Mr. HELMS. Mr. President, I ask unanimous consent that an article by Dr. Clifford A. Kiracofe, Jr. entitled "The Soviet Network in Central America," be printed in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

THE SOVIET NETWORK IN CENTRAL AMERICA

(By Clifford A. Kiracofe)

International concern about the atrocities committed by the Palestine Liberation Organization, its Arab affiliates, and its non-Arab "brothers in arms" has generally focussed on the Middle East and Western Europe during the last two decades. In recent months, however, evidence of PLO penetration of the Western Hemisphere and southern Africa has come to light.

Both President Reagan and Secretary of State Haig went on record during the first weeks of the new administration pledging their determination to overcome the challenge posed by the Soviet-backed Terrorist International.

Orthodox Soviet doctrine holds that the "world revolutionary process" is composed of "three revolutionary streams" which flow into each other. They are: 1) the World Socialist System, which is composed of states ruled by Communist Parties (sometimes including The People's Republic of China); 2) the International Workers' Movement, led by the non-ruling Communist Parties (such as the Spanish, Mexican, Argentine, and South African Parties); and 3) the National Liberation Movement, led by Marxist-Leninist "vanguard" elements operating throughout the so-called Third World.

The National Liberation Movements (NLMS) work in conjunction with the local "non-ruling" Communist Party as well as with the ruling Communist Parties to seize power in the target country. Their strategy follows the classic Leninist two-stage revolution. The first stage, that of the "bourgeois-democratic revolution," is effected by the NLM, which for tactical reasons includes non-orthodox Communist elements such as the "progressive bourgeoisie," workers, students, farmworkers, intellectuals, and peasants. The orthodox Marxist-Leninist core element of the NLM, however, is required to take and maintain the leading (or "vanguard") role during the revolutionary process.

The second stage, the "Socialist revolution," is effected once power has been seized. In this stage, non-orthodox elements are systematically eliminated and the NLM undergoes a transformation (under Moscow's guidance) into an orthodox Communist Party. Unreliable elements are continually purged and power is "consolidated" in the hands of the pro-Soviet "vanguard" party. The society itself then undergoes a process of Sovietization in terms of its socio-economic structure. Recent examples of successful takeovers by NLMs would include Angola, Zimbabwe, and Nicaragua.

It is important to bear in mind that in the early phases of a "War of National Liberation" (i.e., in stage one), terrorist acts are undertaken by both urban and rural terrorist/guerrilla cadres of the NLM. In the initial phase, terrorist acts appear in a somewhat random and scattered pattern but as the assault on society intensifies these patterns become more systematic and frequent. The level of violence escalates to undermine civilian morale and to destabilize the target government. In the latter phases, full-scale guerrilla warfare may ensue, and the target government may fall unless it can mobilize sufficient internal and external support.

The Al-Fatah movement surfaced during the latter 1950s. Read backwards, "Al-Fatah" is an abbreviation for the "Movement for the Liberation of Palestine"; read forward it means "Conquest." Yasir Arafat has been the chief of Al-Fatah and since 1969 also Chief of the Executive Committee of the PLO. The Popular Front for the Liberation of Palestine (PFLP) surfaced in 1967 as an offshoot of the Nasserist Arab Nationalist Movement. The founder of the PFLP, George Habash, was from a Greek Orthodox family from Lydda. Two offshoots of the PFLP are the PFLP-General Commando (PFLP–GC), which surfaced in 1968, and the (Popular) Democratic Front for the Liberation of Palestine (DFLP), which surfaced in 1969. The PFLP–GC has been under the command of Ahmed Jibril, and the DFLP has been under the commander of Nayef Hawatmeh, also of Greek Orthodox origins.

The PLO itself was formed during a 1964 Arab summit conference meeting in Cairo. At the same time a Palestine Liberation Army was also formed. After the stunning Israeli victories in 1967, Al-Fatah gained the dominant position within the umbrella PLO due to the sharp defeat of the PLA during the war.

It must be recalled that the PLO has had close official ties to Moscow for over a decade. Arafat reportedly paid private visits to Moscow during 1968 and 1969; in 1970 Arafat was welcomed in Moscow on his first

"official" visit and he has since paid almost annual visits. "Scores and hundreds of Palestinian officers eligible to command major sectors, such as brigades, have graduated from Soviet military academies (The New York Times, February 18, 1981, quoting Brig. Mohammed Ibrahim al-Shaier, head of the PLO's Moscow office).

Since 1966, the PLO has played the role of catalytic agent for the Moscow-backed Terrorist International. This interlocking global network was formally constituted in Havana at the Tri-Continental Conference in January, 1966. The meeting was attended by delegates from over 82 countries and by 100 observers. From it emerged the Afro-Asian-Latin American Solidarity Organization and the Latin American Solidarity Organization (OLAS—based in Havana). The objective of these organizations was declared to be "to unite, coordinate, and develop the struggle of the peoples of Africa, Asia, and Latin America" and "to organize the flow of aid to National Liberation Movements." The results in the Asian sector ended in Western defeat in Vietnam, Laos, and Cambodia. The results in the African sector have ended, though not irreversibly, in Western defeat in Angola, Mozambique, and Ethiopia. The results, again not irreversibly (as Chile proved), in the Western Hemisphere ended in Western defeat in Nicaragua.

During 1972, the early links established by the Terrorist International were significantly developed in a series of meetings in Lebanon, Algeria, Japan, and Dublin. The meeting in Lebanon was hosted by PFLP and Black September and attended by members of the Baader-Meinhof gang, the Japanese Red Army, the Turkish People's Liberation Army, the IRA, and the Uruguayan Tupamaros. In 1974, the Junta de Coordinacion Revolucionaria (JCR) was established in Paris to coordinate Latin American terrorist organizations. Included in the JCR apparatus were Uruguayan Tupamaros, Argentine People's Revolutionary Army (ERP), and Bolivia's National Liberation Army (ELN). The JCR formed links with European terrorist organizations, the Cubans, and Middle Eastern groups. Though disbanded in 1977, it was reformed once again after the Sandinista victory in the summer of 1979. Other interlocking South American terrorist organizations that have surfaced in recent years are the Chilean MIR, the Colombian M–19, the Argentine Montoneros, and the Nicaraguan Sandinista National Liberation Front (FSLN).

Guerrilla organizations operating in El Salvador today include the Popular Forces for Liberation (FPL, founded in 1970), the Armed Forces of the National Resistance (FARN, founded in 1975), the People's Revolutionary Army (ERP, founded in 1971), and the armed cadres of the Salvadoran Communist Party (PCS). These four organizations are under the military command of the Farabundo Marti National Liberation Front, which is itself under the political command of the United Revolutionary Directorate (DRU).

Aside from Moscow, Colonel Qadhafi of Libya has become perhaps the most significant backer of the PLO, its affiliates, and the Terrorist International. The Libyans cooperate with the PLO and its affiliates as well as the Cubans in training terrorists in the Middle East, principally in Lebanon, Syria, South Yemen, Libya, and Algeria. Two main organs coordinate international terrorist operations in Libya: the Bureau of Foreign Relations, and the Arab Liaison Bureau. Both are located in the People's Palace in Tripoli. The former handles recruitment of revolutionaries on an international basis; the latter organizes terrorist-training programs and arranges financial and logistical support for the Terrorist International. Libya's Secret Service, the Mukhabarat, is interfaced with these bureaus and is under the control of the Soviet KGB via the East German Secret Service.

Though some analysts in the United States pointed to PLO involvement in the "hostage crisis" in Iran, a non-Arab but Islamic state, their views were generally disregarded. It is a fact that the largest single group of terrorist cadres trained at the PLO Hummuriyah camp in Syria in 1979 were Iranians. The internationally-recognized authority Robert Moss reported that, "Some 170 Iranians attended courses at the camp, under a program agreed between Abbas Zamani, the chief of Ayatollah Khomeini's Revolutionary Guards, and the head of the PLO bureau in Tehran, Hani al-Hassan who figures as a highly influential advisor to the Iranian regime." (London, *Daily Telegraph*, June 23, 1980.) Moss, in the same article, pointed out that, "Abbas Zamani has actually trained at a Fatah guerrilla base in Lebanon."

PLO involvement in the "revolutionary process" in Iran extends back at least a decade. A "Palestinian Group" of 45 Iranians were fighting alongside Palestinian terrorists in 1971; some later returned to Iran after receiving combat experience and advanced training.[1] An official statement released in Iran pointed out that "the rebels responsible for the recent killings and clashes with Iranian police [May, 1976] received arms and funds from Libya and the PFLP."[2]

The scale of PLO involvement in Iran today has been touched upon by Professor Houchang Nahavandi, an exceptionally well-informed former Iranian government Minister now living in Europe. He writes that at the end of 1980 some 15,000 PLO-affiliated cadres were scattered throughout Iran actively defending Khomeini's "Red and Black" revolution. He also reports that Khomeini has granted the PLO a stipend of $2 per barrel for every Iranian barrel of oil in the world market.[3]

If this startling revelation is accurate, the PLO war chest would be substantially increased by Khomeini over and above the significant amounts already provided not only by radical Arab states such as Libya and Algeria, but also by "conservative" feudal houses in the Arabian Peninsula.

Western efforts to stabilize the flow of oil from the Arabian Peninsula and Gulf areas must not overlook the fact that the same feudal houses seeking Western protection actively finance the PLO and its affiliates. While some may argue that these funds are given to "pay off" the PLO to refrain from subversive efforts against these houses, this short-term policy is leading to a revolutionary process that in the end may well consume the royal patrons. Furthermore, "conservative" Arab recycling of petrodollars to PLO activities poses a direct threat to Western Europe, the Western Hemisphere, South Africa, and such Pacific states as Japan and the Philippines, not to mention Israel itself.

Nicaragua, under the rule of the Sandinista National Liberation Front (FSLN), has become the main safe haven and training center in the Western Hemisphere for the Terrorist International, while Cuba remains the Command Center and base. The cadres of the FSLN, founded in 1963, have been trained not only in Cuba and Eastern Europe but also in the subterranean networks of the PLO and its affiliates in the Middle East. The late President Somoza himself recorded in his memoir, *Nicaragua Betrayed*, that "all of the [Sandinista] leaders had been trained in Cuba, Czechoslovakia, the PLO, Libya, and Panama; and they were tough. They knew tactics and their knowledge of weaponry was first rate."[4] He also noted that "Some of the Sandinistas had been active with the PLO in Israel ten years previously [in late 1969]."[5]

The Constitutional President of Nicaragua following Somoza (for just 43 hours), Francisco Urcuyo Maliano, specifically records in his memoir, *Solos*, that relations between the FSLN and the PLO were sealed in Mexico City some 10 years ago by FSLN representative Benito Escobar and a high-ranking PLO emissary. He further draws attention to the fact that during the same period, FSLN terrorist Patricio Arguello Ryan was killed by counter-terrorist forces during an incident in which a Black September unit attempted to highjack an El Al jetliner in Europe.[6] Arguello was an integral part of the Black September cadre-system which included non-Arab elements. FSLN cadres are known to have been trained in Lebanon, Libya, and in Algeria under PLO auspices. Arafat himself publicly boasted in Managua, Nicaragua, during July, 1980, that the FSLN had received training and indeed had fought with the PLO in the Middle East.

Thousands of armed terrorist/guerrillas joined with the FSLN during its assault on the Somoza government and formed "International Brigades" on the model of those in the Spanish Civil War. Among these cadres were Argentine ERP and Montoneros, Uruguayan Tupamaros, Chilean MIR, Colombian M–19, as well as Panamanian, Honduran, Mexican, and Venezuelan nationals. A network of terrorist training bases exists today in Nicaragua. Among the locations cited by specialists are: Esteli, Montelimar (the former Somoza estate), Somotillo, Ocotal, Tamarindo, Puerto Cabezas, the Island of Soletiname (in Lake Nicaragua), and several in the Punta Coseguina area (right across from El Salvador). In addition to Cuban and PLO instructors there are veteran cadres from the Argentine, Chilean, and Uruguayan groups mentioned above. These training camps have been and are preparing terrorists for the assault on El Salvador, Guatemala, and Honduras as well as for activity in South America. Not only have PLO cadres been active in training camps in Nicaragua but they have also been reported active in El Salvador and Guatemala. In fact, it has been established that the PLO, Algeria, Libya, and Iraq, as well as Cuba, Nicaragua, Mexico, and Panama, have been supplying weapons and financing to the Salvadoran revolutionary forces.

It should also be noted that it is not only the FSLN who have had long-standing close working relations with the PLO; the Argentine Montoneros, for example, have had such relations. Horacio Mendizabal, a Montonero killed by Argentine counter-terrorist forces on September 17, 1979, was a key liaison cadre between the Montonero executive directorate and the PLO. He had lived in France, Spain, and Lebanon, and in April, 1979 formed links with the Palestinian group operating in Tehran.

There is another aspect to the use of Nicaragua as a safe haven for the Terrorist International. It is known that Nicaragua is issuing false passports to terrorist cadres. Several Cubans using these passports were apprehended in the United States recently. That PLO cadres, as well as other terrorists, could infiltrate the United States, or other countries, using these passports is raising grave concern in a number of capitals.

The U.S. State Department released on February 19, 1981 extensive intelligence documentation of Soviet bloc support for the Salvadoran insurgents. In addition, Lawrence Eagleburger was sent to Western Europe and General Vernon Walters to South

America in order to present the administration's case to allies and friends. The Eagleburger mission was blunted somewhat by the opposition of the Socialist International to the new administration's approach and its well-orchestrated support in Europe for the Salvadoran insurgents. The official position of the Socialist International was expressed by Pierre Schori, foreign-policy spokesman for Sweden's Social Democratic Party and the party's liaison with the Socialist International, in an article appearing in *The New York Times* on February 28, 1981. The El Salvador issue is being manipulated by the European Left in a manner reminiscent of its opposition to U.S. involvement in Vietnam.

While the administration's release of intelligence documentation was a useful addition to the policy debate, it failed to release similar documentation on the Nicaraguan revolution spearheaded by the Marxist-Leninist FSLN which resulted in its 1979 seizure of political power in Nicaragua. Washington has, therefore, failed to place the El Salvador case within the overall context of the Moscow-backed "revolutionary process" in Central America, in which Guatemala, Honduras, and Mexico are further Soviet targets. Contrary to State Department claims, the Nicaraguan case, and *not* the Salvadoran, is the first "text-book example" of a Marxist-Leninist takeover in Central America. If this point is not recognized, and the extreme gravity of the entire Central American situation taken into account, a piece-meal approach involving only El Salvador will in the end prove ineffective in stabilizing the region.

The new U.S. administration, by focussing on the issue of international terrorism and Moscow's deep involvement in it, offers the hope that a coordinated international effort will meet this grave threat. Under no circumstances, however, should it be forgotten that the activities of the Terrorist International and the National Liberation Movements related to it are part of the Soviet order of battle for the current era, as expressed in its doctrine of the Three Revolutionary Streams. The case of El Salvador, or any case of Soviet-backed revolution, cannot be separated from the overall challenge posed by Soviet global strategy.

With respect to the PLO it is obvious that any defense of its activities as some sort of positive factor in Middle Eastern politics is peculiarly astigmatic. Those who, taking what they think to be a "hardheaded" attitude on oil supplies, defend the "conservative" Arab regimes around the Persian Gulf that are financing global revolutionary movements, must expand their horizons.

The PLO has long since expanded far beyond its original Middle Eastern context not only into the Western Hemisphere, but also into southern Africa, where it is comprehensively integrated with Soviet bloc activity in Angola, Mozambique, Tanzania, Zimbabwe, and Namibia. The PLO plays a pivotal role in the Soviet network that also allocates roles to Argentine Montoneros, Uruguayan Tupamaros, Chilean MIR, the El Salvadoran Farabundo Marti Liberation Front, and Italian Red Brigade cadres.

In Central America the vital interests of the United States are directly threatened by the Terrorist International spearheaded by the PLO. The entire Western industrial base is threatened by the activities of the Terrorist International in conjunction with the National Liberation Movements waging the "resource war" for Moscow in southern Africa. While Islamic states have been accused of playing the "oil weapon" in the past, the "PLO weapon" may pose even greater long-term threats to Western stability. In this context, there are clearly broader issues to be taken into consideration by Western capitals when forming policies towards the Middle East. An intensive reappraisal is certainly in order today.

PARAQUAT

Mr. HUMPHREY. Mr. President, I rise today in support of the provision in S. 1196 repealing the ban on paraquat. We are at a crucial point in this country's fight against drug abuse. When the level of illicit drug use among young Americans of high school age is probably higher than that in any other industrialized nation in the world, it is time for decisive action. With the potency of the marihuana available on our streets having increased dramatically since 1975, the dangers of this drug are becoming painfully clear to this Nation's youth.

I have seen, as we all have, the tragic results of such drug abuse in wasted potential, isolation, and unhappiness. Studies have shown that marihuana use interferes with memory, intellectual functioning, motivation, and driving ability. In addtiion, we are now beginning to accumulate scientific data on the health effects of long-term exposure to marihuana, which shows deleterious effects on the lungs and the reproductive system and suggests adverse effects on the cardiovascular system and brain cellular structure.

We must act now to change this trend and to fight drug abuse in any way possible with all of our resources. We must warn young people of the dangers of marihuana and assist families, educators, and communities in developing programs to combat drug abuse. We must attack the drug supply at all points—its source, the point of importation, and at the level of the distributors and pushers.

The paraquat provision of S. 1196 addresses the marihuana problem at its source, the most effective point to combat drug use. Paraquat is the most powerful herbicide we have because it is fast acting, which means the marihuana is destroyed before the farmer can harvest it. The Mexican Government's success in eradicating its marihuana crop proved paraquat's effectiveness and reduced Mexico to a secondary supplier of our illicit drugs.

The last Congress banned paraquat in response to political pressure after reports of possible health hazards of marihuana contaminated with paraquat entering this country were widely publicized. A careful analysis of further data on paraquat's effects when inhaled and the chances of exposure shows that the dangers were greatly exaggerated.

Concentrated paraquat will damage the lungs, but the amount of paraquat actually reaching the lungs through marihuana smoking is extremely small and varies considerably based on factors which include the concentration of paraquat in the contaminated marihuana, the amount of paraquat that passes unchanged in the smoke, and the smoking habits of the marihuana user. In addition, initial estimates of the percentage of contaminated marihuana on the U.S. market were high, and the data now shows less than 1 percent nationwide and only 2.2 percent in the Southwest part of the country. Those few smokers at risk could be warned of paraquat contamination by a chemical marker, which should be developed in the next few years.

I believe it is even more important that in banning paraquat there was no balancing of the possible risks of paraquat inhalation against the known health hazards of smoking marihuana. Because of a highly speculative risk to a potentially small number of smokers, we are losing an opportunity to wipe out the source of a drug that we know causes harm to the health and well-being of our young people.

As chairman of the Subcommittee on Alcoholism and Drug Abuse, I believe it is imperative that we act now to allow funding of paraquat eradication programs.

LEBANON

Mr. HATCH. Mr. President, would my distinguished colleague from Illinois, the chairman of the Foreign Relations Committee, have a moment to discuss how this bill will affect the crisis situation now in Lebanon? What is the level of military aid and what will go to Lebanon in this legislation?

Mr. PERCY. I welcome the concern of my colleague from Utah about the situation in Lebanon. This bill provides funds to strengthen the Lebanese armed forces as follows: $15 million for FMS financing; $5 million in economic support funds; and $1 million in military training. It is designed to aid the efforts of President Sarkis, Defense Minister Skaff, and Chief of Staff Khouri to rebuild the Lebanese Armed Forces.

Mr. HATCH. It is my understanding, Mr. President, that the Secretary of State sent a letter of appreciation to the President of Lebanon for his personal assistance in the successful cease-fire negotiations this summer carried on by Ambassador Habib. Certainly, we have a national interest in seeing a strong, authoritative central government in Lebanon if the cease-fire is to continue. Yet it seems to me that the Lebanese Armed Forces are only just beginning to rebuild after the destructive civil war of the last 6 years. Mr. Chairman, I am not satisfied that the pace with which we are delivering military equipment to Lebanon is going to be adequate to permit the Lebanese Armed Forces to maintain the authority of the central government in the years ahead.

A weak central government not only is dangerous for the people of Lebanon, but also threatens the security of Israel whose military planners are very aware of the operational bases of the PLO in southern Lebanon which stretch all the way north to the capital in Beirut. I just do not see how the Lebanese Armed Forces can maintain order when the PLO has been receiving dozens of tanks this year. Some estimates go as high as 100 tanks of Soviet origin that are now in the hands of the PLO. I understand our Embassy in Beirut and the State Department support Lebanon's request for 30 or 40 American-made M–48 tanks to be delivered as soon as possible. Do you support this request, Mr. Chairman? Can it be expedited and accelerated under this proposed legislation?

Mr. PERCY. My distinguished colleague makes a very persuasive case.

This bill would provide funds for M–48 tanks and other weapons requested by the Government of Lebanon, and I believe that the situation there you have described would justify an acceleration of the pace of delivery of the M–48 tanks. It would be difficult to conceive of any reason this equipment should not be expedited. We will monitor this carefully, I can reassure my colleagues, and I thank Senator HATCH for bringing this matter to the attention of the Senate.

Mr. HATCH. With these reassurances about the high priority that we in the Senate believe should be given to accelerating the delivery of M–48 tanks to Lebanon, many will support your approach. I hope we can insure that the cease-fire in Lebanon can be maintained and that Israeli security as well can be enhanced by this action.

Mr. HELMS. Mr. President, I concur in the remarks of the distinguished Senator from Utah, and the distinguished chairman. The land of Lebanon has suffered long from the predatory attacks of its neighbors and the PLO. The least we can do is to expedite the shipments of heavy materiel that we have promised, and I am delighted at the assurances of our capable chairman.

Mr. GLENN. Mr. President, I agree with these concerns about Lebanon and hope some way can be found to expedite the tank shipments.

The PRESIDING OFFICER. Does the senior Senator from Virginia seek recognition?

Mr. HARRY F. BYRD, JR. May we have third reading first?

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

Mr. BAKER. Mr. President, if I may have the indulgence of the Senator from Virginia, I ask for the yeas and nays on final passage.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PERCY. Mr. President, I wish to express my deep appreciation to the members of the staff of the minority: Jerry Christianson, Gerry Connolly, David Lawther Johnson, Barry Sklar, Peter Galbraith. William Ashworth, and Janice O'Connell.

I also express deep appreciation to the members of the staff of the majority: Ed Sanders, Hans Binnendijk, Joel Johnson, Margaret Hayes, Mary Locke, Bob Russell, Alison Rosenberg, Graeme Bannerman, and Alan Sofrin.

To my distinguished colleague, the ranking minority member and all the members of the committee, I extend deep appreciation for their work and assistance, particularly the chairman of the Armed Services Committee, who has been so cooperative.

The PRESIDING OFFICER. The Senator from Virginia is recognized.

Mr. HARRY F. BYRD, JR. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will be in order.

Mr. HARRY F. BYRD, JR. Mr. President, I invite the attention of the Senate to page 1 of the committee report. The figures show this: That for the fiscal year 1981, the foreign aid authorizations incorporated into this proposal for 1981 are $4 9 billion. For 1932, the authorization in the piece of legislation we will vote on in a moment is $5.8 billion. That is a 17-percent increase in spending for foreign aid in this 1 fiscal year, 1982, vis-a-vis 1981.

This is a time of huge budget deficits. It is a time when our country is faced with tremendous inflation. It is a time when none of us knows precisely how we are going to balance the budget. To come in with a piece of legislation, as we are tonight, with a 17-percent increase in foreign aid spending seems to me to be totally unjustified. I will vote against this proposal.

I point out that the 17-percent increase in foreign aid spending which will be voted on tonight comes on the precise day that our national debt went over the $1 trillion mark. Today. October 22, the national debt, for the first time, exceeded $1 trillion; and we are following that up now with a foreign aid proposal which has been increased by 15 percent over the previous year. It is totally unjustified.

Mr. PERCY. I do remind my colleague with great respect that the Foreign Relations Committee reduced President Reagan's budget by $900 million.

Mr. HARRY F. BYRD, JR. I remind my dear colleague from Illinois that it still represents an increase of 17 percent. That is what his own figures show.

Mr. BAKER. Mr. President, after several days of debate, the time has now come to vote on this year's foreign assistance bill. I recognize that at a time when our domestic economy is not as healthy as we would like, and when we are cutting back on domestic programs, it is difficult to register a vote in favor of foreign assistance. But I believe there are several reasons we should do so.

First, I would note that the foreign assistance bill is not a major item in our Federal budget—this bill is only around 1.6 percent of our Federal expenditures. This program has shrunk steadily relative to our budget and to our GNP over the past 25 years. It is $900 million less than President Reagan's original request and almost identical to his current total request.

Second, the bill provides a variety of new policy requirements and terminates or modifies a number of old ones. The bill thus provides a current statement of the policies and conditions which the Congress desires in conducting a foreign assistance program. Without new legislation, the executive branch would be forced to conduct a foreign assistance program under requirements put in place for a different time and different circumstances.

Finally, this bill provides the President with a critical means of conducting our foreign policy. Our country now faces many challenges in the world. President Reagan, in a letter to Chairman PERCY, noted that—

> This bill would provide vital tools to assist us in meeting these challenges and promote and protect America's interests abroad. The reduction of these assistance programs would have serious repercussions on our foreign policy and would endanger our national security objectives.

Mr. President, before we vote, I would like to warmly commend the floor managers, the distinguished Senators from Illinois and Rhode Island, for their work on this bill. They have managed to deal with a variety of amendments, several involving issues on which many Senators had very strong feelings, with tact and understanding.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass?

On this question, the yeas and nays have been ordered, and the clerk will call the roll.

Mr. BAKER. I announce that the Senator from North Dakota (Mr. ANDREWS), the Senator from New York (Mr. D'AMATO), the Senator from Alabama (Mr. DENTON), the Senator from Minnesota (Mr. DURENBERGER), the Senator from Utah (Mr. GARN), the Senator from Arizona (Mr. GOLDWATER), the Senator from Utah (Mr. HATCH), the Senator from California (Mr. HAYAKAWA), the Senator from Nevada (Mr. LAXALT), the Senator from South Dakota (Mr. PRESSLER), the Senator from Wyoming (Mr. SIMPSON), the Senator from Alaska (Mr. STEVENS), the Senator from Idaho (Mr. SYMMS), and the Senator from Connecticut (Mr. WEICKER) are necessarily absent.

I further announce that, if present and voting, the Senator from Utah (Mr. HATCH) and the Senator from Idaho (Mr. SYMMS) would each vote "nay."

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Arkansas (Mr. BUMPERS), the Senator from North Dakota (Mr. BURDICK), the Senator from West Virginia (Mr. ROBERT C. BYRD), the Senator from Arizona (Mr. DECONCINI), the Senator from Connecticut (Mr. DODD), the Senator from Massachusetts (Mr. KENNEDY), the Senator from Ohio (Mr. METZENBAUM), the Senator from Maryland (Mr. SARBANES), the Senator from Tennessee (Mr. SASSER), the Senator from Massachusetts (Mr. TSONGAS), the Senator from New Jersey (Mr. WILLIAMS), and the Senator from Louisiana (Mr. JOHNSTON) are necessarily absent.

On this vote, the Senator from North Dakota (Mr. BURDICK) is paired with the Senator from Massachusetts (Mr. KENNEDY).

If present and voting, the Senator from North Dakota would vote "nay" and the Senator from Massachusetts would vote "yea."

The PRESIDING OFFICER. Is there any other Senator in the Chamber desiring to vote?

The result was announced—yeas 40, nays 33, as follows:

[Rollcall Vote No. 330 Leg.]

YEAS—40

Baker	Gorton	Mitchell
Baucus	Hart	Moynihan
Biden	Hawkins	Murkowski
Boschwitz	Heinz	Packwood
Chafee	Huddleston	Pell
Chiles	Inouye	Percy
Cochran	Jackson	Riegle
Cohen	Kassebaum	Rudman
Cranston	Kasten	Specter
Danforth	Leahy	Stafford
Dixon	Levin	Thurmond
Dole	Lugar	Tower
Domenici	Mathias	
Glenn	Matsunaga	

NAYS—33

Abdnor	Hatfield	Proxmire
Armstrong	Heflin	Pryor
Bentsen	Helms	Quayle
Boren	Hollings	Randolph
Byrd,	Humphrey	Roth
Harry F., Jr.	Jepsen	Schmitt
Cannon	Long	Stennis
Eagleton	Mattingly	Wallop
East	McClure	Warner

Ford	Nickles	
Grassley	Nunn	

NOT VOTING—27

Andrews	Durenberger	Pressler
Bradley	Garn	Sarbanes
Bumpers	Goldwater	Sasser
Burdick	Hatch	Simpson
Byrd, Robert C.	Hayakawa	Stevens
D'Amato	Johnston	Symms
DeConcini	Kennedy	Tsongas
Denton	Lavalt	Weicker
Dodd	Metzenbaum	Williams

So the bill (S. 1196), as amended, was passed, as follows:

S. 1196

An act to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "International Security and Development Cooperation Act of 1981".

TITLE I—MILITARY SALES AND RELATED PROGRAMS

REPORTS TO THE CONGRESS

SEC. 101. (a) Section 3(d) of the Arms Export Control Act is amended—

(1) in paragraph (1), by striking out all that follows "The President may not give his consent" through "Act of 1961" and inserting in lieu thereof "under paragraph (2) of subsection (a) of this section or under the third sentence of such subsection, or under sections 505(a)(1) or 505(a)(4) of the Foreign Assistance Act of 1961, to the transfer of any major defense equipment valued (in terms of its original acquisition cost) at $14,000,000 or more, or of any defense article or related training or other defense service valued (in terms of its original acquisition cost) at $50,000,000 or more,";

(2) in paragraph (3), by striking out all that follows "The President may not give his consent" through "section 38 of this Act," and inserting in lieu thereof "to the transfer of any major defense equipment valued (in terms of its original acquisition cost) at $14,000,000 or more, or of any defense article or defense service valued (in terms of its original acquisition cost) at $50,000,000 or more, the export of which has been licensed or approved under section 38 of this Act,".

(b) The first sentence of section 36(b)(1) of such Act is amended—

(1) by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000"; and

(2) by striking out "$7,000,000" and inserting in lieu thereof "$14,000,000".

(c) Section 36(c) of such Act is amended in the first sentence of paragraph (1)—

(1) by striking out "$7,000,000" and inserting in lieu thereof "$14,000,000"; and

(2) by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000".

(d) Section 36(d) of such Act is amended by striking out "such subsection" and inserting in lieu thereof "subsection (c)(1) of this section".

(e) Section 109(e) of the International Security and Development Cooperation Act of 1980 is amended—

(1) by striking out "$7,000,000" and inserting in lieu thereof "$14,000,000"; and

(2) by striking out "$25,000,000" and inserting in lieu thereof "$50,000,000".

PROPOSED TRANSFERS OR SALES TO THE NORTH ATLANTIC TREATY ORGANIZATION, JAPAN, AUSTRALIA, OR NEW ZEALAND

SEC. 102. (a) Section 3(d)(2) of the Arms Export Control Act is amended—

(1) by striking out "(2) Unless" and inserting in lieu thereof "(2)(A) Except as provided in subparagraph (B), unless"; and

(2) by adding at the end thereof the following:

"(B) Unless the President states in the certification submitted pursuant to paragraph (1) of this subsection that an emergency exists which requires that consent to the proposed transfer become effective immediately in the national security interests of the United States, in the case of a proposed transfer to the North Atlantic Treaty Organization, or any member country of such Organization, Japan, Australia, or New Zealand, such consent shall not become effective until fifteen calendar days after the date of such submission and such consent shall become effective then only if the Congress does not adopt, within such fifteen-day period, a concurrent resolution disapproving the proposed transfer.".

(b)(1) Section 36(b)(1) of such Act is amended in the fifth sentence by striking out "if the Congress, within thirty calendar days after receiving such certification," and inserting in lieu thereof the following: ", with respect to a proposed sale to the North Atlantic Treaty Organization, any member country of such Organization, Japan, Australia, or New Zealand, if the Congress, within fifteen calendar days after receiving such certification, or with respect to a proposed sale to any other country, if the Congress within thirty calendar days after receiving such certification,".

(2) Section 36(b)(2) of such Act is amended by inserting before the period at the end thereof a comma and the following: "except that for purposes of consideration of any resolution with respect to the North Atlantic Treaty Organization, any member country of such Organization, Japan, Australia, or New Zealand, it shall be in order in the Senate to move to discharge a committee to which such resolution was referred if such committee has not reported such resolution at the end of five calendar days after its introduction".

PERSONNEL PERFORMING DEFENSE SERVICES

SEC. 103. Section 21(c)(2) of the Arms Export Control Act is amended to read as follows:

"(2) Within forty-eight hours of the existence of, or a change in status of hostilities or terrorist acts, which may endanger American lives or property, involving a country in which United States personnel are performing defense services pursuant to this Act or the Foreign Assistance Act of 1961, the President shall submit to the Speaker of the House of Representatives and to the President pro tempore of the Senate a report, in writing, classified if necessary, setting forth—

"(A) the identity of such country;

"(B) a description of such hostilities or terrorist acts; and

"(C) the number of members of the United States Armed Forces and the number of United States civilian personnel that may be endangered by such hostilities or terrorist acts.".

NONRECURRING RESEARCH AND DEVELOPMENT COSTS

SEC. 104. Section 21(e)(2) of the Arms Export Control Act is amended by inserting after "standardization" the following: ", in standardization with the armed forces of Japan, Australia, or New Zealand (in furtherance of the mutual defense treaties between the United States and those countries)".

AUTHORIZATION AND AGGREGATE CEILINGS

SEC. 105 (a) Section 31(a) of the Arms Export Control Act is amended by striking out "$500,000,000 for the fiscal year 1981" and inserting in lieu thereof "$990,900,000 for the fiscal year 1982".

(b) Section 31(b) of such Act is amended—

(1) in paragraph (1)—

(A) by striking out "fiscal year 1981 shall not exceed $500,000,000" and inserting in lieu thereof "fiscal year 1982 shall not exceed $990,9000,000"; and

(B) by adding at the end thereof the following: "The borrowers of such credits shall be released from their contractual liability to repay the United States Government with respect to such credits and participation in credits.";

(2 in paragraph (2), by striking out "fiscal year 1981 shall not exceed $2,616,000,000" and inserting in lieu thereof "fiscal year 1982 shall not exceed $3,085,500,000"; and

(3) in paragraph (3), by striking out "fiscal year 1981" and inserting in lieu thereof "fiscal year 1982", and by striking out ", of which $200,000,000 shall be available only for costs associated with the relocation of Israeli forces from the Sinai".

(c) The first sentence of section 31(c) of such Act is amended by striking out "fiscal year 1981" and inserting in lieu thereof "fiscal year 1982".

(d) The principal amount of loans guaranteed under section 24(a) of such Act for the fiscal year 1982 with respect to Egypt, Greece, Sudan, Somalia, and Turkey shall (if and to the extent each such country so desires) be repaid in not more than twenty years, following a grace period of ten years on repayment of principal.

REPEAL

SEC. 106. Section 38(b)(3) of the Arms Export Control Act is repealed.

AGENTS FEES AND OTHER PAYMENTS

SEC. 107. (a) Section 39 of the Arms Export Control Act is amended—

(1) by striking out subsection (a);

(2) by redesignating subsections (b), (c), and (d) as subsecitons (a), (b), and (c), respectively;

(3) by amending subsection (a), as redesignated by paragraph (2), to read as follows:

"(a) The President may, as he determines will be in furtherance of the purposes of this Act, by regulation prohibit, limit, or prescribe conditions with respect to contributions, gifts, commissions, and fees paid, or offered or agreed to be paid, by any person in connection with—

"(1) sales of defense articles or defense services under section 22, or of design and construction services under section 29 of this Act; or

"(2) commercial sales of defense articles or defense services licensed or approved under section 38 of this Act;

to or for the armed forces of a foreign country or international organization in order to solicit, promote, or otherwise to secure the conclusion of such sales.".

(b) All delegations, rules, regulations, orders, or other forms of administrative action made, issued, or taken under such section 39 of such Act and which are in effect at the time this section takes effect shall continue in effect in accordance with their terms until modified, superseded, set aside, or revoked by appropriate authority.

SPECIAL DEFENSE ACQUISITION FUND

SEC. 108. (a) The Arms Export Control Act is amended by adding at the end thereof the following new chapter:

"Chapter 5—SPECIAL DEFENSE ACQUISITION FUND

"SEC. 51. SPECIAL DEFENSE ACQUISITION FUND.—(a) Under the direction of the President and in consultation with the Secretary of State, the Secretary of Defense shall establish a Special Defense Acquisition Fund, to be used as a revolving fund separate from other accounts, under the control of the Department of Defense, to finance the acquisition of defense articles and defense service in anticipation of their transfer pursuant to this Act, the Foreign Assistance Act, or as otherwise authorized by law, to eligible foreign countries and international organizations, and may acquire such articles and services with the funds in such account as he may determine. Acquisition under this chapter of items for which the initial issue quantity requirements for United States Armed Forces have not been fulfilled and are not under current procurement contract shall be emphasized when compatible with security assistance requirements for the transfer of such items. Nothing in this chapter may be construed to limit or impair any responsibilities conferred upon the Secretary of State or the Secretary of Defense under this Act or the Foreign Assistance Act of 1961.

"(b) The Special Defense Acquisition Fund established pursuant to subsection (a) of this section shall consist of—

"(1) collections from sales made under letters of offer issued pursuant to section 21(a)(1) of this Act representing the actual value of defense articles not intended to be replaced in stock,

"(2) collections from sales representing the value of asset use charges (including contractor rental payments for United States Government-owned plant and production equipment) and charges for the proportionate recoupment of nonrecurring research, development, and production costs, and

"(3) collections from sales made under letters of offer (or transfers made under the Foreign Assistance Act of 1961) of defense articles and defense services acquired under this chapter, representing the value of such items calculated in accordance with paragraph (2) or (3) of section 21(a) or section 22 of this Act or section 644(m) of the Foreign Assistance Act of 1961, as appropriate, together with such funds as may be authorized and appropriated or otherwise made available for the purposes of this account.

"(c) The size of the Special Defense Acquisition Fund may not exceed such dollar amount as is prescribed in section 138(g) of title 10, United States Code, except that in any fiscal year such funds shall be available only to such extent or in such amounts as are provided in advance in appropriation Acts.

"(d) As part of its annual congressional presentation material on security assistance provided to the Congress and as part of the annual written report to the Congress required by section 139(a) of title 10, United States Code, regarding procurement schedules for each weapon system for which funding authorization is required, the President shall provide a report estimating the likely procurements to be made through the Special Defense Acquisition Fund.

"SEC. 52. USE AND TRANSFER OF ITEMS PROCURED BY THE FUND.—(a) No defense article or defense service acquired by the Secretary of Defense under this chapter may be transferred to any foreign country or international organization unless such transfer is authorized by this Act, the Foreign Assistance Act of 1961, or other law.

"(b) The President may authorize the temporary use by the United States Armed Forces of defense articles and defense services acquired under this chapter prior to their transfer to a foreign country or international organization, if such is necessary to meet national defense requirements and the United States Armed Forces bear the costs of operation and maintenance of such articles or services while in their use and the costs of restoration or replacement upon the termination of such use.

"(c) Except as provided in subsection (b) of this section, the account established pursuant to section 51(a) of this Act may be used to pay for storage, maintenance, and other costs related to the preservation and preparation for transfer of defense articles and defense services acquired under this chapter prior to their transfer, as well as the administrative costs of the Department of Defense incurred in the acquisition of such items to the extent not reimbursed pursuant to section 43(b) of this Act.".

(b) Section 138 of title 10, United States Code, is amended adding immediately following subsection (f) the following new section:

"(g) The size of the Special Defense Acquisition Fund established pursuant to chapter 5 of the Arms Export Control Act may not exceed $350,000,000 in fiscal year 1982 and $700,000,000 in fiscal year 1983.".

LEASES OF DEFENSE ARTICLES

SEC. 109. (a) Section 2667 of title 10, United States Code, relating to leases of nonexcess property, is amended by adding at the end thereof the following new subsections:

"(g) Not less than thirty days before entering into or renewing any agreement with a foreign country or international organization to lease under this section any major defense equipment (as defined in section 47(6) of the Arms Export Control Act) valued at $14,000,000 or more and any other property valued at $50,000,000 or more for a period of more than one year, the Secretary of Defense shall transmit to the Speaker of the House of Representatives, and to the Chairman of the Committee on Foreign Relations of the Senate and the Chairman of the Committee on Armed Services of the Senate, a written notification which specifies—

"(1) the country or international organization to which the defense article is to be leased;

"(2) the type, quantity, and value (in terms of replacement cost) of the defense article to be leased;

"(3) the terms and duration of the lease; and

"(4) a justification for the lease, including an explanation of why the defense article is being leased rather than sold under the Arms Export Control Act.

The President may waive the requirements of this section if he determines, and immediately reports to the Congress, that an emergency exists which requires that the lease be entered into immediately in the national security interests of the United States.

"(h) The Secretary of Defense shall transmit to the Speaker of the House of Representatives and to the Chairman of the Committee on Armed Services of the Senate not more than sixty days after the end of each quarter a listing (classified if necessary) of all property valued at $1,000,000 or more which was leased, during the quarter for which such report is submitted, to a foreign government for a period of more than one year under this section.

"(i) Any reference to sales of defense articles under the Arms Export Control Act in any provision of law restricting the countries or organizations to which such sales may be made shall be deemed to include a reference to leases of defense articles under this section.".

(b) Section 109 of the International Security and Development Cooperation Act of 1980 is repealed.

(c) Section 36(a) of the Arms Export Control Act is amended by deleting paragraph (10).

MILITARY ASSISTANCE

SEC. 110. (a) Section 504(a) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(a)(1) There are authorized to be appropriated to the President to carry out the purposes of this chapter not to exceed $31,400,000 for the fiscal year 1982.

"(2) Amounts appropriated under this subsection are authorized to remain available until expended.".

(b) Section 506(a) of such Act is amended by striking out "$50,000,000" and inserting in lieu thereof "$100,000,000".

(c) Section 503(a)(3) of such Act is amended by striking out "specified in section 504(a)(1) of this Act, within the dollar limitations of that section," and inserting in lieu thereof "country,".

STOCKPILING OF DEFENSE ARTICLES FOR FOREIGN COUNTRIES

SEC. 111. Section 514(b)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$85,000,000 for the fiscal year 1981" and inserting in lieu thereof "$160,000,000 for the fiscal year 1982".

INTERNATIONAL MILITARY ASSISTANCE AND SALES PROGRAM MANAGEMENT

SEC. 112. Section 515 of the Foreign Assistance Act of 1961 is amended to read as follows:

"SEC. 515. OVERSEAS MANAGEMENT OF ASSISTANCE AND SALES PROGRAMS.—(a) In order to carry out his responsibilities for the management of international security assistance programs conducted under this chapter, chapter 5 of this part, and under the Arms Export Control Act, the President may assign members of the Armed Forces of the United States to foreign countries to perform necessary management and other functions related to such programs. The total number of members of the Armed Forces assigned under this section in each foreign country may not exceed the number justified to the Congress in the congressional presentation materials for such foreign country, unless the Committee on Foreign Relations of the Senate and the Committee on Foreign Affairs of the House of Representatives are so notified.

"(b) Members of the Armed Forces assigned to a foreign country under this section shall serve under the direction and supervision of the Chief of the United States Diplomatic Mission to that country.

"(c) The numerical limitations contained in subsection (a) of this section shall not apply to members of the Armed Forces of the United States performing services for specific purposes and for fixed periods of time on a fully reimbursable basis under section 21(a) of the Arms Export Control Act. It is the sense of the Congress that training assistance in countries to which military personnel are assigned under this section shall primarily be provided by other personnel who are not assigned under this section and who are detailed for limited periods to perform specific tasks.

"(d) Effective October 1, 1982, the entire

costs (including salaries of United States military personnel) of overseas management of international security assistance programs under this section shall be charged to or reimbursed from funds made available to carry out this chapter, other than such costs which are either paid directly for such defense services under section 21(a) of the Arms Export Control Act or are reimbursed from charges for services collected from foreign governments pursuant to section 21(e) and section 43(b) of the Arms Export Control Act.

"(e) The President shall continue to instruct United States diplomatic and military personnel in the United States missions abroad that they should not encourage, promote, or influence the purchase by any foreign country of United States-made military equipment, unless they are specifically instructed to do so by an appropriate official of the executive branch.".

INTERNATIONAL MILITARY EDUCATION AND TRAINING

SEC. 113. Section 512 of the Foreign Assistance Act of 1961 is amended by striking out "$34,000,000 for the fiscal year 1981" and inserting in lieu thereof "$47,700,000 for the fiscal year 1982".

PEACEKEEPING OPERATIONS

SEC. 114. Section 552(a) of the Foreign Assistance Act of 1961 is amended by striking out "$25,000,000 for the fiscal year 1981" and inserting in lieu thereof "$19,000,000 for the fiscal year 1982".

TITLE II—ECONOMIC SUPPORT FUND AND OTHER PROGRAMS

ECONOMIC SUPPORT FUND

SEC. 201. (a)(1) Section 531(b)(1) of the Foreign Assistance Act of 1961 is amended by striking out "fiscal year 1981, $2,065,300,000" and inserting in lieu thereof "fiscal year 1982, $2,548,500,000".

(2) Section 531 of such Act is amended by adding at the end thereof the following:

"(d) Not less than 15 percent of the funds authorized to be appropriated for each fiscal year pursuant to this chapter, which are allocated under the Commodity Import Program to finance the purchase of commodities produced in the United States, shall be available only for the purpose of financing the purchase of agricultural commodities produced in the United States.".

(3) Section 531(b) of such Act is amended by adding at the end thereof the following:

"(3) Of the funds appropriated pursuant to paragraph (1), up to $75,000,000 may be made available as a special requirements fund, except that none of such funds may be obligated unless the Committee on Foreign Relations of the Senate, the Committee on Foreign Affairs of the House of Representatives, and the Committee on Appropriations of each House of the Congress are notified fifteen days in advance of such obligation.".

(b) Section 532 of such Act is amended to read as follows:

"SEC. 532. USE OF FISCAL YEAR 1982 FUNDS.—(a)(1) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, not less than $806,000,000 shall be available only for Israel and not less than $771,000,000 shall be available only for Egypt.

"(2) All of the funds made available to Israel and to Egypt under this chapter for the fiscal year 1982 shall be provided on a grant basis.

"(3) The total amount of funds allocated for Israel under this chapter for the fiscal year 1982 may be made available as a cash transfer. In exercising the authority of this paragraph, the President shall ensure that the level of cash transfers made to Israel does not cause an adverse impact on the total amount of nonmilitary exports from the United States to Israel.

"(b) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $300,000,000 shall be available only for Turkey. Not less than two-thirds of the funds made available to Turkey under this chapter for the fiscal year 1982 shall be provided on a grant basis.

"(c) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $10,000,000 shall be available only for Cyprus for refugee relief, reconstruction, and educational exchange programs.

"(d) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $15,000,000 shall be available only for Costa Rica for the purposes of economic assistance.

"(e)(1) Up to $50,000,000 of the funds appropriated to carry out this chapter for the fiscal year 1982 may be made available for emergency use under this chapter when the national interests of the United States urgently require economic support to promote economic or political stability.

"(2) Notwithstanding subsections (a)(1), (b), and (c) of this section, up to 5 per centum of the funds available for any country or region pursuant to such subsections may be used under paragraph (1) of this subsection.

"(f) None of the funds appropriated to carry out this chapter for the fiscal year 1982 may be made available to Syria.

"(g) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, not less than $5,000,000 shall be available for Tunisia.

"(h) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $100,000,000 shall be available only for Pakistan.

"(i) Notwithstanding any other provision of the law, of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $5,000,000 shall be available only for Poland for the purchase, transportation and distribution of food and medical supplies through private voluntary agencies where appropriate.".

(c) Section 533 of such Act is repealed.

TITLE III—DEVELOPMENT ASSISTANCE

AGRICULTURE, RURAL DEVELOPMENT, AND NUTRITION

SEC. 301. (a) The first sentence of section 103(a)(2) of the Foreign Assistance Act of 1961 is amended by striking out "$713,500,000 for the fiscal year 1981" and inserting in lieu thereof "$689,000,000 for the fiscal year 1982".

(b)(1) It is the sense of the Congress that the United States should strongly support the efforts of developing countries to improve infant feeding practices, in particular, through the promotion of breast feeding. As a demonstration of that support, the President is authorized to spend up to $5,000,000 from funds made available for fiscal year 1982 to carry out the purposes of sections 103 and 101(c) of the Foreign Assistance Act of 1961, to assist developing countries establish or improve programs to encourage improved infant feeding practices. As part of such a program, the Agency for International Development should fund necessary research to obtain better information on the precise nature and magnitude of problems relating to infant feeding practices, including the use of infant formula, in developing countries.

(2) The President shall, as part of the Congressional Presentation Documentation for fiscal years 1983 and 1984, include information relevant to the implementation of this section, including—

(A) a description of actions taken by the Agency for International Development to promote breast feeding and to improve supplemental infant feeding practices in developing countries through funds made available in this section and through its regular programs in the fields of health, nutrition, and population activities;

(B) summary information on results of studies authorized by this section on the nature and magnitude of problems in the developing countries related to infant feeding practices; and

(C) summary of reports by member countries of the World Health Organization on their actions to implement the International Code of Marketing of Breast Milk Substitutes.

(c) Section 103 of such Act is amended by adding at the end thereof the following new subsection:

"(g)(1) The President is authorized to participate in and provide, on such terms and conditions as he may determine, not to exceed $180,000,000 to the International Fund for Agricultural Development. There are authorized to be appropriated to the President for the purposes of this subsection, in addition to funds otherwise available for such purposes, $180,000,000, of which amount not more than $45,000,000 may be appropriated for such purposes for the fiscal year 1982. Amounts appropriated under this subsection are authorized to remain available until expended.

"(2)(A) In order to further the purposes of United States participation in the International Fund for Agricultural Development, it is the sense of the Congress that the President should—

"(i) instruct United States representatives on the Governing Council of the Fund to actively seek to limit to seventy-five the number of professional staff (professional category and above, according to the United Nations Common System) of the Fund;

"(ii) instruct United States representatives to seek equity between the contributions of member states of the Organization for Economic Cooperation and Development and all other donors in any negotiations for future replenishments of resources for the Fund;

"(iii) through his representatives on the Governing Council of the Fund, encourage the development of procedures to expedite disbursement of resources for projects and activities supported by the Fund; and

"(iv) seek to assure that the United States contribution to the Fund is disbursed in a manner which is related to the Fund's actual rate of disbursal of loans and grants.

"(B) The Congress looks with favor on the general approach of the Fund in obtaining major support from a wider variety of donors than has normally been the case in international organizations.

"(C) The Congress finds that the President should pursue other efforts to increase the amount of assistance provided to developing countries by European allies of the United States, Japan, and members of the Organization of Petroleum Exporting Countries (OPEC).".

POPULATION AND HEALTH

SEC. 302. (a) The first sentence of section 104(g) of the Foreign Assistance Act of 1961 is amended to read as follows: "There are authorized to be appropriated to the President, in addition to funds otherwise available for such purposes—

"(1) $216,000,000 for the fiscal year 1982 to carry out subsection (b) of this section, of which not less than $3,000,000 shall be available only to support the World Health Organization's Special Program of Research, Development and Research Training in Human Reproduction, and not less than $38,000,000 shall be available for the program of the United Nations Fund for Population Activities; and

"(2) $127,905,000 for the fiscal year 1982 to carry out subsection (c) of this section.".

(b) Section 104(f) of such Act is amended by adding at the end thereof the following:

"(3) None of the funds made available to carry out this part may be used to pay for any biomedical research which relates, in whole or in part, to methods of, or the performance of, abortions or involuntary sterilization as a means of family planning.".

(c) Section 104 of such Act is amended by adding at the end thereof the following:

"(h) Of the amount authorized to be appropriated under subsection (g)(2), not less than $15,000,000 shall be made available to private voluntary organizations to carry out public health activities. For purposes of this subsection, the term 'public health activities' means activities carried out for the purpose of addressing major health problems in the poorer countries through—

"(1) disease control, including projects to promote safe water supplies, sanitary waste disposal, and preventive medicine;

"(2) projects and programs to promote general health, including health education; and

"(3) health services delivery and management.".

EDUCATION AND HUMAN RESOURCES DEVELOPMENT

SEC. 303. Section 105(a) of the Foreign Assistance Act of 1961 is amended—

(1) by striking out in the second sentence "$101,000,000 for the fiscal year 1981" and inserting in lieu thereof "$109,574,000 for the fiscal year 1982"; and

(2) by adding at the end thereof the following: "The President shall use up to $5,700,000 of the funds made available for the purposes of this section for the fiscal year 1982 to finance scholarships for undergraduate or professional education in the United States for South African students who are disadvantaged by virtue of legal restrictions on their ability to secure an adequate undergraduate or professional education, except that up to $1,000,000 of the funds made available for the fiscal year 1982 under chapter 4 of part II of this Act for a Southern Africa Regional Program may be used to finance such scholarships in lieu of an equal amount under this section.".

ENERGY, PRIVATE VOLUNTARY ORGANIZATIONS, AND SELECTED DEVELOPMENT ACTIVITIES

SEC. 304. (a) Section 106(d)(3) of the Foreign Assistance Act of 1961 is amended by inserting before the semicolon at the end thereof the following: "and programs of disaster preparedness including the prediction of, and contingency planning for, natural disasters abroad".

(b) Section 106(e)(1) of such Act is amended by striking out "$140,000,000 for the fiscal year 1981" and inserting in lieu thereof "$140,889,000 for the fiscal year 1982".

PROGRAMS OF SCIENTIFIC AND TECHNOLOGICAL COOPERATION

SEC. 305. The Foreign Assistance Act of 1961 is amended by inserting after section 106 the following new section:

"SEC. 106A. PROGRAMS OF SCIENTIFIC AND TECHNOLOGICAL COOPERATION.—(a) The President is authorized to furnish assistance, on such terms and conditions as he may determine, for programs of scientific and technological cooperation, which include—

"(1) assistance to developing countries to strengthen their own scientific and technological capacity in order for such countries to undertake the research and experimentation necessary for development;

"(2) support for research, in the United States and in developing countries, on critical development problems, with emphasis on research relating to technologies which are labor-intensive or which do not generate additional unemployment or underemployment and with emphasis on those problems which are the greatest impediment to improvement in the lives of the majority of the poor;

"(3) fostering the exchange of scientists and other technological experts with developing countries, and other forms of exchange and communication, to promote the joint solution of problems of mutual concern to the United States and developing countries;

"(4) advice and assistance to other agencies of the United States Government in planning and executing policies and programs of scientific and technological cooperation with developing countries;

"(5) facilitation of the participation of institutions, businesses, and individuals from the United States private sector in scientific and technological cooperation with developing countries; and

"(6) gathering, analyzing, and disseminating information relevant to the scientific and technological needs of developing countries.

"(b) There are authorized to be appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $10,000,000 for the fiscal year 1982, which are authorized to remain available until expended.".

UNITED NATIONS DECADE FOR WOMEN

SEC. 306. Section 113 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(c) For the fiscal year 1982, not less than $500,000 of the funds appropriated for this chapter shall be expended on international programs which support the original goals of the United Nations Decade for Women.".

HUMAN RIGHTS

SEC. 307. The first sentence of section 116(e) of the Foreign Assistance Act of 1961 is amended by striking out "not less than $1,500,000 of the" and "for the fiscal year 1981".

TROPICAL FOREST DESTRUCTION AND LOSS

SEC. 308. Section 118 of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following new subsection:

"(c)(1) In enacting section 103(b)(3) of this Act the Congress recognized the importance of forests and tree cover to the developing countries. The Congress is particularly concerned about the continuing and accelerating alteration, destruction, and loss of tropical forests in developing countries. Tropical forests constitute a major world resource. Their destruction and loss pose a serious threat to development and the environment in developing countries. Tropical forest destruction and loss result in shortages of wood, especially wood for fuel; siltation of lakes, reservoirs and irrigation systems; floods; destruction of indigenous peoples; extinction of plant and animal species; reduced capacity for food production; and loss of genetic resources; and can result in desertification and in destabilization of the Earth's climate. Properly managed tropical forests provide a sustained source of fiber and other commodities essential to the economic growth of developing countries.

"(2) The concerns expressed in paragraph (1) and the recommendations of the United States Interagency Task Force on Tropical Forests shall be considered by the President—

"(A) in formulating and carrying out programs and policies with respect to developing countries, including those relating to bilateral and multilateral assistance and those relating to private sector activities, and

"(B) in seeking opportunities to coordinate public and private development and investment activities which affect forests in developing countries.

"(3) It is the sense of the Congress that the President should instruct the representatives of the United States to the United Nations and to other appropriate international organizations to urge—

"(A) that higher priority be given in the programs of these organizations to the problems of tropical forest alteration and loss, and

"(B) that there be improved cooperation and coordination among these organizations with respect to tropical forest activities.".

SAHEL DEVELOPMENT PROGRAM—IMPLEMENTATION

SEC. 309. (a) Section 121(c) of the Foreign Assistance Act of 1961 is amended by inserting after the third sentence the following new sentence: "In addition to the amounts authorized to be appropriated in the preceding sentences and to funds otherwise available for such purposes, there are authorized to be appropriated to the President for purposes of this section $102,000,000 for the fiscal year 1982.".

(b) Section 121 of such Act is amended by adding at the end thereof the following new subsection:

"(d) Funds available to carry out this section (including foreign currencies acquired with funds appropriated to carry out this section) may not be made available to any foreign government for disbursement unless the Administrator of the Agency for International Development determines that the foreign government will maintain a system of accounts with respect to those funds which will provide adequate identification of and control over the receipt and expenditure of those funds.".

PRIVATE VOLUNTARY ORGANIZATIONS

SEC. 310. Section 123 of the Foreign Assistance Act of 1961 is amended—

(1) by redesignating subsection (a) as subsection (a)(1); and

(2) by adding at the end of subsection (a)(1), as redesignated by paragraph (1), the following:

"(2) Of the total amounts authorized to be appropriated to the President under sections 103(a)(2), 104(g)(1) and (2), 105(a), 106(e)(1), 121(c), and 492, not less than 16 per centum shall be made available for the activities of private voluntary organizations. The President shall prepare an annual report concerning implementation of this paragraph, which shall be submitted as part of the report required by section 634 of this Act.".

INTERNATIONAL ORGANIZATIONS AND PROGRAM

SEC. 311. (a) Section 301(f) of the Foreign Assistance Act of 1961 is amended—

(1) by inserting "and the International Food Policy Research Institute" after "International Fertilizer Development Center"; and

(2) by inserting "and the Institute" after "the Center".

(b) Section 302(a)(1) of the Foreign Assistance Act of 1961 is amended by striking out "$233,350,000 for the fiscal year 1981" and inserting in lieu thereof "$229,050,000 for the fiscal year 1982. Of the funds appropriated pursuant to the authorities of this section in fiscal year 1982, not less than 19.6 per centum of the total appropriated or up to $45,000,000 shall be available only for the United Nation's Children's Fund, not less than 58.7 per centum of the total appropriated or up to $134,500,000 shall be available only for the United Nations Development Fund, and not less than 4.4 per centum of the total appropriated or up to $10,000,000 shall be available only for the United Nations Environmental Program.".

TRADE AND DEVELOPMENT PROGRAMS

SEC. 312. (a) The section caption of section 661 of the Foreign Assistance Act of 1961 is amended by striking out "REIMBURSABLE DEVELOPMENT PROGRAMS" and inserting in lieu thereof "TRADE AND DEVELOPMENT PROGRAMS".

(b) Section 661 of such Act is amended—

(1) by inserting "(a)" immediately before "The President";

(2) in the first sentence by striking out "to use $4,000,000 of the funds made available for the fiscal year 1981 for purposes of this Act"; and

(3) by adding at the end thereof the following new subsection:

"(b) There are authorized to be appropriated to the President for purposes of this section, in addition to funds otherwise available for such purposes, $6,907,000 for the fiscal year 1982.".

HOUSING GUARANTY PROGRAMS

SEC. 313. (a) The third sentence of section 222(a) of the Foreign Assistance Act of 1961 is amended by striking out "September 30, 1982" and inserting in lieu thereof "September 30, 1983".

(b) Section 223(b) of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following: "There shall be established in the Treasury of the United States a revolving fund account into which all of the fees referred to in this section, together with any accrued earnings thereon, and any other income arising from guaranty operations under this title shall be deposited. All funds in such account may be invested in obligations of the United States. Any interest or other receipts derived from such investments will be credited to such account and may be used for the purposes cited in this section.".

TITLE IV—OTHER ASSISTANCE PROGRAMS

AMERICAN SCHOOLS AND HOSPITALS ABROAD

SEC. 401. Section 214(c) of the Foreign Assistance Act of 1961 is amended by striking out "$30,000,000 for the fiscal year 1981" and inserting in lieu thereof "$12,000,000 for the fiscal year 1982".

INTERNATIONAL DISASTER ASSISTANCE

SEC. 402. Section 492(a) the Foreign Assistance Act of 1961 is amended by striking out "$25,000,000 for the fiscal year 1981" and inserting in lieu thereof "$27,000,000 for the fiscal year 1982".

INTERNATIONAL NARCOTICS CONTROL

SEC. 403. (a) Section 481(d) of the Foreign Assistance Act of 1961 is amended to read as follows:

"(d)(1) The Secretary of State shall inform the Secretary of Health and Human Services of the use or intended use by any country or international organization of any herbicide to eradicate marihuana in a program receiving assistance under this chapter.

"(2) The Secretary of Health and Human Services shall monitor the impact on the health of persons who may use or consume marihuana of the spraying of a herbicide to eradicate such marihuana in a program receiving assistance under this chapter, and if he determines that such persons are exposed to amounts of such herbicide which are harmful to their health, he shall prepare and transmit a report to the Congress setting forth such determination together with any recommendations he may make.

"(3) Of the funds authorized to be appropriated for the fiscal year 1982 under section 482, not less than $100,000 shall be used to develop a substance that clearly and readily warns potential users and consumers of marihuana that it has been sprayed with the herbicide paraquat.

"(4) If the Secretary of Agriculture determines that a substance has been developed that clearly and readily warns potential users and consumers of marihuana that it has been sprayed with the herbicide paraquat, such substance shall be used in conjunction with the spraying of paraquat in any program receiving assistance under this chapter.".

(b) Section 482(a) of such Act is amended to read as follows:

"(a)(1) To carry out the purposes of section 481, there are authorized to be appropriated to the President $37,700,000 for the fiscal year 1982.

"(2) Amounts appropriated under this subsection are authorized to remain available until expended.".

TITLE V—PEACE CORPS

PART A—PEACE CORPS AUTONOMY

SEC. 501. This part may be cited as the "Peace Corps Autonomy Act".

ESTABLISHMENT AS AN INDEPENDENT AGENCY

SEC. 502. Effective on the date of enactment of this Act, the Peace Corps shall be an independent agency within the executive branch and shall not be an agency within the ACTION Agency or any other department or agency of the United States.

TRANSFER OF FUNCTIONS

SEC. 503. (a) There are transferred to the Director of the Peace Corps all functions relating to the Peace Corps which were vested in the Director of the ACTION Agency on the day before the date of enactment of this Act.

(b)(1) All personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds as are determined by the Director of the Office of Management and Budget, after consultation with the Comptroller General of the United States, the Director of the Peace Corps, and the Director of the ACTION Agency, to be employed, held, or used primarily in connection with any function relating to the Peace Corps before the date of the enactment of this Act are transferred to the Peace Corps. The transfer of unexpended balances pursuant to the preceding sentence shall be subject to section 202 of the Budget and Accounting Procedures Act of 1950 (31 U.S.C. 581c).

(2)(A) The transfer pursuant to this section of full-time personnel (except special Government employees) and parttime personnel holding permanent positions shall not cause any employee to be separated or reduced in rank, class, grade, or compensation, or otherwise suffer a loss of employment benefits for one year after—

(i) the date on which the Director of the Office of Management and Budget submits the report required under section 606, or

(ii) the effective date of the transfer of such employee,

whichever occurs later.

(B) The personnel transferred pursuant to this section shall, to the maximum extent feasible, be assigned to such related functions and organizational units in the Peace Corps as such personnel were assigned to immediately before the date of enactment of this Act.

(C) Collective-bargaining agreements in effect on the date of enactment of this Act covering personnel transferred pursuant to this section or employed on such date by the Peace Corps shall continue to be recognized by the Peace Corps until the termination date of such agreements or until a mutual modification by the parties otherwise specifies.

(3) Under such regulations as the President may prescribe, each person who does not hold an appointment under section 7(a)(2) of the Peace Corps Act and who is determined under paragraph (1) to be employed primarily in connection with any function relating to the Peace Corps shall, effective on the date of enactment of this Act, be appointed a member of the Foreign Service under the authority of section 7(a)(2) of the Peace Corps Act, and be appointed or assigned to an appropriate class thereof, except that—

(A) no person who holds a career or career-conditional appointment immediately before such date shall, without the consent of such person, be so appointed until three years after such date, during which period such person not consenting to be so appointed may continue to hold such career or career-conditional appointment; and

(B) each person so appointed who, immediately before such date, held a career or career-conditional appointment at grade 8 or below of the General Schedule established by section 5332 of title 5, United States Code, shall be appointed a member of the Foreign Service for the duration of operations under the Peace Corps Act.

Each person appointed under this paragraph shall receive basic compensation at the rate of such person's class determined by the President to be appropriate, except that the rate of basic compensation received by such person immediately before the effective date of such person's appointment under this paragraph shall not be reduced as a result of the provisions of this paragraph.

DIRECTOR OF THE PEACE CORPS

SEC. 504. Section 4(b) of the Peace Corps Act (22 U.S.C. 2503(b)) is amended by striking out "such agency or officer of the United States Government as he shall direct. The head of any such agency or any such officer" and inserting in lieu thereof "the Director of the Peace Corps. The Director of the Peace Corps".

TECHNICAL AMENDMENTS

SEC. 505. (a) Section 3 of the Peace Corps Act (22 U.S.C. 2502) is amended by—

(1) repealing subsections (d), (e), and (f); and

(2) redesignating subsection (g) as subsection (d).

(b) The repeal of provisions of law made by subsection (a) of this section shall not affect (1) the validity of any action taken under the repealed provisions before the date of the enactment of this Act, or (2) the liability of any person for any payment described in such subsection (f).

REPORTS

SEC. 506. (a) Not later than the thirtieth day after the date of enactment of this Act, the Director of the Office of Management and Budget shall submit to the appropriate committees of the Congress and to the Comptroller General a report regarding the steps taken in implementation of the provisions of this part, including descriptions of the manner in which various administrative matters are disposed of, such as matters relating to personnel, assets, liabilities, contracts, property, records, and unexpended balances of appropriations, authorizations, allocations, and other funds employed, used, held, available, or to be made available in connection with functions or activities relating to the Peace Corps.

(b) Not later than the forty-fifth day after the date of the enactment of this Act, the Comptroller General shall submit to such committees a report stating whether, in the judgment of the Comptroller General, determinations made by the Director of the Office of Management and Budget under section 503(b)(1) were equitable.

REFERENCES IN LAW

SEC. 507. References in any statute, reorganization plan, Executive order, regulation, or other official document or proceeding to the ACTION Agency or the Director of the ACTION Agency with respect to functions or activities relating to the Peace Corps shall be deemed to refer to the Peace Corps or the Director of the Peace Corps, respectively.

PART B—PEACE CORPS ACT AMENDMENTS

AUTHORIZATION OF APPROPRIATIONS

SEC. 511. Section 3 of the Peace Corps Act, as amended by section 505 of this title, is further amended—

(1) by striking out in subsection (b) "fiscal year 1981 not to exceed $118,000,000" and inserting in lieu thereof "the fiscal year 1982, not to exceed $105,000,000"; and

(2) by inserting in subsection (c) "and fiscal year 1982" after "fiscal year 1981".

INTEGRATION OF DISABLED PEOPLE

SEC. 512. Section 3 of the Peace Corps Act, as amended by sections 505 and 511 of this title, is further amended by adding at the end thereof the following new subsection:

"(e) In recognition of the more than four hundred million disabled people in the world, 95 per centum of whom are among the poorest of the poor, the Peace Corps shall be administered so as to give particular attention to programs, projects, and activities which tend to integrate disabled people into the national economies of developing countries, thus improving their status and assisting the total development effort.".

MALPRACTICE LIABILITY INSURANCE

SEC. 513. (a) Section 5(h) of the Peace Corps Act is amended by striking out the last two sentences.

(b) Section 10 of such Act is amended by adding at the end thereof the following new subsection:

"(1) The provisions of section 30 of the State Department Basic Authorities Act of 1956 shall apply to volunteers and persons employed, appointed, or assigned under this Act. For purposes of this subsection, references to the Secretary in subsection (b) of such section shall be deemed to be references to the Director of the Peace Corps and references to the Secretary in subsection (f) of such section shall be deemed to be references to the President. For purposes of subsection (g) of such section, a Peace Corps representative shall be deemed to be a principal representative of the United States.".

TECHNICAL AMENDMENTS

SEC. 514. (a) Section 9 of the Peace Corps Act is amended by striking out "section 10(a)(4)" and by inserting in lieu thereof "section 10(a)(5)".

(b) Section 18 of such Act (22 U.S.C. 2517) is repealed.

READJUSTMENT ALLOWANCE

SEC. 515. The first sentence of section 5(c) of the Peace Corps Act is amended by striking out "at a rate not to exceed $125".

TITLE VI—FOOD FOR PEACE PROGRAMS

REPEAL OF OBSOLETE FOREIGN CURRENCY PROVISIONS

SEC. 601. The Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in section 101, by striking out "for foreign currencies" and inserting in lieu thereof ", to the extent that sales for dollars under the terms applicable to such sales are not possible, for foreign currencies on credit terms and on terms which permit conversion to dollars at the exchange rate applicable to the sales agreement";

(2) by amending section 103(b) to read as follows:

"(b) except there the President determines that it would be inconsistent with the objectives of this Act, determine the amount of foreign currencies needed for the uses specified in subsections (a), (b), (e), and (h) of section 104 and in title III, and the agreements for credit sales shall provide for payment of such amounts in dollars or in foreign currencies upon delivery of the agricultural commodities; and such payment may be considered as an advance payment of the earliest installments;";

(3) in section 103(d), by striking out "(1)" and by striking out ", or (2) for the purpose only of sales of agricultural commodities for foreign currencies under title I of this Act, any country or area dominated by a Communist government";

(4) in section 103(1), by striking out "obtain commitments from friendly" and all that follows through "United States of America, and";

(5) in section 104—

(A) in the text preceding subsection (a), by striking out "this title" and inserting in lieu thereof "agreements for such sales entered into prior to January 1, 1972,"; and

(B) in paragraph (3) of the proviso following subsection (k), by striking out "(except as provided in subsection (c) of this section),";

(6) in section 106(a)—

(A) by inserting "(1)" after "(a)"; and

(B) by adding at the end thereof the following:

"(2) Payment by any friendly country for commodities purchased for foreign currencies on credit terms and on terms which permit conversion to dollars shall be upon terms no less favorable to the United States than those for development loans made under section 122 of the Foreign Assistance Act of 1961.";

(7) by repealing section 108; and

(8) by repealing section 109(b).

EMERGENCY OR EXTRAORDINARY RELIEF REQUIREMENTS

SEC. 602. Section 104(d) of the Agricultural Trade Development and Assistance Act of 1954 is amended by striking out "$5,000,000" and inserting in lieu thereof "$10,000,000".

SELF-HELP MEASURES TO INCREASE AGRICULTURAL PRODUCTION

SEC. 603. Section 109(a) of the Agricultural Trade Development and Assistance Act of 1954 is amended—

(1) in paragraph (3), by inserting immediately before the semicolon ", and reducing illiteracy among the rural poor";

(2) by striking out the period at the end of paragraph (10) and inserting in lieu thereof "; and"; and

(3) by inserting the following new paragraph immediately after paragraph (10):

"(11) carrying out programs to improve the health of the rural poor.".

ASSESSMENT OF SELF-HELP PROVISIONS

SEC. 604. Section 109 of the Agricultural Trade Development and Assistance Act of 1954 is amended by adding at the end thereof the following new subsection:

"(d)(1) In each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake shall be described (A) to the maximum feasible extent, in specific and measurable terms, and (B) in a manner which ensures that the needy people in the recipient country will be the major beneficiaries of the self-help measures pursuant to each agreement.

"(2) The President shall, to the maximum extent feasible, take appropriate steps to assure that, in each agreement entered into under this title and in each amendment to such an agreement, the economic development and self-help measures which the recipient country agrees to undertake are additional to the measures which the recipient country otherwise is undertaking irrespective of that agreement or amendment.

"(3) The President shall take all appropriate steps to detemine whether the economic development and self-help provisions of each agreement entered into under this title, and of each amendment to such an agreement, are being fully carried out.".

TITLE VII—MISCELLANEOUS PROVISIONS

OPERATING EXPENSES

SEC. 701. Section 667(a) of the Foreign Assistance Act of 1961 is amended—

(1) in the text above paragraph (1), by striking out "fiscal year 1981" and inserting in lieu thereof "fiscal year 1982"; and

(2) in paragraph (1), by striking out "$293,800,000" and inserting in lieu thereof "$330,972,000".

CONSTRUCTION OF PRODUCTIVE ENTERPRISES IN EGYPT

SEC. 702. The first sentence of section 602(k) of the Foreign Assistance Act of 1961 is amended by striking out "for fiscal year 1977, fiscal year 1980, or fiscal year 1981".

COMPENSATION FOR PARTICIPATING AGENCY EMPLOYEES

SEC. 703. The first sentence of section 625(d) of the Foreign Assistance Act of 1961 is amended by striking out "together with allowances and benefits under that Act" and inserting in lieu thereof "or under chapter 53 of title 5, United States Code, or at any other rate authorized by law, together with allowances and benefits under the Foreign Service Act of 1980".

MISSIONS AND STAFFS ABROAD

SEC. 704. Section 631(b) of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following sentence: "Such deputy shall be entitled to receive such compensation and allowances as are authorized by the Foreign Service Act of 1980, not to exceed those authorized for a member of the Senior Foreign Service, as the President shall determine to be appropriate.".

NOTIFICATION OF PROGRAM CHANGES

SEC. 705. Section 634A of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following: "Such notification shall specify—

"(1) the nature and purpose of such proposed obligation;

"(2) the nature and current use of the appropriated funds for such proposed obligation;

"(3) the reasons that such proposed obligation could not be made out of funds which might be appropriated pursuant to a request for supplemental appropriations during the remainder of the respective fiscal year; and

"(4) the national interest of the United States in such proposed obligation.".

ABOLISHMENT OF THE UNITED STATES INTERNATIONAL DEVELOPMENT COOPERATION AGENCY

SEC. 706. (a)(1) There are transferred to the Administrator of the Agency for International Development all functions of the Director of the United States International Development Cooperation Agency under section 407 of the Agricultural Trade Development and Assistance Act of 1954, section 602 of the International Security Assistance and Arms Export Control Act of 1976, and sections 233(b), 296(e), 297(d), 298(c)(6), 299(d), 601(c), and 624(f)(2)(C) of the Foreign Assistance Act of 1961.

(2) There are transferred to the Administrator of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961 all functions of the Director of the United States International Development Cooperation Agency under sections 125, 601(e)(2), and 640B of the Foreign Assistance Act of 1961.

(3) There are transferred to the Agency for International Development the functions of the Director of the United States International Development Cooperation Agency under section 706 of the Foreign Relations Authorization Act, Fiscal Year 1979, and sections 239(i) and 601(d) of the Foreign Assistance Act of 1961.

(4) There are transferred to the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961 all functions of the Director under sections 101(b) (other than policy guidance), 119, and 531(a)(2) of the Foreign Assistance Act of 1961.

(5) There are transferred to the Administrator of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961 all other functions of the Director of the United States International Development Cooperation Agency which were vested in him by Reorganization Plan No. 2 of 1979 and which are not transferred under paragraph (1), (2), (3), or (4) of this subsection or under subsection (b).

(6) In addition to the officers in the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961, appointed by the President under section 624(a) of such Act, the President may appoint, by and with the advice and consent of the Senate, one additional officer in such agency.

(b) There are transferred to the Secretary of State all functions of the Director of the United States International Development Cooperation Agency under section 901 of the Act of October 3, 1977 (Public Law 95–118), under section 101(b) of the Foreign Assistance Act of 1961 (insofar as such function relates to policy guidance other than foreign policy guidance), and under section 622(c) of such Act (insofar as such function relates to development assistance).

(c) (1) Any function of the President delegated by any order, determination, rule, regulation, or other directive issued by the President under the authority of Reorganization Plan No. 2 of 1979, or issued by the President under the authority of any other provision of law, which relates to the Director of the United States International Development Cooperation Agency, to his functions, or to such Agency, is transferred to the President, except that all functions of the President delegated to the Director under section 1–102(d) of Executive Order 12163, dated September 29, 1979, are transferred to the Bureau of International Organization Affairs of the Department of State.

(2) The Agency referred to in paragraph (1) is abolished.

(d) (1) Subject to the provisions of section 202 of the Budget and Accounting Procedures Act of 1950, there are transferred to the Agency for International Development so much of the personnel, property, records, and unexpended balances of appropriations, allocations and other funds determined by the Director of the Office of Management and Budget to be employed, used, held, available, or to be made available in connection with a function of the Director of the United States International Development Cooperation Agency transferred under this Act.

(2) The transfer pursuant to this Act of full-time personnel (except special Government employees) and part-time personnel holding permanent positions shall not cause any employee to be separated or reduced in grade or compensation for one year after the effective date of this Act.

(3) For purposes of this subsection, the term "personnel" does not include an individual appointed by the President, by and with the advice and consent of the Senate, to a position established by Reorganization Plan No. 2 of 1979.

(e) (1) No action or other proceeding lawfully commenced by or against the United States International Development Cooperation Agency or by the Director, acting in his official capacity, shall abate by reason of any transfer under this Act.

(2) Except as provided in paragraph (3)—

(A) the provision of this section shall not affect actions begun before the date of enactment of this section; and

(B) in all such actions, proceedings shall be had, appeals taken, and judgments rendered in the same manner and effect as if this section had not been enacted.

(3) If, before the date of enactment of this section, the United States International Development Cooperation Agency, or any officer thereof in the official capacity of such officer, is a party to an action, such action shall be continued with the Agency for International Development or an appropriate official of such Agency substituted or added as a party.

(4) Except as provided in subsection (c), any order, determination, rule, regulation, grant, contract, or agreement which is issued, granted, made, undertaken, or entered into in the preformance of any function transferred under this section and which is in effect on the date of enactment of this section shall continue in effect according to its terms until modified, terminated, superseded, set aside, or revoked in accordance with law by any authorized official, a court of competent jurisdiction, or by operation of law.

(f) (1) (A) The International Security and Development Cooperation Act of 1980 is amended—

(i) in section 316(a)—

(I) by striking out in the first sentence "Director of the United States International Development Cooperation Agency" and inserting in lieu thereof "Administrator of the agency primarily responsible for administering part I of the Foreign Assistance Act of 1961"; and

(II) by striking out in the second sentence "Director" and inserting in lieu thereof "Administrator"; and

(ii) in section 316(b), by striking out "Director" and inserting in lieu thereof "Administrator".

(B) Section 624(g) of the Foreign Assistance Act of 1961 is amended—

(i) in paragraph (3), by striking out the second sentence;

(ii) in paragraph (4), by striking out "and the Director"; and

(iii) in paragraph (9)(A), by striking out "or under the United States International Development Cooperation Agency" and inserting in lieu thereof "the Agency for International Development or the Overseas Private Investment Corporation".

(2) Any reference not amended by paragraph (1) in any other law to the Director of the United States International Development Cooperation Agency or to such Agency shall be deemed to be a reference to the Administrator of the Agency for International Development or to the Agency for International Development, as the case may be.

EL SALVADOR

SEC. 707. (a) The Congress finds that peaceful and democratic development in Central America is in the interest of the United States and of the Community of American States generally, that the recent civil strife in El Salvador has caused great human sufferings and disruption to the economy of that country, and that substantial external assistance to El Salvador is necessary to help alleviate that suffering and to promote economic recovery within a peaceful and democratic process. In fiscal year 1982 and 1983 funds may be obligated for assistance for El Salvador under chapter 2 or 5 of part II of the Foreign Assistance Act of 1961, letters of offer may be issued and credits and guaranties may be extended for El Salvador under the Arms Export Control Act, and members of the Armed Forces may be assigned or detailed to El Salvador to carry out functions under the Foreign Assistance Act of 1961 or the Arms Export Control Act, only if every one hundred and eighty days after enactment of this Act, the President makes a certification in accordance with subsection (c).

(b) If the President does not make such a certification, then the President shall immediately—

(1) suspend all expenditures of funds and other deliveries of assistance for El Salvador which were obligated under chapters 2 and 5 of part II of the Foreign Assistance Act of 1961 after the date of enactment of this Act;

(2) withhold all approvals for use of credits and guaranties for El Salvador which were extended under the Arms Export Control Act after the date of enactment of this Act;

(3) suspend all deliveries of defense articles, defense services, and design and construction services to El Salvador which were sold under the Arms Export Control Act after the date of enactment of this Act; and

(4) order the prompt withdrawal from El Salvador of all members of the Armed Forces performing defense services, conducting international military education and training activities, or performing management functions under section 515 of the Foreign Assistance Act of 1961.

Any suspension of assistance pursuant to paragraphs (1) through (4) of this subsection shall remain in effect during fiscal year 1982 until such time as the President makes a certification in accordance with subsection (c).

(c) The certification required by subsections (a) and (b) is a certification by the President to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate of a determination that the Government of El Salvador, to the extent not precluded by forces outside its control—

(1) is making a concerted and significant effort to control gross violations of internationally recognized human rights;

(2) is moving to achieve control over all elements of its own armed forces, so as to bring to an end the indiscriminate torture and murder of Salvadoran citizens by these forces;

(3) is making continued progress in implementing essential economic and political reforms, including the land reform program;

(4) is committed to the holding of free elections at an early date and to that end has demonstrated its willingness to negotiate an equitable political resolution of the conflict with any group which renounces and refrains from further military or paramilitary opposition activity.

Each such certification shall discuss fully and completely the justification for making each of the determinations required by paragraphs (1) through (4).

(d) On making the first certification under subsection (a) of this section, the President shall also certify to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate that he has determined that the Government of El Salvador has made good faith efforts both to investigate the murders of the six United States citizens in El Salvador in December 1980 and January 1981 and to bring to justice those responsible for those murders.

ARGENTINA

SEC. 708. (a) Section 620B of the Foreign Assistance Act of 1961, relating to Argentina, is repealed.

(b) Notwithstanding any other provision of law—

(1) no assistance may be furnished under chapter 2, 4, 5, or 6 of part II of the Foreign Assistance Act of 1961 to Argentina;

(2) no sales of defense articles or services may be made under the Arms Export Control Act to Argentina;

(3) no credits (including participation in credits) may be extended and no loan may be guaranteed under the Arms Export Control Act with respect to Argentina; and

(4) no export licenses may be issued under section 38 of the Arms Export Control Act to or for the Government of Argentina,

unless and until the President submits to the Speaker of the House of Representatives and the chairman of the Committee on For-

eign Relations of the Senate a detailed report certifying—

(A) that the Government of Argentina has made significant progress in complying with internationally recognized principles of human rights; and

(B) that the provision of such assistance, articles, or services is in the national interest of the United States.

ANGOLA

SEC. 709. (a) Section 118 of the International Security and Development Cooperation Act of 1980, relating to Angola, is repealed.

(b) Nothing in this section shall be construed to be an endorsement by Congress of the provision of assistance for the purpose, or which would have the effect, of promoting or augmenting, directly or indirectly, the capacity of any nation, group, organization, movement, or individual to conduct military or paramilitary operations in Angola.

CONSOLIDATED REPORTS: ARMS EXPORT CONTROL ACT

SEC. 710. Section 25 of the Arms Export Control Act is amended to read as follows:

"SEC. 25. ANNUAL ESTIMATE AND JUSTIFICATION FOR SALES PROGRAM.—(a) No later than February 1 of each year, the President shall transmit to the Congress, as a part of the annual presentation materials for security assistance programs proposed for the next fiscal year, a report which sets forth—

"(1) an Arms Sales Proposal covering all sales and licensed commercial exports under this Act of major weapons or weapons-related defense equipment for $7,000,000 or more, or of any other weapons or weapons-related defense equipment for $25,000,000 or more, which are considered eligible for approval during the current calendar year, together with an indication of which sales and licensed commercial exports are deemed most likely actually to result in the issuance of a letter of offer or of an export license during such year;

"(2) an estimate of the total amount of sales and licensed commercial exports expected to be made to each foreign nation from the United States;

"(3) the United States national security considerations involved in expected sales or licensed commercial exports to each country, an analysis of the relationship between anticipated sales to each country and arms control efforts concerning such country and an analysis of the impact of such anticipated sales on the stability of the region that includes such country;

"(4) an estimate with regard to the international volume of arms traffic to and from nations purchasing arms in (1) and (2) above together with best estimates of the sale and delivery of weapons and weapons-related defense equipment by all major arms suppliers to all major recipient countries during the preceding fiscal year;

"(5) the aggregate dollar value and quantity of defense articles and defense services, and of military education and training, furnished by the United States to each foreign country and international organization, by category, specifying whether they were furnished by grant under chapter 2 of the Arms Export Control Act, by commercial sale licensed under section 38 of that Act, or by other authority;

"(6) a list of all letters of offer, and licenses to export, issued under this Act during the previous calendar year for major defense equipment valued at $7,000,000 or more or any defense articles or defense services valued at $25,000,000 or more, indicating which of such letters of offer and licenses to export were not the subject of a listing under paragraph (1) of this subsection and, with respect to letters of offer, which of them either had not been accepted or had been canceled;

"(7) (A) an estimate of the number of officers and employees of the United States Government and of United States civilian contract personnel present in each such country at the end of the preceding fiscal year for assignments in implementation of sales and commercial exports under this Act;

"(B) an analysis and description of the services performed during the preceding fiscal year by officers and employees of the United States Government carrying out functions on a full-time basis under this Act for which reimbursement is provided under section 43(b) or section 21(a) of this Act, including the number of personnel involved in performing such services;

"(8) a description of each payment, contribution, gift, commission, or fee reported to the Secretary of State under section 39, including—

"(A) the name of the person who made such payment, contribution, gift, commission, or fee;

"(B) the name of any sales agent or other person to whom such payment, contribution, gift, commission, or fee was paid;

"(C) the date and amount of such payment, contribution, gift, commission, or fee;

"(D) a description of the sale in connection with which such payment, contribution, gift, commission, or fee was paid; and

"(E) the identification of any business information considered confidential by the person submitting it which is included in the report, for the preceding fiscal year;

(9) a listing of each sale under section 29 during the past fiscal year, specifying (A) the purchaser, (B) the United States Government department or agency responsible for implementing the sale, (C) an estimate of the dollar amount of the sale, and (D) a general description of the real property facilities to be constructed pursuant to such sale;

"(10) a listing of all property valued at $1,000,000 or more which was leased to a foreign government for a period of more than six months under chapter 6 of this Act;

"(11) the total amount of funds in the reserve under section 24(c) at the end of the fiscal year immediately preceding the fiscal year in which a report under this section is made, together with an assessment of the adequacy of such total amount of funds as a reserve for the payment of claims under guaranties issued pursuant to section 24 in view of the current debt servicing capacity of borrowing countries, as reported to the Congress pursuant to section 634(a)(5) of the Foreign Assistance Act of 1961;

"(12) a list of all countries with respect to which findings made by the President pursuant to section 3(a)(1) of this Act are in effect on the date of such transmission;

"(13) the progress made under the program of the Republic of Korea to modernize its armed forces, the role of the United States in mutual security efforts in the Republic of Korea and the military balance between the People's Republic of Korea and the Republic of Korea;

"(14) the amount and nature of Soviet military assistance to the armed forces of Cuba during the preceding fiscal year and the military capabilities of those armed forces;

"(15) the status of each loan and each contract of guaranty or insurance theretofore made under the Foreign Assistance Act of 1961, as amended, predecessor Acts, or any Act authorizing international security assistance, with respect to which there remains outstanding any unpaid obligation or potential liability; the status of each extension of credit for the procurement of defense articles or defense services, and of each contract of guarantee in connection with any such procurement, theretofore made under the Arms Export Control Act with respect to which there remains outstanding any unpaid obligations or potential liability;

"(16) a list of all defense requirement surveys authorized during the preceding calendar year, specifying the country with respect to which the survey was or will be conducted, the purpose of the survey, and the number of United States Government personnel who participate or will participate in the survey; and

"(17) such other information as the President may deem necessary.

"(b) Not later than thirty days following the receipt of a request made by the Committee on Foreign Relations of the Senate or the Committee on Foreign Affairs of the House of Representatives for additional information with respect to any information submitted pursuant to subsection (a), the President shall submit such information to such committee.

"(c) The President shall make every effort to submit all of the information required by subsection (a) or (b) wholly in unclassified form. Whenever the President submits any such information in classified form, he shall submit such classified information in an addendum and shall also submit simultaneously a detailed summary, in unclassified form of such classified information.".

CONSOLIDATED REPORTS: FOREIGN ASSISTANCE ACT OF 1961

SEC. 711. (a) Section 634 of the Foreign Assistance Act of 1961 is amended—

(1) by amending the first sentence to read as follows: "In order that the Congress and the American people may be better and more currently informed regarding American foreign policy, and the effectiveness of assistance provided by the United States Government to other countries and to international organizations, the President shall prepare and transmit to the Congress, no later than February 1 of each year, as a part of the annual presentation materials for foreign assistance, a report as described in this subsection. This report shall include—";

(2) in paragraph (1)(B), by striking out the progress developing countries are making toward achieving those objectives which are indicative of improved well-being of the poor majority, which objectives shall include but not be limited to";

(3) in paragraph (2)—

(A) by striking out "and" at the end of clause (D);

(B) by adding "and" at the end of clause (E); and

(C) by adding at the end thereof the following:

"(F) of any contract in excess of $100,000 administered by the Agency for International Development which was entered into in the preceding fiscal year without competitive selection procedures, and the reasons for doing so;";

(4) by amending paragraph (4) to read as follows:

"(4) the status of each sale of agricultural commodities on credit terms, theretofore made under the Agricultural Trade Development and Assistance Act of 1954 with respect to which there remains outstanding any unpaid obligation; and the status of each transaction with respect to which a loan, contract or guarantee of insurance, or extension of credit (or participation therein) was theretofore made under the Export-Import Bank Act of 1945 with respect to which there remains outstanding any unpaid obligation or potential liability; except that such report shall include individually only any loan, contract, sale, extension of credit, or other transactions listed in this paragraph which is in excess of $1,000,000;"; and

(5) by amending paragraph (8) to read as follows:

"(8) the allocation of the United States contribution to the Sahel Development Program, the extent of the contributions from other donor countries, the effectiveness of the integrated effort through the Club des Amis du Sahel, and the progress made in achieving the objectives of the Program;

"(9) the activities carried out pursuant to sections 296 through 299 of this Act including activities during the preceding fiscal year and containing a projection of programs and activities to be conducted during the subsequent five fiscal years. This information shall contain a summary of the activities of the Board for International Food and Agricultural Development established pursuant to section 298 of this Act and may include the separate views of the Board with respect to any aspect of the programs conducted or proposed to be conducted under sections 296 through 299;

"(10) all voluntary contributions by the United States Government to international organizations in the preceding fiscal year. This information shall specify the Government agency making the voluntary contribution, the international organization to which the contribution was made, the amount and form of the contribution, and the purpose of the contribution. It shall include actions taken by the international financial institutions and the United Nations Development Program to improve the evaluations of projects and programs conducted by these institutions. It shall also include evaluations by the President and the Comptroller General of reports received by United States representatives to international organizations and actions taken as a result of recommendations contained therein. Contributions shall be listed on both an agency-by-agency basis and an organization-by-organization basis. 'Contribution' shall be understood to include the furnishing of funds or other financial support, services of any kind (including the use of experts or other personnel), commodities, equipment, supplies, or other material;

"(11) the programing and obligation of funds under chapter 8 of part I of this Act, as well as the activities and operations carried out under such chapter in the preceding fiscal year. Information shall include, but not be limited to—

"(A) the status of each agreement concluded with other countries to carry out the purposes of such chapter; and

"(B) the aggregate of obligations and expenditures made, and the types and quantity of equipment provided—

"(i) to carry out the purposes of such chapter with respect to each country and each international organization receiving assistance under such chapter including the cost of United States personnel engaged in carrying out such purposes in each such country and with each such international organization;

"(ii) to carry out each program conducted under such chapter in each country and by each international organization, including the cost of United States personnel engaged in carrying out each such program; and

"(iii) for administrative support services within the United States to carry out the purposes of such chapter, including cost of United States personnel engaged in carrying out such purposes in the United States;

"(C) the status of the United States policy to establish and encourage an international strategy to prevent the illicit production of and to interdict and intercept trafficking in narcotics;

"(12)(A) a full and complete description of the practices regarding the observance of and respect for internationally recognized human rights (within the meaning of sections 116(a) and 502B of this Act) in each country proposed as a recipient of foreign assistance and in all other countries which are members of the United Nations, with consideration being given to (i) relevant findings of appropriate international organizations, including nongovernmental organizations such as the International Committee of the Red Cross, and (ii) the extent of cooperation by the government of the country in permitting an unimpeded investigation by any such organization of alleged violations of internationally recognized human rights; and

"(B) a description of the steps the Administrator of the agency primarily responsible for administering part I of this Act has taken to alter United States programs under such part in any country because of human rights considerations;

"(13) the amount of all foreign currencies acquired without payment of dollars on hand of each foreign country as of September 30 of the preceding fiscal year;

"(14) the Development Coordination Committee's operations pursuant to section 640B(f) of this Act;

"(15) the aggregate dollar value and quantity of grant military assistance, military education and training, and any of other defense articles and services furnished under this Act by the United States to each foreign country and international organization for the preceding fiscal year;

"(16) appropriate information regarding any country, including Egypt, Israel, and Turkey, whose economic conditions may jeopardize its ability to meet its international debt obligations and stabilize its economy;

"(17) information concerning the activities of the Minority Resource Center during the preceding fiscal year;

"(18) a complete and detailed report of the operations of the Overseas Private Investment Corporation during the preceding fiscal year, including:

"(A) an assessment, based upon the development impact profiles required by section 239(i), of the economic and social development impact and benefits of the projects with respect to which such profiles are prepared, and of the extent to which the operations of the Corporation complement or are compatible with the development assistance programs of the United States and other donors; and

"(B) a description of any project for which the Corporation—

"(i) refused to provide any insurance, reinsurance, guaranty, financing, or other financial support, on account of violations of human rights referred to in section 239(l); or

"(ii) notwithstanding such violations, provided such insurance, reinsurance, guaranty, financing, or financial support, on the basis of a determination (I) that the project will directly benefit the needy people in the country in which the project is located, or (II) that the national security interest so requires;

"(C) the development of private and multilateral programs for investment insurance and any reinsurance arrangements the Corporation has made with private insurance companies, multilateral organizations and institutions, or other entities; and

(19) other information appropriate to the conduct of the foreign assistance program of the United States Government.".

(b) Section 624(f)(2)(B) of the Foreign Assistance Act of 1961 is amended by inserting "and section 634(a)(12)" immediately after "section 502B".

REPEALS

SEC. 712. (a) The following provisions of the following Acts are repealed:

(1) The Foreign Assistance Act of 1961: Sections 116(d), 121(b), 125(b), 240A, 300, 301(b), 301(e)(3), 302(a)(3), 306, 451(b), 481(b)(1), 481(b)(2), 481(c)(2), 495D(e), 495(c)(2), 513(b), 513(c), 601(e)(2), 613(c), 620(b), 620(l), 620(s)(2), 620(u), 620(m), 640B(g), 657, 659, 668, the first sentence and the words "report or" in the second sentence of section 502(b), and the second sentence of section 542.

(2) The International Security and Development Cooperation Act of 1980: Sections 108(a), 108(b), 313(b), 603, 713, 714(a), 714(b), 720, and 721.

(3) The International Development Cooperation Act of 1979: Sections 124, 407(b)(2), 411, 504(b), 506, 507(b), 508(b), and 509(c).

(4) The Special International Security Assistance Act of 1979: Sections 4(e)(2), 7(b), 8(c), and 9.

(5) The International Development and Food Assistance Act of 1978: Sections 117(b)(2), 122(b), 201, 303, and 603(a)(1).

(6) The International Development and Food Assistance Act of 1977: Sections 132(a), 133(c)(6), and 214.

(7) Section 213 of the International Development and Food Assistance Act of 1975.

(8) The Foreign Assistance Act of 1974: Sections 3, 25, 26, 27, 43, 49, 50(c), 51(c), 55(a)(4), 55(a)(5), and 55(a)(6).

(9) The Foreign Assistance Act of 1973: Sections 36(e), 37, 38, and 39(a)(4).

(10) The Arms Export Control Act: Sections 25, 26(b), 28, 36(a), 43(c), and the fifth paragraph of section 1.

(11) The International Security Assistance Act of 1979: Sections 6(b), 20(a), 25, and 28.

(12) The International Security Assistance Act of 1978: Sections 15(b), 23(d), 23(e)(2), 24(c), and 27.

(13) The International Security Assistance Act of 1977: Sections 14, 22, 24(c), 25, and 28(a)(2).

(14) Section 507(b) of the International Security Assistance and Arms Export Control Act of 1976.

(15) Section 7 of the Foreign Military Sales Act Amendments.

(b) The repeal of the provisions listed in subsection (a) shall take effect on October 1, 1981, or upon the date of enactment of this Act, whichever is later.

(c) Except as otherwise explicitly provided by their terms, amendments to the Foreign Assistance Act of 1961 and the Arms Export Control Act which are applicable only to a single fiscal or calendar year or which require reports or other actions on a nonrecurring basis shall be deemed to have expired and shall be removed from law upon the expiration of the applicable time periods for the fulfillment of the required actions.

TECHNICAL AMENDMENT

SEC. 713. The last sentence of section 620(f) of the Foreign Assistance Act of 1961 is amended to read as follows: "For the purposes of this subsection, the phrase 'Communist country' includes specifically, but is not limited to, the following countries:

"Czechoslovak Socialist Republic,
"Democratic People's Republic of Korea,
"Estonia,
"German Democratic Republic,
"Hungarian People's Republic,
"Lao People's Democratic Republic,
"Latvia,
"Lithuania,
"Mongolian People's Republic,
"People's Republic of Albania,
"People's Republic of Bulgaria,
"People's Republic of China,
"Polish People's Republic,
"Republic of Cuba,
"Socialist Federal Republic of Yugoslavia,
"Socialist Republic of Romania,
"Socialist Republic of Vietnam,
"Tibet, and
"Union of Soviet Socialist Republics (including its captive constituent republics).".

ASSISTANCE TO PAKISTAN

SEC. 714. Chapter 1 of part III of the Foreign Assistance Act of 1961 is amended by adding at the end thereof the following:

"SEC. 620E. ASSISTANCE TO PAKISTAN.—(a) The Congress recognizes that Soviet forces occupying Afghanistan pose a security threat to Pakistan. The Congress also recognizes that an independent and democratic Pakistan with continued friendly ties with the United States is in the interest of both nations. The Congress finds that United States assistance will help Pakistan maintain its independence. Assistance to Pakistan is intend-

ed to benefit the people of Pakistan by helping them meet the burdens imposed by the presence of Soviet forces in Afghanistan and by promoting economic development. In authorizing assistance to Pakistan, it is the intent of Congress to promote the expeditious restoration of full civil liberties and representaitve government in Pakistan.

"(b) Accordingly, the President may waive the prohibitions of section 669 of this Act at any time during the period beginning on the date of enactment of this section and ending on September 30, 1987, to provide assistance to Pakistan if he determines that to do so is in the national interest of the United States.

"(c) On or before October 1, 1981, the President shall provide a report to the Speaker of the House of Representatives and the chairman of the Committee on Foreign Relations of the Senate which would include—

"(1) a comprehensive and detailed proposal for assistance to Pakistan in future years; and

"(2) a full explanation of the President's current nonproliferation policy.

"(d) Beginning with the fiscal year 1983 and during each fiscal year thereafter during which the waiver contained in subsection (b) is in effect, the President shall prepare and transmit to the Congress, as part of the presentation materials for foreign assistance programs proposed for each fiscal year, a classified report describing the nuclear program and related activities of Pakistan, including an assessment of (i) the extent and effectiveness of International Atomic Energy Agency safeguards at Pakistan's nuclear facilities; and (ii) the capability, actions, and intentions of the Government of Pakistan with respect to the manufacture or acquisition of a nuclear explosive device. Nothing in this Act relieves the executive branch from the reporting requirements of applicable law.

"(e) The Senate finds that a nuclear detonation by any nonnucelar weapons country would cause grave damage to bilateral relations between the United States and such country. The President shall not use the waiver provided in section 670 of this Act if such country detonates a nuclear device.".

LEBANON

SEC. 715. (a) It is the sense of the Congress that the Government of the United States should continue to support diplomatic efforts to resolve the current crisis in Lebanon, and to pursue a comprehensive and coordinated policy in Lebanon guided by the following principles—

(1) maintenance of an effective cease-fire through Lebanon;

(2) resolution of the issue of the Syrian missiles deployed in Lebanon;

(3) freedom, security and opportunity for the Christian and all other Lebanese communities, including the Moslem, Druze, and Jewish communities in Lebanon;

(4) reaffirmation of the historic United States-Lebanon relationship and strengthening the longstanding commitment of the United States to the independence, sovereignty, and territorial integrity of Lebanon, without partition, free from terrorism and violence, and free to determine its future without Soviet or other outside interference;

(5) generous international support for relief, rehabilitation, and humanitarian assistance for Lebanon, particularly for those Lebanese citizens who have suffered from the terrorism and violence of recent events; and

(6) respect for and strengthening of the authority of a Lebanese Government, based on open national elections free from external interference which will be able to preserve security through its national army and its security forces without outside military presence.

(b) Section 532 of the Foreign Assistance Act of 1961, as amended by section 201(b) of this Act, is further amended by adding at the end thereof the following:

"(j) Of the funds authorized to be appropriated to carry out this chapter for the fiscal year 1982, $5,000,000 shall be available only for Lebanon for relief and rehabilitation programs of international and private voluntary agencies.".

SEC. 716. (a) (1) It is the sense of the Congress that funds made available under chapter 1 of part I or chapter 2 or chapter 5 of part II of the Foreign Assistance Act of 1961 should be used for programs in Haiti which would ameliorate the conditions of poverty and underdevelopment which contribute to the emigration of Haitian citizens and which would assist Haiti to deal with the problem of illegal emigration.

(2) To the maximum extent practicable, assistance for Haiti for the fiscal year 1982 under chapter 1 of part I of the Foreign Assistance Act of 1961 should be provided through private and voluntary organizations.

(b) Funds available for the fiscal year 1982 to carry out chapter 1 of part I or chapter 2 or chapter 5 of part II of the Foreign Assistance Act of 1961 may be expended for Haiti, and credits and guarantees extended for the fiscal year 1982 under the Arms Export Control Act may be approved for use for Haiti only if the President determines that the Government of Haiti—

(1) is cooperating with the United States in halting illegal emigration from Haiti;

(2) is not aiding, abetting, or otherwise supporting illegal emigration from Haiti;

(3) has provided assurances that it will cooperate fully in implementing United States development assistance programs in Haiti (including programs for prior fiscal years); and

(4) is not engaged in a consistent pattern of gross violations of internationally recognized human rights.

(c) Six months after the date of enactment of this Act, the President shall prepare and transmit to the Congress a report on the extent to which the actions of the Government of Haiti are consistent with paragraphs (1), (2), (3), and (4) of subsection (b) of this section.

(d) Notwithstanding the limitations of section 660 of the Foreign Assistance Act of 1961, funds made available under such Act for the fiscal year 1982 may be used for programs with Haiti if such funds are used to assist in halting significant illegal emigration from Haiti to the United States.

NOMINATION FOR THE POSITION OF ASSISTANT SECRETARY OF STATE FOR HUMAN RIGHTS AND HUMANITARIAN AFFAIRS

SEC. 717. (a) The Congress finds that—

(1) the United States has long been a leading defender of the basic rights of persecuted, oppressed, and endangered people around the world, and should continue in this role; and

(2) effective foreign policy formulation requires that the President and the Secretary of State posses current and accurate information derived from continuous observation and review of all matters pertaining to human rights and humanitarian affairs (including matters relating to refugees, prisoners of war, and members of the United States Armed Forces missing in action).

(b) It is the sense of the Congress that—

(1) a strong commitment to the defense of human rights should continue to be a central feature of American foreign policy; and

(2) the President should submit to the Senate the name of a nominee for the position of Assistant Secretary of State for Human Rights and Humanitarian Affairs, as established by section 624(f) of the Foreign Assistance Act of 1961.

COMPREHENSIVE ANALYSIS OF FOREIGN ASSISTANCE

SEC. 718. It is the sense of Congress that at a time when major retrenchments and reappraisals are being made in domestic programs, it is also logical that, while maintaining past international commitments, the magnitude and direction of future foreign assistance programs should also be reviewed. As part of such a review process, the President is requested to provide no later than February 15, 1982, a comprehensive report to the Congress on his approach to foreign assistance. Such report shall include an analysis and recommendations on the following issues—

(1) the relationship between foreign assistance and defense expenditures as means of conducting foreign policy;

(2) the appropriate mix between military and economic assistance;

(3) the strengths and weaknesses, and appropriate mix, of bilateral and multilateral assistance programs;

(4) the relevance of the basic human needs approach to current aid policy;

(5) the performance of other aid donors, and the benefits they derive from their programs;

(6) criteria for determining the appropriate size and composition of country programs;

(7) the appropriateness of the current mix of grants and loans, and the possibility of combining them with new or existing guarantee, insurance, and export credit programs;

(8) specific means to more actively engage the private sector in assistance programs; and

(9) the usefulness of current functional categories in constructing the development assistance budget.

PROCEDURES FOR THE DEOBLIGATION OF FUNDS

SEC. 719. Funds appropriated to carry out any provision of the Foreign Assistance Act of 1961 or the Arms Export Control Act and obligated to carry out such provision may be deobligated, during the period for which such funds are obligated, by an Act of Congress only to the extent or in the amounts provided in an appropriation Act enacted on or after the date of enactment of this Act.

SENSE OF THE CONGRESS RELATIVE TO THE NATIONAL EXECUTIVE POWER OF THE ARGENTINE GOVERNMENT

SEC. 720. It is the sense of the Congress that it welcomes the actions of the Government of Argentina to adjudicate numerous cases of those detained under the National Executive Power of the Argentine Government. The Congress expresses the hope that further such progress will continue, especially with regard to (a) providing information, insofar as the Government of Argentina has information, on those citizens in Argentina listed as "disappeared" who have died, and (b) those prisoners who have not yet been either released or brought to justice and who are being held at the disposition of the National Executive Power

FINANCIAL OBLIGATIONS OF THE SOVIET UNION TO THE UNITED NATIONS

SEC. 721. (a) The Congress finds and declares that—

(1) the financing of the United Nations is the collective responsibility of all member nations;

(2) the International Court of Justice has determined that the expenses of the United Nations incurred in its peacekeeping operations are properly included as a part of the regular expenses of the United Nations;

(3) peacekeeping operations are vital to the mission of the United Nations and must be adequately financed if such operations are to continue; and

(4) the Government of the Union of Soviet Socialist Republics is currently $180,000,000 in arrears on its payments to the United Nations, primarily as a result of its refusal to pay for the peacekeeping operations of the United Nations.

(b) It is the sense of the Congress that the President, acting through the Permanent Representative of the United States to the United Nations, should undertake a diplomatic initiative to obtain payment by the Government of the Union of Soviet Socialist Republics of all its outstanding financial obligations to the United Nations, including its assessments with respect to the peacekeeping operations of the United Nations.

USE OF TOXINS OR BIOLOGICAL OR CHEMICAL AGENTS

SEC. 722. (a) The Congress hereby condemns the use of, or the provision for use of, toxins or biological or chemical agents against the peoples of Laos, Kampuchea (Cambodia), and Afghanistan.

(b) It is the sense of the Congress that the President should, acting through the Permanent Representative of the United States to the United Nations or other appropriate diplomatic agents, seek definite measures to bring to an end actions by any party or government in using, or providing for use, toxins or biological or chemical agents against the peoples of Laos, Kampuchea (Cambodia), and Afghanistan, in violation of the spirit or the provisions of—

(1) the Convention on the Prohibition of the Development, Production and Stockpiling of Bacteriological (Biological) and Toxin Weapons, done at Washington, London, and Moscow on April 10, 1972;

(2) the Protocol for the Prohibition of the Use in War of Asphyxiating, Poisonous or Other Gases, and of Bacteriological Methods of Warfare, signed at Geneva on June 17, 1925; or

(3) customary international law.

(c) It is further the sense of the Congress that the President should vigorously seek a satisfactory explanation from the Government of the Soviet Union regarding the strong circumstantial and presumptive evidence of the use of, or the provision for use of, toxins or biological or chemical agents by the Government of the Soviet Union against the peoples of Laos, Cambodia (Kampuchea), and Afghanistan.

NICARAGUA

SEC. 723. Of the funds authorized to be appropriated to carry out the Foreign Assistance Act of 1961 for the fiscal year 1982, $13,275,000 under part I and $20,000,000 under chapter 4 of part II of the Foreign Assistance Act of 1961 shall be available only for Nicaragua under the following conditions—

(a) all of the funds made available to Nicaragua shall be furnished solely for assistance to the private sector in Nicaragua;

(b) the provisions of subsection (a) shall not apply when the President determines, and reports to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate, that Nicaragua is making substantial progress toward free and fair elections;

(c) for each 6-month period in which any funds are expended under this Act for Nicaragua, the President shall submit to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a report accounting fully and in itemized detail for the amounts obligated and actually expended in Nicaragua.

CONDEMNATION OF LIBYA FOR ITS SUPPORT OF INTERNATIONAL TERRORIST MOVEMENTS

SEC. 724. The Congress of the United States condemns the Libyan Government for its support of international terrorist movements, its efforts to obstruct positive movement toward the peaceful resolution of problems in the Middle East region, and its actions to destabilize and control governments of neighboring states in Africa. The Congress believes that the President should conduct an immediate review of concrete steps the United States could take, individually and in concert with its allies, to bring economic and political pressure on Libya to cease such activities, and submit such a report to the Congress within one hundred eighty days of enactment. Such a review should include the possibility of tariffs on or prohibitions against the import of crude oil from Libya.

NONALINED COUNTRIES

SEC. 725. (a) In considering whether to provide assistance, make sales, extend credits, or guarantee loans under the provisions of the Foreign Assistance Act of 1961, as amended, or the Arms Export Control Act, to any country represented at the Meeting of the Ministers of Foreign Affairs and Heads of Delegations of the Non-Alined Countries to the 36th General Session of the General Assembly of the United Nations on September 25 and 28, 1981, the President shall take into account whether such country has dissociated itself from the communique issued following the meeting.

(b) Within thirty days of enactment of this section, the President shall send a report to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate setting forth the countries which have dissociated themselves from the nonalined countries communique together with a full description of the method of dissociation and the forum in which the dissociation has been made. The President shall transmit with the report a copy of each statement of dissociation.

(c) Within thirty days after the receipt of a statement of dissociation from any country the President shall transmit a copy of the statement of dissociation together with a full description of the method of dissociation and the forum in which the dissociation is made to the Speaker of the House of Representatives and the Committee on Foreign Relations of the Senate.

REPEAL OF LIMITATIONS ON ASSISTANCE, SALES, AND SALES CREDITS FOR CHILE

SEC. 726. (a) Section 406 of the International Security Assistance and Arms Export Control Act of 1976 (22 U.S.C. 2370 note) is repealed.

(b) Notwithstanding any other provision of law—

(1) no assistance may be furnished under chapter 2, 4, 5 or 6 of part II of the Foreign Assistance Act of 1961 to Chile;

(2) no sale of defense articles or services may be made under the Arms Export Control Act to Chile;

(3) no credits (including participation in credits) may be extended and no loan may be guaranteed under the Arms Export Control Act with respect to Chile; and

(4) no export licenses may be issued under section 38 of the Arms Export Control Act to or for the Government of Chile, unless and until the President submits to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a detailed report certifying—

(A) that the Government of Chile has made significant progress in complying with internationally recognized principles of human rights;

(B) that the provision of such assistance, articles or services is in the national interest of the United States;

(C) that the Government of Chile is not aiding or abetting international terrorism.

(5) It is the sense of the Congress that the Government of Chile should take steps to bring to justice by all legal means available in the United States or Chile those indicted by a United States grand jury in connection with the murders of Orlando Letelier and Ronni Moffitt.

UNITED STATES CITIZENS ACTING IN THE SERVICE OF INTERNATIONAL TERRORISM

SEC. 727. (a) It is the sense of the Congress that the spread of international terrorism poses a grave and growing danger for world peace and for the national security of the United States. As a part of its vigorous opposition to the activities of international terrorist leaders and the increase of international terrorism, the United States should take all steps necessary to ensure that no United States citizen is acting in the service of terrorism or of the proponents of terrorism.

(b) Within six months after the enactment of the International Security and Development Cooperation Act of 1981, the President shall submit to the Speaker of the House of Representatives and the Chairman of the Committee on Foreign Relations of the Senate a report including the following:

(1) a description of all legislation, currently in force, and of all administrative remedies, presently available, which can be employed to prevent the involvement, service, or participation by United States citizens in activities in support of international terrorism or terrorist leaders;

(2) an assessment of the adequacy of such legislation and remedies, and of the enforcement resources available to carry out such measures, to prevent the involvement, service, or participation by United States citizens in activities in support of international terrorism or terrorist leaders; and

(3) a description of available legislative and administrative alternatives, together with an assessment of their potential impact and effectiveness, which could be enacted or employed to put an end to the participation by United States citizens in activities in support of international terrorism or terrorist leaders.

REPORTING REQUIREMENT RELATING TO EL SALVADOR

SEC. 728. Not later than ninety days after the date of enactment of this section, the President shall prepare and transmit to the Speaker of the House of Representatives and to the chairman of the Committee on Foreign Relations of the Senate a report and a briefing in closed session setting forth—

(a) The viewpoints of all major parties to the conflict in El Salvador and of the influential actors in the Salvadoran political system regarding the potential for and interest in, negotiations, elections, and a settlement of the conflict.

(b) The views of democratic Latin American nations, Canada, the Organization of American States, and European allies of the United States regarding a negotiated settlement to such conflict.

(c) It is the sense of the Senate that the President shall, as soon as possible, send a special envoy or other appropriate means to consult with and gather information from appropriate representatives of the parties to the Salvadoran conflict, democratic governments of Latin America, Canada and European allies of the United States regarding the attainment of a negotiated settlement in El Salvador.

RESTRICTIONS ON AID TO EL SALVADOR

SEC. 729. None of the funds authorized to be appropriated by this Act may be made available for the provision of assistance to El Salvador for the purpose of planning for compensation, or for the purpose of compensation, for the confiscation, nationalization, acquisition, or expropriation of any agricultural or banking enterprise, or of the properties or stock shares which may be pertaining thereto.

USE OF CERTAIN POLISH CURRENCIES

SEC. 730. Notwithstanding section 1415 of the Supplemental Appropriation Act. 1953, section 508 of the General Government Matters, Department of Commerce, and Related Agencies Appropriation Act, 1962, or any other provision of law, the currencies or credits received by the United States from the April 1981 sale of United States Government-held surplus dairy products to Poland shall, to such extent as may be provided in advance in an appropriation Act, be used by the President in Poland to serve United States interests, including use for activities of common benefit to the people of the United States and the people of Poland, such as joint programs in energy, agriculture, education, science, health, and culture, or for humanitarian activities.

LIMITATION ON THE OBLIGATION OR EXPENDITURE OF FUNDS

SEC. 731. (a) Notwithstanding any other provision of this Act, the funds authorized to be appropriated by this Act shall be reduced by $67,600,000.

(b) In order to comply with the limitation contained in subsection (a), the head of each agency to which funds are appropriated pursuant to this Act shall determine the extent to which funds available to such agency for any activity, program, project, type of materiel assistance, or country will not be obligated or expanded.

(c) Nothing in this section authorizes an increase in the amount available for any activity, program, project, type of materiel assistance, or country.

EFFECTIVE DATE

SEC. 732. This Act shall be effective upon the date of its enactment, except as provided otherwise in section 712 and except that authorizations of appropriations and limitations of authority applicable to the fiscal year 1982 as contained in this Act and in provisions of law amended by this Act shall take effect on October 1, 1981.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. INOUYE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The title was amended so as to read:

A bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for the fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982; and for other purposes.

Mr. BAKER. Mr. President, I would point out that on this bill the Senate considered S. 1196 for a total of 6 days, and as of 10 o'clock tonight we had consumed approximately 36½ hours of debate. Twenty-one rollcalls were conducted, 65 amendments were considered, of which 51 were agreed to, 5 were rejected, 2 were tabled, 4 withdrawn, and 3 not acted upon. It was indeed an active piece of legislation.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I ask now that the Chair proceed with the next order of business.

STANDBY PETROLEUM ALLOCATION ACT OF 1981

The Senate proceeded to consider the bill (S. 1503) to authorize the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage, which had been reported from the Committee on Energy and Natural Resources with an amendment to strike out all after the enacting clause, and insert the following:

SHORT TITLE

SECTION 1. This Act may be cited as the "Standby Petroleum Allocation Act of 1981".

STATEMENT OF FINDINGS AND PURPOSES

SEC. 2. (a)(1) Shortages of crude oil, residual fuel oil, and refined petroleum products caused by reductions in imports of petroleum may occur at any time.

(2) Such shortages could be sufficiently large to cause severe dislocations and hardships within various segments of the economy, both regional and national, and constitute a threat to the public health, safety, and welfare.

(3) The national security and economic well-being of the United States require that the President have authority, during a severe petroleum supply shortage, to allocate crude oil, residual fuel oil, and refined petroleum products so as to minimize adverse effects on the public health, safety, and welfare.

(b) The purpose of this Act is to grant to the President limited and temporary authority to allocate crude oil, residual fuel oil, and refined petroleum products in the event of a severe petroleum supply shortage. The authority granted under this Act shall be exercised for the purpose of minimizing the adverse impacts of such a shortage on the American people and the domestic economy.

DEFINITIONS

SEC. 3. As used in this Act, the term—

(1) "severe petroleum supply shortage" means a national or regional petroleum supply shortage which the President determines—

(A) is, or is likely to be, of significant scope and duration;

(B) may cause major adverse impact on national security, the national economy, or the economy of any of the several States or regions of the United States,

(C) results, or is likely to result, from an interruption in the imported petroleum supplies of the United States, including supplies of imported crude oil, residual fuel oil, and refined petroleum products, or from sabotage, accidents, or an act of God, and

(D) may not be reasonably manageable—

(i) by reliance on free market pricing and allocation, or

(ii) under other authorities available to the President.

(2) "international energy program" has the same meaning as in section 3(7) of the Energy Policy and Conservation Act (42 U.S.C. 6202).

(3) "United States" means the several States, the Commonwealth of Puerto Rico, the District of Columbia, and the territories and possessions of the United States, including the Trust Territory of the Pacific Islands.

PRESIDENTIAL AUTHORITY

SEC. 4. (a)(1) The President may implement a standby regulation providing for the mandatory allocation of crude oil, residual fuel oil, and any refined petroleum product throughout the United States or in any seriously affected State or region of the United States, if—

(A) subject to subsection (d), the President finds that a severe petroleum supply shortage exists or is imminent; or

(B) notwithstanding subsection (d), the President finds that such implementation is required to meet obligations of the United States under the international energy program.

(2) Administration of such regulation shall, to the maximum extent practicable, provide for—

(A) protection of public health (including the production of pharmaceuticals), safety and welfare (including maintenance of residential heating, such as individual homes, apartments and similar occupied dwelling units), and the national defense;

(B) maintenance of all public services (including facilities and services provided by municipalities, cooperatives, or investor owned utilities or by any State or local government or authority, and including transportation facilities and services which serve the public at large);

(C) maintenance of agricultural operations, including farming, ranching, dairy, and fishing activities, and service directly related thereto;

(D) preservation of an economically sound and competitive petroleum industry; including the priority needs to restore and foster competition in the producing, refining, distribution, marketing, and petrochemical sectors of such industry, and to preserve the competitive viability of independent refiners, small refiners, nonbranded independent marketers, and branded independent marketers;

(E) the allocation of suitable types, grades, and quality of crude oil to refineries in the United States to permit such refineries to operate at full capacity;

(F) equitable distribution of crude oil, residual fuel oil, and refined petroleum products at equitable prices among all regions and areas of the United States and sectors of the petroleum industry, including independent refiners, small refiners, nonbranded independent marketers, branded independent marketers and among all users;

(G) allocation of residual fuel oil and refined petroleum products in such amounts and in such manner as may be necessary for the maintenance of, exploration for, and production or extraction of—

(i) fuels, and

(ii) mineral essential to the requirement of the United States,

and for required transportation related thereto;

(H) economic efficiency; and

(I) minimization of economic distortion, inflexibility, and unnecessary interference with market mechanisms.

(3) If the President, pursuant to subsection (a), implements a program for mandatory allocation of residual fuel oil or any refined petroleum product throughout the United States, or in any State or region of the United States, such program shall provide for a State set-aside of residual fuel oil or any refined petroleum product allocated in each State to which the Federal program applies.

(b)(1) The standby regulation pursuant to subsection (a) may include limitations on the price of crude oil, residual fuel oil, and any refined petroleum product only if the President finds that such limitations are necessary to achieve the objectives of such regulation. Such limitations may include provisions restricting discriminatory pricing.

(2) Except as provided by the Constitution of the United States, any finding by the President under paragraph (1) is not subject to judicial review.

(c) The President, not later than ninety days after the date of enactment of this Act, shall promulgate a general standby regulation for administration of the allocation authority pursuant to this section, to be implemented, with such additional provisions as may be determined to be necessary at the time, in the event the President institutes mandatory allocation pursuant to this section.

(d) The President shall not implement any mandatory allocation pursuant to this section unless he has transmitted notice to the Congress as an energy action pursuant to

section 551 of the Energy Policy and Conservation Act (42 U.S.C. 6421), as amended, and neither House of Congress has passed a resolution of disapproval (or both Houses have passed a resolution of approval) within fifteen calendar days of continuous session of Congress in accordance with the procedures specified in section 551.

(e) The standby regulation under section 4 may continue in effect for no more than ninety days after implementation except that the period of effectiveness of such regulation may be extended for an additional sixty days upon a finding by the President that—

(1) (A) the severe petroleum supply shortage continues in effect, or

(B) such action is required to meet the obligations of the United States under the international energy program; and

(2) mandatory allocation must be continued to meet the objectives of subsection (a).

Thereafter, the effectiveness of the regulation implemented pursuant to this section shall terminate, unless he has submitted a new notice and neither House of the Congress has disapproved (or both Houses have approved) pursuant to subsection (d).

(f) The authority of this Act shall not be used to impose or implement any tax, tariff, user fee, or a program for the assignment of rights for end-user purchases of gasoline or diesel fuel, as described in section 203(a)(1)(A) and (B) of the Energy Policy and Conservation Act (42 U.S.C. 6263).

CRUDE OIL SHARING

SEC. 5. (a)(1) The standby regulation under section 4 shall include an optional standby program designed in accordance with this section to achieve the purposes of this Act with minimum interference with market mechanisms. Such program shall specify the manner in which the President will require limited sales of crude oil among refiners, should he decide to implement such a program.

(2) The program under paragraph (1) shall be designed to minimize the rate of increase in the price of crude oil during the implementation of the program by providing reasonable access to crude oil by specified refiners.

(b) The program under subsection (a) shall—

(1) provide a mechanism based upon relative crude oil availability, and such other factors as the President deems appropriate, for designating refiner-buyers and refiner-sellers for the period during which the program is implemented;

(2) be designed to offset partially the disproportionate impact of reduced supplies of crude oil on the ability of any refiner-buyer to provide needed refined petroleum products;

(3) contain a formula for distributing sales obligations among refiner-sellers;

(4) provide for a reduction in the sales obligation of any refiner-seller to the extent the President determines that an obligation established under paragraph (3) would constitute an unreasonable burden on such refiner-seller or otherwise would be inconsistent with the purposes of this Act;

(5) prescribe the manner of determining the terms and conditions and an equitable price of crude oil for any sale under this section; and

(6) provide for certification by each refiner-seller and refiner-buyer that, to the maximum extent practicable, the predisruption distribution of residual fuel oil and refined petroleum products produced by such refiner-seller or refiner-buyer will be maintained on a nondiscriminatory basis.

(c) The program under this section shall, to the maximum extent practicable, encourage the maintenance of high levels of inventories and secure sources of supply of crude oil, residual oil, and refined petroleum products by refiners, distributors and users.

EFFECT ON OTHER LAW

SEC. 6. (a) The regulations issued (whether implemented or not) under section 4, including the standby regulation, and any order issued thereunder shall preempt any provisions of any program for the allocation or pricing of crude oil, residual fuel oil, or any refined petroleum product established by any State or local government if such provision is in conflict with such regulation or any such order.

(b) Unless explicitly provided otherwise, nothing in this Act affects any authority under any other provision of Federal law (including section 161 of the Energy Policy and Conservation Act (42 U.S.C. 6241)) to provide for the allocation or pricing of crude oil, residual fuel oil, or any refined petroleum product.

ENFORCEMENT AND ADMINISTRATION

SEC. 7. (a) Whoever violates the requirements of the standby regulation or any order issued pursuant to this Act shall be subject to a civil penalty not to exceed $40,000 for each violation.

(b)(1) Except as provided in paragraph (2), (A) sections 205 through 207 and sections 209 through 211 of the Economic Stabilization Act of 1970 (12 U.S.C. 1904, note) shall apply to the regulation promulgated under section 4(a), to any order under this Act, and to any action taken by the President (or his delegate) under this Act, as if such regulation had been promulgated, such order had been issued, or such action had been taken under the Economic Stabilization Act of 1970; and (B) section 212 (other than 212 (b)) and 213 of such Act shall apply to functions under this Act to the same extent such sections would apply to functions under the Economic Stabilization Act of 1970.

(2) The expiration of authority to issue and enforce orders and regulations under section 218 of such Act shall not affect any authority to amend and enforce the regulation or to issue and enforce any order under this Act, and shall not affect any authority under sections 212 and 213 insofar as such authority is made applicable to functions under this Act.

(c) Any penalty under subsection (a) may be assessed by the court in any action brought in any appropriate United States district court or any other court of competent jurisdiction. Any such penalty collected shall be deposited into the general fund of the United States Treasury as miscellaneous receipts.

(d) There shall be available as a defense to any action brought for breach of contract in any Federal or State court arising out of delay or failure to provide, sell, or offer for sale or exchange crude oil, residual fuel oil, or any refined petroleum product, that such delay or failure was caused solely by compliance with the provisions of this Act or with the regulation or any order under this Act.

DELEGATION OF AUTHORITY

SEC. 8. (a) The President may delegate all or any portion of his authority to implement the standby regulation under section 4 to any State (or officer thereof), as he deems appropriate.

(b) The only Federal officers or agencies of the United States to whom the President may delegate authority under this Act are officers or agencies of the Department of Energy or of any successor thereof.

CONFORMING AMENDMENT TO THE ENERGY POLICY AND CONSERVATION ACT

SEC. 9. DOMESTIC ALLOCATION.—Section 251 of the Energy Policy and Conservation Act (42 U.S.C. 6271) is amended by adding at the end thereof the following new subsection:

"(e) Nothing in this section authorizes the President to require the allocation or specification of prices (or the manner of determination of prices) of petroleum products within domestic commerce.".

EXPIRATION DATE

SEC. 10. The provisions of this Act shall cease to have effect on January 1, 1985, but such expiration shall not affect any action or pending proceeding, administrative or civil, not finally determined on such date, nor any administrative or civil action or proceeding, whether or not pending, based on any act committed or liability incurred prior to such expiration date.

IMPACT STUDY

SEC. 11. (a) The President shall analyze the impact on the domestic economy and on consumers in the United States of reliance on market allocation and pricing during a severe oil supply interruption. Such analysis shall (1) examine the equity and efficiency of such reliance and (2) distinguish between the impacts of such reliance on various categories of business (including small business) and on households of different income levels.

(b) Within one year of enactment the President shall submit a report to the Congress containing the analysis required by subsection (a) along with such recommendations as the President deems appropriate.

OIL STORAGE TAX INCENTIVES

SEC. 12. Within six months after the date of the enactment of this Act, the President shall submit a full and detailed report on the advisability and alternative means of (1) reducing the tax liability of persons who draw down oil reserves during oil supply disruptions, and (2) providing tax or other incentives for the construction of private-sector oil storage facilities and the maintenance of increased private-sector oil reserves.

INTERNATIONAL COOPERATION

SEC. 13. Within six months after the date of the enactment of this Act, the President shall submit a full and detailed report on the manner in which oil stockpile and demand restraint measures have been and may be coordinated among some or all allies and trading partners of the United States.

ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that there now be a brief period for the transaction of routine morning business to extend no longer than 5 minutes in which Senators may speak.

The PRESIDING OFFICER. Without objection, it is so ordered.

THE AWACS SALE

Mr. GLENN. Mr. President, I have a very short statement relating to Saudi Arabia's proposal to purchase AWACS planes from the United States.

It appears, at least on the present vote count in the Senate, that the AWACS sale may well be disapproved by the Senate next week. I would not want to pre-

dict what will happen between now and then, but that may occur. Unfortunately, some may perceive this action as some sort of litmus test or some sort of action which will doom our relationship with Saudi Arabia.

I do not agree with that, Mr. President. I think yesterday, Senator ROBERT C. BYRD addressed this point very eloquently in his AWACS speech, which I certainly commend to be read and reread by my colleagues.

Nevertheless, I think it is important that in the event the sale is disapproved, the Senate immediately make its views on the United States-Saudi relationship crystal clear. Accordingly, I wish to let my colleagues know that in the event that that AWACS sale is disapproved, I am prepared to introduce a resolution when and if necessary that would indicate, and not necessarily in these same words, the following:

That a Saudi Arabia, secure from external threat, is a vital U.S. interest and that the United States accordingly should reaffirm its commitment to assist the kingdom in meeting its air surveillance and combat air direction and control needs by stationing the standard U.S. Air Force E3–A AWACS aircraft in Saudi Arabia for at least a 5-year period or until requested by the Saudi Arabian Government to remove the aircraft; and that the U.S. encourage an expanded Saudi Arabian participation in all phases of the operation of such an AWACS aircraft, including mission planning and night operations.

Mr. President, it will be my intent, if the sale is turned down, to offer language that will do that in a resolution of the Senate so that it will indicate our continuing support and concern for that Persian Gulf area and for Saudi Arabia and the vital role that they play there. I hope that the Saudis, in the form of Crown Prince Fahd at Cancun, can agree, perhaps, with the President, who is there now, to joint manning of the aircraft. I think that would solve all of our problems, including those of Israel and other nations in the area.

In the event that that sale is turned down, it would be my intention to offer the proposal, hoping that we can continue the existing relationship there, at least, and that the Saudis will, in turn, see that it is in their interest and in our interest for the security of that Persian Gulf area; and that we would be prepared, in that case, as far as I am concerned, to see increased and expanded Saudi Arabian participation in all phases of the operation of the AWACS aircraft, including mission planning and flight operations along with American crews.

GENOCIDE CONVENTION WOULD STRENGTHEN AMERICA'S EFFORTS TO PROTEST SOVIET ABUSES

Mr. PROXMIRE. Mr. President, the "Liberty Lobby's White Paper" on the Genocide Convention makes the following assertion and I quote:

> It is clear that the ratification of the Genocide Convention will in no way serve the interests of the United States nor those of the citizens, voters and taxpayers. The only argument for it reduces to infinitely repeated assertions that it will somehow aid our "foreign policy"—an elusive thing which itself has never been defined.

Mr. President, statements such as this one could not be further from the truth. The only thing that is clear from reading this white paper is that the Liberty Lobby needs only to read the hearing record of the Foreign Relations Committee to determine how this treaty will serve the interests of the United States, its citizens, voters and taxpayers.

The benefits to our foreign policy are more than elusive, undefined ideas.

First, ratification of the Genocide Convention would strengthen our hand in attacking the gross violation of human rights by the Soviet Union and its allies. While the Genocide Convention itself is a narrowly drafted human rights treaty, the testimony of Nixon administration officials during the 1970 hearings make it clear that ratification of this convention would strengthen our foreign policy.

Rita Hauser, a Republican respected on both sides of the aisle, and, at the time, our delegate to the Human Rights Commission, testified:

> We have frequently invoked the terms of this convention (the Genocide Convention) as well as the provisions of the Universal Declaration of Human Rights . . . in our continued aggressive attack against the Soviet Union for its practices, particularly as to its large Jewish communities but also as to its Ukrainians, Tartars, Baptists and others. It is this anomaly . . . that while we have felt free to invoke the Genocide Convention against others, we have not yet ourselves ratified it. This often leads to the retort in debates plainly put, simply put, "Who are you to to invoke a treaty that you are not party to?"

Who indeed, Mr. President? In that same hearing, Ambassador Charles Yost, a career foreign service officer, and President Nixon's choice to represent the United States at the United Nations, noted:

> I can assure the subcommittee that in my diplomatic life, at the United Nations and elsewhere, no question has ever been asked me about the policy of my country which has been more difficult to answer than questions about American inaction on this convention.

But that was 1970, Mr. President. Does our failure to ratify this convention impair our ability to conduct our foreign policy? Does it impair our ability to speak out against abuses by the Soviet Union and its allies today? Absolutely.

Former Associate Supreme Court Justice Arthur Goldberg, who represented the United States at the United Nations for 3 years, pleaded with the Foreign Relations Committee in the 1977 hearings not to send our people to Belgrade, for the "Helsinki Accord Conference" the fall of that year, and talk about human rights when our country still has not ratified the most basic human rights convention—the Genocide Convention.

That Belgrade conference, Mr. President, included a major effort by the Western powers to hold the feet of the Soviet Union and the Eastern European nations to the fire on the basic human rights issues. Our representatives to this and subsequent conferences have repeatedly stated that our hand would have been strengthened in protesting Communist transgressions on basic human rights if the Senate had acted on the Genocide Convention.

Does the Liberty Lobby believe that we should continue to have our diplomats fight the Soviets—and other human rights transgressors—with one arm tied behind their back? I would hope not.

Second, the ratification of this convention eliminates a point of attack for our enemies. As a self-proclaimed leader in the area of human rights—and Mr. President, our record is clearly unequalled in the world—the United States has been haunted by its failure to take action on basic human rights treaties, which parallel our ideals and our practice here at home. It is time to end, for once and for all, these taunts of hypocrisy from nations who wish us ill. It's time to eliminate the puzzlement of our allies, who have ratified this Convention, and are amazed at our procrastination.

Third, ratification of the Genocide Convention would help to accelerate the development of a firm principle of international law that life is sacred. That the world cherishes and will solemnly pledge to safeguard the right of every national, ethnic, racial or religious group to exist. Perhaps this is what Liberty Lobby finds elusive. Perhaps they oppose all international law.

But this Senator is one American, who is proud of our country, proud of the freedoms enumerated in our Declaration of Independence and guaranteed by our Bill of Rights and Constitution, and I do not fear seeing the most basic right that these documents protect—the right to live—protected on an international scale.

Mr. President, we have led the way in the protection of every citizen's liberties here at home. I have enough faith in those principles to see them extended abroad. I would have thought that any organization named Liberty Lobby would have that same faith in the principles we pioneered to see them extended abroad. But I remain hopeful that they will—some day.

CAREER OF LT. GEN. ERNEST GRAVES

Mr. TOWER. Mr. President, on July 31, 1981, Lt. Gen. Ernest Graves, Jr. of the U.S. Army concluded a brilliant military career as a soldier-scientist-diplomat. General Graves served as the Director of the Defense Security Assistance Agency for the 3½ years prior to his retirement. His achievements in this important and demanding position will have a lasting effect upon the national security and foreign policy of the United States. It is

appropriate that during consideration of the international security and development cooperation bill that the Senate recognize the individual who contributed so heavily to the formulation of the security assistance portions of this bill.

General Graves' strong educational background served him well in his varied assignments. A 1944 graduate of the U.S. Military Academy at West Point, General Graves holds a Ph. D. in physics from the Massachusetts Institute of Technology and attended the Harvard Business School.

As a military leader, he saw service in three conflicts, commanding a combat engineer platoon in Europe during World War II, an engineer battalion in Korea, and an engineer group in Vietnam.

A substantial portion of General Graves" military career was devoted to the development and application of nuclear energy. An early educator in this field, he was responsible for establishing training programs for nuclear power technicians in colleges across the United States. His efforts in the "Plow Share" program from its inception significantly advanced the peaceful application of nuclear energy, as did his work on the study to create a sea level canal in Panama.

As Director of Military Application for the Energy Research and Development Administration (ERDA), he was responsible for the direction of the entire nuclear weapons program. He supervised the development of nuclear weapons to fulfill the strategy of flexible response. He also contributed to the U.S. negotiating positions for the nuclear test ban treaty. His personal supervision of ERDA's laser programs led to major contributions to the Nation's long-term energy needs and independence.

His skillful management of resources enabled ERDA to meet its requirements during periods of shrinking budgets. In addition, General Graves' presentations to the Congress in support of ERDA programs marked the beginning of a long and close relationship with the legislative branch.

As the division engineer for the Army Corps of Engineers on the Great Lakes and the Mississippi River—a 12-State region—he made invaluable contributions to water resource development, management, and conservation. Subsequently, as a Director of Civil Works for the Corps of Engineers, he directed the formulation and presentation to the Congress of the nationwide civil works program for water resources and development with an annual budget of $2.5 billion.

Other high-level assignments during General Graves' 7-year career include executive to the Secretary of the Army, Deputy Director of Military Construction in the Office of the Chief of Engineers, and president of the Air Defense Evaluation Board. These assignments, which are illustrative of General Graves' many important positions, show the wide scope of his service, expertise, and accomplishments.

General Graves' last assignment as Director of the Defense Security Assistance Agency further demonstrated his superb management and administrative skills. He directed the planning and execution of the complex, politically sensitive, multibillion-dollar U.S. security assistance program.

General Graves' retirement is deeply regretted for the loss of his guiding hand in the management of major defense programs; however, I am certain that he will remain ready to serve if called upon. I and the entire membership of the Armed Services Committee salute him as a great patriot and congratulate him on a brilliant career.

Mr. President, I request unanimous consent that the testimonials on behalf of General Graves by myself and Senators PERCY, STENNIS, and GLENN be collected and printed as a Senate document for presentation to General Graves.

THE FEDERAL RESERVE NEEDS A VOICE FROM SMALL BUSINESS

Mr. EAGLETON. Mr. President, today's sky-high interest rates are causing enormous damage to vital sectors of our national economy: housing, automobiles, farming, and all kinds of small businesses.

In recent days, we have witnessed a public admission by President Reagan that the Nation is indeed in a recession. This statement by the President confirms what many private economists have been saying for months.

In addition, the Commerce Department has reported that the gross national product declined at an annual rate of 0.6 percent in the third quarter and should continue falling in the final quarter of the year. This drop in GNP comes after a 1.6-percent decline in the second quarter of 1981.

Perhaps the single greatest cause of today's recession is high interest rates. High interest rates place an awesome squeeze on credit, which is the very lifeblood of the American economy.

Witness the dramatic rise in the number of bankruptcies in America. In 1979, there were 29,500 bankruptcies nationwide; by June 30, 1981, the number had soared to 47,738 nationwide. My home State of Missouri was particularly hard hit by this phenomenon. In 1979, there were 549 bankruptcies in the State; that number more than doubled to 1,294 by end of June 1981. Although double-digit inflation and more lenient bankruptcy laws are a factor in these statistics, the dominant reason behind such increases is sustained high interest rates.

The auto industry has been severely harmed by the cost of borrowing money. During the first 10 days of October, auto sales were at the lowest rate in 23 years, with the introduction of the 1982 models having little impact on the car market.

The housing industry finds itself in as bad, if not worse, shape. Since interest costs are such a large proportion of monthly mortgage payments, interest rate increases cause many would-be homebuyers to be priced out of the market. The plight of the savings and loan industry bears this out. Fifteen S. & L.'s in St. Louis lost more than $22 million in net income in 1980.

We can see that high interest rates have a ripple effect throughout the American economy. For that reason, I am cosponsoring the bill proposed by the Senator from West Virginia (Mr. BYRD) which would require the President to nominate an individual whose background is in small business to fill the first vacancy occurring on the Board of Governors of the Federal Reserve.

Such an individual would know from firsthand experience what a member of the Board of Governors from a large business or a large financial institution would not: that stratospheric interest rates are devastating Main Street America.

The followers of Milton Friedman, whose pure monetarism as a cure for inflation is personified in Federal Reserve Board Chairman Paul Volcker, must hear another voice in the inner sanctum of the Federal Reserve. The message the monetarists must hear is that you cannot destroy Main Street in order to save it.

A member of the Board of Governors of the Federal Reserve from small business, which by its very nature is extremely credit sensitive, would provide an important and much-needed voice in the making of our monetary policy.

ANTI-SEMITISM IN THE SOVIET UNION

Mr. PELL. Mr. President, on October 6, I joined my distinguished colleague, Senator HEINZ, in cochairing a hearing on anti-Semitism in the Soviet Union. The purpose of this hearing, which commemorated the 40th anniversary of the Babi Yar massacre, was to demonstrate to the Soviet leadership the depth of American concern about Soviet anti-Semitism and to illustrate, once again, the importance which the United States places upon human rights.

We had the privilege of receiving testimony from six witnesses, each of whom has a special expertise, derived from governmental service, scholarly study, or personal experience, on the problems of Soviet Jewry. Collectively, these witnesses offered conclusive evidence that the Soviet Government has intensified its campaign against Soviet Jews through harassment, propaganda, and new forms of discrimination. In addition, the Soviet leadership has sought

to undermine the Jewish emigration movement by cutting the monthly emigration rate and imprisoning Jewish activists. One of our witnesses, the distinguished Soviet physicist and former refusnik, Dr. Mark Azbel, reminded us that the result of this campaign could be the silencing of the Soviet Jewish community.

As concerned Americans, we cannot and will not allow these violations of international law and fundamental human rights to go unnoticed or unchallenged. The hearing which we held was not an isolated event but rather part of a crusade to force the Soviet Union to end this despicable campaign against the Jewish citizens and to live up to its obligations under international law. It is my fondest hope that 1 day our goal will be achieved.

I would like to thank the National Conference on Soviet Jewry and the Jewish Community Council of Greater Washington for their sponsorship of this hearing. In particular, I would like to extend my appreciation to Mark Levin of the National Conference and Buddy Sislen of the Jewish Community Council for the generous time and efforts that they gave in making this hearing a success.

At this time, I would like to ask unanimous consent that the text of my statement of October 6 on Soviet antisemitism be printed in the RECORD.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR CLAIBORNE PELL

HEARING ON SOVIET ANTISEMITISM, TUESDAY, OCTOBER 6

I am pleased to be here today and to join my distinguished colleague, Senator Heinz, in chairing this hearing on anti-semitism in the Soviet Union. This hearing, as you know, commemorates the 40th anniversary of the Babi Yar massacre.

The world stood by and watched in silence in September, 1941 as the Nazis murdered over 33,000 Ukrainian Jews at Babi Yar, near Kiev. The Babi Yar massacre serves not only as a symbol of anti-semitism but also as a reminder to those of us who believe in human rights and fundamental freedoms that we must not remain silent or indifferent to violations of any of these rights.

As a party to many international conventions such as the United Nations Charter and the International Covenants on Human Rights and as a signatory of the Helsinki Accords, the Soviet Union has pledged respect for human rights and fundamental freedoms and accepted obligations in these areas under international law. Nevertheless, the Soviet Union has consistently and flagrantly violated these obligations in its treatment of Soviet Jews.

Through its policies and practices, the Soviet government institutes and fosters the growth of anti-semitism. There are many indications that in recent years discrimination against Jews, particularly in the areas of education and employment, has increased. In addition, the Soviet government has placed further obstacles in the pathway of Jews who desire to emigrate to the West and has increased harassment of those who have been refused exit permits. As a member and former co-chairman of the Helsinki Commission, I am especially disturbed by these developments. I hope that this hearing will focus public attention on these violations and show the Soviet Union that discrimination against Soviet Jews is a matter of concern to all Americans.

DEDICATION OF SOLON ELEMENTARY SCHOOL

Mr. MITCHELL. Mr. President, one of the most serious problems we confront as a Nation is our dependence on foreign oil. It is critical that we devise a national policy to eliminate that dependence. It is also important that in towns and cities across the Nation, Americans act on their own to do the same. No State is more dependent on foreign oil than Maine, and no State has made greater efforts to reduce that dependence. As one small but important example of that effort, I want to share with my colleagues the experience I had in attending the dedication of a new school in the town of Solon, Maine, last week.

When the elementary school in Solon burned down some time ago, local officials faced a challenge. They wanted to design a facility that would be functional and pleasing to the eye, and yet would also serve national goals by fostering energy conservation and achievement of energy self-sufficiency. So they consulted with their architect, who summarized for them the advantages and disadvantages of alternate energy sources.

The result of their deliberations was impressive. Classrooms were of different sizes and shapes, and there was one small corridor and the latest in alternate energy systems. Basic heat for the building is provided by wood and coal, and the water is heated by means of a solar-powered unit.

Mr. President, local officials in rural Somerset County have distinguished themselves by planning an innovative and pragmatic facility to house their school. They, as most other Mainers, are conscious of the need to reduce our country's dependence on imported oil, and are doing their share to conserve energy.

I applaud them for their efforts and commend their creativity to others in America who need to replace old or outmoded school buildings and equipment.

We in Washington can learn much from what is happening in communities across the country.

At this point, I ask unanimous consent that two items be printed in the RECORD. The first is a summary of the architect's recommendations on alternate sources of fuel; and the second is an article, appearing in a recent edition of the Bangor Daily News, which gives further detail on the new Solon elementary school.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

ALTERNATE FUELS—A GREAT BENEFIT WITH SOME EXTRA WORK

With increasing interest in and adoption of alternate fuels in many of our buildings, we feel a realistic view is needed to avoid undue disillusionment after the excitement of a new venture wears off.

THE SITUATION

Two primary alternate fuels seem reasonably viable in most of Maine at this time. Stick wood is available almost anywhere and, with the advent of high efficiency wood boilers, appears to offer a reliable high capacity renewable alternate heat fuel. Coal, with a less universal source of supply, is still widely available in Maine. As a fossil fuel of abundant American supply and reserve, it offers an alternate to oil heat that is somewhat more automatic than wood. Waste wood or wood chips have a high capacity for industrial uses but have not been shown to be a dependable trouble-free heat source. Solar heat can be considered at least a partial alternate fuel. It does not at this stage, however, seem to offer complete heat without extreme effort.

IMPORTANCE

Use of alternate fuels that allows reduction in our dependence on foreign oil and on electricity derived from oil is mandatory wherever possible:

1. to avoid exponential cost increases for fuel;

2. to help balance US payments;

3. to help maintain our national independent security; and

4. to preserve an important world-wide natural resource.

STICK WOOD

Stick wood is a lovely fuel. It is also rough, hard, splintery, wet, dirty, and sometimes frozen. Every piece must be handled: to split and cut to length; to stockpile for drying; to stack once or twice for easy access and to stoke. This stoking must occur for every batch which may be early in the morning or late at night. Buying wood, receiving deliveries of wood and protecting it will be new experiences to those who are only used to oil. Wood costs will, of course, rise by the laws of supply and demand, hopefully not as sharply as oil prices. Care must be taken to avoid fire danger. Every week or two some ash must be cleaned out and removed. (About a 5 qt. pail full)

The high efficiency wood stove allows complete burning of the wood. A heat storage water tank should hold the heat until needed for use. It can also be compatible with heating your domestic hot water. Wood smoke in faint quantities can be very appealing. Finally, oil back-up can take the worry out of awkward stoking needs.

COAL

Coal furnaces are available with almost any capacity. Nearly complete automation is possible. But coal has its problems: There is delivery. Can it be placed automatically where you wish to store it? To the basement by gravity? To the main floor by shute or conveyor? It is messy and black and comes in big heavy trucks. Worms and stokers usually deliver the coal to the furnace from the coal bin, but will all the coal reach the worm without coaxing? There is also ash, 170 to 190 lbs. per ton. This is not very easily automated. Where will it go? How will it get

there? There are cotter pins that can break—at most inconvenient times and places. What about coal dust? If accumulations are not properly handled, certain concentrations of dust can explode.

Coal heat used with a heat storage water tank to even it out can provide steady dependable heat of great comfort that you may like better than any you have had. It also can provide domestic hot water.

CONCLUSION

Alternate fuels as noted have been enthusiastically endorsed by a wide range of committees, boards, and people. It must be understood, however, that this is a new way of life. There is work scheduling and personnel costs to be taken care of. There are considerable storage space needs that must be protected and controlled. Delivery trucks must have access, often at difficult locations. The easy automation of oil must be gone, hopefully replaced by a sense of pride.

[From the Bangor (Maine) Daily News, Aug. 29-30, 1981]

THE SOMERSET PAGE

(by Bruce Hertz)

Next topic: the new elementary schools of Somerset County.

I have absolutely no training or background in architecture. But like the loudmouthed, red-faced Texan viewing a Jackson Pollock said, I know what I like.

The Skowhegan school, now known as Bloomfield Elementary, and the St. Albans School are functional and will probably conserve fuel. They might even save money over the older schools they are replacing. Aesthetically they are dull.

The rectangular class rooms off long corridors are like almost every other school. They are safe, unimaginative buildings which will enable the teachers and students to proceed through their day and school year. Several Skowhegan teachers said they will miss their large rooms with many floor-to-ceiling windows. The Bloomfield classrooms are about one-third smaller than the old rooms and there is but one window per room.

In both St. Albans and Skowhegan, there will be a doubling of electrical cost because of the fewer windows.

A contrast to these schools is the Solon Elementary School which is as innovative and spirit lifting as the other schools are pedestrian. There is only one small corridor in the Solon school. Each classroom has a different shape. Some are triangular, some trapezoidal; there is one rectangular. The rooms are grouped around the core of the multi-purpose room. Each space relates to the next space so there is a feeling of unity of purpose.

The use of state of the art alternative heating systems reinforces the effort to present something different for an educational environment. Unlike the Skowhegan and St. Albans schools, each room in the Solon school has no fewer than four windows. Each window has a screen, a thermopane insert and blinds. Every view was studied for the effect on the classroom.

In the kindergarten room, the window was placed low enough so the students can see out when they are sitting on the floor.

The children at all the schools will no doubt enjoy the newness of their surroundings, but it will be the students of Solon who will find new ways to use their school every day.

BANK HOLDING ACT AMENDMENTS

Mr. MITCHELL. Mr. President, I am especially pleased that Senator GARN has included the provisions of S. 207, which deals with the insurance activities of bank holding companies, in the banking legislation he recently introduced. Legislation similar to S. 207 was reported by the Senate Banking Committee during the 96th Congress, but unfortunately was not considered by the Senate before the adjournment. I introduced the bill earlier this year as S. 207.

My legislation would amend the Bank Holding Company Act of 1956 to limit the property and casualty and life insurance activities of bank holding companies and their subsidiaries. One of the fundamental purposes of the National Bank Act of 1864 is to prevent an undue concentration of economic power. The nonbanking activities of national bank are, therefore, extremely limited. In addition, most of the States generally preclude insurance activities by State-chartered banks.

As our national economy has grown, many commercial banks have moved to a bank holding company organization in which the banks become subsidiaries of parent holding companies. One result of the restructuring was to allow bank holding companies to engage in nonbanking activities through separate subsidiaries. As a result, Congress limited the permissible activities of bank holding companies in 1956 and again in 1970.

The current Bank Holding Company Act permits bank holding companies to conduct nonbanking activities if certain conditions delineated by the Federal Reserve Board are met. The Independent Insurance Agents of America challenged the Federal Reserve's authorization of certain insurance activities in a Federal court action in 1977. As a result of this litigation and subsequent Federal Reserve actions, bank holding companies have been allowed to move into an insurance market that has traditionally been served by independent insurance agents—credit related property and casualty insurance.

S. 207 would generally prohibit a bank holding company from providing insurance as a principal, agent, or broker. There are six exceptions to this general prohibition, resulting in the prohibition being principally applicable to the underwriting or sale of property and casualty insurance. The exemptions establish, for example, a grandfather date for the continuation of previously authorized insurance activities, and permit bank holding companies to engage in, among other things, credit life, disability, and involuntary unemployment insurance activities.

This legislation will provide a much needed reform in the Bank Holding Company Act and will protect consumers and small businesses by insuring that bank holding companies do not gain an unfair economic advantage in the marketplace.

I look forward to a thorough consideration of S. 207 in light of the other proposals contained in Senator GARN's legislation.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

At an executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the Committee on Armed Services.

(The nominations received today are printed at the end of the Senate proceedings.)

MESSAGES FROM THE HOUSE

At 11:50 a.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its reading clerks, announced that the House has passed the following bill, in which it requests the concurrence of the Senate:

H.R. 3403. An act to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1982 and 1983, to provide for the establishment of regional training centers to assist in improving the emergency response and enforcement capabilities of State and local personnel, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTIONS SIGNED

The message also announced that the Speaker has signed the following enrolled bills and joint resolutions:

S. 1000. An act to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1981, 1982, and 1983, and for other purposes;

S. 1209. An act to authorize appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes;

H.R. 3499. An act to amend title 38, United States Code, to extend the period for Vietnam-era veterans to request counseling under the veterans' readjustment counseling program, to provide medical care eligibility for veterans exposed to herbicides or defoliants (including Agent Orange), or to nuclear radiation, to establish a minimum total number of operating beds in Veterans' Administration hospital and nursing home facilities, to extend for certain Vietnam-era veterans the period of time in which GI Bill educational assistance benefits may be used for the pursuit of certain training, to provide a small business loan program for Vietnam era and disabled veterans, and to extend the authority for veterans readjustment appointments in the civil service, and for other purposes;

S.J. Res. 4. Joint resolution to authorize the President to issue a proclamation designating the week beginning November 22, 1981, as "National Family Week"; and

H.J. Res. 268. Joint resolution to designate October 23, 1981, as "Hungarian Freedom Fighters Day".

The bill H.R. 3499 was subsequently signed by the President pro tempore (Mr. THURMOND).

The remaining enrolled bills and joint resolutions were subsequently signed by the Vice President.

HOUSE BILL PLACED ON CALENDAR

The following bill was read twice by unanimous consent, and placed on the calendar:

H.R. 3403. An act to amend the Hazardous Materials Transportation Act to authorize appropriations for fiscal years 1982 and 1983, to provide for the establishment of regional training centers to assist in improving the emergency response and enforcement capabilities of State and local personnel, and for other purposes.

ENROLLED BILLS AND JOINT RESOLUTIONS PRESENTED

The Secretary reported that on today, October 22, 1981, he had presented to the President of the United States the following enrolled bills and joint resolution:

S. 1000. An act to amend the Independent Safety Board Act of 1974 to authorize appropriations for fiscal years 1981, 1982, and 1983, and for other purposes;

S. 1209. An act authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes; and

S.J. Res. 4. Joint resolution to authorize the President to issue a proclamation designating the week beginning November 22, 1981, as "'National Family Week".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC-2104. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting pursuant to law, the revised test section for the TOMAHAWK missile; to the Committee on Armed Services.

EC-2105. A communication from the Comptroller General of the United States transmitting, pursuant to law, a report entitled "Budgetary Pressures Created by the Army's Plans to Procure New Major Weapon Systems are Just Beginning"; to the Committee on Armed Services.

EC-2106. A communication from the Deputy Secretary of Defense transmitting, pursuant to law, a report on fiscal year 1981 civilian end strength employment in the Department of Defense; to the Committee on Armed Services.

EC-2107. A communication from the Director of the Federal Emergency Management Agency, transmitting pursuant to law, a report on acquisition of real or personal property during the quarter ending September 30, 1981; to the Committee on Armed Services.

EC-2108. A communication from the Assistant Secretary of the Navy for Shipbuildand Logistics transmitting, pursuant to law, a report on a decision to contract out certain military maintenance functions at the Naval Air Station, North Island, San Diego, California, without undergoing a cost comparison study; to the Committee on Armed Services.

EC-2109. A communication from the Assistant Secretary of the Navy for Shipbuilding and Logistics transmitting, pursuant to law, notice of a decision to convert the keypunch function at the Fleet Accounting and Disbursing Center, U.S. Atlantic Fleet Norfolk, Va. to performance under contract; to the Committee on Armed Services.

EC-2110. A communication from the Secretary of Energy transmitting, pursuant to law, a report on the financing, supply, and installation activities of public utilities in connection with residential energy conservaton measures; to the Committee on Energy and Natural Resources.

EC-2111. A communication from the Acting Comptroller General of the United States transmitting, pursuant to law, a report entitled "The Congress Should Control Federal Credit Programs to Promote Economic Stabilization"; to the Committee on Governmental Affairs.

EC-2112. A communication from the Director of the National Oceanic and Atmospheric Administration transmitting, pursuant to law, a report on the 1980 NOAA Corps pension plan; to the Committee on Governmental Affairs.

EC-2113. A communication from the Attorney General of the United States transmitting a draft of proposed legislation entitled "Omnibus Immigration Control Act"; to the Committee on the Judiciary.

EC-2114. A communication from the Associate Commissioner of the Immigration and Naturalization Service for Examinations transmitting, pursuant to law, 516 orders entered under the authority of section 212(d)(3) of the Immigration and Nationality Act; to the Committee on the Judiciary.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. HATFIELD, from the Committee on Appropriations, favorably with amendments:

H.R. 4119: A bill making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes.

By Mr. TOWER, from the Committee on Armed Services:

Special report entitled "Military and Technical Implications of the Proposed Sale of Air Defense Enhancements to Saudi Arabia (Rept. No. 97-242).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, favorably without amendment:

S. 1605: A bill to provide for the reinstatement and validation of United States oil and gas lease numbered E. S. 20644 (Rept. No. 97-243).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, favorably with an amendment:

S. 383: A bill to provide for the reinstatement and validation of United States oil and gas lease numbered M-16402 (ND) Acq (Rept. No. 97-244).

S. 466: A bill to provide for the reinstatement and validation of United States oil and gas lease numbered M-15450 (ND) (Rept. No. 97-245).

S. 1457: A bill to reinstate United States oil and gas lease number OR-13713 (Rept. No. 97-246).

By Mr. McCLURE, from the Committee on Energy and Natural Resources, favorably with amendments:

S. 651: A bill to provide for the reinstatement and validation of United States oil and gas lease numbered W-46102 (Rept. No. 97-247).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Jean Tufts, of New Hampshire, to be Assistant Secretary for Special Education and Rehabilitative Services, Department of Education.

(The above nomination was reported from the Committee on Labor and Human Resources, with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

FOREIGN CURRENCY REPORTS

In accordance with the appropriate provisions of law, the Secretary of the Senate herewith submits the following report(s) of standing committees of the Senate, certain joint committees of the Congress, delegations and groups, and select and special committees of the Senate, relating to expenses incurred in the performance of authorized foreign travel:

CONSOLIDATED REPORT OF EXPENDITURE OF FOREIGN CURRENCIES AND APPROPRIATED FUNDS FOR FOREIGN TRAVEL BY MEMBERS AND EMPLOYEES OF THE U.S. SENATE, UNDER AUTHORITY OF SEC. 22, PUBLIC LAW 95-384—22 U.S.C. 1754(b), COMMITTEE ON APPROPRIATIONS, FOR THE PERIOD FROM APR. 1 TO JUNE 30, 1981

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. COCHRAN:

S. 1761. A bill to amend the Voting Rights Act of 1965 to provide for the application of preclearance provisions to all States and political subdivisions and to provide for submission of any changes under the preclearance provisions to the appropriate district court of the United States; to the Committee on the Judiciary.

By Mr. MOYNIHAN:

S. 1762. A bill to amend part A of title IV of the Social Security Act with respect to the earned income disregard; to the Committee on Finance.

S. 1763. A bill to amend the provisions of the Internal Revenue Code related to cooperative housing corporations; to the Committee on Finance.

S. 1764. A bill to amend the provisions of the Internal Revenue Code related to cooperative housing corporations; to the Committee on Finance.

By Mr. THURMOND (by request):

S. 1765. A bill to revise and reform the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

By Mr. CRANSTON:

S. 1766. A bill to amend the Federal Election Campaign Act of 1971 to provide that the limitations on contributions to candidates shall be waived for elections in which any candidate spends more than $35,000 from his personal funds; to the Committee on Rules and Administration.

By Mr. CANNON:

S. 1767. A bill to transfer certain lands in Clark County, Nevada, from the Department of Agriculture to the Frontier Girl Scout Council; to the Committee on Energy and Natural Resources.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. COCHRAN:

S. 1761. A bill to amend the Voting Rights Act of 1965 to provide for the application of preclearance provisions to all States and political subdivisions and to provide for submission of any changes under the preclearance provisions to the appropriate district court of the United States; to the Committee on the Judiciary.

(The remarks of Mr. COCHRAN on this legislation appear earlier in today's RECORD.)

By Mr. MOYNIHAN:

S. 1762. A bill to amend part A of title IV of the Social Security Act with respect to the earned income disregard; to the Committee on Finance.

EARNED INCOME DISREGARD

● Mr. MOYNIHAN. Mr. President, for 14 years the program we know as "aid to families with dependent children"—AFDC, more commonly known as welfare—embodied the principle that welfare recipients who are able to work should have an incentive to work. The Social Security Amendments of 1967 established what is known as the $30 and one-third earned income disregard. This meant that a welfare recipient could keep the first $30 of each month's earnings, plus one-third of all additional earnings, plus whatever was required to pay for work-related expenses and children's day care. The welfare check was then reduced by the amount of earnings in excess of those disregarded under the formula.

The result was that a significant number of AFDC recipients did work. In 1977, some 21.8 percent of all AFDC families had income other than their welfare benefit. That represented a population of 763,000 families, 65,000 of them in New York, who were both economically better off as a consequence of working and in which the children were growing up with an awareness that one who works is better off than one who does not.

The Reconciliation Act eliminated this incentive. A less generous version of the disregard will apply only to the first 4 months of work. After working for 4 months, a welfare recipient would be able to disregard $75 toward work expenses and up to $160 of child care, but could keep nothing else of his earnings. Should his income exceed 150 percent of the State's standard of need—a range from $268 per month in Tennessee to $1,101 in Vermont, averaging $526 in the 50 States and the District of Columbia—the recipient will cease to qualify for welfare, and cannot return to the rolls for 12 months, even if he loses his job the next day.

One assumes this policy is designed to reduce dependence. Taking away the economic incentive to work will not do so. It will result in fewer welfare recipients working. If there is no economic gain from working, there is no economic reason—although there may be other reason—to work.

That is why I rise today to introduce a bill to restore the earned income disregard. Not to return to the 1967 law, which has been attacked with some justification as overly generous, but to retain a less substantial disregard that will apply to earnings throughout a welfare recipient's employment.

The bill's provisions are simple. For the first 4 months at work, a welfare recipient would be treated as the Reconciliation Act mandates. In each month that a recipient works, he will be able to deduct the first $75 of earned income—instead of itemized work expenses—up to $160 of child care expenses, $30 and one-third of the remainder of earned income. The law would remain in effect after the fourth month of employment, except that the recipient could keep, after deductions for child care and work expenses, only $30 and one-fifth of the rest of his earnings.

This bill is an attempt to reintroduce a work incentive into the AFDC program. That this must be done is somewhat ironic, as another change made by the Reconciliation Act allows States to require community service in exchange for a monthly welfare check. This will not have the salutary effects of paid employment; commonsense tells both worker and employer that jobs worth doing are jobs that pay. Community work will provide neither the economic nor the psychological benefits that come from earning a wage, will in no way encourage welfare recipients to believe that working can be financially or personally rewarding.

Since 1967 we have been committed to the proposition that welfare recipients who can work should be encouraged to work. In the words of a Washington Post editorial of October 7, eliminating the earned income disregard gives welfare recipients the grotesque choice of either quitting their jobs or, by keeping them, losing both income and medical care. Given such a choice, what reasonable person will continue to work? I fear that we risk consigning the temporarily needy to permanent dependency unless we restore some earnings disregard. My bill would be a sensible, moderate way to do so.

I ask unanimous consent to place the Washington Post editorial "Keep Working Mothers Working" in the RECORD.●

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

KEEP WORKING MOTHERS WORKING

In case you missed the first, or second, or third time around, let us say it again: there is something fundamentally wrongheaded and outrageously unfair about the recent changes in welfare law that punish poor people for working. We are not talking about some abstruse concern of theoretical economics. We are talking about real people who now face the grotesque choice of either quitting their jobs or, by keeping them, losing both income and medical care.

Why would the administration propose, and Congress enact, a law with so perverse a result? OMB Director David Stockman defends the changes on two grounds: they are that (1) previous welfare law was so generous to the working poor that families with incomes of $20,000 or more could still receive aid, and (2) there is no way to provide work incentives for the poor by income "disregards and offsets" without "putting half the population" on welfare.

The first of these arguments rests on a wild generalization from a handful of cases. It is true that, before Oct. 1, states were allowed to reimburse working welfare mothers for the full cost of child care and work-related expenses. If these costs were very high, families could have substantial earnings and still receive welfare. As a result, now and then some horror case would emerge—the recent divorcee with a good salary, three children in private school and payments due on a late model Cadillac. There weren't many such cases—three-quarters of working welfare mothers earn less than $500 a month—and the remedy, proposed by the last three administrations, was simple. You can put a reasonable cap on work-related expense deductions while still retaining the important feature of welfare law that, by reducing benefits by less than the full amount of earnings, provided at least a small reward for work effort.

It is this so-called "earnings disregard" that Mr. Stockman fears will put half the citizenry on welfare. This fear might be better grounded if the country had a very generous welfare system—one, say, that guaranteed a poverty-level income to all the poor and reduced benefits by no more than 33 cents for every dollar of earnings. But welfare in the United States isn't like that. Aid to Families with Dependent Children—what most people think of as welfare—is received almost exclusively by husbandless women with children to support. No state has a basic benefit level close to the poverty line,

and some states have benefits less than half that amount even counting food stamps.

A modest work incentive was provided—before the recent changes—by reducing benefits by 67 cents for each dollar earned, but since food stamps were cut by another 10 cents the recipient netted only about 20 cents on the dollar for her labor. What all this added up to was that even with the full set of "disregards and offsets" in place, less than 9 percent—not one-half—of the population received AFDC benefits.

The elimination of work incentives is not claimed to be a big money saver even by its advocates. In fact, welfare costs are more likely to rise as recipients choose the higher income—plus Medicaid—now offered by welfare instead of persisting in their generally low-paid dead-end jobs. Before that happens—before one more working welfare mother gets processed off the rolls or driven from the labor force—Congress should restore at least the minimal incentive for work that AFDC law used to provide.

By Mr. MOYNIHAN:

S. 1763. A bill to amend the provisions of the Internal Revenue Code related to cooperative housing corporations; to the Committee on Finance.

S. 1764. A bill to amend the provisions of the Internal Revenue Code related to cooperative housing corporations; to the Committee on Finance.

COOPERATIVE HOUSING CORPORATIONS

● Mr. MOYNIHAN. Mr. President, the legislation I am introducing today amends section 216 of the Internal Revenue Code. Section 216 authorizes any individual who owns a cooperative apartment to deduct his proportionate share of the mortgage interest and property taxes paid on the cooperative building.

The provision was enacted in 1942. The aim was to treat owners of cooperative apartments the same as owners of condominiums and single-family houses, who already were able to deduct mortgage interest and property taxes. Owners of cooperative apartments could not, because their interest and taxes are legally an obligation of the cooperative housing corporation that owns the building, even though the tenants are responsible for them in practice.

Before an apartment owner can qualify for deductions under section 216, he must satisfy two tests. He must be a tenant-stockholder. That is to say, he must be an individual, rather than a corporation or a partnership. And the cooperative housing corporation that owns the building must earn at least 80 percent of its income from tenant-stockholders.

In 1978, the law was changed so that owners of apartments in a building that has just gone cooperative would not be disqualified while the sponsor—a corporation or a partnership—still holds a large number of apartments waiting to be sold. An investor who plans to convert a building into cooperatives generally starts by forming a corporation or a partnership with other investors to raise capital. He then purchases the building and transfers the deed to a cooperative housing corporation. In exchange, he receives cash paid by people who want to purchase apartments in the building and proprietary leases to the remaining apartments. The sponsor continues to sell the remaining apartments as he can. Because the sponsor is not an individual, the co-op could fail to earn at least 80 percent of its income from tenant-stockholders during the start-up period.

Section 216(b)(6) of the Tax Code says the "original seller," or sponsor, will be considered a tenant-stockholder, even though the sponsor is a corporation or a partnership. However, the grace period lasts only 3 years. It applies to apartments that he acquires direct from the cooperative housing corporation within 1 year after the deed to the building is originally transferred.

My bill is easy to describe. It would extend the grace period. In future, a sponsor would continue to be a tenant-stockholder for as long as he holds apartments in his capacity as the original seller.

I was the author of the amendment in 1978; 3 years was an arbitrary figure. It serves no policy purpose.

In fact, there are good reasons to have no limit at all. A temporary grace period gives sponsors an incentive to convert buildings into condominiums rather than cooperatives. That is because a sponsor can hold unsold condominiums for as long as he likes. This has no effect on whether owners of the other condominiums can deduct their interest and taxes.

But a cooperative is different. Three years after a building goes cooperative, the sponsor usually has to distribute the unsold units to his investors, or risk jeopardizing the tax deductions of people who bought cooperative apartments. This is a burden because no investor wants to find himself suddenly having to manage individual units.

Hence, the tax laws favor condominium conversion. I submit that the laws should be neutral between condominiums and cooperatives.

Also, a temporary grace period encourages sponsors in New York to evict renters from buildings that have gone cooperative. New York law distinguishes between eviction and noneviction plans. An eviction plan gives the sponsor the right to evict tenants who refuse to buy their apartments. However, an eviction plan cannot be implemented unless the sponsor is able within 18 months to persuade at least 35 percent of the tenants who are protected by local rent control laws to purchase their units.

Under a noneviction plan, the sponsor has no right to evict tenants. He simply has a right to the tenants' apartments when the apartments are vacated. The law requires at least 15 percent of the units to be sold to rent-stabilized tenants before a noneviction plan can be implemented. A sponsor chooses either an eviction or a noneviction plan when he files registration materials with the State attorney general.

A sponsor who uses a noneviction plan can be left holding proprietary leases to apartments for decades. This would not matter much if it were not for Federal tax law. But as I have already said, any apartment that a corporate sponsor still has 3 years after a building went cooperative must be distributed to the investors. This is a burden. Hence, there is an incentive for sponsors to use eviction plans and to throw out elderly tenants. I do not think that is a practice we should encourage.

Mr. President, I ask unanimous consent that the text of the legislation be printed in the RECORD.

There being no objection, the bills were ordered to be printed in the RECORD, as follows:

S. 1763

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) Paragraph (6) of subsection (b) of section 216 of the Internal Revenue Code (relating to deductions for tenant-stockholders in cooperative housing corporations) is amended by placing a period after the term "tenant-stockholder" in subparagraph (A) and by deleting the phrase "for a period not to exceed three years from the date of the acquisition of such stock.".

(b) This amendment shall apply in tax years beginning after the date of enactment.

S. 1764

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

(a) Subparagraph (D) of section 216(b)(1) of the Internal Revenue Code (defining cooperative housing corporation) is amended by deleting "80 percent" and inserting in lieu thereof "50 percent".

(b) Subparagraph (A) of section 216(b)(6) of such Code (relating to the definition of tenant-stockholder) is amended by placing a period after the term "tenant-stockholder" and by deleting the phrase "for a period not to exceed three years from the date of the acquisition of such stock.".

(c) These amendments shall apply in tax years beginning after the date of enactment.●

By Mr. THURMOND (by request):

S. 1765. A bill to revise and reform the Immigration and Nationality Act, and for other purposes; to the Committee on the Judiciary.

OMNIBUS IMMIGRATION CONTROL ACT

Mr. THURMOND. Mr. President, today, at the request of the administration, I am introducing legislation entitled the Omnibus Immigration Control Act.

The Reagan administration should be commended for its initiative in sending forward such comprehensive legislation in an area that certainly needs congressional action. Mr. President, almost every day our citizens read in a newspaper or see on television a story about immigration and refugee problems either worldwide or here in America. In fiscal year 1981, during the previous administration approximately 217,000 refugees were authorized to enter the United States. It is estimated that more than 160,000 of that number have already reached our shores.

In addition to refugee admissions, the United States admitted 650,000 immigrants lawfully under provisions of the Immigration and Nationality Act during fiscal year 1981. The estimate of the number of illegal aliens presently in this country ranges from 3 to 6 million. As the Attorney General of the United States has stated "we have lost control of our borders."

The social and economic impact of the presence of these high numbers of both legal and illegal immigrants and thousands of refugees is growing each day.

Areas of south Florida, for example, are being required to absorb and care for thousands of Cubans who came during the Mariel boat lift, as well as thousands of Hatians who have been coming in a steady stream for the past few years. It is now beyond the ability of State and local governments to deal with this situation. Something must be done.

Mr. President, it is indeed with a sense of urgency that we must respond to this growing problem. At the same time, however, we must take into account the impact new legislation will have on the flow of refugees to America, as well as the impact on our society. We should allow foreign nationals into our Nation, but on terms that are consistent both with a global humanitarian interest and the best interests of the American people.

Mr. President, as chairman of the Committee on the Judiciary, I can assure the Senate that the committee is prepared to act on immigration and refugee legislation in this Congress. Under the leadership of Senator SIMPSON, chairman of the Subcommittee on Immigration and Refugee Policy, this legislation will undergo careful scrutiny. Senator SIMPSON has already done yeoman work in this area and I want to commend him for his continued leadership in pressing for a sound legislative response to immigration and refugee problems.

There are proposals in the package submitted by the administration that have my full support. There are others, however, on which I intend to reserve judgment until the committee has had the opportunity to study them closely, as well as consider other alternatives. But I believe the proposal I am introducing today can serve as a vehicle for achieving legislative reforms in this Congress.

Mr. President, I ask unanimous consent that the Executive communication to the Vice President from the Attorney General of the United States and the bill with the accompanying materials on the Omnibus Immigration Control Act be printed in the RECORD following my remarks.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

S. 1765

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Omnibus Immigration Control Act."

TITLE I—TEMPORARY RESIDENT STATUS FOR ILLEGAL ALIENS

SEC. 101. (a) Notwithstanding any other provision of law, the Attorney General in his discretion and under such regulations as he may prescribe, may accord temporary resident status to any alien who:

(1) entered the United States prior to January 1, 1980, and has continuously resided in the United States since that time;

(2) is admissible to the United States except for the grounds of exclusion specified in paragraphs (14), (20), (21), and (23). If excludability thereunder is based solely on a single conviction for possession without intent to distribute narcotics drugs or marihuana, (25), and (32) of section 212(a) of the Immigration and Nationality Act;

(3) has not assisted in the persecution of any person or persons on account of race religion, nationality, membership in a particular social group, or political opinion;

(4) if the alien, entered the United States as a nonimmigrant, has not maintained a lawful nonimmigrant status since January 1, 1980; and

(5) if the alien was at any time a nonimmigrant exchange alien as defined in section 101(a)(15)(J) of the Immigration and Nationality Act, was not subject to the two-year foreign residence requirement of section 212(e) of the Act, or has fulfilled that requirement, or has received a waiver thereof.

(b)(1) To be eligible for benefits under subsection (a) of this section, an alien must register with the Immigration and Naturalization Service within 12 months of the date established by the Attorneey General as the beginning of registration under this section.

(2) An alien under temporary resident status under this section must register with the Immigration and Naturalization Service every three years thereafter, under such regulations as the Attorney General may prescribe, as long as the alien remains under temporary resident status.

(c) If at any time after the alien is granted temporary resident status under this section, it shall appear to the Attorney General that the alien was in fact not eligible for that status, or that the alien is deportable under section 241 of the Immigration and Nationality Act (8 U.S.C. 1251), the Attorney General may rescind such temporary resident status, under such regulations as he may prescribe, and the person shall be subject to all provisions of this Act to the same extent as if the status had not been granted.

(d) The spouse and children of an alien granted temporary resident status under this section shall not receive any status or preferred treatment under the Immigration and Nationality Act by reason of the family relationship with the temporary resident alien. However, this subsection shall not prevent a spouse or child who independently meets the qualifications of subsections (a) and (b) of this section from obtaining temporary resident status.

(e) An alien who is granted temporary resident status under this section shall not be eligible for refugee assistance under the Immigration and Nationality Act, except as specifically set forth in subsection (f) of this title.

(f) An alien who is granted temporary resident status under this section shall not be eligible for any benefits under any of the following provisions of law:

(1) Food Stamp Act of 1964, as amended (7 U.S.C. 2011 et seq.);

(2) Financial assistance made available pursuant to the United States Housing Act of 1937, section 235 or 236 or National Housing Act or section 101 of the Housing and Urban Development Act;

(3) Aid or assistance under a State plan approved under title I, X, XIV, or XVI of the Social Security Act (other than on the basis of a disability described in paragraph (5) of this subsection);

(4) Medical assistance under title XIX of the Social Security Act (other than in the case of an individual receiving aid under a State plan approved under title XIV or XVI of the Social Security Act, or supplemental security income benefits under title XVI of that Act, on the basis of a disability described in paragraph (5) of this subsection; and

(5)(1) Section 402(a)(33) of the Social Security Act is amended by striking out the period at the end thereof and inserting instead "other than an alien granted temporary resident status."

(2) Section 1614(a)(1)(B) of such Act is amended by striking out the period at the end thereof and inserting instead "other than an alien granted temporary resident status."

(3) Section (2)(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (12),

(B) by striking out the period at the end of paragraph (13) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(14) provided that, in order for any individual to be a recipient of old-age assistance, or an individual whose needs are taken into account in making the determination under paragraph (10)(A), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted temporary resident status."

(4) Section 1002(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (13),

(B) by striking out the period at the end of paragraph (14) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(14) provided that, in order for any individual to be a recipient of aid to the blind, or an individual whose needs are taken into account in making the determination under paragraph (8), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted temporary resident status."

(5) Section 1402(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (11),

(B) by striking out the period at the end of paragraph (12) and inserting instead "; and", and

(C) by adding at the end of that subsection the following new paragraph:

"(13) provided that, in order for any individual to be a recipient of aid to the permanently and totally disabled, or an individual whose needs are taken into account in making the determination under paragraph (8), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted temporary resident status."

(6) Section 1602(a) of such Act (as in effect in Puerto Rico, Guam, and the Virgin Islands) is amended—

(A) by striking out "and" at the end of paragraph (16),

(B) by striking out the period at the end of paragraph (17) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(18) provided that, in order for any individual to be a recipient of aid to the aged, blind, or disabled, or an individual whose needs are taken into account in making the determination under paragraph (14), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted temporary resident status."

(7) Section 1902(a) of such Act is amended—

(A) by striking out the period at the end of paragraph (43) and inserting "; and", and

(B) by adding at the end thereof the following new paragraph:

(44) provided that in order for any individual to be eligible for medical assistance, such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted temporary resident status.

SEC. 102. (a) Notwithstanding any other provision of law, the Attorney General in his discretion and under such regulations as he may prescribe, may adjust the status of any alien accorded temporary resident status under section (a) of this Title to that of an alien lawfully admitted for permanent residence, if the alien:

(1) has completed 10 years of continuous residence in the United States from time of entry;

(2) can demonstrate an understanding of the English language, including an ability to read, write, speak words in ordinary usage in the English language: *Provided*, That this requirement shall not apply to any person physically unable to comply therewith, if otherwise eligible for adjustment; *Provided further*, That the requirements of this section relating to ability to read and write shall be met if the applicant can read or write simple words and phrases and that no extraordinary or unreasonable conditions shall be imposed upon the applicant; and

(3) remains eligible to receive an immigrant visa and otherwise admissible a specified in section (a) of this Title.

SEC. 103. The requirement of continuous residence shall be defined by regulations to be issued by the Attorney General.

SEC. 104. The numerical limitations of section 201 of the Immigration and Nationality Act shall be inapplicable to grants of lawful permanent residence under section 102 of this Title.

TITLE II—THE UNLAWFUL EMPLOYMENT OF ALIENS ACT OF 1981

SEC. 201. Section 274 of the Immigration and Nationality Act (8 U.S.C. 1324) is amended to read as follows:

(d)(1) It shall be unlawful for an employer knowingly to hire an alien for employment in the United States, unless at the time of employment the alien has been lawfully admitted for permanent residence or is an alien who has been authorized to be employed by the Attorney General: *Provided*, That this provision shall not apply to an employer who establishes that he or she did not employ four or more persons, at the time of violation.

(2) If an alien has been employed in violation of this subsection, the employer shall be subject to a civil penalty of $500 per alien employed without authorization upon determination of a first violation. Upon determination of a subsequent violation, the employer shall pay the sum of $1,000 per alien employed without authorization. Payment shall be made to the district director of the Immigration and Naturalization Service in the district where the violation occurred. In the discretion of the Attorney General, payment may be recovered by civil suit in a United States district court in the name of the United States from any employer made liable under this subsection. The Attorney General shall establish by regulation a procedure for implementing this subsection.

(3) Whenever the Attorney General has reasonable cause to believe that an employer has engaged in a pattern or practice of employment in violation of this subsection, the Attorney General may bring a civil action in the appropriate district court of the United States by filing with it a complaint setting forth facts pertaining to such pattern or practice and requesting such relief, including an application for a permanent or temporary injunction, restraining order, or other order against the employer as the Attorney General deems necessary. For purposes of this paragraph the term "district court" shall include a United States magistrate.

(4) For the purposes of this section, an employer shall be presumed to have knowingly employed an alien who is not authorized for employment in the United States if the employer does not request and obtain evidence that the individual is authorized for employment as set forth in (d)(5) below: *Provided*, That the foregoing shall not prevent the Government from establishing knowing employment by any other means.

(5) The Attorney General shall establish by regulation a form by which every employer as described in subsection (d)(1) above, and every prospective employee of such employer, shall attest that the prospective employee is a United States citizen, a national of the United States, or has the status of an alien lawfully admitted for permanent residence, or has been authorized for employment by the Attorney General, and that the employer has examined such documents as may, by regulation, be prescribed by the Attorney General relating to such citizenship, permanent resident status, or employment authorization. Such forms shall be retained by the employer and shall be available for inspection by officers of the Immigration and Naturalization Service, for the duration of the employee's employment, and for one year following the termination of the employment.

(6)(1) Section 6(f) of the Farm Labor Contractor Registration Act of 1963, as amended, is hereby repealed.

(2) Section 5(b)(6) of the Farm Labor Contractor Registration Act of 1963, as amended, is revised to read as follows:

(6) has been found to have knowingly employed an alien not lawfully admitted for permanent residence or not authorized for permanent residence or not authorized by the Attorney General to accept employment in violation of section 274 of the Immigration and Nationality Act.

(2) by inserting after new subsection (d) the following new subsection:

(e) The provisions of this section are intended to preempt any state or local laws imposing civil or criminal sanctions upon those who employ aliens not authorized to work in the United States.

(3) the title of section 274 of such Act is amended to read as follows: "BRINGING IN, HARBORING, AND EMPLOYING CERTAIN ALIENS."

(4) the designation of section 274 in the table of contents (Title II—Immigration, Chapter 8) of such Act is amended to read as follows: "Section 274. Bringing in, harboring, and employing certain aliens."

SEC. 202. Section 275 of the Immigration and Nationality Act (8 U.S.C. 1325) is amended to read as follows: "275 ENTRY OF ALIEN AT IMPROPER TIME OR PLACE: MISREPRESENTATION AND CONCEALMENT OF FACTS: MISREPRESENTATION OF EMPLOYMENT STATUS."

(a) Any alien who (1) enters the United States at any time or place other than as designated by immigration officers, or (2) eludes examination or inspection by immigration officers, or (3) obtains entry to the United States by a willfully false or misleading representation or the willful concealment of a material fact, shall, for the first commission of any such offenses, be guilty of a misdemeanor and upon conviction thereof be punished by imprisonment for not more than six months, or by a fine of not more than $500, or both, and for a subsequent commission of any such offenses shall be guilty of a felony and upon conviction thereof shall be punished by imprisonment for not more than two years, or by a fine of not more than $1,000, or both.

(b) Any person who with unlawful intent photographs, prints, or in any other manner makes, or executes, any engraving, photograph, print, or impression in the likeness of any document presented to establish United States citizenship, lawful permanent resident status or employment authorization granted by the Attorney General, as required by subsection 274(d)(5) of the Act or regulations issued thereunder; or any person who with unlawful intent presents or uses such documents, shall upon conviction be fined not to exceed $5,000 or be imprisoned not more than five years, or both.

(c) Any alien who does not have the status of an alien lawfully admitted for permanent residence, or who has not been authorized to be employed by the Attorney General, who willfully and knowingly possesses and presents any document relating to another person for the purpose of obtaining employment in the United States, shall upon conviction be fined not to exceed $5,000 or be imprisoned not more than five years, or both.

(b) the designation of section 275 in the table of contents (Title II—Immigration, Chapter 8) of such Act is amended to read as follows:

SEC. 275. Entry of alien at improper time or place; misrepresentation and concealment of facts; misrepresentation of employment status.

SEC. 203. The provisions of this Title shall become effective upon the date of enactment.

SEC. 204. This Title shall be known as the Unlawful Employment of Aliens Act of 1981.

TITLE I'I—CUBAN/HAITIAN TEMPORARY RESIDENT STATUS ACT OF 1981

SEC. 301. (a) Except as provided in subsection (c) of this section, the following aliens shall be granted Cuban/Haitian temporary resident status beginning 60 days after enactment of this Act and may remain in the United States under such conditions as the Attorney General may deem appropriate:

(1) Nationals of Cuba who arrived in the United States and presented themselves for inspection after April 20, 1980, and before January 1, 1981; and who are still physically present in the United States;

(2) Nationals of Haiti who on December 31, 1980, were the subjects of exclusion proceedings under section 236 of the Immigration and Nationality Act, including those who on that date were under orders of exclusion and deportation which had not yet been executed;

(3) Nationals of Haiti who on December 31, 1980, were the subjects of deportation proceedings under section 242 of the Immigra-

tion and Nationality Act, including those who on that date were under orders of deportation which had not yet been executed;

(4) Nationals of Haiti who were paroled into the United States under section 212(d)(5) of the Immigration and Nationality Act or were granted voluntary departure before December 31, 1980, and were physically present in the United States on that date; and

(5) Nationals of Cuba or Haiti who on December 31, 1980, had applications for asylum pending with the Immigration and Naturalization Service.

(b) The Attorney General may in his discretion grant an alien described in subsection (a) of this section authorization to engage in employment in the United States and provide to that alien an "employment authorized" endorsement or other appropriate work permit.

(c) Cuban/Haitian temporary resident status for any alien may be denied or terminated by the Attorney General, in his discretion, pursuant to such regulations as the Attorney General may prescribe, if the Attorney General determines, with or without a hearing, that the alien is inadmissible under section 212(a) of the Immigration and Nationality Act (8 U.S.C. 1182(d)) (except paragraph (14), (15), (20), (21), (23), if the alien's inclusion in paragraph (23) is the result of only one conviction for possession without intent to distribute narcotic drugs or marihuana, (25) or (32) of subsection (a)), or if the Attorney General determines that:

(1) the alien ordered, incited, assisted, or otherwise participated in the persecution of any person on account of race, religion, nationality, membership in a particular social group, or political opinion;

(2) there are serious reasons for considering that the alien has committed a serious nonpolitical crime outside the United States prior to the arrival of the alien in the United States;

(3) the alien is in detention at the time this Title is enacted.

(d) An alien granted Cuban/Haitian temporary resident status under this section shall register with the Immigration and Naturalization Service every three years, under such regulations as the Attorney General may prescribe, for so long as the alien remains in temporary resident status.

(e)(1) An alien under Cuban/Haitian temporary resident status shall not be eligible for benefits under section 501 of the Refugee Education Assistance Act of 1980 (P.L. 96–122).

(2) The spouse and children of an alien granted temporary resident status under this section shall not receive any status or preferred treatment under the Immigration and Nationality Act by reason of the family relationship with the temporary resident alien. However, this subsection shall not prevent a spouse or child who independently meets the qualifications of subsections (a) and (b) of this section from obtaining temporary resident status.

(3) An alien granted Cuban/Haitian temporary resident status shall not be eligible for any benefits under any of the following provisions of law:

(A) Aid to families with dependent children under Title IV, Part A, of the Social Security Act (42 U.S.C. 601 et seq.);

(B) Supplemental security income for the aged, blind, and disabled under title XVI of the Social Security Act (42 U.S.C. 1381 et seq.) unless such disability was incurred directly from employment after registration under the provisions of the Act;

(C) Food Stamp Act of 1964, as amended (7 U.S.C. 2011 et seq.);

(D) Financial assistance made available pursuant to the United States Housing Act of 1937, Section 235 or 236 or National Housing Act or section 101 of the Housing and Urban Development Act of 1965; and

(E) Aid or assistance under a State plan approved under title I, X, XIV, or XVI of the Social Security Act (other than on the basis of a disability described in paragraph (G) of this subsection);

(F) Redesignating paragraph (5) as paragraph (6) and amending it to read: "(6) medical assistance under title XIX of the Social Security Act (other than in the case of an individual receiving aid under a State plan approved under title XIV or XVI of the Social Security Act, or supplemental security income benefits under title XVI of that Act, on the basis of a disability described in paragraph (G) of this subsection.)";

(G)(1) Section 402(a)(33) of the Social Security Act is amended by striking out the period at the end thereof and inserting instead "other than an alien granted Cuban/Haitian temporary resident status."

(2) Section 1614(a)(1)(B) of such Act is amended by striking out the period at the end thereof and inserting instead "other than an alien granted Cuban/Haitian temporary resident status."

(3) Section (2)(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (12),

(B) by striking out the period at the end of paragraph (13) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(14) provide that, in order for any individual to be a recipient of old-age assistance, or an individual whose needs are taken into account in making the determination under paragraph (10)(A), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted Cuban/Haitian temporary resident status."

(4) Section 1002(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (13),

(B) by striking out the period at the end of paragraph (14) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(14) provide that, in order for any individual to be a recipient of aid to the blind, or an individual whose needs are taken into account in making the determination under paragraph (8), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted Cuban/Haitian temporary resident status."

(5) Section 1402(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (11),

(B) by striking out the period at the end of paragraph (12) and inserting instead "; and", and

(C) by adding at the end of that subsection the following new paragraph:

"(13) provide that, in order for any individual to be a recipient of aid to the permanently and totally disabled, or an individual whose needs are taken into account in making the determination under paragraph (8), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted Cuban/Haitian temporary resident status."

(6) Section 1602(a) of such Act (as in effect in Puerto Rico, Guam, and the Virgin Islands) is amended—

(A) by striking out "and" at the end of paragraph (16),

(B) by striking out the period at the end of paragraph (17) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(18) provide that, in order for any individual to be a recipient of aid to the aged, blind, or disabled, or an individual whose needs are taken into account in making the determination under paragraph (14), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted Cuban/Haitian temporary resident status."

(7) Section 1902(a) of such Act is amended—

(A) by striking out the period at the end of paragraph (43) and inserting "; and", and

(B) by adding at the end thereof the following new paragraph:

"(44) provide that, in order for any individual to be eligible for medical assistance, such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than an alien granted Cuban/Haitian temporary resident status."

SEC. 302. (a) Any alien (except an alien specified in section 301(a)(3), or an alien specified in section 301(a)(5) who has entered the United States) who is denied Cuban/Haitian temporary resident status for any of the reasons set forth in section 301(c), or whose status is terminated pursuant to the provisions of section 301 shall be detained pending a final determination of admissibility, or pending release on parole, or pending deportation if the alien is found excludable, unless an examining officer finds that the alien is clearly and beyond a doubt entitled to be admitted to the United States. Such detention shall be in any prison or other detention facility or elsewhere, whether maintained by the Federal Government or otherwise, as the Attorney General may direct. The Attorney General may at any time transfer an alien from one place of detention to another. No alien shall be released from detention pending a final determination of admissibility, or pending exclusion or deportation if the alien is found excludable, except in the discretion of the Attorney

General, and under such conditions as the Attorney General may prescribe, including release on bond. No court shall review any decision of the Attorney General made pursuant to this paragraph to detain, to transfer or to release an alien, except that any person so detained may obtain review, in habeas corpus proceedings, on the question of whether that person falls within the category of aliens subject to detention. A determination of admissibility is exempt from the provisions of the Administrative Procedures Act 15 U.S.C. 701(a).

(b) An alien specified in section 301(a)(3), or an alien specified in section 301(a)(5) who has entered the United States, who is denied Cuban/Haitian temporary resident status for any of the reasons set forth in section 301(c), or whose status is terminated pursuant to the provisions of section 301 shall be dealt with in accordance with section 242 of the Immigration and Nationality Act.

SEC. 303. (a) Notwithstanding any numerical limitations in the Immigration and Nationality Act, the Attorney General, in his discretion and under such regulations as he may prescribe, may adjust the status of a Cuban/Haitian temporary resident to that of an alien lawfully admitted for permanent residence if the alien:

(1) applies for such adjustment,

(2) is not firmly resettled in any foreign country,

(3) has been physically present in the United States for at least five years after the earliest date upon which he came within any category specified in section 2(a)(1)–(5),

(4) can demonstrate an understanding of the English language, *Provided*, that this requirement shall not apply to any person physically unable to comply therewith, if otherwise eligible for adjustment; *Provided further*, that the requirements of this section relating to ability to read and write shall be met if the applicant can read or write simple words and phrases and that no extraordinary or unreasonable conditions shall be imposed upon the applicant; and

(5) is admissible (except as otherwise provided in subsection (b)) as an immigrant under the Immigration and Nationality Act at the time of examination for adjustment of such alien.

(b) The provisions of paragraphs (14), (20), (21), and (32) of section 212(a) of the Immigration and Nationality Act shall not be applicable to an alien seeking adjustment of status under this section, and the Attorney General may waive any other provision of such section (other than paragraph (27), (29), or (33) and other than so much of paragraph (23), except if the alien's inclusion in paragraph (23) is the result of only one conviction for possession without intent to distribute narcotic drugs or marihuana) with respect to such an alien for humanitarian purposes, to assure family unity, or when it is otherwise in the public interest.

SEC. 304. (a) An alien granted Cuban/Haitian temporary resident status may not apply for asylum under section 208 of the Immigration and Nationality Act (8 U.S.C. 1158), and any application for asylum under section 208 or under any other provision of law filed by the alien but not approved before the alien was granted Cuban/Haitian temporary resident status shall be denied.

(b) Subsection (c) of section 208 of the Immigration and Nationality Act (8 U.S.C. 1158) and subsection (b) of section 209 (8 U.S.C. 1159) of that Act shall not be applicable to an alien granted Cuban/Haitian temporary resident status or to the spouse or child of such alien.

SEC. 305. Public Law 89–732 is repealed.

SEC. 306. There are hereby authorized to be appropriated such sums as may be necessary for the purpose of carrying out the provisions of this Act.

SEC. 307. This Act may be cited as the Cuban/Haitian Temporary Resident Status Act of 1981.

TITLE IV—THE FAIR AND EXPEDITIOUS APPEAL, ASYLUM AND EXCLUSION ACT OF 1981

SEC. 401. Section 106(a)(1) of the Immigration and Nationality Act (8 U.S.C. 1105a) is amended to read as follows: "A petition for review may be filed not later than 30 days from the date of the final deportation order or from the effective date of this section, whichever is the later."

SEC. 402(a). Section 279 of the Immigration and Nationality Act (8 U.S.C. 1329) is designated as section 279(a).

(b) Section 279 of the Act is hereby amended by adding after subsection (a) the following new subsection (b) to read as follows:

"(b) An action for judicial review of any administrative action arising under this Act, or regulations issued pursuant to this Act, other than a final order of deportation as provided in section 106(a) of the Act, may not be filed later than 30 days from the date of the final administrative actions or from the effective date of this section, whichever is the later."

SEC. 403. Section 208 of the Immigration and Nationality Act (8 U.S.C. 1158) is amended to read as follows:

"SEC. 208(a)(1). An application for asylum may be made by any alien physically present in the United States or at a land border or port of entry. An alien may be granted asylum by an asylum officer under paragraph (2) of this subsection, if (A) the asylum officer determines that the alien is a refugee within the meaning of section 101(a)(42)(A); (B) the alien is not firmly resettled in any foreign country; (C) the alien is not inadmissible under the provisions of paragraphs (27), (29), or (33) of section 212(a), or so much of paragraph 23 of section 212(a) as relates to trafficking; (D) the alien has not been convicted by final judgment of a particularly serious crime and does not constitute a danger to the community; and (E) there are no serious reasons for considering that the alien has committed a serious nonpolitical crime outside the United States prior to the arrival of the alien in the United States.

(2) Eligibility for asylum shall be determined by an asylum officer, who shall serve at the direction of the Commissioner, and shall perform such other duties as the Commissioner may prescribe, except for the investigation or prosecution of any case under sections 235 or 242 of this Act. An alien seeking asylum shall appear before the asylum officer in an informal, nonadversary interview, and may be accompanied by counsel at no expense and no delay to the government. Counsel may advise the alien during the interview but shall not otherwise participate in the interview. The asylum officer may administer oaths and call witnesses, and request information on an application from any government agency, including information classified under Executive Order No. 12065 (50 U.S.C. nt. 401). A record of the proceedings shall be made in accordance with this section, and under such regulations as the Attorney General shall prescribe. The procedures set forth in this section shall be the sole and exclusive procedures for determining asylum. The determination of the asylum officer shall be final and shall not be subject to further administrative appeal or review, except that either the Commissioner or the Attorney General may require that the decision of an asylum officer be certified to him for review.

(3) The burden of proof shall be on the alien to establish that he qualifies for asylum under this section.

(4) No alien who meets the refugee definition set forth in section 101(a)(42)(A), and who meets the requirements of subsections (1) (C), (D), and (E) of this section shall be returned to the country or place where he would face persecution, as determined by the asylum officer.

(5) An alien against whom proceedings are instituted under section 236 or 242 of this Act, who has not previously made a claim for asylum, must make any application for asylum to the asylum officer under this section within 14 days of the service of the notice instituting such proceedings. An alien who does not make such a timely claim shall not be allowed to initiate an asylum claim absent a clear showing of changed circumstances in the country of the alien's nationality, or in the case of an alien having no nationality, the country of the alien's last habitual residence.

(6) An asylum officer may not reopen a proceeding under this section except upon a clear showing of changed circumstances in the country of the alien's nationality, or in the case of an alien having no nationality, the country of the alien's last habitual residence.

(b) Asylum granted under subsection (a) may be terminated if the Attorney General, pursuant to such regulations as the Attorney General may prescribe, determines that the alien is (A) no longer a refugee within the meaning of section 101(a)(42)(A) owing to a change in circumstances in the alien's country of nationality or in the case of an alien having no nationality, in the country in which the alien last habitually resided; or (B) the alien was not a refugee within the meaning of section 101(a)(42)(A) at the time he was granted asylum; or (C) the alien is no longer eligible for asylum on any of the grounds set forth in (a)(1) above.

(c) A spouse or child (as defined in section 101(b)(1) (A), (B), (C), (D), or (E)) of an alien who is granted asylum under subsection (a) may, if not otherwise eligible for asylum under such subsection, be granted the same status as the alien if accompanying, or following to join, such alien.

(d) Notwithstanding any other provision of law, a denial of an application for asylum and the procedures established to adjudicate asylum claims under this section shall be subject to judicial review only in a proceeding challenging the validity of an exclusion or deportation order as provided for in section 106(a)(1) of the Immigration and Nationality Act, 8 U.S.C. 1105a, and shall not be subject to review under 5 U.S.C. 702. The denial of an application for asylum may be set aside, or the cause remanded for further proceedings, only upon a showing that such denial was arbitrary and capricious, or as otherwise not in accordance with law.

SEC. 404. Section 235(b) of the Immigration and Nationality Act (8 U.S.C. 1225(b)) is amended to read as follows:

"Sec. 235(b) Provided that an 'Immigration Emergency' has not been declared an immigration officer shall inspect each alien who is required to have documentation seeking entry to the United States and shall make a determination on each alien's admissibility. (1) The decision of the immigration officer on admissibility of an alien shall be final, and not subject to further agency review or to judicial review, if the immigration officer determines an alien to be an alien crewman, a stoaway under section 273(d) of this Act, or an alien who does not present documentary evidence of U.S. citizenship, or lawful admission for permanent residence, or a visa or other entry document, or a certificate of identity issued under section 360 (b) to support a claim of admissibility. (2) Any alien not excluded under paragraph one of this subsection who does not appear to the examining immigration officer to be clearly and beyond a doubt entitled to admission shall be detained for further inquiry by a special inquiry officer under section 236."

SEC. 405. Section 237 of the Immigration and Nationality Act (8 U.S.C. 1227(a)) is amended to read as follows:

"SEC. 237(a)(1) Any alien (other than an alien crewman) arriving in the United States who is excluded under this Act, shall be im-

mediately deported, in accommodations of the same class in which he arrived, unless the Attorney General, in an individual case in his discretion, concludes that immediate deportation is not practicable or proper. Deportation shall be to the country in which the alien boarded the vessel or aircraft in foreign territory. If such boarding occurred in territory contiguous to the United States or in any island adjacent thereto or adjacent to the United States and the alien is not a native, citizen, or subject or national of, or does not have residence in, such foreign contiguous territory or adjacent island, the deportation shall instead be to the country in which is located the port at which the alien embarked for such foreign contiguous territory or adjacent island. The cost of the maintenance, including detention expenses incident to detention of any such alien while he is being detained, shall be borne by the owner or owners of the vessel or aircraft on which he arrived, except that the cost of maintenance (including detention expenses and expenses incident to detention while the alien is being detained prior to the time he is offered for deportation to the transportation line which brought him to the United States) shall not be assessed against the owner or owners of such vessel or aircraft if (A) the alien was in possession of a valid, unexpired immigrant visa, or (B) the alien (other than an alien crewman) was in possession of a valid, unexpired nonimmigrant visa or other document authorizing such alien to apply for temporary admission to the United States, or an unexpired reentry permit issued to him, and (i) such application was made within one hundred and twenty days of the date of issuance of the visa or other document, or in the case of an alien in possession of a reentry permit, examined and admitted by the Service, or (ii) in the event the application was made later than one hundred and twenty days of the date of issuance of the visa or other document or such examination and admission, if the owner or owners of such vessels or aircraft establishes to the satisfaction of the Attorney General that the ground of exclusion could not have been ascertained by the exercise of due diligence prior to the alien's embarkation, or (C) the person claimed United States nationality or citizenship and was in possession of an unexpired United States passport issued to him by competent authority.

(2) If the government of the country designated in subsection (a)(1) will not accept the alien into its territory, the alien's deportation shall be directed by the Attorney General, in his discretion and without necessarily giving any priority or preference because of their order as herein set forth, to—

(A) the country of which the alien is a subject, citizen, or national;

(B) the country in which he was born;

(C) the country in which he has a residence; or

(D) any country which is willing to accept the alien into its territory, if deportation to any of the foregoing countries is impracticable, inadvisable or impossible.

(b) It shall be unlawful for any master, commanding officer, purser, person in charge, agent, owner, or consignee of any vessel or aircraft (1) to refuse to receive any alien (other than an alien crewman) ordered deported under this section back on board such vessel or aircraft or another vessel or aircraft owned or operated by the same interests; (2) to fail to detain any alien (other than an alien crewman) on board any such vessel or at the airport of arrival of the aircraft when required by this Act or if so ordered by an immigration officer, or to fail or refuse to deliver him for medical or other inspection, or for further medical or other inspection, as and when so ordered by such officer; (3) to refuse or fail to remove him from the United States to the country to which his exclusion and deportation has been directed; (4) to fail to pay the cost of his maintenance while being detained as required by this section or section 233 of this title; (5) to take any fee, deposit, or consideration on a contingent basis to be kept or returned in case the alien is landed or excluded; or (6) knowingly to bring to the United States any alien (other than an alien crewman) excluded or arrested and deported under any provision of law until such alien may be lawfully entitled to reapply for admission to the United States. If it shall appear to the satisfaction of the Attorney General that any such master, commanding officer, purser, person in charge, agent, owner, or consignee of any vessel or aircraft has violated any of the provisions of this section or of section 233 of this title, such master, commanding officer, purser, person in charge, agent, owner, or consignee shall pay to the district director of customs of the district in which the port of arrival is situated or in which any vessel or aircraft of the line may be found, the sum of $500 for each violation. No such vessel or aircraft shall have clearance from any port of the United States while any such fine is unpaid or while the question of liability to pay any such fine is being determined, nor shall any such fine be remitted or refunded; except that clearance may be granted prior to the determination of such question upon the deposit with the district director of customs of a bond or undertaking approved by the Attorney General or a sum sufficient to cover such fine.

(c) An alien shall be deported on a vessel or an aircraft owned by the same person who owns the vessel or aircraft on which such alien arrived in the United States, unless it is impracticable to so deport the alien within a reasonable time. The transportation expenses of the alien's deportation shall be borne by the owner or owners of the vessel or aircraft on which the alien arrived. If the deportation is effected on a vessel or aircraft not owned by such owner or owners, the transportation expenses of the alien's deportation may be paid from the appropriation for the enforcement of this Act and recovered by civil suit from any owner, agent, or consignees of the vessel or aircraft on which the alien arrived.

(d) The Attorney General, under such conditions as are by regulations prescribed, may stay the deportation of any alien deportable under this section, if in his judgment the testimony of such alien is necessary on behalf of the United States in the prosecution of offenders against any provision of this Act or other laws of the United States. The cost of maintenance of any person so detained resulting from a stay of deportation under this subsection and a witness fee in the sum of $1 per day for each day such person is so detained may be paid from the appropriation for the enforcement of this title. Such alien may be released under bond in the penalty of not less than $500 with security approved by the Attorney General on condition that such alien shall be produced when required as a witness and for deportation, and on such other conditions as the Attorney General may prescribe.

(e) Upon the certificate of an examining medical officer to the effect that an alien ordered to be excluded and deported under this section is helpless from sickness or mental and physical disability, or infancy, if such alien is accompanied by another alien whose protection or guardianship is required by the alien ordered excluded and deported, such accompanying alien may also be excluded and deported, and the master, commanding officer, agent owner, or consignee of the vessel or aircraft in which such alien and accompanying alien arrived in the United States shall be required to return the accompanying alien in the same manner as other aliens denied admission and ordered deported under this section."

SEC. 406. Section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)) is hereby repealed.

TITLE V—THE IMMIGRANT VISAS FOR CANADA AND MEXICO

SEC. 501. (a) Section 201(a) of the Immigration and Nationality Act (8 U.S.C. 1151(a)) is amended to read as follows:

"(a)(1) Exclusive of special immigrants defined in section 101(a)(27), immediate relatives specified in subsection (b) of this section, aliens who are admitted or granted asylum under section 207 or 208, and aliens described in paragraph (2) of this subsection, the number of aliens who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence, shall not in any of the first three quarters of any fiscal year exceed a total of sixty-one thousand and shall not in any fiscal year exceed two hundred thirty thousand.

"(2) Exclusive of special immigrants defined in section 101(a)(27), immediate relatives specified in section 201(b), and aliens who are admitted or granted asylum under section 207 or 208, the number of aliens chargeable (as provided in section 202(b)) to any single foreign state contiguous to the United States who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence shall not in any of the first three quarters of any fiscal year exceed a total of eleven thousand and shall not in any fiscal year exceed a total of forty thousand: Provided, however, that, if in any fiscal year, the number of aliens chargeable to either contiguous foreign state who are issued immigrant visas and otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence is less than forty thousand, in the next following fiscal year the number of aliens from the other contiguous foreign state who may be issued immigrant visas or otherwise acquire the status of an alien lawfully admitted to the United States shall be increased by an amount equal to the difference between forty thousand and such number. In such a case, the limitation prescribed for such foreign state for each of the first three quarters of such fiscal year shall be increased by an appropriate proportional amount."

(b) Section 202(a) (8 U.S.C. 1152(a)) is amended to read as follows:

"(a) No person shall receive any preference or priority or be discriminated against in the issuance of an immigrant visa because of his race, sex, nationality, place of birth, or place of residence, except as specifically provided in section 101(a)(27), 201(b), and section 203: Provided, that the total number of immigrant visas made available to natives of any single foreign state (other than a foreign state contiguous to the United States) under paragraphs (1) through (7) of section 203(a) shall not exceed 20,000 in any fiscal year."

TITLE VI—THE TEMPORARY MEXICAN WORKERS ACT

SEC. 601(a) During each of two consecutive twelve month periods beginning on the first day of the seventh month following enactment of this section, there are authorized to be admitted to the United States as nonimmigrants not more than fifty thousand aliens who—

(1) are nationals of Mexico;

(2) have a residence in Mexico which they have no intention of abandoning;

(3) are seeking to enter the United States temporarily to perform services or labor as specified in subsection (b) of this section;

(4) are in possession of a nonimmigrant visa issued by a consular officer as provided in subsection (c) of this section; and

(5) are otherwise admissible under the Immigration and Nationality Act, as amended, to the United States as nonimmigrants.

(b)(1) Prior to the beginning of each twelve-month period specified in subsection (a) of this section, the Governor of each of the states of the United States wishing to participate in the program established in this section, shall, (A) using a format which may be prescribed by the Secretary of Labor, establish a list of industries, following the Standard Industrial Classification Code, and/or a list of occupations, following the Dictionary of Occupational Titles, containing the industries and/or occupations having an adequate supply of qualified workers within such State; and (B) estimate how many aliens described in subsection (a) of this section might be admitted to the United States for employment in other occupations in such state without adversely affecting labor conditions therein.

(2) Upon receipt of the determinations made by states pursuant to subsection (b)(1)(B) of this section, the Secretary of Labor shall consider any request above 50,000 to be equal to 50,000, and shall allocate to each state the amount of its request, up 925 (1/54 of 50,000). If there is an unallocated remainder of the 50,000, and if there are states with requests in excess of 925, the remainder will be allocated among those states as follows: Each such state will be allocated a share of the remainder in the same proportion that its unfilled request bears to the total of such unfilled requests. The Secretary shall there upon promptly inform the Secretary of State and the Commissioner of Immigration and Naturalization of such estimates or of the total assigned to each state

(2) Any person in the United States intending to employ an alien described in subsection (a) of this section may apply to the Governor of the state, or his designee, in which the alien will be employed, in such form as the Secretary of Labor may prescribe, and submit a statement identifying the occupation in which employment is to be offered to the alien, using the Dictionary of Occupational Titles, and certifying that the employer will comply with all Federal, State and local laws regarding such employment. Upon receipt of such application, the Governor, or his designee, shall approve such application and endorse it appropriately, if (1) the occupation in which the alien is to be employed is not included on the list prepared pursuant to subsection (b)(1)(A) for such state; and (2) if the number of such applications approved for such state in the same twelve-month period has not reached the number established for such state pursuant to subsection (b)(2).

(4) Upon approval and endorsement of an application, the Governor, or his designee, shall transmit the endorsed application to the consular office, designated by the employer as the office at which the alien will apply for a visa.

(5) Nothing in this section shall be construed to authorize or require the Secretary of Labor or the Governor of any state to paticipate in the recruitment of workers.

(c) After receipt of the application as provided in subsection (b)(4) of this section, the consular officer may, upon application therefor by an alien designated by the employer, issue a nonimmigrant visa to the alien, provided the alien is otherwise eligible therefor as provided in subsection (a) of this section. Such visa shall be in the form prescribed by the Secretary of State for nonimmigrant visas generally, shall bear the visa symbol "M" and shall be valid for no more than one year from the date of issuance of such visa, and for multiple applications for admission.

(d) When an alien in possession of a visa issued pursuant to subsection (c) applies for admission to the United States, the Attorney General shall, if he finds that the alien is admissible to the United States, admit the alien for a period of no more than 365 days.

(e) An alien admitted pursuant to subsection (d) of this section may be granted permission to change employment, upon application by the employer for whom the alien desires to work, provided that (1) such employment is in a state participating in the program established by this section; and (2) such employment is not in an occupation listed pursuant to subsection (b)(1)(A) for such state. An employer desiring and intending to employ such an alien may apply to the Governor of the State, or his designee on the form prescribed pursuant to subsection (b)(1) of this section. If the Governor, or his designee determines that such employment is not in an occupation listed pursuant to subsection (b)(1)(A) of this section for the State, he may approve such application and return it to the employer. Actual employment of the alien by the new employer prior to such approval shall constitute employment in violation of the provisions of 5(f). The employer shall thereupon furnish the approved application to the alien who shall apply to the District Office of the Immigration and Naturalization Service having jurisdiction over the place of proposed employment, for annotation of the alien's entry record to reflect the change of employment and for extension of his authorized period of admission, if necessary.

(f) An alien admitted pursuant to the provisions of this section who thereafter is employed in violation of the provisions of this section, who remains longer than authorized under this section, or otherwise violates the terms and conditions of his admission shall not thereafter be eligible for admission pursuant to this section.

(g) an alien who is the spouse or child of an alien admitted pursuant to this section shall not be admissible to the United States on the basis of such relationship.

(h) No alien admitted pursuant to this section shall be eligible to receive any of the following benefits—

(1) food stamps under the Food Stamp Act of 1964, as amended (7 U.S.C. 2011, et seq.); or

(2) benefits under any State or Federal unemployment compensation program based on any services performed or any wages earned while present in the United States after such admission; *Provided*, That no employer of such an alien shall be exempt from taxation on the wages paid to such alien under any state unemployment compensation law or under chapter 23 of the Internal Revenue Code of 1954 because of such alien's status as an alien, the admission of such alien pursuant to this section, or the temporary nature of such admission.

(3) Financial assistance made available pursuant to the United States Housing Act of 1937, Section 235 or 236 or National Housing Act or Section 101 of the Housing and Urban Development Act of 1965; and

(4) aid or assistance under a State plan approved under title I, X, XIV, or XVI of the Social Security Act (other than on the basis of a disability described in paragraph (6) of this subsection); and

(5) medical assistance under title XIX of the Social Security Act (other than in the case of an individual receiving aid under a state plan approved under title XIV or XVI of the Social Security Act, or supplemental security income benefits under title XVI of that Act, on the basis of a disability described in paragraph (6) of this subsection;

(6)(1) Section 402(a)(33) of the Social Security Act is amended by striking out the period at the end thereof and inserting instead "other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program.

(2) Section 1614 (a)(1)(B) of such Act is amended by striking out the period at the end thereof and inserting instead "other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program.

(3) Section (2)(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (12),

(B) by striking out the period at the end of paragraph (13) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(14) provide that, in order for any individual to be a recipient of old-age assistance, or an individual whose needs are taken into account in making the determination under paragraph (10)(A), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203 (a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program."

(4) Section 1002(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (13),

(B) by striking out the period at the end of paragraph (14) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(14) provide that, in order for any individual to be a recipient of aid to the blind, or an individual whose needs are taken into account in making the determination under paragraph (8), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203 (a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program."

(5) Section 1402(a) of such Act is amended—

(A) by striking out "and" at the end of paragraph (11),

(B) by striking out the period at the end of paragraph (12) and inserting instead "; and", and

(C) by adding at the end of that subsection the following new paragraph:

(13) provide that, in order for any individual to be a recipient of aid to the permanently and totally disabled, or an individual whose needs are taken into acocunt in making the determination under paragraph (8), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a

result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program.

(6) Section 1602(a) of such Act (as in effect in Puerto Rico, Guam, and the Virgin Islands) is amended—

(A) by striking out "and" at the end of paragraph (16),

(B) by striking out the period at the end of paragraph (17) and inserting instead "; and", and

(C) by adding at the end of such subsection the following new paragraph:

"(18) provide that, in order for any individual to be a recipient of aid to the aged, blind, or disabled, or an individual whose needs are taken into account in making the determination under paragraph (14), such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program."

(7) Section 1902(a) of such Act is amended—

(A) by striking out the period at the end of paragraph (43) and inserting "; and", and

(B) by adding at the end thereof the following new paragraph:

(44) provide that, in order for any individual to be eligible for medical assistance, such individual must be either (A) a citizen, or (B) an alien lawfully admitted for permanent residence or otherwise permanently residing in the United States under color of law (including any alien who is lawfully present in the United States as a result of the application of the provisions of section 207(c) of the Immigration and Nationality Act (or of section 203(a)(7) of such Act prior to April 1, 1980), or as a result of the application of the provisions of section 208 or 212(d)(5) of such Act), other than a nonimmigrant admitted for a period of no more than 365 days in order to participate in an experimental work program.

(i)(1) Notwithstanding the provisions of the Immigration and Nationality Act, as amended, no alien admitted as a nonimmigrant pursuant to the provisions of this section shall be granted adjustment of status pursuant to section 245 thereof to that of an alien lawfully admitted for permanent residence, change of nonimmigrant classification pursuant to section 248 thereof, or suspension of deportation pursuant to section 244 thereof.

(2) Except as otherwise provided in this section, the provisions of the Immigration and Nationality Act, as amended, shall apply in the administration and enforcement of the provisions of this section.

(j) Not later than ninety days following the end of each twelve-month period specified in subsection (a) of this section, the Governor of each state, or his designee, which has participated in the program established by this section during such twelve-month period shall submit to the Secretary of Labor a detailed report of the operation of the program in such state. The report shall contain such information as the Secretary of Labor may prescribe, including, but not limited to, the number of workers employed under this program in the state, the occupations and industries in which such workers were employed, the locations within the state at which such workers were employed, and the wages and working conditions of such employment.

TITLE VII—THE IMMIGRATION EMERGENCY ACT

SEC. 701. Chapter 4 of Title II of the Immigration and Nationality Act is amended by inserting at the end thereof the following new sections (8 U.S.C. 1230A through 1230E):

SEC. 240A. Declaration of Immigration Emergency.

(a) The President may declare an immigration emergency with respect to any specifically designated foreign country or countries or geographical area or areas, if the President, in his judgment, determines that:

(1) a substantial number of aliens who lack documents authorizing entry to the United States appear to be ready to embark or have already embarked for the United States, and the aliens will travel from, or are likely to travel in transit through, the foreign country or countries or the foreign geographical area or areas; and

(2) the normal procedures of the Immigration and Nationality Act or the current resources of the Immigration and Naturalization Service would be inadequate to respond effectively to the influx of these aliens.

(b) Within 48 hours of the declaration of any immigration emergency, the President shall inform the Speaker of the House and the President pro-tempore of the Senate for the reasons prompting the declaration. The President shall cause the declaration to be published in the Federal Register as soon as practicable. The declaration shall expire automatically 120 days after its proclamation, unless ended sooner by the President. The President may extend the declaration for additional periods of 120 days by following the procedures set forth in this subsection, if, in his judgment, the conditions listed in subsection (a) continue to exist.

Sec. 240B. Emergency Powers and Procedures.

(a) Upon the declaration of an immigration emergency under Section 240A, the President may invoke the following emergency powers and procedures:

(1) Any or all United States vessels, vehicles and aircraft, and any other vessel, vehicle or aircraft which is owned or operated by, chartered to, or otherwise controlled by one or more citizens or residents of the United States or corporations organized under the laws of the United States or of any political subdivision thereof, bound directly or indirectly for a designated foreign country or foreign geographical area may be precluded from departing from the United States or may be intercepted while en route and required to return to the United States if feasible, or to any other reasonable location until such time as it is feasible to return to the United States, or, if appropriate, allowed to proceed to any other reasonable location.

(2) The arrival in the United States of any aliens or class of aliens who lack documents authorizing entry to the United States or who are otherwise inadmissible and who are traveling directly or indirectly from or in transit through a designated foreign country or foreign geographical area may be prevented by returning or requiring the return of such alien or any vessel, vehicle, or aircraft carrying any such alien to the designated country or area, or to some other reasonable location.

(3)(i) The exclusion or admission to the United States of any alien, regardless of nationality, who is traveling or has traveled to the United States directly or indirectly from or through the designated foreign country or foreign geographical area and who is not in possession of a visa or other entry document required for admission to the United States by statute or regulation may be determined under procedures established by the Attorney General (whether by regulation or otherwise), and no such alien shall be presented for inquiry before a special inquiry officer unless such presentation is authorized by the Attorney General pursuant to regulation.

(ii) Notwithstanding section 208, or any other provision of law, the Attorney General may establish by regulation or otherwise a separate procedure to consider an asylum claim advanced by an alien whose admissibility is to be determined in accordance with this paragraph.

(iii) Any alien found inadmissible to the United States pursuant to the procedures established by the Attorney General under this paragraph shall be deported to the country from whence he came. If the Attorney General determines that the alien should not or cannot practicably be removed to the country from whence the alien came, the Attorney General may deport the alien to any country described in section 243(a), without regard to the designation of the alien or the order of countries set forth in section 243(a).

(iv) Any alien admitted to the United States under this paragraph shall be admitted for such time and under such conditions as may be prescribed by the Attorney General, including the giving of a bond with sufficient surety in such sum and containing such conditions as the Attorney General shall prescribe to insure compliance with the terms and conditions of the alien's admission.

(v) No court shall have jurisdiction to review the determination of admissibility or nonadmissibility, or the determination of any asylum claim with respect to any alien who is subject to this paragraph.

(4) Every alien who is subject to the provisions of this section shall be detained pending release on parole, or pending deportation if the alien is found excludable, unless an examining officer finds that the alien is clearly and beyond a doubt entitled to be admitted to the United States. Such detention shall be in any prison or other detention facility or elsewhere, whether maintained by the Federal Government or otherwise, as the Attorney General may direct. The Attorney General may at any time transfer an alien from one place of detention to another. No alien shall be released from detention pending a final determination of admissibility, or pending deportation if the alien is found excludable, except in the discretion of the Attorney General, and under such conditions as the Attorney General may prescribe, including release on bond. Any alien applying for admission for foreign contiguous territory may, in the discretion of the Attorney General, be required to remain outside of the United States pending a final determination of admissibility. No court shall review any decision of the Attorney General made pursuant to this paragraph to detain, to transfer or to release an alien, except that any person so detained may obtain review, in habeas corpus proceedings, on the question of whether that person falls within the category of aliens subject to detention. Nothing in this paragraph shall relieve a carrier or any other person of any liability, duty or consequence pertaining to the detention of aliens which may arise under any other provision of the Act or other law.

(5)(i) The President may exempt any source of any department, agency, or instrumentality in the executive branch from applicable environmental requirements pursuant to section 1323(a) of title 33 and sections 300j-6(b), 4903, 6961, and 7418(b) of title 42 of the United States Code.

(ii) Upon a Presidential finding, trans-

mitted to Congress, that an exemption is necessary to respond to an immigration emergency, the President may exempt any source or action of any department, agency, or instrumentality in the executive branch which is directly and substantially related to an immigration emergency from applicable requirements of the National Environmental Policy Act, 42 U.S.C. 4331 et seq., the Coastal Zone Management Act, 46 U.S.C. 1451 et seq., the Endangered Species Act, 16 U.S.C. 1531 et seq., The Fish and Wildlife Coordination Act, 16 U.S.C. 661 et seq., the Historic Preservation Act, 16 U.S.C. 470 et seq., and from the applicable requirements of any other Federal, state or local law which is intended principally to protect or preserve the environment, wildlife, or aspects of the history or heritage of the United States.

(iii) Except with respect to matters concerning the detention of aliens, an exemption under this paragraph shall lapse upon termination of an immigration emergency. In no event shall any exemption under this paragraph last more than one year. An exemption with respect to matters concerning the detention of aliens shall last until terminated by the President, or the expiration of one year, whichever occurs first. During the time period in which an exemption applies the President may, in his discretion, require that a source nonetheless meet certain environmental standards without thereby creating a private right of action to enforce that requirement.

(b)(1) During the existence of the immigration emergency, the President may order the closing or sealing of any harbor, port, airport, road or any other place, structure or location which may be used as a point of departure from the United States to a designated foreign country or foreign geographical area, if, in the President's judgment, such action is necessary to prevent the arrival in the United States of aliens who are inadmissible and who are traveling from or in transit through a designated country or area.

(2) No person shall cause any vessel, or aircraft to depart from or beyond or enter into a closed or sealed harbor, port, airport, road, place, structure or location during an immigration emergency, unless written permission has been obtained for such departure prior to the actual departure of the vessel, or aircraft.

(3) Permission for departure from or beyond or entry into a closed or sealed harbor, port, airport, road, or any other place, structure or location shall be given only for those vessels, vehicles, aircraft which are clearly shown not to be destined for a designated foreign country or foreign geographical area. The agency designated by the President under subsection (c) of this section shall prescribe the procedures to be followed in requesting departure permission. In the absence of such procedures, permission may be sought from any agency directly involved in the closing or sealing of the harbor, port, airport, road, or other place, structure or location. A final decision shall be made on any request for departure permission within 72 hours of the request, unless the person seeking such permission consents to a longer period. If no action is taken on the request within the requisite period, the request for departure permission shall be deemed denied.

(4) The district courts of the United States shall have jurisdiction to review any final decision denying permission to depart under paragraph (3) of this subsection, except that review may be obtained prior to a final administrative decision with respect to any vessel, vehicle or aircraft if irreparable injury would occur before a final administrative decision could be obtained.

(c) Although the President may not delegate the authority to initiate those emergency powers of this section which expressly require Presidential invocation, the President may designate one or more agencies of the Federal Government to administer the provisions of sections 240B through 240D. In the course of enforcement of these provisions, the designated agency may promulgate regulations and may request assistance from any state or local agency or from any civilian Federal agency. The President may direct that any component of the Department of Defense, including the Army, Navy, and Air Force, provide assistance, any statute, rule or regulation to the contrary notwithstanding. Any such agency or military component may assist in the actual detention, removal and transportation of an alien to the country to which he is being deported.

(d) Notwithstanding any other provision of law, any agency or military component requested or directed to render assistance or services during an immigration emergency is authorized to stop, board, make arrest of persons, inspect and seize any vessel, vehicle or aircraft which is subject to the provisions of sections 240B through 240D.

(e) In providing assistance under sections 240B through 240D, agencies shall have the same authority as for disaster relief under 42 U.S.C. 5149.

(f) The provisions of paragraphs (3) and (4) of subsection (a) of this section shall continue to govern any aliens subject to those provisions, regardless of the termination of the immigration emergency.

(g) The President may direct the enforcement of subsection (a) of this section beyond the territorial limits of the United States including on the high seas.

(h) Nothing in this section shall relieve any carrier or any other person of any civil or criminal liability, duty, or consequence that may arise from the transportation or the bringing of any alien to the United States.

Sec. 240C. Travel Restrictions and Licensing.

(a) Upon the declaration of an immigration emergency under section 240A, it shall be unlawful for any person to cause any United States vessel, vehicle or aircraft, or any other vessel, vehicle or aircraft which is owned by, chartered to or otherwise controlled by one or more citizens or residents of the United States or corporations organized under the laws of the United States or of any political subdivision thereof, to travel or be transported to a designated foreign country or foreign geographical area or to within such distance therefrom as the President may specify, unless prior approval has been obtained from an agency designated by the President.

(b) The designated agency may, for authorized purposes, grant prior approval for travel to or around a designated foreign country or geographical area by regulation for certain classes or categories of vessels, vehicles and aircraft. The owner or operator of any vessel, vehicle, or aircraft not authorized by regulation to travel to or around a designated country or area may apply to the designated agency for a license granting permission for one or more trips to that country or area. The designated agency shall establish by regulation the proceedures governing the application for and the approval and revocation of such licenses. The designated agency may authorize officials of any other United States agency to accept and transmit applications for licenses to the designated agency or to grant or deny such licenses under standards established by the designated agency.

(c) No travel to or within such distance as the President may specify from a designated foreign country or area shall be approved if it appears that such travel may result in or contribute to a violation of any statute or regulation relating to the immigration of aliens to the United States.

(d) Nothing in this section shall be construed to require the agency designated by the President to approve the travel of any vessel, vehicle or aircraft to a designated country or area or within the specified distance therefrom.

Sec. 240D. Penalties.

(a)(1) Any vessel, vehicle or aircraft involved in a violation of section 240B(b)(2) or section 240C(a) shall be forfeited and the owner, operator, and any person causing such vessel, vehicle or aircraft to be involved in the violation shall be subject to a civil fine of $10,000 for each separate act in violation of those sections. This subsection shall become effective on the day following the day of publication of the declaration of the immigration emergency in the Federal Register, except that this subsection shall be immediately effective as to any person who has learned or been informed of the existence of the declaration.

(2) All provisions of the customs laws relating to the seizure, summary and judicial forfeiture, and condemnation of property; the disposition of such property or the proceeds from the sale thereof; the remission or mitigation of such forfeiture; and the compromise of claims and the award of compensation to informers in respect to such forfeitures shall apply to seizures and forfeitures incurred or alleged to have been incurred, under the provisions of this section insofar as applicable and not inconsistent with the provisions hereof, except that duties imposed on customs officers or other persons regarding the seizure and forfeiture of property under the customs laws may be performed with respect to seizure and forfeitures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General.

(3) Whenever a conveyance is forfeited under this section the Attorney General may:

(i) retain the conveyance for official use;

(ii) sell the conveyance, in which case proceeds from any such sale shall be used to pay all proper expenses of the proceedings for forfeiture and sale including expenses of seizure, maintenance of custody, advertising, and court costs, with the remaining proceeds, if any, turned over to the United States Treasury;

(iii) require that the General Services Administraton, or the Federal Maritime Commission if appropriate under 40 U.S.C. 484(1), take custody of the conveyance and remove it for disposition in accordance with law; or

(iv) dispose of the conveyance in accordance with the terms and conditions of any petition or remission or mitigation of forfeiture granted by the Attorney General.

(4) In all suits or actions brought for the forfeiture of any conveyance seized under this section, where the conveyance is claimed by any person, the burden of proof shall lie upon such claimant: Provided, that probable cause shall be first shown for the institution of such suit or action, to be judged of by the court.

(b) Any person who knowingly engages or attempts to engage in any conduct prohibited by the terms of section 240B(b)(2) or section 240C(a) shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding $50,000 or by imprisonment for a term not exceeding five years, or both, for each separate prohibited act. This subsection shall become effective on the day following the day of publication of the declaration of the immigration emergency in the Federal Register, except that this subsection shall be immediately effective as to any person who has learned or been informed of the existence of the declaration.

(c) Any alien who willfully violates a condition of his admission under section 240B shall be guilty of a misdemeanor and upon

conviction thereof shall be fined not more than $1,000 or imprisoned for not more than one year, or both.

(d) The requirements and sanctions imposed by this section shall be in addition to those set forth by other provisions of law.

(e) Violations of any provisions of the Immigration and Nationality Act committed during the immigration emergency may be investigated by the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Coast Guard, or any component of the Department of Treasury. Assistance in investigating or enforcing this section may be provided by any Federal, with the approval of the Attorney General, state or local agency including the Army, Navy, and Air Force, any statute, rule, or regulation to the contrary notwithstanding.

Sec. 240E. Definitions.

As used in chapters 240A through 240D:

(1) The term "vessel" means any ship, boat, barge, submarine, raft, or other craft or structure capable of being used as a means of transportation on, under or immediately above the water.

(2) The term "vehicle" means any automobile, motorcycle, bus, truck, cart, train, or other device or structure capable of being used as a means of transportation on land.

(3) The term "aircraft" means any airplane, helicopter, glide, balloon, blimp, or other craft or structure capable of being used as a means of transportation in the air.

(4) The term "United States vessel, vehicle or aircraft" include any vessel, vehicle, or aircraft documented, registered, licensed, or numbered under the laws of the United States or any political subdivision thereof.

(5) The term "agency" includes any executive department and component thereof, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory agency."

SEC. 702. Subsection (b) of section 273 of the Immigration and Nationality Act (8 U.S.C. 1323(b)) is amended by substituting the figure "$3,000" for the figure of "$1,000" in the first sentence thereof, by deleting the last sentence of that subsection, and by adding the following at the end thereof: "Such sums shall be a lien upon the vessel or aircraft involved in a violation of the provisions of subsection (a) of this section, and such vessel or aircraft may be "libeled therefore in the appropriate United States court. In addition, pending the determination of liability to the payment of such sums or while such sums remain unpaid, said vessel or aircraft may be denied clearance, or summarily seized, or both, unless a deposit is made of an amount sufficient to cover such sums or of a bond with sufficient surety to secure the payment thereof satisfactory to the Attorney General."

SEC. 703. Section 235(b) of the Immigration and Nationality Act (8 U.S.C. 1225(b)) is amended to read as follows:

"SEC. 235(b). Provided that an "immigration emergency" has not been declared, an immigration officer shall inspect each alien, who is required to have documentation seeking entry to the United States and shall make a determination on each alien's admissibility. (1) The decision of the immigration officer on admissibility of an alien shall be final, and not subject to further agency review or to judicial review, if the immigration officer determines an alien to be an alien crewman, a stowaway under section 273(d) of this Act, or an alien who does not present documentary evidence of United States citizenship, or lawful admission for permanent residence, or a visa or other entry document, or a certificate of identity issued under section 360(b) to support a claim of admissibility. (2) Any alien not excluded under paragraph 1 of this subsection who does not appear to the examining immigration officer to be clearly and beyond a doubt entitled to admission shall be detained for further inquiry by a special inquiry officer under section 236."

SEC. 704. There are authorized to be appropriated to the President specifically to fund expenses incurred in carrying out the purposes of sections 240A through 240E of the Immigration and Nationality Act an amount not to exceed $35 million. Amounts appropriated under this section are authorized to remain available until expended.

TITLE VIII—THE UNAUTHORIZED ENTRY AND TRANSPORTATION ACT

SEC. 801. Section 274 of the Immigration and Nationality Act is amended to read as follows:

BRINGING IN AND HARBORING CERTAIN ALIENS

(a) Any person who—knowing or in reckless disregard of the fact that the alien has not received prior official authorization to come to, enter, or reside in the United States, brings to or attempts to bring to the United States in any manner whatsoever, any alien, regardless of any official action which may later be taken with respect to such alien,

(1) shall, for each transaction constituting a violation of this subsection, regardless of the number of aliens involved, be guilty of a misdemeanor and upon conviction shall be punished by a mandatory fine of $2,500, the imposition of which shall not be suspended by the court, and, in the court's discretion, may be punished by an additional fine of not more than an amount equal to $2,500 for each such alien in respect to whom any violation of this paragraph occurs, or by imprisonment for a term not exceeding one year, or both; or

(2)(A) for a second offense under this section;

(B) for an offense done for the purpose of commercial advantage or private financial gain;

(C) for an offense in which the alien is not upon arrival immediately brought and presented to an appropriate immigration official; or

(D) for an offense during which either the offender or the alien with the knowledge of the offender, makes any false or misleading statement, or engages in any act or conduct intended to mislead any officer, agent, or employee of the United States, shall be guilty of a felony and upon conviction shall be punished by a fine not exceeding $10,000 or by imprisonment for a term not exceeding five years, or both, for each alien in respect to whom any violation of this paragraph occurs.

(b) Any person who—(1) knowing or having reason to know that the person is an alien, brings to or attempts to bring to the United States in any manner whatsoever, any such person at a place other than a designated port of entry or place other than as designated by the Commissioner of the Immigration and Naturalization Service regardless of whether such alien has received prior official authorization to come to, enter, or reside in the United States and regardless of any future official action which may be taken with respect to such alien;

(2) knowing or in reckless disregard of the fact that the alien has come to, entered, or remains in the United States in violation of law, transports, or moves or attempts to transport or move any such alien within the United States by means of transportation or otherwise, in furtherance of such violation of law;

(3) knowing or in reckless disregard of the fact that the alien has come to, entered, or remains in the United States in violation of law, conceals, harbors, or shields from detection, any such alien in any place, including any building or any means of transportation; or

(4) knowing or having reason to know that a person is an alien, willfully encourages or induces or attempts to encourage or induce, either directly or indirectly, the entry without prior official authorization, into the United States of any such alien—

shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding $10,000 or by imprisonment for a term not exceeding five years, or both, for each alien in respect to whom any violation of this subsection occurs: *Provided*, however, that for the purposes of this section, employment (including the usual and normal practices incident to employment) shall not be deemed to constitute harboring.

(c)(1) any conveyance, including any vessel, vehicle, or aircraft, which has been, is being, or is intended to be used, in the commission of a violation of subsections (a) or (b) shall be seized and subject to forfeiture except that—

(A) no conveyance used by any person as a common carrier shall be forfeited under the provisions of this section if the offense occurs when the conveyance is being used in the business as a common carrier unless the owner, operator, or other person in charge of the conveyance at the time of the offense was a consenting party or privy to the illegal act; and

(B) no conveyance shall be forfeited under the provisions of this section if the offense occurred while such conveyance was unlawfully in the possession of a person other than the owner in violation of the criminal laws of the United States or of any State.

(2) Any conveyance subject to seizure under this section may be seized without a warrant if there is probable cause to believe the conveyance has been, is being, or is intended to be used in a violation of subsection (a) or (b) and circumstances exist where a warrant is not constitutionally required.

(3) All provisions of the customs laws relating to the seizure, summary and judicial forfeiture, and condemnation of property; the disposition of such property or the proceeds from the sale thereof; the remission or mitigation of such forfeiture; and the compromise of claims and the award of compensation to informers in respect of such forfeitures shall apply to seizures and forfeitures incurred or alleged to have been incurred, under the provisions of this section insofar as applicable and not inconsistent with the provisions hereof, except that duties imposed on customs officers or other persons regarding the seizure and forfeiture of property under the customs laws may be performed with respect to seizure and forfeitures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General.

(4) Whenever a conveyance is forfeited under this section the Attorney General may—

(A) retain the conveyance for official use;

(B) sell the conveyance, in which case the proceeds from any such sale shall be used to pay all proper expenses of the proceedings for forfeiture and sale including expenses of seizure, maintenance of custody, advertising, and court costs;

(C) require that the General Services Administration, or the Federal Maritime Commission if appropriate under 40 U.S.C. 484 (i), take custody of the conveyance and remove it for disposition in accordance with law; or

(D) dispose of the conveyance in accordance with the terms and conditions of any petition of remission or mitigation of forfeiture granted by the Attorney General.

(5) In all suits or actions brought for the forfeiture of any conveyance seized under this section, where the conveyance is claimed by any person, the burden of proof shall lie upon such claimant: *Provided*, That probable cause shall be first shown for the institution

of such suit or action, to be judged of by the court. In determining whether probable cause exists, any of the following shall be prima facie evidence, of the presumption that an alien involved in the alleged violation had not received prior official authorization to come to, enter or reside in the United States or that such alien had come to, entered, or remained in the United States in violation of law:

(A) Records of any judicial or administrative proceeding in which that alien's status was an issue and in which it was determined that the alien had not received prior official authorization to come to, enter, or reside in the United States or that such alien had come to, entered, or remained in the United States in violation of law;

(B) Official records of the Immigration and Naturalization Service or State Department showing that the alien had not received prior authorization to come to, enter, or reside in the United States or had come to, entered, or remained in the United States in violation of law; and

(C) Testimony, by an immigration officer having personal knowledge of the facts concerning that alien's status, that the alien had not received prior authorization to come to, enter, or reside in the United States or had come to, entered, or remained in the United States in violation of law.

(6) Any officer or employee of the Service designated by the Attorney General, either individually or as a member of a class, and all other Federal officers and officers of a state or political subdivision thereof whose duty it is to enforce criminal laws shall have authority to make any arrest for a violation of any provision of this section.

TITLE IX—THE LABOR CERTIFICATION ACT

SEC. 901. Notwithstanding the provisions of section 212(a)(14) of the Immigration and Nationality Act (8 U.S.C. 1182(a)) is hereby amended to read as follows:

"(a)(34) Aliens seeking to enter the United States for the purpose of performing skilled or unskilled labor, unless the Secretary of Labor has determined and certified to the Secretary of State and the Attorney General that at the time of application (A) there are not sufficient workers available in the United States in the occupations in which the aliens will be employed and (B) the employment of aliens in such occupations will not adversely affect the wages and working conditions of workers in the United States who are similarly employed. In making such determinations, the Secretary of Labor may use labor market information without reference to the specific job opportunity for which certification is requested. An alien on behalf of whom a certification is sought must have an offer of employment from an employer in the United States, except that the Secretary of Labor may waive this requirement in the case of an alien of exceptional ability. The exclusion of aliens under this paragraph shall apply to preference immigrant aliens described in section 203(a)(3) and (6), and to nonpreference immigrant aliens described in section 203(a)(7). Notwithstanding any other provision of law, decisions of the Secretary of Labor made pursuant to this paragraph, including the issuance and content of regulations and the use of labor market information under this paragraph, shall be reviewable by the appropriate United States district court, but the court shall not set aside such a decision unless there is compelling evidence that the Secretary made such decision in an arbitrary and capricious manner;".

TITLE X—THE EMERGENCY INTERDICTION ACT

SEC. 1001. Subsection (f) of section 212 of the Immigration and Nationality Act (8 U.S.C. 1182(f)) is amended to read as follows:

(f)(1) In order to prevent the illegal migration of aliens to the United States, the President is authorized to conclude arrangements with other countries for the purpose of preventing such illegal migration. Notwithstanding any other provision of law, the President is authorized to furnish assistance to any country, on such terms and conditions as he may determine, for the control of the immigration of persons from such country to the United States.

(f)(2) Notwithstanding any provision of law, the President may direct the Coast Guard or any other federal agency including the Army, Navy and Air Force, to stop and examine, on the high seas, vessels of the United States, vessels subject to United States jurisdiction, or foreign flag vessels for which the United States Government has an arrangement authorizing such action. Upon boarding, the Coast Guard or other federal agency may make inquiries of those on board, examine documents, and take such actions as are necessary to establish the registry, condition, and destination of the vessel and the status of those on board the vessel. When these measures indicate that an offense against United States immigration laws, or an offense under the laws of a foreign country with which the United States has an agreement to assist is being committed, the Coast Guard or other federal agency may return the vessel and passengers to the country from whence they came or to some other location. An alien who qualifies as a refugee under the terms of the United Nations Convention and Protocol Relating to the Status of Refugees may not be returned to a country where such person's life or freedom would be threatened on account of his race, religion, nationality, membership in a particular social group, or political opinion.

(f)(3) Notwithstanding any other provision of law, the Attorney General is authorized to establish by regulation, procedures to determine the admissibility of those aliens who have not landed in the United States.

(f)(4) Nothing contained in this section shall be construed as limiting the President in any way from exercising his Constitutional powers.

(f)(5) For purposes of this section the terms "vessel of the United States" and "vessel subject to the jurisdiction of the United States" shall have the same meaning as set forth in 21 U.S.C. 955b.

SECTION-BY-SECTION ANALYSIS

TITLE I: TEMPORARY RESIDENT STATUS FOR ILLEGAL ALIENS

Title I permits immediate legalization of illegal aliens who entered the United States prior to January 1, 1980, and have had a continuous residence in the United States since that time, by providing a "temporary resident status" for such aliens. The proposal provides for adjustment to status to that of a lawful permanent resident for these aliens after they have completed ten years of continuous residence.

Section 101 of the proposal authorizes the Attorney General, in his discretion, to grant "temporary resident status" to any alien who entered the U.S. prior to January 1, 1980, and has continuously resided in the U.S. since that time, if the alien is otherwise admissible to the U.S., with certain exclusion provisions waived. To be eligible for adjustment under this section, the alien must register with the INS within 12 months after the Attorney General announces that registration has begun. An alien granted temporary resident status must register with the Immigration and Naturalization Service every three years. The Attorney General is authorized to set additional registration requirements in his discretion. An alien granted temporary resident status may not bring his spouse or children to the U.S. and is ineligible for benefits under Aid to Families with Dependent Children, Supplemental Security Income, the National Housing Act, Medicaid, and food stamps programs, but may be authorized to work by the Attorney General.

Section 102 provides that an alien who is granted temporary resident status may have his status adjusted to that of lawful permanent resident, once he completes 10 years of continuous residence in the U.S., if he remains otherwise admissible and has a minimal English language ability.

Section 103 The Attorney General shall define the requirement of continuous residence.

Section 104 makes the numerical provisions of the INA inapplicable to adjustments under this title.

TITLE II: UNLAWFUL EMPLOYMENT OF ALIENS ACT OF 1981

General purpose. The purpose of Title II is to restrict employment opportunities for aliens not entitled to employment in the United States, thereby significantly reducing the major cause of illegal immigration into the United States. The bill would impose penalties on employers who hire aliens who are not lawful permanent residents, or who are not authorized employment by the Attorney General. An employer who hires an alien in violation of this bill would be subject to a $500 fine for each alien so hired, for the first violation, and a $1,000 fine per violation for each subsequent violation. If an employer engages in a pattern or practice of violation, an injunction may be obtained. Coverage of this bill is limited to employers employing four or more persons. The bill additionally provides substantial penalties for persons who counterfeit documents used to establish employment authorization, and for persons who use documents relating to another person.

I. Section 201(1). This subsection includes a provision exempting certain employers from coverage by this bill. An employer who can establish that he did not employ four or more persons, at the time the unauthorized alien was hired is not subject to the penalties and fines incorporated in this bill. This procedure requires an employer to come forward with evidence that he is not a "four-or-more-person employer" once it is established by the government that he has employed an alien who does not have employment authorization, or who is not a lawful permanent resident. This approach is considered necessary to establish that the employer meets the numerical limitations of the bill's coverage. Employers should be easily able to establish the employment history of their business from business records such as tax returns, FICA statements, and other means, which will show the employment level at the time of and prior to the violation. The evidence will be provided from ordinary business records, which will not impose additional record-keeping burdens on employers.

II. Section 201(2). This subsection provides for a $500 fine for the first violation, and a $1,000 fine for each subsequent violation, for each alien employed in violation of this section. It is anticipated that a district director of the Service would issue a notice

of intent to fine, similar to that issued presently in fine cases under section 273 of the Act. The employer would be allowed to respond in writing if the fine was not contested, or to request a hearing before an immigration judge if the fine was contested. In the latter case, an evidentiary hearing would be conducted as prescribed by regulations issued by the Attorney General, with the employer represented by counsel if he so chooses. Any fine levied would be payable to the district director of the Service district where the violation occurred. Payment could be enforced by civil suit brought in a United States district court. While the employment of illegal aliens is not a crime, the fine that will be imposed upon employers who violate this provision is designed to defray the cost to the Government of detecting violators

III. Section 201(3). This provision is aimed at the employer who is a persistent employer of illegal aliens, who engages in a "pattern or practice" of such employment. The term "pattern or practice" has been used in other federal statutes such as the Civil Rights Act of 1964 (42 U.S.C. 2000e-6) and the Fair Housing Act of 1968 (42 U.S.C. 3613). Hiring practices prior to the effective date will be considered in establishing whether a "pattern or practice" exists. The Government will be required to show more than accidental, isolated or sporadic hirings of aliens not authorized employment. Upon determination by the district court that a "pattern or practice" exists, the employer may be enjoined from this activity.

IV. Section 201(4). This provision establishes a presumption of "knowing" employment where the employer does not request and obtain documentation that the alien is authorized employment in the United States. This provision will place on an employer a duty to inquire into the employment status of all persons who apply for employment.

V. Section 201(5). This subsection directs the Attorney General to establish regulations implementing a standard employment form used to determine a job applicant's employment status. This form will list the documents to be presented to establish the applicant's status, such as an alien registration receipt card, birth certificates or passports. The employer and the applicant will sign the form. An employer would be obligated to retain the forms for inspection by an immigration officer for the duration of the person's employment, and for one year following the termination of employment.

VI. Section 201(6). Under section 5(b)(6) of the Farm Labor Contractor Registration Act (FLCRA), the Secretary of Labor could refuse to issue a certificate of registration to any farm labor contractor who has employed an illegal alien. Section 6F of FLCRA provides that a farm labor contractor is subject to civil and criminal penalties if the contractor employs an illegal alien.

VII. Section 201(2)e. This provision preempts any state or local laws which may be enacted to penalize employers who employ aliens without employment authorization.

VIII. Section 202. A new section 275(b) of the Act is added to provide for criminal penalties for persons who fraudulently duplicate or copy documents used to establish citizenship, permanent resident status or employment authorization granted by the Attorney General. Persons who present or use such fraudulent documents are subject to the same penalties, which consist of a fine up to $5,000 or five years imprisonment, or both.

IX. Section 202(c). This new subsection penalizes aliens who are not authorized employment in the United States who present documents of another person who is authorized employment or who is a citizen of the United States. This penalty should deter the fraudulent use of valid documents. A $5,000 fine or five years imprisonment, or both, may be imposed upon conviction.

X. Section 203. Date of enactment of this Title.

XI. Section 204. The title of this Title will be the Unlawful Employment of Aliens Act of 1981.

TITLE III: CUBAN/HAITIAN TEMPORARY RESIDENT STATUS ACT OF 1981

Section 301 of the bill grants "Cuban/Haitian Temporary Resident" status to Cubans who were paroled into the United States between April 20, 1980, and January 1, 1981, or who had applications for asylum pending with the Immigration and Naturalization Service on December 31, 1980, and to Haitians who were (1) subjects of exclusion or deportation proceedings on December 31, 1980, or (2) were paroled into the United States before December 31, 1980, or (3) who had applications for asylum pending on December 31, 1980. Cuban/Haitian temporary resident status would be granted beginning 60 days after enactment of this Act. The Attorney General would be authorized to deny Cuban/Haitian temporary resident status to, or terminate the status of, any alien who is excludable under section 212(a) of the Immigration and Nationality Act (8 U.S.C. 1182), with certain exceptions. It allows the Attorney General to deny temporary resident status to detainees. This section would also permit the Attorney General to authorize Cuban/Haitian temporary resident to engage in employment in the United States. Subsection (d) provides that, notwithstanding that this section gives legal status to these aliens, the penalty provisions of section 273 and section 274 of the Immigration and Nationality Act would still apply to the boat captains who brought them in.

The section provides that aliens granted Cuban/Haitian temporary resident status must register with the Attorney General every three years and makes them ineligible for any government benefits including benefits under the Refugee Assistance Act of 1980.

Section 302 provides for detention of aliens denied Cuban/Haitian temporary resident status until a final determination of admissibility is made, or pending determination, so that an alien may be detained for an indeterminate period. The section limits judicial review of such detention to habeas corpus proceedings on the question of whether that person falls within the category of aliens subject to exclusion. Persons eligible for deportation proceedings would be processed under section 242, as presently. The provisions of the Administrative Procedures Act will not apply to determinations of admissibility.

Section 303 authorizes the Attorney General to adjust the status of a Cuban/Haitian temporary resident to that of an alien lawfully admitted for permanent residence after the alien has maintained temporary resident status for five years. The Cuban/Haitian temporary resident may be denied adjustment if he is firmly resettled in another country or inadmissible under the Immigration and Nationality Act (8 U.S.C. 1182). The Attorney General is authorized to waive grounds for exclusion (with the exception of the provisions regarding national security, association with the Nazi government or trafficking in narcotics) for humanitarian purposes, to assure family unity, or when it otherwise would be in the public interest. These adjustments would not count against the numerical limitations of the Immigration and Nationality Act.

Section 304 terminates asylum proceedings for all temporary residents who have not been granted asylum under section 208 of the Immigration and Nationality Act (8 U.S.C. 1158) as of the date they are granted Cuban/Haitian temporary resident status. Those aliens granted asylum prior to the enactment of this Act will retain their status and will also be granted Cuban/Haitian temporary resident status if eligible under this Act. For purposes of adjustment of status and family reunification, such aliens will be treated as Cuban/Haitian temporary residents.

Section 305 repeals the Cuban Refugee Adjustment Act, P.L. 89-732. Under P.L. 89-732, the Cubans would otherwise be eligible for adjustment once they complete a year of physical presence.

Section 306 authorizes appropriations to carry out the provisions of this Act.

Section 307. The title of the Act.

TITLE IV: THE FAIR AND EXPEDITIOUS APPEAL, ASYLUM, AND EXCLUSION ACT OF 1981

This title addresses three major aspects of the immigration law: exclusion, appeals, and asylum. The changes made in exsting laws, plus additional provisions should provide for a speedier and more efficient resolution of admissibility, appeals, and asylum claims. The appeal provisions shorten the time period allowed for appeal from orders of deportation, and for the first time establish a 30-day appeal period for other administrative decisions. The exclusion provisions limit the categories of aliens who may request an exclusion hearing before an immigration judge. For example, persons who attempt to enter the United States without any valid documentation, or alien crewmen or stowaways will have their admissibility determined by an immigration inspector. An excluded alien may be returned to the country where he boarded the aircraft or vessel or to any other country or place designated in the amended section 237. Under the present provisions, the government is often unable to exclude and deport an alien, as deportation may only be to the country "whence the alien came". The asylum provisions establish an "asylum officer" who will adjudicate all such claims in a nonadversarial setting. Limits are imposed on the time during which an application may be made, and the conditions for reopening the application. The asylum provisions are made consistent with the refugee provisions of section 207 in regard to eligibility. Finally, review of asylum applications is limited: there is no administrative review except through certification, and judicial review is provided for only in the context of the review of a final order of deportation or exclusion.

Section 106a of the Immigration and Nationality Act, 8 U.S.C. 1105a is amended to shorten the time period within which a deportation order may be appealed from six months, to 30 days. Under the current provision, many deportable aliens postpone their appeal for five months or more, and then submit a frivolous appeal. The filing of the appeal serves as an automatic stay. With the present backlog in the courts of appeal, the net result is to award a deportable alien extra time in the United States. Shortening the appeal period to 30 days will speed up the deportation process, and will not adversely affect an alien's legitimate defense of a deportation order.

Section 279 of the Act, 8 U.S.C. 1329, is amended to provide for a 30 day appeal period to contest an administrative action arising under the immigration statutes or regulations. Under the present provision, which specifies no appeal limit, deportable aliens have been able to frustrate the deportation process by filing suit contesting administrative actions, such as denial of student reinstatement, after the deportation process has been completed, and after they

have received final orders of deportation. The proposed 30 day appeal period will be consistent with the proposed section 106a.

Section 208(a)(1) incorporates the present provision that any alien physically present in the United States may apply for asylum, regardless of his means of entry, or the legality of his status. This subsection additionally specifics that an asylum officer will determine eligibility for asylum, and bars certain categories of aliens from receiving a grant of asylum. Persons firmly resettled in a foreign country will not be eligible for asylum. Aliens inadmissible under paragraphs (27), (29), or (33), and so much of paragraph (23) as relates to trafficking in narcotics, of section 212(a) will not be eligible for asylum. The addition of these two bars to eligibility will result in an asylum provision which is consistent with the refugee provisions of section 207 of the Act, 8 U.S.C. 1157. It should also do away with the present somewhat anomalous situation where aliens may be granted asylum, without regard to these provisions, but then are rendered ineligible for adjustment of status to permanent residence under section 209(b) of the Act. This subsection also bars a grant of asylum to an alien who has been convicted of a particularly serious crime and constitutes a danger to the community, as well as an alien for whom there is serious reason to believe that he has committed a serious nonpolitical crime outside the United States prior to arrival. These bars are consistent with the UN Convention Relating to the Status of Refugees, and are presently incorporated in section 243(h) of the Act, which is repealed. The United States is not obligated to grant refugee status to persons committing acts of this type.

Subsection 208(a)(2) provides for an "asylum officer" to adjudicate asylum claims. This officer would serve at the direction of the Commissioner of the Service, and would be specifically trained to adjudicate asylum claims in a nonadversarial setting. The present system allows an alien to make successive applications to the district director and to an immigration judge, leading to a time-consuming process. The asylum officer would preside as a hearing officer, and would interview witnesses and consider evidence submitted by the applicant, as well as information provided at the asylum officer's request by other agencies, such as the Department of State. Counsel's participation would be limited to advising the applicant, and not otherwise presenting evidence, or acting as an advocate. The asylum officer's determination would be administratively final, except in instances where the Attorney General or Commissioner determined that certification of the application was appropriate. In such cases, the asylum officer's determination to either grant or deny asylum could be reversed.

Subsection 208(a)(3) places the burden of proof on the applicant. No such provision exists in the present asylum statute. This provision codifies the administrative interpretations of the Board of Immigration Appeals, and is consistent with the UN Convention Relating to the Status of Refugees.

Subsection 208(a)(4) bars the deportation of an alien to a country or place where he will suffer persecution, thus incorporating the major provision of the present section 243(h) of the Act. This section satisfies the standards of Article 33 of the UN Convention Relating to the Status of Refugees, by preventing the "refoulement" of refugees to a country or place of persecution.

Subsection 208(a)(5) provides that an alien brought into asylum or deportation proceedings, who has not previously made a claim to asylum, must apply for asylum within 14 days of the notice instituting the proceedings. If a timely claim is not made, the applicant must make a clear showing of changed circumstances in the country of alleged persecution.

Subsection 208(a)(6) prohibits reopening of asylum or deportation proceedings before the asylum officer except upon a clear showing of changed circumstances in the country of alleged persecution. This provision enables flexibility in cases where the alien originally lacked sufficient evidence of persecution, but where conditions in the country may have since changed.

Subsection 208(b) provides for termination of asylum status if circumstances change in the country of persecution to such an extent that the applicant need no longer fear persecution upon return. This subsection also adds a provision allowing termination of asylum status if the alien was not a refugee at the time he was granted asylum. This is a parallel provision to section 207 of the Act. Additionally, it allows for termination if it is determined that the alien is no longer eligible for asylum for any of the reasons which initially bar a grant of asylum. These provisions are presently incorporated in the asylum regulations, but have no statutory basis, except by analogy to section 243(h).

Subsection 208(c) incorporates the present provisions of section 108(c) of the Act, which accord derivative asylum status to the spouses or child of the person granted asylum.

Subsection 208(d) provides that judicial review of an asylum claim is reviewable in the context of judicial review of an order of exclusion or deportation as provided in section 106(a) of the Act, 8 U.S.C. 1105a, and that a claim is not reviewable under the Administrative Procedure Act. The standard for review is that the denial of the asylum application was arbitrary or capricious, or otherwise not in accordance with law. This provision will allow review of the great majority of asylum claims made by aliens who are placed in deportation or exclusion proceedings, but will not provide for judicial review of asylum claims by persons who maintain a lawful status in the United States. This provision does not address the use of petitions for writs of habeas corpus which will probably continue to provide an additional means of review for all aliens taken into custody following a finding of excludability or deportability.

Section 304 amends section 235(b) to provide that any alien who presents himself for inspection by an immigration officer may be summarily excluded from admission by that immigration officer if the alien does not present any documentation to support a claim that he is admissible to the United States.

An alien seeking entry has only those rights which Congress determines should be extended to him. *Knauff* v. *Shaughnessy*, 338 U.S. 537 (1950). Currently, exclusion proceedings are prescribed by section 236 of the Act. That section provides for a hearing before an immigration judge and requires that a complete record of the testimony and evidence be kept. Section 292 of the Act provides right of counsel (at no expense to the Government) for any alien in an exclusion proceeding. Under 8 C.F.R. 236.2, the immigration judge must advise the alien of his right to counsel of his choice and of the availability of free legal services. A decision by the immigration judge that the alien is excludable is appealable to the Attorney General under section 236(b).

The Board of Immigration Appeals was created by the Attorney General administratively to hear such appeals (8 C.F.R. Part 3). Under 8 C.F.R. 236.7, the alien has 13 days after a written decision of exclusion is mailed to file an appeal with the BIA. An appeal from an oral decision of exclusion must be taken immediately after the decision is rendered. On request, the BIA must schedule oral hearings on the appeal. BIA decisions must be issued in writing. Under section 106 (b) of the Act, an alien under a final order of exclusion by the BIA may obtain judicial review only by habeas corpus proceedings.

These procedures are available to any alien, regardless of his claim. This proposal will streamline those proceedings when an alien cannot present any documentation to support a claim of admissibility. Under currently available procedures, those aliens denied entry under this provision who have a claim to admission but who have lost their documents may go to the U.S. consular officer and apply for a special immigrant visa.

Section 405 amends section 237 to eliminate the problems caused by the current law which specifies that an alien orderd *excluded* from the United States may be returned only to the "country whence he came." Decisional law has defined "the country whence he came" as the country where the alien last had a place of abode. When, however, that country does not recognize the alien's right to return, the United States Government has no discretion under the Immigration and Nationality Act to apply to a second country which may be willing to accept the alien as a deportee. In contrast, when an alien illegally in the United States is ordered arrested and deported following an *expulsion* hearing, section 243(a) of the Act (8 U.S.C. 1253(a)) provides that if the country first designated will not accept the alien, application may be made to other countries. This amendment would provide similar options with respect to aliens who have been ordered excluded and deported. It will also eliminate the confusing term "whence he came" and make it clear to which country deportation initially would be sought.

Section 406 repeals section 243(h) in its entirety. As long as this withholding provision exists, each alien will have two means of applying for asylum in the United States. With the incorporation of the new subsection 208(a)(4), which bars deportation to a country or place of persecution, there is no need for withholding of deportation. In practice, the existence of both applications has led to confusion, as immigration judges apparently have the option of granting either asylum or withholding. The reality of the situation is that few if any aliens granted withholding ever leave the United States. It is also incongruous to have a mandatory withholding provision and a discretionary asylum provision.

TITLE V: THE IMMIGRANT VISAS FOR CANADA AND MEXICO ACT

Section 501(a) would amend section 201 (a) of the Act to create separate numerical limitations of 40,000 each on immigration from Canada and Mexico, our two contiguous neighbors. The overall limitation on immigration from the rest of the world would be reduced from 270,000 to 230,000.

Under this proposal qualified immigrants from each of the two countries would compete for immigration only among themselves. The substantive rules for qualification to immigrate would remain unchanged, as would the apportionment of the respective limitations among the various classes of qualified immigrants (preference and nonpreference) set forth in section 203(a) of the Act.

This proposal also contains provisions for increasing the limitation for either Canada or Mexico by an amount equal to the amount, if any, unused by the other country.

If, in a given fiscal year, immigration under the 40,000 limitation from either country fell below the 40,000 maximum, in the next fiscal year the limitation for the other country could be increased by an amount equal to the previous year's shortfall. In no case, however, would the basic 40,000 limitation for either country be reduced.

As a example, in the first year of operation of this proposed system the limitation for each country would be 40,000. If, at the end of the year, immigration from Canada had reached only 25,000, then in the second year the limitation for Canada would again be 40,000, but the limitation for Mexico would be 55,000—the basic 40,000 plus 15,000 (the difference between 40,000 and Canada's previous year usage of 25,000).

This calculation of the limitation would be made each year on the basis of the previous year's level of immigration. In theory, if immigration from both countries fell below 40,000 in any fiscal year, both countries would be entitled to an increase in the next year. It is unlikely, however, that such a situation would occur.

Section 501(b) would make a conforming technical amendment in section 202(a).

TITLE VI: THE TEMPORARY MEXICAN WORKERS ACT

Section 601 would establish a two-year program for the admission of nationals of Mexico for employment in jobs for which there is a shortage of domestic workers. The jobs could be in any field, skilled or unskilled, provided that there was a lack of available labor. Because the program is a pilot project and is intended as a test, it would not only be limited in time to a two-year period, but also be limited in size to 50,000 workers per year.

Under the proposal, the participating states of the United States would determine for each fiscal year the occupations in each state for which there is an adequate supply of workers. Also, each participating state would estimate the number of alien workers for whom employment might be available in other occupations within the state without adverse effect on the labor market in the state. These estimates would be submitted to the Secretary of Labor who would total them. If they amounted to a grand total of 50,000 or less, the Secretary would simply assign as each state's share the number estimated by the state. If the grand total exceeded 50,000, the Secretary would assign as each state's share a proportionate share of the 50,000 total, taking into account the size of the state's total request.

An employer desiring to hire a Mexican worker under this program would apply to the Governor of the state. The Governor would verify that the proposed job is not in an occupation included on the "adequate supply of labor list" for the state in which the job is located and that the number of approvals for that year for that state had not reached the number assigned for that state. After verifying these two items, he would then send the application to the consulate in Mexico at which a worker designated by the employer will apply for an entry visa.

The consul will verify that the worker is generally admissible under the immigration law and, if so, issue a visa. When the worker applies to enter this country he will be admitted for a period of up to twelve months. During the period of employment, the worker would be allowed to travel back to Mexico for short visits and return to his job.

If the worker desired to change jobs after admission, his new employer would apply to the Governor of the state in which the new job is located for permission to do so. The Governor would grant the permission if the new job was not included on the "adequate supply of labor list" for the state in which the job was located (either the same state or another and either the same type of job or a different type). The numerical limit on the number per state would not apply to requests to change employment.

Mexican workers admitted under this program would not be allowed to bring their families with them and would be ineligible to receive a number of social benefits which citizen and permanent resident workers can receive. On the other hand, these Mexican workers would find themselves significantly better off than they now are as workers here without lawful status or a legal right to be employed. First, they would have the legal right to be employed in the jobs they have and would have obtained those jobs through a formal, open procedure. Also, and perhaps even more important, they would be allowed to change jobs legally under a simple procedure. This second feature will do much to eliminate the exploitation which now often takes place.

At the same time, however, the interests of citizen and permanent resident workers are protected by the requirement that the Mexican worker not be employed in jobs for which there is an adequate supply of American workers.

Mexican workers admitted under this program who violate the terms of their admission (for example, by taking a job in a listed occupation or by staying longer than permitted) would not only be subject to the general provisions of the immigration law regarding deportation, but would also be prohibited from future participation in this program. Also, participants in this program would be barred from certain general benefits under the immigration law such as adjustment of status to permanent resident, suspension of deportation and change to another nonimmigrant classification.

TITLE VII: THE IMMIGRATION EMERGENCY ACT

Declaration of the emergency

Section 240A(a) allows the President to declare an immigration emergency if, in his judgment, a substantial number of undocumented aliens are about to embark or have embarked for the United States, and the procedures of the Immigration and Nationality Act or the resources of the Immigration and Naturalization Service would be inadequate to respond to the expected influx. The triggering criteria have been broadly worded to allow the President reasonable flexibility. Clearly, the Secretary of State and the Attorney General would play key roles in advising the President concerning the need for and the consequences of declaring an emergency.

The language pertaining to a "substantial number" of aliens is necessarily inexact. The President could not have expected to have precise estimates of the number of undocumented aliens who may be about to travel to the United States. The phrase "substantial number" would clearly permit the declaration of an immigration emergency in response to a situation such as existed before the 1980 Cuban flotilla, in which well over 100,000 aliens came to the United States. It is not, however, intended that declarations of emergencies be limited to situations involving the exceptionally large numbers associated with the 1980 Cuban flotilla. Rather, it is anticipated that an immigration emergency could be declared even if only a few thousand aliens were expected to arrive over the course of several weeks. Consequently, a key factor in assessing the need for invoking these emergency powers is the adequacy of the response that would be made using the normal exclusion and asylum procedures of the Immigration and Nationality Act and the available resources of the Immigration and Naturalization Service. On the other hand, while serious problems exist with respect to daily illegal border crossings, it is not expected that such activity would lead to the declaration of an emergency absent other exceptional circumstances.

Subsection (b) of section 240A provides that within forty-eight hours of the declaration of an immigration emergency the President must inform the President pro tempore of the Senate and the Speaker of the House of his reasons for invoking the emergency provisions. The emergency would end automatically after 120 days, or earlier if ordered by the President, unless extended for an additional 120-day period or periods by the President.

Emergency powers

Section 240B of the bill sets forth the emergency powers and procedures which could be invoked pursuant to a declaration of an emergency. Under subsection (a)(1), the President could restrict or ban the travel of vessels, vehicles, and aircraft to a designated country or area. This would deter such vessels, vehicles, and aircraft from picking up undocumented aliens seeking to enter the United States. This subsection would also authorize the interception of vessels, vehicles, and aircraft traveling to the prohibited country or area and force them to return to the United States, or to other reasonable locations. Intercepted conveyances not likely to violate the travel restrictions could be allowed to proceed freely to other places.

Subsection (a)(1) would have a clear impact on the constitutionally protected right to international travel. In the recent decision of *Haig* v. *Agee*, — U.S. — (June 29, 1981), the Supreme Court noted, however, that "the freedom to travel outside the United States must be distinguished from the right to travel within the United States." Slip op. p. 25. Quoting from *Califano* v. *Aznovorian*, 439 U.S. 170, 176 (1978), the Court stated:

"Aznovorian urges that the freedom of international travel is basically equivalent to the constitutional right to interstate travel, recognized by this Court for over 100 years. But this Court has often pointed out the crucial difference between the freedom to travel internationally and the right of interstate travel.

"The constitutional right of interstate travel is virtually unqualified. By contrast the "right" of international travel has been considered to be no more than an aspect of the "liberty" protected by the Due Process Clause of the Fifth Amendment. As such this "right" the Court has held, can be regulated within the bounds of due process." [Citations omitted.] Slip op. pp. 25–26.

It is clear from the *Agee* decision, that the right to travel outside the United States can be restricted subject to due process limitations.

This emergency legislation provides the requisite due process by establishing a licensing process in section 240C which would allow the Government to approve such travel where adequate safeguards exist to insure that the Government's interests are protected. The provision is tailored to address the perceived harm, namely, the influx into the United States of a large number of visa-less aliens. Furthermore, the restriction does not unnecessarily infringe on the right of travel, because individuals are free to travel to a designated foreign country or geographical area, by foreign common carriers for ex-

ample, as long as no United States owned or controlled conveyances are transported to the designated country or area. *Compare Zemel* v. *Rusk*, 381 U.S. 1 (1969), *with Kent* v. *Dulles*, 357 U.S. 116 (1958).

Subsection (a)(2) of section 240B is intended to permit the interception of vessels on the high seas and to permit the return of any aliens or vessels, or aircraft carrying such aliens to the designated country or to any other suitable country or area. The power to return aliens to the designated country or to any other suitable country or area should be administered with due regard for this nation's international obligations related to refugees and the granting of asylum.

Subsection (a)(3)(i) and (ii) would permit the utilization of procedures designed to expedite the adjudication of exclusion and asylum proceedings. It would not, however, absolve the Government from the responsibility to make admission and asylum determinations, and thus should not amount to an abrogation of our treaty obligations in this area. One of the primary means of expediting exclusion procedures is the elimination of the requirement that an immigration judge conduct hearings.

Since the Attorney General is authorized to set up procedures for making exclusion and asylum determinations, he can set up different procedures for different types of cases. Thus, those undocumented aliens who claim to be United States citizens or to be lawfully admitted aliens may receive different review than that afforded aliens who have no colorable claims for admission into the United States.

Subsection (a)(3)(iii) would authorize returning an alien to a country, other than the country from whence he came, if the Attorney General determines that it would not be practicable or appropriate to return the alien to the country from which he came. Under section 237 of the Act (8 U.S.C. 1227), an excluded alien must be returned to the country from "whence he came." This limitation of the current law does not provide the flexibility needed in times of crisis. Subsection (a)(3)(iii) will provide flexibility by permitting the Attorney General to deport the alien to his native land even if that is not the country "from whence he came," or to any country which is willing to accept the excluded alien. As stated above, in the discussion of section 240B(a)(2), the deportation of aliens should be administered with due regard for this nation's international obligations related to refugees and the granting of asylum.

Subsection (a)(3)(iv) authorizes the Attorney General to prescribe the terms and conditions under which an alien would be admitted to the United States. The posting of a bond with sufficient surety to ensure compliance with the conditions of admission is specifically authorized.

Subsection (a)(3)(v) would eliminate judicial review of exclusion and asylum determinations. For years, aliens who are clearly not entitled to enter the United States have come here and been able to remain indefinitely while their cases proceed through the labyrinth of administrative and judicial proceedings. The aliens have been able to take advantage of court ordered or automatic stays of deportation. It is obviously in the interest of such aliens to take advantage of every procedural and judicial avenue available to them regardless of merits of their cases. By expediting the administrative procedure and eliminating judicial review of the administrative decision, it will be possible to dispose of these cases much more quickly than is possible under current law.

The elimination of judicial review is a significant step and has been taken only after serious consideration. The law is clear, however, that those aliens seeking admission to the United States have only the due process rights which Congress decides to give them. *Knauff* v. *Shaughnessy*, 338 U.S. 537 (1950). Moreover, our treaty obligations with respect to refugee claimants do not mandate any particular procedures which must be followed in resolving claims of persecution.

Subsection (a)(4) of section 240B provides for the detention of every alien, except those who are beyond a doubt entitled to be admitted to the United States, pending a final determination of admissibility, or pending release on parole, or pending deportation if the alien is found excludable. This paragraph makes clear that the Attorney General has complete discretion as to where such aliens will be detained, including federal prisons where appropriate. This paragraph is not intended to grant the Attorney General power to direct other governmental agencies to house detained aliens. The power of the Attorney General to request assistance from such agencies is addressed in subsection (c) of section 240B.

If an alien is found excludable he can be detained until such time as he can be deported. The language of this paragraph is also intended to permit the indefinite detention of the alien if no country is willing to accept him, such as occurred in the Cuban flotilla situation. The Attorney General's decision as to where an alien should be detained is not subject to judicial review; however, an alien can obtain habeas corpus review on the issue of whether he falls within the category of aliens subject to detention.

Subsection (a)(5) of section 240B would exempt actions taken during an immigration emergency from the restraints of the nation's environmental laws. The first paragraph merely references existing Presidential exemption authority under the Clean Air Act, Clean Water Act, Safe Drinking Water Act, Resource Conservation and Recovery Act and the Noise Control Act. The second paragraph provides the President with additional exemption authority with respect to other major Federal environmental requirements, as well as state and local requirements, but limits that authority in that it must be closely tied to the demands of an immigration emergency. The third paragraph places limits on the time the exemptions can remain in effect but in no event can they last longer than one year.

The Federal Government should be able to comply after a year with environmental requirements such as sewage discharge from a detention facility. If this will not be possible, legislation granting further exemptions can be obtained from Congress.

These environmental exemptions will allow the Government to deal quickly with an emergency without litigants impeding those efforts through court stays and injunctions such as occurred during the 1980 Cuban flotilla when efforts to transfer aliens to Fort Allen, Puerto Rico were blocked by a court injunction. See *Commonwealth of Puerto Rico* v. *Muskie*, 507 F. Supp. 1035 (D.P.R. 1981).

Subsection 240B(b) creates special emergency powers which would allow the President to order the sealing or closing of roads or harbors if necessary to prevent the arrival of the aliens in the United States. The purpose of this provision is to permit authorities to close a harbor or airport before ships or planes can depart for the purpose of picking up aliens and bringing them to the United States. In addition, roads leading to harbors, for example, may be closed in order to prevent people from launching their boats. It is obviously easier for authorities to quarantine harbors and airports and to prevent boats and planes or other conveyances from leaving, than it is to try and intercept such conveyances once they have dispersed or have entered foreign territory.

During the time a harbor, port or road is sealed, it will be left to the designated agency or the agency which is closing the harbor, port or road to determine whether a vessel, vehicle or aircraft will be allowed to depart or to travel on such road. If the facts indicate that the vessel, or aircraft is not bound for the designated foreign country, then permission will be given to proceed. The burden, however, will be on the party seeking permission to depart to show that he in fact is not intending to go to the designated foreign country. A party who is denied permission to depart may seek judicial review of the agency's decision in a United States District Court. Judicial review prior to the exhaustion of administrative remedies can be obtained if a party can show he would suffer irreparable injury should his departure be delayed. Thus, a captain of a ship with perishable cargo will be able to seek immediate judicial review if it appears that awaiting a final administrative decision would by itself result in loss or spoilage of the cargo.

Subsection (b)(3) provides that the agency designated by the President shall set up procedures to be followed in requesting departure permission. The provision recognizes, however, that there may be no procedures established for granting permission to depart. In this situation, the agency which is responsible for the closing of the harbor, airport, or road will make such determinations. However once the designated agency establishes procedures for obtaining departure permission these procedures will have to be followed.

The sealing of harbors, ports or roads, will interfere with the right to travel. As discussed previously, however, the right to travel outside the United States is not absolute and can be restricted where the limitation is tailored to a perceived harm and does not unnecessarily infringe on the right to travel, and where the necessary due process safeguards are provided. *Haig* v. *Agee*, — U.S. — (June 29, 1981), Slip op. pp. 25–26.

Some constraints on domestic travel may also result from the sealing of harbors or airports or the closing of roads. Individuals would, of course, remain free to travel within the United States. However, it is recognized that restricting the movement of conveyances may also at least temporarily restrict the movement of the persons owning or using those conveyances.

The requirement that an administrative decision on departure permission be made within 72 hours recognizes the need not to unduly restrain domestic travel, as well as legitimate international travel. Compelling justifications for some limitations on domestic travel, moreover, exist because of the practical enforcement problems associated with the interdiction of widely dispersed vessels, aircraft in flight, and vehicles that have entered foreign territory, and because of the injury to the United States which would occur if a mass migration of undocumented aliens were to take place.

Subsection (c) of section 240B authorizes the President to designate an agency or agencies which are to be responsible for carrying out the emergency provisions once they have been invoked by the President. In addition, state or local agencies or any civilian Federal agency may be called on for assistance. The President may direct that any component of the Department of Defense provide assist-

ance. By specifically permitting the Army, Navy, and Air Force to enforce these provisions, any problems with the Posse Comitatus Act are eliminated. State and local agencies would be called upon to render aid within the limits of their general competence and would not be asked to make asylum and admissibility determinations.

Subsection (d) grants search and seizure powers to agencies enforcing the provisions of this emergency legislation. The body of law governing the search and seizure powers of the INS and Coast Guard has seen some changes in recent years, and no attempt has been made to define the permissible limits of law enforcement in this respect. The actual exercise of these search and seizure powers would, however, be consistent with prevailing interpretations of the Fourth Amendment.

Under current law, the Coast Guard has broad authority to stop and inspect ships for possible violations of various laws. See 19 U.S.C. 1581(a); 14 U.S.C. 89(a). The courts have upheld against Fourth Amendment challenges the right of the Coast Guard under 14 U.S.C. 89(a) to stop and board United States vessels for administrative documentation and safety checks without a warrant and in the absence of suspicion of criminal activity. *United States* v. *Arra*, 630 F.2d 836 (1st Cir. 1980); *United States* v. *Demanett*, 629 F.2d 862 (3d Cir. 1980) (approving documentation checks); *United States* v. *Hilton*, 619 F.2d 127 (1st Cir. 1980); *United States* v. *Harper*, 617 F.2d 35 (4th Cir. 1980); *United States* v. *Warren*, 578 F.2d 1058, 1064–1065 (5th Cir. 1978) (en banc).

The intrusion justified by such an administrative inspection is limited. The scope of permissible Coast Guard inspection is restricted to those matters reasonably relating to checking documentation and safety. *United States* v. *Arra*, *supra*, at 841 n. 6; *United States* v. *Demanett*, *supra*; *United States* v. *Robbins*, 623 F.2d 418, 420 (5th Cir. 1980). However, where probable cause or reasonable suspicion of criminal activity arises during such an inspection, the inquiry and search may be appropriately expanded. See *United States* v. *Demanett*, *supra*; *United States* v. *Ricardo*, 619 F.2d 1124, 1129 (5th Cir. 1980); *United States* v. *Hilton*, *supra*, 619 F.2d at 131; *United States* v. *Warren*, *supra*, 578 F.2d at 1065. Aside from administrative inspections, brief investigatory interceptions of vessels may be permissible if there is a reasonable suspicion of a criminal violation. See *United States* v. *Williams*, 617 F.2d 1063 at 1078 (5th Cir. 1980).

In *United States* v. *Martinez-Fuerte*, 428 U.S. 543 (1976), the Court upheld the INS procedure of setting up fixed checkpoints away from the border at which cars could be stopped and the occupants questioned as to their citizenship and immigration status. The court held that such stops could occur even if there was no reason to believe the particular automobile contained illegal aliens. While *Martinez-Fuerte* concerned a different type of problem, it indicates that interior vehicle checkpoints could lawfully be established to aid in identifying persons who intend to transport a conveyance from the United States to a designated foreign country or geographical area.

Subsection (e) of 240B provides that agencies will have the same authority as they now have for disaster relief under 42 U.S.C. 5149. Under 42 U.S.C. 5149, a Federal agency in a disaster type situation can, with the consent of a state or local government, utilize the services or facilities of such government. In addition, 42 U.S.C. 5149 authorizes a Federal agency to hire temporary personnel and to purchase, rent, or hire equipment, materials and supplies for such things as shipping, travel and communications and for the administration and supervision of such activities.

Subsection (f) of 240B provides that paragraphs 3 and 4 of subsection (a), which authorize expedited exclusion and asylum proceedings and the detention of aliens, will remain in effect for those aliens who were subject to those provisions, even after the immigration emergency has ended. It is important to note that during an immigration emergency, not every alien attempting to enter the United States will be subjected to expedited proceedings and detention, only those undocumented aliens who are traveling directly or indirectly from the designated foreign country or area will be subject to such proceedings.

Subsection (g) would permit the President to direct enforcement of subsection (a) beyond the territorial limits of the United States. As in the initial decision to declare an immigration emergency, the Attorney General and Secretary of State would have major roles in advising the President concerning the need for and appropriate procedures for handling such enforcement.

There are customary international law limitations which restrict the ability of the United States to interdict foreign flag vessels absent the consent of the foreign flag state. Despite these limitations, the Fifth Circuit has held that 14 U.S.C. 89(a) authorizes the Coast Guard to board foreign flag vessels in international waters when there is reasonable suspicion that the vessel's occupants are engaged in conduct which violates a United States statute having extraterritorial application. *United States* v. *Williams*, 617 F.2d 1063 (5th Cir. 1980). As a matter of our domestic law, this emergency legislation would thus permit the halting of a foreign flag vessel, in the absence of foreign state approval, if there was reasonable suspicion that the vessel was transporting visaless aliens to the United States in violation of our civil or criminal immigration laws. Such action would, however, be inconsistent with international law, and it is not anticipated that the United States would violate those customary rules of international law which restrict the boarding of foreign flag vessels, except in the most compelling of circumstances. The statute, though, is broadly worded to permit the necessary lawful actions to be taken in response to a situation such as the 1980 Cuban flotilla.

Subsection (g) also authorizes, *inter alia*, the making of admissibility and asylum determinations outside the territorial limits of the United States, including on the high seas. Aliens intercepted at sea could receive these determinations on ships and if they are found excludable, they would not be allowed to proceed to the United States.

Subsection (h) makes clear that the fact that an immigration emergency has been declared does not relieve any carrier or other persons from any of the other civil or criminal liabilities, duties or consequences which arise elsewhere from the transportation or the bringing of any alien to the United States.

Travel restrictions and licensing

Section 240C provides for travel restrictions on vessels, vehicles, and aircraft and for licensing procedures. The travel restrictions would apply to all United States vessels, vehicles and aircraft and such other vessels, vehicles, and aircraft which are owned by, leased by or controlled by United States citizens or residents or by United States corporations. This latter phrase prevents a United States citizen from hiring a foreign registered vessel and using that vessel to bring undocumented aliens to the United States. As a result, if an emergency were declared with respect to Cuba, the statute would also require prior approval for a Mexican tour ship to go to Cuba if that ship was owned by a United States corporation, even if the ship could never reasonably be expected to travel to the United States. It is expected, however, that regulations promulgated by the designated agency would provide almost blanket approval for foreign registered vessels and aircraft to travel to designated countries or areas as long as they are not also involved in any travel to the United States. Such blanket approval could help eliminate some of the problems associated with the purported regulation of foreign flag vessels, a problem which occurs repeatedly in the statute. Broad language, however, has been consistently employed in order to reach conduct that must be regulated in order to deal effectively with a flotilla-like situation.

Penalties

Section 240D provides for both civil and criminal penalties for violations of either section 240B(b)(2) or section 240C, and a misdemeanor penalty for aliens violating the terms of admission under section 240B. Subsection (a) provides for a civil fine of up to $10,000 and the forfeiture of any vessel, vehicle or aircraft which is used to violate the travel restrictions imposed in section 240C, or the limitations on departing from a sealed harbor or closed road under section 240B(b). The same forfeiture procedures that are used under the customs laws are adopted for purposes of this provision. A person who knowingly engages in conduct prohibited with respect to travel restrictions or the sealing and closing of harbors and roads is guilty of a criminal offense and is subject to a fine of up to $50,000 and imprisonment for up to five years.

Subsection (e) of section 240D provides that violations of the immigration laws committed during an immigration emergency may be investigated by various Federal agencies. Once one of these agencies commences an investigation of a violation, it may conclude the investigation even though the immigration emergency has ended. This provision also specifies that assistance in investigating or enforcing section 240D may be provided by other Federal agencies including the Army, Navy and Air Force and also from state and local agencies. By specifically including the Army, Navy and Air Force, any problems with the Posse Comitatus Act are eliminated.

Definitions

Section 240E contains definitions which apply to the terms used in sections 240A through 240D.

The section 273(b) amendment

While not an emergency provision, an amendment to section 273(b) of the Act, 8 U.S.C. 1323(b), has been included. It is intended to increase the deterrent effect of that statute by increasing the monetary penalty for unlawfully bringing to the United States aliens without visas, and to provide greater authority for imposing sanctions directly on the vessel. With regard to sanctions on the vessel, the statute at present provides only for denial of clearance. Although denial of clearance is in some circumstances a valuable coercive tool in obtaining collection of the monetary penalty, it is fundamentally inadequate for that purpose in dealing with vessels not requiring clearance, such as non-commercial vessels and commercial vessels not bound for foreign ports. The Cuban flotilla in 1980 was comprised primarily of such vessels. In order to provide adequate flexibility to ensure fine

collection, the proposed amendment thus also makes the penalty a lien on the vessel, in the manner presently provided for similar violations of the immigration laws under 8 U.S.C. 1287 and 1321(a).

The power to seize a vessel involved in a violation of 8 U.S.C. 1323 may already exist under 19 U.S.C. 1581(e). However, the proposed amendment eliminates any doubt on that issue by explicitly authorizing seizure. The existence of clear authority to summarily seize vessels is important for three reasons. First, seizure secures the vessel as an aid to fine collection. Second, seizure may be necessary to prevent multiple trips bringing undocumented aliens by vessel owners or masters who, because of a lack of assets reachable in judicial collection actions, or for other reasons, are undeterred by the monetary penalties provided by the statute. Third, this seizure power will exist regardless of the declaration of an immigration emergency.

It is intended that seizures made under this provision be based on probable cause to believe the vessel or aircraft has been, or is being, used in violation of the section, but such seizures are to be without a warrant unless a warrant is constitutionally required. See 8 U.S.C. 1324(c). This amendment does not, however, affect the government's due process obligation to provide prompt post-seizure hearings to the aggrieved owners. See *Pollgreen* v. *Morris*, 496 F. Supp. 1042 (S.D. Fla. 1980).

The sanctions against the vessel are not available under this amendment if a sufficient deposit or bond is provided to otherwise secure payment of any penalty. The current law is identical in this respect.

Miscellaneous

Finally, the legislation contains a conforming amendment to section 235(b) of the Immigration and Nationality Act (8 U.S.C. 1225(b)), and an appropriations provision.

TITLE VIII: THE UNAUTHORIZED ENTRY AND TRANSPORTATION ACT

Subsections (a) and (b) are designed to fill the gap in Section 274 of the Immigration and Nationality Act (8 U.S.C. 1324) caused by the December 19, 1980, opinion of the United States District Court for the Southern District of Florida in *United States* v. *Anaya, et al.*, No. 80-231-CR-EPS. In *Anaya* the court held that section 1324(a)(1) does not prohibit the mere bringing of undocumented aliens to this country's borders. In the court's view, this statute is aimed only at preventing surreptitious entries. An alien does not make an entry by arriving at a port so long as he is detained or paroled. The court held that "[t]o accomplish an entry an alien must be present in the United States and be free of official restraint." Slip op. p. 8. Since there were neither actual nor attempted surreptitious entries in the Cuban flotilla cases, the court dismissed the indictments. Consequently, 1324(a) is redrafted in two new subsections, one a misdemeanor and the other a felony, to make it clear that it is the bringing to the United States of an alien who does not have prior authorization to come, as well as the transporting or harboring of an alien who has come here without prior authorization, that is proscribed.

Paragraph (a)(1) makes it a misdemeanor punishable by a mandatory fine of $2,500 and imprisonment for up to one year, or both, for a person to bring to the United States an alien who does not have prior official authorization to come to this country, regardless of whether the alien does or does not make an entry, and regardless of any future action that might be taken with respect to the alien such as the granting of parole. The fine may, in the court's discretion, be increased by any amount up to $2,500 per alien involved in the offense. It is of no consequence under this paragraph that the alien later presents himself to an Immigration and Naturalization Service officer or other authority. Persons who bring to the United States aliens who do not have visas or have not otherwise been previously given official permission to come to, enter, or reside in the United States would be in violation. Attempts to bring such aliens to the United States are also proscribed.

Paragraph (a)(2) provides that bringing an alien who does not have prior authorization to come to, enter, or reside in this country for purposes of financial gain or commercial advantage is a felony. It also provides that bringing such an alien without taking him directly to an INS official, bringing of such an alien by means of fraud, and any second offense under section 1324 are felonies. The punishment is imprisonment for up to five years and a fine of up to $10,000 for each alien involved in the offense.

Paragraph (b)(1) has no counterpart in present section 1324. It prohibits the bringing of an alien to the United States at a place other than a designated port of entry or other place designated by the INS. The provision is meant to preclude such a bringing of an alien to the United States in any manner whatsoever. The intent requirement is that at the time of the bringing or attempted bringing to the United States, the subject know or have reason to believe the person is an alien. The alien's possession of a visa or other entitlement to come to or reside in the United States is irrelevant under this paragraph.

Paragraph (b)(2) proscribes the transporting within the United States of an alien who has come to, entered, or remains illegally in the United States. It closely follows the existing subsection 1324(a)(2), except there is no requirement that the subject know that the alien first came to the United States less than three years prior to the illegal transportation. The transportation must be in furtherance of the violation of law. Thus it would not be a violation of the paragraph to transport an alien who first came to the United States illegally but was subsequently granted asylum or parole. If, however, the subject knows or is in reckless disregard of the fact that the alien has come to or remains in the United States in violation of law and the transportation is for the purpose of furthering the violation, the subject's knowledge of the date of entry should be irrelevant.

Paragraph (b)(3) is simply a restatement of existing section 1324(a)(3). It is rephrased to make clear that the harboring or concealing of an alien who has come to, entered, or remains in the United States in violation of law is prohibited.

Paragraph (b)(4) is simply a restatement of existing section 1324(a)(4) with no substantive change intended.

All violations of subsection (b) are felonies and the punishment extends to a fine of up to $10,000 and imprisonment for up to five years, or both, for each alien in respect to whom any violation of the subsection occurs. The provision that it is a separate felony as to each alien involved, which also applies to violations of paragraph (a)(2), is carried forward from the present section 1324. The courts have specifically upheld indictments charging multiple counts of transportation of aliens and consecutive sentences even though all were transported at the same time and place. See *Vega-Murrillo* v. *United States*, 264 F.2d 240 (9th Cir. 1959); *Jones* v. *United States*, 260 F.2d 89 (9th Cir. 1958).

Subsection (c) narrows the exceptions that exist in present section 1324(b), providing for forfeiture of vehicles, vessels, and aircraft used in the transportation of illegal aliens. The subsection closely follows the provisions of H.R. 8115 (96th Cong.) which was reported favorably by the Judiciary Committee. See Report No. 96-1395.

Present INS forfeiture authority, enacted in 1978, and codified in 8 U.S.C. 1324(b)(1)(A) is too restrictive. For example, this section precludes the forfeiture of any vessel unless the Government can show that the owner, master or person in charge consented to or knew of the illegal use of the vessel. In many situations such knowledge or consent is impossible to demonstrate and is a burden of proof not borne by other Federal law enforcement agencies such as the Customs Service and the Drug Enforcement Administration where proving such knowledge or consent is limited to seizures involving common carriers. 21 U.S.C. 881(a)(4)(A). Additionally, section 1324(b) presently requires INS to bear administrative and incidental expenses when it turns out that an innocent owner is involved even though the seizure was made in a good faith belief that it was warranted based on facts known to the INS at the time. No other enforcement agency with vehicle seizure authority is subjected to this type of liability. Compare Department of Justice Regulations for the Remission or Mitigation of Civil Forfeitures, 28 C.F.R. 9.7. Finally, present law provides that INS is required to satisfy any valid lien or third party interest in the conveyance "without expense to the interest holder." This creates little incentive for mortgage lenders to exercise caution in making loans for the purchase of conveyances that could be used to transport illegal aliens. Compare 28 C.F.R. 9.7, providing that a lienholder's interest in the vehicle should be satisfied only after the Government's costs associated with the seizure and forfeiture have been deducted. The new subsection (c) has the effect of leaving on the lienholder the normal burden of showing good faith, innocence, and lack of knowledge in order to obtain a remission or mitigation of the forfeiture. This is the procedure currently followed pursuant to the customs and drug laws. Compare 28 C.F.R. 9.5 (b) and (c).

Section 1324(c)(1) provides that any conveyance used in or intended to be used in a violation of subsection (a) or (b) shall be seized and subject to forfeiture. This is a slight expansion on the authority provided in present section 1324(b)(1) in that it allows for seizure of a conveyance clearly intended to be used in the substantive offense as well as where it is used in committing a substantive violation. Paragraph (c)(1)(A) exempts common carriers from forfeiture if the offense occurs while the conveyance is being used as a common carrier unless the owner, operator or other person in charge was a consenting party or privy to the illegal act. It is similar to a provision in the law providing for forfeiture of conveyances used to transport controlled substances, 21 U.S.C. 881(a)(4)(A), and to a provision in 49 U.S.C. 782 providing for seizure and forfeiture of conveyances used in transporting certain articles of contraband. Paragraph (c)(1)(B) carries forward existing 8 U.S.C. 1324(b)(1)(B) providing that it is a defense to a forfeiture if the offense occurred while the conveyance was unlawfully in the possession of a person other than the owner in violation of law.

Section 1324(c)(2) carries forward 8 U.S.C. 1324(b)(3) providing that a conveyance subject to seizure may be seized without a warrant in circumstances where a warrant is not constitutionally required. Together with section 1324(c)(3), which makes provisions of the customs laws applicable by reference to seizures and forfeitures under this sec-

tion, section (c)(2) will allow the INS to seize vessels or other conveyances if an INS officer has probable cause to believe the vessel is being used in violation of section 1324. There is no need to determine whether the owner was involved before making the seizure. Once a vessel is seized, it is normally held by the government pending the actual judicial proceeding to perfect the forfeiture.

Section 1324(c)(5) deals with the burden of proof in the forfeiture action and is similar to 19 U.S.C. 1615 relating to customs forfeitures. It provides that initially the government must show the probable cause that justified the seizure and the institution of the forfeiture action. In showing probable cause the government must produce evidence that the aliens involved with the conveyance did not produce evidence that the aliens involved with the conveyance did not have prior authorization to come to or remain in the United States. In order to forestall any possible claim that the government must detain all undocumented aliens involved in a particular incident, the proposed bill lists three types of evidence that are *prima facie* evidence that the aliens involved did not have such authorization. They are records of any administrative or judicial proceeding concerning the alien's status in which it was determined he had not received authorization to come to or enter this country, official records of the INS or State Department showing that the alien had not received such authorization, and testimony by an immigration officer having knowledge of the alien's status that the alien had not received such authorization. (An example of the last type of evidence might come from an INS officer who, by referring to notes or INS records, can testify that a certain boat landed on a particular day with a particular illegal alien on it). Once the government shows probable cause for the seizure and the initiation of the forfeiture action, the burden of proof shifts to the claimant to show either that the conveyance was not used in a violation of the section or that the common carrier exception or the exception for conveyances unlawfully in the hands of someone other than the owner applies.

Section 1324(c)(4) provides for disposition of the conveyance and the payment of costs and expenses. It is similar to provisions contained in the Controlled Substances Act, 21 U.S.C. 881(e).

Section 1324(d) concerns arrest authority for violations of sections 1324(a) and (b). It expands on the present provisions to allow not only INS officers but also other Federal and state law enforcement officers to make arrests. Occasionally, alien smugglers are first spotted in the act by state law enforcement officers and this provision allows them to make an arrest.

TITLE IX: THE LABOR CERTIFICATION ACT

This title amends section 212(a)(14) of the Immigration and Nationality Act, the labor certification provision. The bill provides for the exclusion of aliens under the third (exceptional) and sixth (skilled or unskilled labor) preference categories or the nonpreference category unless the Department of Labor certifies that there are not sufficient workers available in the alien's occupation and that the employment of aliens in such occupations will not adversely affect the wages and working conditions of workers in the United States similarly employed. In making such determinations, the Secretary of Labor may use labor market information without reference to the specific job opportunity for which the certification is sought. Decisions of the Secretary of Labor made pursuant to this section would be subject to only limited review by the courts. The Secretary may waive the requirement of an offer of employment for an alien of exceptional ability.

TITLE X: THE EMERGENCY INSTRUCTION ACT

The proposed amendment to subsection (f) of section 212 of the Immigration and Nationality Act (8 U.S.C. 1182(f)), would add five new paragraphs. The first new paragraph (f)(2) would authorize the President to enter into arrangements with foreign countries for the purpose of preventing illegal migration to the United States. Such arrangements could, for example, authorize the Coast Guard to stop foreign flag vessels on the high seas to determine whether such vessels are destined for the United States and are carrying undocumented aliens who are not entitled to enter the United States. Under existing international law, the regulation of a vessel in international waters is normally the sole responsibility of the nation whose flag the vessel flies. See *United States* v. *Postal*, 589 F.2d 862, 869 (5th Cir. 1979). A corollary is that foreign flag vessels are generally accorded the right to undisturbed navigation on international waters. This rule of non-interference is given formal recognition by the Convention on the High Seas, 13 U.S.T. 2312, T.I.A.S. No. 5200 (entered into force September 30, 1962). Thus, except in a few limited situations, before a foreign flag vessel can be stopped on the high seas, the authorization of the foreign government must be obtained. This paragraph would authorize the President to enter into arrangements with foreign countries whereby they will agree to consent to the stopping of their flag vessels in order to determine whether such vessel is destined for the United States and is carrying undocumented aliens or aliens who are otherwise not entitled to enter the United States.

This paragraph also authorizes the President to direct the Coast Guard or other federal agency to stop foreign flag vessels where the foreign country has entered into an arrangement with the United States Government authorizing such action. The word "arrangement" was used instead of "agreement" to indicate that a formal agreement with a foreign country is not necessary but that it could be done on an *ad hoc* basis.

This paragraph also provides that after stopping a vessel, the Coast Guard or other federal agency may make inquiries of those on board, examine documents, and take other actions to establish the registry, condition and destination of the vessel and the status of those on board the vessel. If the circumstances indicate that an offense against United States immigration laws, or an offense against the laws of a foreign country with which the United States has an agreement to assist is being committed, the vessel and the passengers may be returned to the country from whence they came or to some other reasonable location. However, if a person qualifies as a refugee under the United Nations Convention and Protocol Relating to Refugees, 19 U.S.T. 6223, T.I.A.S. 6577, he cannot be returned to a country where his life or freedom is threatened on account of his race, religion, nationality, membership in a particular social group, or political opinion.

The third new paragraph (f)(4), authorizes the Attorney General to establish procedures for determining the admissibility of those aliens who have not landed in the United States. This will permit the Attorney General to set up expedited procedures in determining the admissibility of such aliens. It is expected that such determinations will take place on the detained vessels or on the Coast Guard vessels.

In addition, this paragraph would authorize the President to furnish assistance to a foreign country for the purpose of controlling the immigration of persons from such country to the United States.

The second new paragraph (f)(3), would authorize the President to direct the Coast Guard or any other appropriate federal agency, including components of the Department of Defense to stop on the high seas vessels of the United States, vessels subject to United States jurisdiction, or foreign flag vessels if the United States Government has an arrangement with such country authorizing such action. Of course, once a foreign flag vessel enters the territorial waters of the United States it can be stopped without obtaining the consent of the foreign country. The statute does not require the President to direct the stopping of each vessel but he may direct the stopping of a particular class of vessels.

Presently, the courts have upheld against Fourth Amendment challenges, the right of the Coast Guard under 14 U.S.C. 89(a) to stop and board American flag vessels for administrative documentation and safety checks without a warrant and in the absence of suspicion of criminal activity. *United States* v. *Arra*, 630 F.2d 836 (1st Cir. 1980); *United States* v. *Demanett*, 629 F.2d 862 (3d Cir. 1980) (approving documentation checks); *United States* v. *Hilton*, 619 F.2d 127 (1st Cir. 1980); *United States* v. *Harper*, 617 F.2d 35 (4th Cir. 1980); *United States* v. *Warren*, 578 F.2d 1058, 1064–1065 (5th Cir. 1978) (*en banc*). Likewise, the courts have upheld the authority of the Coast Guard under 14 U.S.C. 89(a) to board stateless vessels. *United States* v. *Rubies*, 612 F.2d 397, 403 (9th Cir. 1979) (boarding allowed at least for the limited purpose of determining the identity of the vessel); *United States* v. *Dominguez*, 604 F.2d 304 (4th Cir. 1979) (boarding allowed because a stateless vessel is subject to the jurisdiction of the United States for the purpose of enforcing its law); *United States* v. *Postal*, *supra*.

It is well established that aliens not at our borders who seek to come here have no enforceable procedural protections. The courts can neither review the denial of a visa nor compel a consular officer to adjudicate such an application. *Wan Shih Hsieh* v. *Kiley*, 569 F.2d 1179 (2d Cir. 19178); *Gomez* v. *Kissinger*, 534 F.2d 518 (2nd Cir. 1976), *cert. denied*, 429 U.S. 897 (1976); *Burrafato* v. *United States Department of State*, 523 F.2d 554 (2d Cir. 1976), *cert. denied*, 424 U.S. 910 (1976); *Loza-Bedoya* v. *INS*, 410 F.2d 343 (9th Cir. 1969); *U.S. ex rel. Ulrich* v. *Kellogg*, 30 F.2d 984 (D.C. Cir. 1929), *cert. denied*, 279 U.S. 868 (1929); *U.S. ex rel. London* v. *Phelps*, 22 F.2d 288 (2d Cir. 1927), *cert denied*, 276 U.S. 630 (1928); *Licea-Gomez* v. *Pilliod*, 193 F. Supp. 577 (N.D. Ill. 1960); see *Kleindienst* v. *Mandell*, 408 U.S. 753, 762 (1972). Thus by making the admissibility determination before the aliens have landed in the United States, the aliens will not be entitled to such protections as judicial review of the admissibility determination or a hearing before an immigration judge.

While paragraph (f)(4) would permit the utilization of procedures designed to expedite the adjudication of exclusion and refugee claims, it would not absolve the Government from the responsibility to make admission and refugee determinations and thus will not amount to an abrogation of our treaty obligations in this area. Also, since the Attorney General is authorized to set up procedures for making exclusion and refugee determinations, he can set up different procedures for different types of cases. Thus those undocumented aliens who claim to be United States citizens or to be lawfully admitted aliens may receive different review than that afforded aliens who have no colorable claims for admission into the United States.

The fourth new paragraph (f)(5), makes clear that nothing contained in this section shall be interpreted as limiting in any way the President from exercising his Constitutional powers.

Finally, new paragraph (f)(6) sets forth the definitions for the terms "vessel of the United States" and "vessel subject to the jurisdiction of the United States" by cross referencing to title 21, United States Code, section 955b which defines these terms.

AMENDMENTS TO THE IMMIGRATION AND NATIONALITY ACT*

(As Amended September 1, 1980)

(Act of June 27, 1952; 66 Stat. 163; 8 U.S.C. 1101 et seq.)

JUDICIAL REVIEW OF ORDERS OF DEPORTATION AND EXCLUSION

SEC. 106. [8 U.S.C. 1105a] (a) The procedure prescribed by, and all the provisions of the Act of December 29, 1950, as amended [10] (64 Stat. 1129; 68 Stat. 961; 5 U.S.C. 1031 et seq.), shall apply to, and shall be the sole and exclusive procedure for, the judicial review of all final orders of deportation heretofore or hereafter made against aliens within the United States pursuant to administrative proceedings under section 242(b) of this Act or comparable provisions of any prior Act, except that—

[(1) a petition for review may be filed not later than six months from the date of the final deportation order or from the effective date of this section, whichever is the later] [;]

(1) *"A petition for review may be filed not later than 30 days from the date of the final deportation order or from the effective date of this section, whichever is the later."*

(2) the venue of any petition for review under this section shall be in the judicial circuit in which the administrative proceedings before a special inquiry officer were conducted in whole or in part, for in the judicial circuit wherein is the residence, as defined in this Act, of the petitioner, but not in more than one circuit;

(3) the action shall be brought against the Immigration and Naturalization Service, as respondent. Service of the petition to review shall be made upon the Attorney General of the United States and upon the official of the Immigration and Naturalization Service in charge of the Service district in which the office of the clerk of the court is located. The service of the petition for review upon such official of the Service shall stay the deportation of the alien pending determination of the petition by the court, unless the court otherwise directs;

(4) except as provided in clause (B) of paragraph (5) of this subsection, the petition shall be determined solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial, and probative evidence on the record considered as a whole, shall be conclusive;

(5) whenever any petitioner, who seeks review of an order under this section, claims to be a national of the United States and makes a showing that his claim is not frivolous, the court shall (A) pass upon the issues presented when it appears from the pleadings and affidavits filed by the parties that no genuine issue of material fact is presented; or (B) where a genuine issue of material fact as to the petitioner's nationality is presented, transfer the proceedings to a United States district court for the district where the petitioner has his residence for hearing de novo of the nationality claim and determination as if such proceedings were originally initiated in the district court under the provisions of section 2201 of title 28, United States Code. Any such petitioner shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise;

(6) if the validity of a deportation order has not been judicially determined, its validity may be challenged in a criminal proceeding against the alien for violation of subsection (d) or (e) of section 242 of this Act only by separate motion for judicial review before trial. Such motion shall be determined by the court without a jury and before the trial of the general issue. Whenever a claim to United States nationality is made in such motion, and in the opinion of the court, a genuine issue of material fact as to the alien's nationality is presented, the court shall accord him a hearing de novo on the nationality claim and determine that issue as if proceedings had been initiated under the provisions of section 2201 of title 28, United States Code. Any such alien shall not be entitled to have such issue determined under section 360(a) of this Act or otherwise. If no such hearing de novo as to nationality is conducted, the determination shall be made solely upon the administrative record upon which the deportation order is based and the Attorney General's findings of fact, if supported by reasonable, substantial and probative evidence on the record considered as a whole, shall be conclusive. If the deportation order is held invalid, the court shall dismiss the indictment and the United States shall have the right to appeal to the court of appeals within thirty days. The procedure on such appeals shall be as provided in the Federal rules of criminal procedure. No petition for review under this section may be filed by any alien during the pendency of a criminal proceeding against such alien for violation of subsection (d) or (e) of section 242 of this Act;

(7) nothing in this section shall be construed to require the Attorney General to defer deportation of an alien after the issuance of a deportation order because of the right of judicial review of the order granted by this section, or to relieve any alien from compliance with subsections (d) and (e) of section 242 of this Act. Nothing contained in this section shall be construed to preclude the Attorney General from detaining or continuing to detain an alien or from taking him into custody pursuant to subsection (c) of section 242 of this Act at any time after the issuance of a deportation order.

(8) it shall not be necessary to print the record or any part thereof, or the briefs, and the court shall review the proceedings on a typewritten record and on typewritten briefs; and

(9) any alien held in custody pursuant to an order of deportation may obtain judicial review thereof by habeas corpus proceedings.

TITLE II—IMMIGRATION

CHAPTER 1—SELECTION SYSTEM

NUMERIAL LIMITATIONS

SEC. 201. [8 U.S.C. 1151] [(a) Exclusive of special immigrants defined in section 101(a)(27), immediate relatives specified in subsection (b) of this section, and aliens who are admitted or granted asylum under section 207 or 208, the number of aliens born in any foreign state or dependent area who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence, shall not in any of the first three quarters of any fiscal year exceed a total of seventy-two thousand and shall not in any fiscal year exceed two hundred and seventy thousand.]

(a)(1) Exclusive of special immigrants defined in section 101(a)(27), immediate relatives specified in subsection (b) of this section, aliens who are admitted or granted asylum under section 207 or 208, and aliens described in paragraph (2) of this subsection, the number of aliens who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence, shall not in any of the first three quarters of any fiscal year exceed a total of sixty-one thousand and shall not in any fiscal year exceed two hundred thirty thousand.

(2) Exclusive of special immigrants defined in section 101(a)(27), immediate relatives specified in section 201(b), and aliens who are admitted or granted asylum under section 270 or 208, the number of aliens chargeable (as provided in section 202(b)) to any single foreign state contiguous to the United States who may be issued immigrant visas or who may otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence shall not in any of the first three quarters of any fiscal year exceed a total of eleven thousand and shall not in any fiscal year exceed a total of forty thousand: Provided, however, that, if in any fiscal year, the number of aliens chargeable to either contiguous foreign state who are issued immigrant visas and otherwise acquire the status of an alien lawfully admitted to the United States for permanent residence is less than forty thousand, in the next following fiscal year the number of aliens from the other contiguous foreign state who may be issued immigrant visas or otherwise acquire the status of an alien lawfully admitted to the United States shall be increased by an amount equal to the difference between forty thousand and such number. In such a case, the limitation prescribed for such foreign state for each of the first three quarters of such fiscal year shall be increased by an appropriate proportional amount.

(b) The "immediate relatives" referred to in subsection (a) of this section shall mean the children, spouses, and parents of a citizen of the United States: *Provided*, That in the case of parents, such citizen must be at least twenty-one years of age. The immediate relatives specified in this subsection who are otherwise qualified for admission an immigrant shall be admitted as such, without regard to the numerical limitations in this Act.

NUMERICAL LIMITATION TO ANY SINGLE FOREIGN STATE

SEC. 202. [8 U.S.C. 1152] [(a) No person shall receive any preference or priority or be discriminated against in the issuance of an immigrant visa because of his race, sex, nationality, place of birth, or place of residence, except as specifically provided in section 101(a)(27), section 201(b), and section 203: *Provided*, That the total number of immigrant visas made available to natives of any single foreign state under paragraphs (1) through (7) of section 203(a) shall not exceed 20,000 in any fiscal year.]

(a) No person shall receive any preference or priority or be discriminated against in the issuance of an immigrant visa because of his race, sex, nationality, place of birth, or place of residence, except as specifically provided in section 101(a)(27), section 201(b), and section 203: Provided, that the total number of immigrant visas made available to natives of any single foreign state (other than a foreign state contiguous to the United States) under paragraphs (1) through (7) of section 203 (a) shall not exceed 20,000 in any fiscal year,

*Material to be deleted is enclosed with brackets; new language is italicized.

(b) Each independent country, self-governing dominion, mandated territory, and territory under the international trusteeship system of the United Nations, other than the United States and its outlying possessions shall be treated as a separate foreign state for the purposes of the numerical limitation set forth in the proviso to subsection (a) of this section when approved by the Secretary of State. All other inhabited lands shall be attributed to a foreign state specified by the Secretary of State. For the purposes of this Act the foreign state to which an immigrant is chargeable shall be determined by birth within such foreign state except that (1) an alien child, when accompanied by his alien parent or parents, may be charged to the same foreign state as the accompanying parent or of either accompanying parent if such parent has received or would be qualified for an immigrant visa, if necessary to prevent the separation of the child from the accompanying parent or parents, and if the foreign state to which such parent has been or would be chargeable has not exceeded the numerical limitation set forth in the proviso to subsection (a) of this section for that fiscal year; (2) if an alien is chargeable to a different foreign state from that of his accompanying spouse, the foreign state to which such alien is chargeable may, if necessary to prevent the separation of husband and wife, be determined by the foreign state of the accompanying spouse, if such spouse has received or would be qualified for an immigrant visa and if the foreign state to which such spouse has been or would be chargeable has not exceeded the numerical limitation set forth in the proviso to subsection (a) of this section for that fiscal year; (3) an alien born in the United States shall be considered as having been born in the country of which he is a citizen or subject, or if he is not a citizen or subject of any country then in the last foreign country in which he had his residence as determined by the consular officer; [and] (4) an alien born within any foreign state in which neither of his parents was born and in which neither of his parents had a residence at the time of such alien's birth may be charged to the foreign state of either parent.

(c) Any immigrant born in a colony or other component or dependent area of a foreign state overseas from the foreign state, other than a special immigrant, as defined in section 101(a)(27), or an immediate relative of a United States citizen, as defined in section 201(b), shall be chargeable for the purpose of the limitation set forth in section 202(a), to the foreign state, and the number of immigrant visas available to each such colony or other component or dependent area shall not exceed six hundred in any one fiscal year.

(d) In the case of any change in the territorial limits of foreign states, the Secretary of State shall, upon recognition of such change, issue appropriate instructions to all diplomatic and consular offices.

(e) Whenever the maximum number of visas have been made available under section 202 to natives of any single foreign state as defined in subsection (b) of this section or any dependent area as defined in subsection (c) of this section in any fiscal year, in the next following fiscal year a number of visas, not to exceed 20,000, in the case of a foreign state or 600 in the case of a dependent area, shall be made available and allocated as follows:

(1) Visas shall first be made available, in a number not to exceed 20 per centum of the number specified in this subsection, to qualified immigrants who are the unmarried sons or daughters of citizens of the United States.

(2) Visas shall next be made available, in a number not to exceed 26 per centum of the number specified in this subsection, plus any visas not required for the classes specified in paragraph (1), to qualified immigrants who are the spouses, unmarried sons, or unmarried daughters of an alien lawfully admitted for permanent residence.

(3) Visas shall next be made available, in a number not to exceed 10 per centum of the number specified in this subsection, to qualified immigrants who are members of the professions, or who because of their exceptional ability in the sciences or the arts will substantially benefit prospectively the national economy, cultural interests, or welfare of the United States, and whose services in the professions, sciences, or arts are sought by an employer in the United States.

(4) Visas shall next be made available, in a number not to exceed 10 per centum of the number specified in this subsection, plus any visas not required for the classes specified in paragraphs (1) through (3), to qualified immigrants who are the married sons or the married daughters of citizens of the United States.

(5) Visas shall next be made available, in a number not to exceed 24 per centum of the number specified in this subsection, plus any visas not required for the classes specified in paragraphs (1) through (4), to qualified immigrants, who are the brothers or sisters of citizens of the United States, provided such citizens are at least twenty-one years of age.

(6) Visas shall next be made available, in a number not to exceed 10 per centum of the number specified in this subsection, to qualified immigrants capable of performing specified skilled or unskilled labor, not of a temporary or seasonal nature, for which a shortage of employable and willing persons exists in the United States.

(7) Visas so allocated but not required for the classes specified in paragraphs (1) through (6) shall be made available to other qualified immigrants strictly in the chronological order in which they qualify.

ASYLUM PROCEDURE

SEC. 208. [8 U.S.C. 1158] [(a) The Attorney General shall establish a procedure for an alien physically present in the United States or at a land border or port of entry, irrespective of such alien's status, to apply for asylum, and the alien may be granted asylum in the discretion of the Attorney General if the Attorney General determines that such alien is a refugee within the meaning of section 101(a)(42)(A).

(b) Asylum granted under subsection (a) may be terminated if the Attorney General, pursuant to such regulations as the Attorney General may prescribe, determines that the alien is no longer a refugee within the meaning of section 101(a)(42)(A) owing to a change in circumstances in the alien's country of nationality or, in the case of an alien having no nationality, in the country in which the alien last habitually resided.

(c) A spouse or child (as defined in section 101(b)(1) (A), (B), (C), (D), or (E)) of an alien who is granted asylum under subsection (a) may, if not otherwise eligible for asylum under such subsection, be granted the same status as the alien if accompanying, or following to join, such alien.]

(a)(1). An application for asylum may be made by any alien physically present in the United States or at a land border or port of entry. An alien may be granted asylum by an asylum officer under paragraph (2) of this subsection, if (A) the asylum officer determines that the alien is a refugee within the meaning of section 101(a)(42)(A); (B) the alien is not firmly resettled in any foreign country; (C) the alien is not inadmissible under the provisions of paragraphs (27), (29), or (33) of section 212(a), or so much of paragraph 23 of section 212(a) as relates to trafficking; (D) the alien has not been convicted by final judgment of a particularly serious crime and does not constitute a danger to the community; and (E) there are no serious reasons for considering that the alien has committed a serious nonpolitical crime outside the United States prior to the arrival of the alien in the United States.

(2) Eligibility for asylum shall be determined by an asylum officer, who shall serve at the direction of the Commissioner, and who shall perform such other duties as the Commissioner may prescribe, except for the investigation or prosecution of any case under section 235 or 242 of this Act. An alien seeking asylum shall appear before the asylum officer in an informal, nonadversary interview, and may be accompanied by counsel at no expense and no delay to the government. Counsel may advise the alien during the interview but shall not otherwise participate in the interview. The asylum officer may administer oaths and call witnesses, and request information on an application from any government agency, including information classified under Executive Order No. 12065 (50 U.S.C. nt. 401). A record of the proceedings shall be made in accordance with this section, and under such regulations as the Attorney General shall prescribe. The procedures set forth in this section shall be the sole and exclusive procedures for determining asylum. The determination of the asylum officer shall be final and shall not be subject to further administrative appeal or review, except that either the Commissioner or the Attorney General may require that the decision of an asylum officer be certified to him for review.

(3) The burden of proof shall be on the alien to establish that he qualifies for asylum under this section.

(4) No alien who meets the refugee definition set forth in section 101(a)(42)(A), and who meets the requirements of subsections (1)(C), (D), and (E) of this section shall be returned to the country or place where he would face persecution, as determined by the asylum officer.

(5) An alien against whom proceedings are instituted under section 236 or 242 of this Act, who has not previously made a claim for asylum, must make any application for asylum to the asylum officer under this section within 14 days of the service of the notice instituting such proceedings. An alien who does not make such a timely claim shall not be allowed to initiate an asylum claim absent a clear showing of charged circumstances in the country of the alien's nationality, or in the case of an alien having no nationality, the country of the alien's last habitual residence.

(6) An asylum officer may not reopen a proceeding under this section except upon a clear showing of changed circumstances in the country of the alien's nationality, or in the case of an alien having no nationality, the country of the alien's last habitual residence.

(b) Asylum granted under subsection (a) may be terminated if the Attorney General, pursuant to such regulations as the Attorney General may prescribe, determines that the alien is (A) no longer a refugee within the meaning of section 101(a)(42)(A) owing to a change in circumstances in the alien's country of nationality or in the case of an alien having no nationality, in the country in which the alien last habitually resided; or (B) the alien was not a refugee within

the meaning of section 101(a)(42)(A) at the time he was granted asylum; or (C) the alien is no longer eligible for asylum on any of the grounds set forth in (a)(1) above.

(c) A spouse or child (as defined in section 101(b)(1)(A), (B), (C), (D), or (E)) of an alien who is granted asylum under subsection (a) may, if not otherwise eligible for asylum under such subsection, be granted the same status as the alien if accompanying, or following to join, such alien.

(d) Notwithstanding any other provision of law, a denial of an application for asylum and the procedures established to adjudicate asylum claims under this section shall be subject to judicial review only in a proceeding challenging the validity of an exclusion or deportation order as provided for in section 106(a)(1) of the Immigration and Nationality Act, 8 U.S.C. 1105a, and shall not be subject to review under 5 U.S.C. 702. The denial of an application for asylum may be set aside, or the cause remanded for further proceedings, only upon a showing that such denial was arbitrary and capricious, or was otherwise not in accordance with law.

GENERAL CLASSES OF ALIENS INELIGIBLE TO RECEIVE VISAS AND EXCLUDED FROM ADMISSION; WAIVERS OF INADMISSIBILITY

SEC. 212. [8 U.S.C. 1182] (a) Except as otherwise provided in this Act,[27] the following classes of aliens shall be ineligible to receive visas and shall be excluded from admission into the United States:

(1) Aliens who are mentally retarded;

(2) Aliens who are insane;

(3) Aliens who have had one or more attacks of insanity;

(4) Aliens afflicted with psychopathic personality, or sexual deviation, or a mental defect;

(5) Aliens who are narcotic drug addicts or chronic alcoholics;

(6) Aliens who are afflicted with any dangerous contagious disease;

(7) Aliens not comprehended within any of the foregoing classes who are certified by the examining surgeon as having a physical defect, disease, or disability, when determined by the consular or immigration officer to be of such a nature that it may affect, the ability of the alien to earn a living, unless the alien affirmatively establishes that he will not have to earn a living;

(8) Aliens who are paupers, professional beggars, or vagrants;

(9) Aliens who have been convicted of a crime involving moral turpitude (other than a purely political offense), or aliens who admit having committed such a crime, or aliens who admit committing acts which constitute the essential elements of such a crime; except that aliens who have committed only one such crime while under the age of eighteen years may be granted a visa and admitted if the crime was committed more than five years prior to the date of the application for a visa or other documentation, and more than five years prior to date of application for a visa or other documentation, and more than five years prior to date of application for admission to the United States, unless the crime resulted in confinement in a prison or correctional institution, in which case such alien must have been released from such confinement more than five years prior to the date of the application for a visa or other documentation, and for admission, to the United States. Any alien who would be excludable because of the conviction of a misdemeanor classifiable as a petty offense under the provisions of section 1(3) of title 18, United States Code, by reason of the punishment actually imposed, or who would be excludable as one who admits the commission of an offense that is classifiable as a misdemeanor under the provisions of section 1(2) of title 18, United States Code, by reason of the punishment which might have been imposed upon him, may be granted a visa and admitted to the United States if otherwise admissible: *Provided*, That the alien has committed only one such offense, or admits the commission of acts which constitute the essential elements of only one such offense.

(10) Aliens who have been convicted of two or more offenses (other than purely political offenses), regardless of whether the conviction was in a single trial or whether the offenses arose from a single scheme of misconduct and regardless of whether the offenses involved moral turpitude, for which the aggregate sentences to confinement actually imposed were five years or more;

(11) Aliens who are polygamists or who practice polygamy or advocate the practice of polygamy;

(12) Aliens who are prostitutes or who have engaged in prostitution, or aliens coming to the United States solely, principally, or incidentally to engage in prostitution; aliens who directly or indirectly procure or attempt to procure, or who have procured or attempted to procure or to import, prostitutes or persons for the purpose of prostitution or for any other immoral purpose; and aliens who are or have been supported by, or receive or have received, in whole or in part, the proceeds of prostitution or aliens coming to the United States to engage in any other unlawful commercialized vice, whether or not related to prostitution;

(13) Aliens coming to the United States to engage in any immoral sexual act;

(14) Aliens seeking to enter the United States, for the purpose of performing skilled or unskilled labor, unless the Secretary of Labor has determined and certified to the Secretary of State and the Attorney General that (A) there are not sufficient workers who are able, willing, qualified (or equally qualified in the case of aliens who are members of the teaching profession or who have exceptional ability in the sciences or the arts), and available at the time of application for a visa and admission to the United States and at the place where the alien is to perform such skilled or unskilled labor, and (B) the employment of such aliens will not adversely affect the wages and working conditions of the workers in the United States similarly employed. The exclusion of aliens under this paragraph shall apply to preference immigrant aliens described in section 203(a)(3) and (6), and to nonpreference immigrant aliens described in section 203(a)(7);

(15) Aliens who, in the opinion of the consular officer at the time of application for a visa, or in the opinion of the Attorney General at the time of application for admission, are likely at any time to become public charges;

(16) Aliens who have been excluded from admission and deported and who again seek admission within one year from the date of such deportation, unless prior to their reembarkation at a place outside the United States or their attempt to be admitted from foreign contiguous territory the Attorney General has consented to their reapplying for admission;

(17) Aliens who have been arrested and deported, or who have fallen into distress and have been removed pursuant to this or any prior act, or who have been removed as alien enemies, or who have been removed at Government expense in lieu of deportation pursuant to section 242(b), unless prior to their embarkation or reembarkation at a place outside the United States or their attempt to be admitted from foreign contiguous territory the Attorney General has consented to their applying or reapplying for admission;

(18) Aliens who are stowaways;

(19) Any alien who seeks to procure, or has sought to procure, or has procured a visa or other documentation, or seeks to enter the United States, by fraud or by willfully misrepresenting a material fact;

(20) Except as otherwise specifically provided in this Act, any immigrant who at the time of application for admission is not in possession of a valid unexpired immigrant visa, reentry permit, border crossing identification card, or other valid entry document required by this Act, and a valid unexpired passport, or other suitable travel document, or document of identity and nationality, if such document is required under the regulations issued by the Attorney General pursuant to section 211(a);

(21) Except as otherwise specifically provided in this Act, any immigrant at the time of application for admission whose visa has been issued without compliance with the provisions of section 203;

(22) Aliens who are ineligible to citizenship, except aliens seeking to enter as nonimmigrants; or persons who have departed from or who have remained outside the United States to avoid or evade training or service in the armed forces in time of war or a period declared by the President to be a national emergency, except aliens who were at the time of such departure nonimmigrant aliens and who seek to reenter the United States as nonimmigrants;

(23) Any alien who has been convicted of a violation of, or a conspiracy to violate, any law or regulation relating to the illicit possession of or traffic in narcotic drugs or marihuana, or who has been convicted of a violation of, or a conspiracy to violate, any law or regulation governing or controlling the taxing, manufacture, production, compounding, transportation, sale, exchange, dispensing, giving away, importation, exportation, or the possession for the purpose of the manufacture, production, compounding, transportation, sale, exchange, dispensing, giving away, importation, or exportation of opium, coca leaves, heroin, marihuana, or any salt derivative or preparation of opium or coca leaves, or isonipecaine or any addiction-forming or addiction-sustaining opiate; or any alien who the consular officer or immigration officers know or have reason to believe is or has been an illicit trafficker in any of the aforementioned drugs;

(24) Aliens (other than aliens described in 101(a)(27)(A) and aliens born in the Western Hemisphere) who seek admission from foreign contiguous territory or adjacent islands, having arrived there on a vessel or aircraft of a nonsignatory line, or if signatory, a noncomplying transportation line under section 238(a) and who have not resided for at least two years subsequent to such arrival in such territory or adjacent islands;

(25) Aliens (other than aliens who have been lawfully admitted for permanent residence and who are returning from a temporary visit abroad) over sixteen years of age, physically capable of reading, who cannot read and understand some language or dialect;

(26) Any nonimmigrant who is not in possession of (A) a passport valid for a minimum period of six months from the date of the expiration of the initial period of his admission or contemplated initial period of stay authorizing him to return to the country from which he came or to proceed to and enter some other country during such period; and (B) at the time of application

for admission a valid nonimmigrant visa or border crossing identification card;

(27) Aliens who the consular officer or the Attorney General knows or has reason to believe seek to enter the United States solely, principally, or incidentally to engage in activities which would be prejudicial to the public interest, or endanger the welfare, safety, or security of the United States;

(28) Aliens who are, or at any time have been, members of any of the following classes:

(A) Aliens who are anarchists;

(B) Aliens who advocate or teach, or who are members of or affiliated with any organization that advocates or teaches, opposition to all organized government;

(C) Aliens who are members of or affiliated with (i) the Communist Party of the United States, (ii) any other totalitarian party of the United States, (iii) the Communist Political Association, (iv) the Communist or any other totalitarian party of any State of the United States, of any foreign state, or of any political or geographical subdivision of any foreign state, (v) any section, subsidiary, branch, affiliate, or subdivision of any such association or party, or (vi) the direct predecessors or successors of any such association or party, regardless of what name such group or organization may have used, may now bear, or may hereafter adopt: *Provided*, That nothing in this paragraph, or in any other provision of this Act, shall be construed as declaring that the Communist Party does not advocate the overthrow of the Government of the United States by force, violence, or other unconstitutional means;

(D) Aliens not within any of the other provisions of this paragraph who advocate the economic, international, and governmental doctrines of world communism or the establishment in the United States of a totalitarian dictatorship, or who are members of or affiliated with any organization that advocates the economic, international, and governmental doctrines of world communism or the establishment in the United States of a totalitarian dictatorship, either through its own utterances or through any written or printed publications issued or published by or with the permission or consent of or under the authority of such organization or paid for by the funds of, or funds furnished by, such organization;

(E) Aliens not within any of the other provisions of this paragraph, who are members of or affiliated with any organization during the time it is registered or required to be registered under section 7 of the Subversive Activities Control Act of 1950, unless such aliens establish that they did not have knowledge or reason to believe at the time they became members of or affiliated with such an organization (and did not thereafter and prior to the date upon which such organization was so registered or so required to be registered have such knowledge or reason to believe) that such organization was a Communist organization;

(F) Aliens who advocate or teach or who are members of or affiliated with any organization that advocates or teaches (i) the overthrow by force, violence, or other unconstitutional means of the Government of the United States or of all forms of law; or (ii) the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers (either of specific individuals or of officers generally) of the Government of the United States or of any other organized government, because of his or their official character, or (iii) the unlawful damage, injury, or destruction of property; or (iv) sabotage;

(G) Aliens who write or publish, or cause to be written or published, or who knowingly circulate, distribute, print, or display, or knowingly cause to be circulated, distributed, printed, published, or displayed, or who knowingly have in their possession for the purpose of circulation, publication, distribution, or display, any written or printed matter, advocating or teaching opposition to all organized government, or advocating or teaching (i) the overthrow by force, violence, or other unconstitutional means of the Government of the United States or of all forms of law; or (ii) the duty, necessity, or propriety of the unlawful assaulting or killing of any officer or officers (either of specific individuals or of officers generally) of the Government of the United States or of any other organized government, because of his or their official character; or (iii) the unlawful damage, injury, or destruction of property; or (iv) sabotage; or (v) the economic, international, and governmental doctrines of world communism or the establishment in the United States of a totalitarian dictatorship;

(H) Aliens who are members of or affiliated with any organization that writes, circulates, distributes, prints, publishes, or displays, or causes to be written, circulated, distributed, printed, published, or displayed, or that has in its possession for the purpose of circulation, distribution, publication, issue, or display, any written or printed matter of the character described in paragraph (G);

(I) Any alien who is within any of the classes described in subparagraphs (B), (C), (D), (E), (F), (G), and (H) of this paragraph because of membership in or affiliation with a party or organization or a section, subsidiary, branch, affiliate, or subdivision thereof, may, if not otherwise ineligible, be issued a visa if such alien establishes to the satisfaction of the consular officer when applying for a visa and the consular officer finds that (i) such membership or affiliation is or was involuntary, or is or was solely when under sixteen years of age, by operation of law, or for purposes of obtaining employment, food rations, or other essentials of living and where necessary for such purposes, or (ii)(a) since the termination of such membership or affiliation, such alien is and has been, for at least five years prior to the date of the application for a visa, actively opposed to the doctrine, program, principles, and ideology of such party or organization or the section, subsidiary, branch, or affiliate or subdivision thereof, and (b) the admission of such alien into the United States would be in the public interest. Any such alien to whom a visa has been issued under the provisions of this subparagraph may, if not otherwise inadmissible, be admitted into the United States if he shall establish to the satisfaction of the Attorney General when applying for admission to the United States and the Attorney General finds that (i) such membership or affiliation is or was involuntary, or is or was solely when under sixteen years of age, by operation of law, or for purposes of obtaining employment, food rations, or other essentials of living and when necessary for such purposes, or (ii)(a) since the termination of such membership or affiliation, such alien is and has been, for at least five years prior to the date of the application for admission actively opposed to the doctrine, program, principles, and ideology of such party or organization or the section, subsidiary, branch, or affiliate or subdivision thereof, and (b) the admission of such alien into the United States would be in the public interest. The Attorney General shall promptly make a detailed report to the Congress in the case of each alien who is or shall be admitted into the United States under (ii) of this subparagraph;

(29) Aliens with respect to whom the consular officer or the Attorney General knows or has reasonable ground to believe probably would, after entry, (A) engage in activities which would be prohibited by the laws of the United States relating to espionage, sabotage, public disorder, or in other activity subversive to the national security, (B) engage in any activity a purpose of which is the opposition to, or the control or overthrow of, the Government of the United States, by force, violence, or other unconstitutional means, or (C) join, affiliate with, or participate in the activities of any organization which is registered or required to be registered under section 7 of the Subversive Activities Control Act of 1950;

(30) Any alien accompanying another alien ordered to be excluded and deported and certified to be helpless from sickness or mental or physical disability or infancy pursuant to section 237(e), whose protection or guardianship is required by the alien ordered excluded and deported;

(31) Any alien who at any time shall have, knowingly and for gain, encouraged, induced, assisted, abetted, or aided any other alien to enter or to try to enter the United States in violation of law;

(32) Aliens who are graduates of a medical school not accredited by a body or bodies approved for the purpose by the Commissioner of Education (regardless of whether such school of medicine is in the United States [)] and are coming to the United States principally to perform services as members of the medical profession, except such aliens who have passed [35] parts I and II of the National Board of Medical Examiners Examination (or an equivalent examination as determined by the Secretary of Health, Education, and Welfare) and who are competent in oral and written English. The exclusion of aliens under this paragraph shall apply to preference immigrant aliens described in section 203(a) (3) and (6) and to nonpreference immigrant aliens described in section 203(a) (7);

(33) Any alien who during the period beginning on March 23, 1933, and ending on May 8, 1945, under the direction of, or in association with—

(A) the Nazi government in Germany.

(B) any government in any area occupied by the military forces of the Nazi government of Germany,

(C) any government established with the assistance or cooperation of the Nazi government of Germany, or

(D) any government which was an ally of the Nazi government of Germany,

* * * * *

ordered, incited, assisted, or otherwise participated in the persecution of any person because of race, religion, national origin, or political opinion.

(b) The provisions of paragraph (25) of subsection (a) shall not be applicable to any alien who (1) is the parent, grandparent, spouse, daughter, or son of an admissible alien, or any alien lawfully admitted for permanent residence, or any citizen of the United States, if accompanying such admissible alien, or coming to join such citizen or alien lawfully admitted, and if otherwise admissible, or (2) proves that he is seeking admission to the United States to avoid religious persecution in the country of his last permanent residence, whether such persecution be evidenced by overt acts or by laws or governmental regulations that discriminate against such alien or any group to which he belongs because of his religious faith. For the purpose of ascertaining whether an alien can read under paragraph (25)

of subsection (a), the consular officers and immigration officers shall be furnished with slips of uniform size, prepared under direction of the Attorney General, each containing not less than thirty nor more than forty words in ordinary use, printed in plainly legible type, in one of the various languages or dialects of immigrants. Each alien may designate the particular language or dialect in which he desires the examination to be made and shall be required to read and understand the words printed on the slip in such language or dialect.

(c) Aliens lawfully admitted for permanent residence who temporarily proceeded abroad voluntarily and not under an order of deportation, and who are returning to a lawful unrelinquished domicile of seven consecutive years, may be admitted in the discretion of the Attorney General without regard to the provisions of paragraph (1) through (25) and paragraphs (30) and (31) of subsection (a). Nothing contained in this subsection shall limit the authority of the Attorney General to exercise the discretion vested in him under section 211(b).

(d)(1) The provisions of paragraphs (11) and (25) of subsection (a) shall not be applicable to any alien who in good faith is seeking to enter the United States as a nonimmigrant.

(2) The provisions of paragraph (28) of subsection (a) of this section shall not be applicable to any alien who is seeking to enter the United States temporarily as a nonimmigrant under paragraph (15)(A)(iii) or (15)(G)(v) of section 101(a).

(3) Except as provided in this subsection, an alien (A) who is applying for a nonimmigrant visa and is known or believed by the consular officer to be ineligible for such visa under one or more of the paragraphs enumerated in subsection (a) (other than paragraphs (27), (29), and (33)), may, after approval by the Attorney General of a recommendation by the Secretary of State or by the consular officer that the alien be admitted temporarily despite his inadmissibility, be granted such a visa and may be admitted into the United States temporarily as a nonimmigrant in the discretion of the Attorney General, or (B) who is inadmissible under one or more of the paragraphs, enumerated in subsection (a) (other than paragraphs (27), (29), and (33)), but who is in possession of appropriate documents or is granted a waiver thereof and is seeking admission, may be admitted into the United States temporarily as a nonimmigrant in the discretion of the Attorney General.

(4) Either or both of the requirements of paragraph (26) of subsection (a) may be waived by the Attorney General and the Secretary of State acting jointly (A) on the basis of unforeseen emergency in individual cases, or (B) on the basis of reciprocity with respect to nationals of foreign contiguous territory or of adjacent islands and residents thereof having a common nationality with such nationals, or (C) in the case of aliens proceeding in immediate and continuous transit through the United States under contracts authorized in section 238(d).

(5)(A) The Attorney General may, except as provided in subparagraph (B), in his discretion parole into the United States temporarily under such conditions as he may prescribe for emergent reasons or for reasons deemed strictly in the public interest any alien applying for admission to the United States, but such parole of such alien shall not be regarded as an admission of the alien and when the purposes of such parole shall, in the opinion of the Attorney General, have been served the alien shall forthwith return or be returned to the custody from which he was paroled and thereafter his case shall continue to be dealt with in the same manner as that of any other applicant for admission to the United States.

(B) The Attorney General may not parole into the United States an alien who is a refugee unless the Attorney General determines that compelling reasons in the public interest with respect to that particular alien require that the alien be paroled into the United States rather than be admitted as a refugee under section 207.

(6) The Attorney General shall prescribe conditions, including exaction of such bonds as may be necessary, to control and regulate the admission and return of excludable aliens applying for temporary admission under this subsection. The Attorney General shall make a detailed report to the Congress in any case in which he exercises his authority under paragraph (3) of this subsection on behalf of any alien excludable under paragraphs (9), (10), and (28) of subsection (a).

(7) The provisions of subsection (a) of this section, except paragraphs (20), (21), and (26), shall be applicable to any alien who shall leave Guam, Puerto Rico, or the Virgin Islands of the United States, and who seeks to enter the continental United States or any other place under the jurisdiction of the United States. Any alien described in this paragraph, who is excluded from admission to the United States, shall be immediately deported in the manner provided by section 237(a) of this Act.

(8) Upon a basis of reciprocity accredited officials of foreign governments, their immediate families, attendants, servants, and personal employees may be admitted in immediate and continuous transit through the United States without regard to the provisions of this section except paragraphs (26), (27), and (29) of subsection (a) of this section.

(9) The provisions of paragraph (7) of subsection (a) shall not be applicable to any alien who is seeking to enter the United States as a special immigrant under subparagraph (E), (F), or (G) of section 101(a)(27).

(10) The provisions of paragraph (15) of subsection (a) shall not be applicable to any alien who is seeking to enter the United States as a special immigrant under subparagraph (E), (F), or (G) of section 101(a)(27) and who applies for admission as such a special immigrant not later than March 31, 1982.

(e) No person admitted under section 101(a)(15)(J) or acquiring such status after admission (i) whose participation in the program for which he came to the United States was financed in whole or in part, directly or indirectly, by an agency of the Government of the United States or by the government of the country of his nationality or his last residence, (ii) who at the time of admission or acquisition of status under section 101(a)(15)(J) was a national or resident of a country which the Secretary of State pursuant to regulations prescribed by him, had designated as clearly requiring the services of persons engaged in the field of specialized knowledge or skill in which the alien was engaged, or (iii) who came to the United States or acquired such status in order to receive graduate medical education or training, shall be eligible to apply for an immigrant visa, or for permanent residence, or for a nonimmigrant visa under section 101(a)(15)(H) or section 101(a)(15)(L) until it is established that such person has resided and been physically present in the country of his nationality or his last residence for an aggregate of at least two years following departure from the United States: *Provided*, That upon the favorable recommendation of the Secretary of State, pursuant to the request of an interested United States Government agency, or of the Commissioner of Immigration and Naturalization after he has determined that departure from the United States would impose exceptional hardship upon the alien's spouse or child (if such spouse or child is a citizen of the United States or a lawfully resident alien), or that the alien cannot return to the country of his nationality or last residence because he would be subject to persecution on account of race, religion, or political opinion, the Attorney General may waive the requirement of such two-year foreign residence abroad in the case of any alien whose admission to the United States is found by the Attorney General to be in the public interest: *And provided further*, That, except in the case of an alien described in clause (iii), the Attorney General may, upon the favorable recommendation of the Secretary of State, waive such two-year foreign residence requirement in any case in which the foreign country of the alien's nationality or last residence has furnished the Secretary of State a statement in writing that it has no objection to such waiver in the case of such alien.

[(f) Whenever the President finds that the entry of any aliens or of any class of aliens into the United States would be detrimental to the interests of the United States, he may by proclamation, and for such period as he shall deem necessary, suspend the entry of all aliens or any class of aliens as immigrants or nonimmigrants, or impose on the entry of aliens any restrictions he may deem to be appropriate.]

(f)(1) In order to prevent the illegal migration of aliens to the United States, the President is authorized to conclude arrangements with other countries for the purpose of preventing such illegal migration. Notwithstanding any other provision of law, the President is authorized to furnish assistance to any country, on such terms and conditions as he may determine, for the control of the immigration of persons from such country to the United States.

(f)(2) Notwithstanding any provision of law, the President may direct the Coast Guard or any other federal agency including the Army, Navy and Air Force, to stop and examine, on the high seas, vessels of the United States, vessels subject to United States jurisdiction, or foreign flag vessels for which the United States Government has an arrangement authorizing such action. Upon boarding, the Coast Guard or other federal agency may make inquiries of those on board, examine documents, and take such actions as are necessary to establish the registry, condition, and destination of the vessel and the status of those on board the vessel. When these measures indicate that an offense against United States immigration laws, or an offense under the laws of a foreign country with which the United States has an agreement to assist is being committed, the Coast Guard or other federal agency may return the vessel and passengers to the country from whence they came or to some other location. An alien who qualifies as a refugee under the terms of the United Nations Convention and Protocol Relating to the Status of Refugees may not be returned to a country where such person's life or freedom would be threatened on account of his race, religion, nationality, membership in a particular social group, or political opinion.

(f)(3) Notwithstanding any other provision of law, the Attorney General is authorized to establish by regulation, procedures to determine the admissibility of those aliens who have not landed in the United States.

(f)(4) Nothing contained in this section shall be construed as limiting the President in any way from exercising his Constitutional powers.

(f)(5) For purposes of this section the terms "vessel of the United States" and "vessel subject to the jurisdiction of the United States" shall have the same meaning as set forth in 21 U.S.C. 955b.

(g) Any alien who is excludable from the United States under paragraph (1) of subsection (a) of this section, or any alien afflicted with tuberculosis in any form who (A) is the spouse or the unmarried son or daughter, or the minor unmarried lawfully adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or of an alien who has been issued an immigrant visa, or (B) has a son or daughter who is a United States citizen, or an alien lawfully admitted for permanent residence, or an alien who has been issued an immigrant visa, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence in accordance with such terms, conditions, and controls, if any, including the giving of a bond, as the Attorney General, in his discretion after consultation with the Surgeon General of the United States Public Health Service,[41] may by regulations prescribe. Any alien excludable under paragraph (3) of subsection (a) of this section because of past history of mental illness who has one of the same family relationships as are prescribed in this subsection for aliens afflicted with tuberculosis and whom the Surgeon General of the United States Public Health Service finds to have been free of such mental illness for a period of time sufficient in the light of such history to demonstrate recovery shall be eligible for a visa in accordance with the terms of this subsection.

(h) Any alien, who is excludable from the United States under paragraphs [paragraph] (9), (10), or (12) of this section, who (A) is the spouse or child, including a minor unmarried adopted child, of a United States citizen, or of an alien lawfully admitted for permanent residence, or (B) has a son or daughter who is a United States citizen or an alien lawfully admitted for permanent residence, shall, if otherwise admissible, be issued a visa and admitted to the United States for permanent residence (1) if it shall be established to the satisfaction of the Attorney General that (A) the alien's exclusion would result in extreme hardship to the United States citizen or lawfully resident spouse, parent, or son or daughter of such alien, and (B) the admission to the United States of such alien would not be contrary to the national welfare, safety, or security of the United States; and (2) if the Attorney General, in his discretion, and pursuant to such terms, conditions, and procedures as he may by regulations prescribe, has consented to the alien's applying or reapplying for a visa and for admission to the United States.

(i) Any alien who is the spouse, parent, or child of a United States citizen or of an alien lawfully admitted for permanent residence and who is excludable because (1) he seeks, has sought to procure, or has procured, a visa or other documentation, or entry into the United States, by fraud or misrepresentation, or (2) he admits the commission of perjury in connection therewith, may be granted a visa and admitted to the United States for permanent residence, if otherwise admissible, if the Attorney General in his discretion has consented to the alien's applying or reapplying for a visa and for admission to the United States.

(j)(1) The additional requirements referred to in section 101(a)(15)(J) for an alien who is coming to the United States under a program under which he will receive graduate medical education or training are:

(A) A school of medicine or of one of the other health professions, which is accredited by a body or bodies approved for the purpose by the Commissioner of Education, has agreed in writing to provide the graduate medical education or training under the program for which the alien is coming to the United States or to assume responsibility for arranging for the provision thereof by an appropriate public or nonprofit private institution or agency, except that, in the case of such an agreement by a school of medicine, any one or more of its affiliated hospitals which are to participate in the provision of the graduate medical education or training must join in the agreement;

(B) Before making such agreement, the accredited school has been satisfied that the alien (i) is a graduate of a school of medicine which is accredited by a body or bodies approved for the purpose by the Commissioner of Education (regardless of whether such school of medicine is in the United States); or (ii) has passed parts I and II of the National Board of Medical Examiners Examination (or an equivalent examination as determined by the Secretary of Health, Education, and Welfare [Secretary of Health and Human Services]), has competency in oral and written English, will be able to adapt to the educational and cultural environment in which he will be receiving his education or training, and has adequate prior education and training to participate satisfactorily in the program for which he is coming to the United States;

(C) The alien has made a commitment to return to the country of his nationality or last residence upon completion of the education or training for which he is coming to the United States (including any extension of the duration thereof under subparagraph (D)), and the government of the country of his nationality or last residence has provided a written assurance, satisfactory to the Secretary of Health, Education, and Welfare [Secretary of Health and Human Services], that there is a need in that country for persons with the skills the alien will acquire in such education or training; and

(D) The duration of the alien's participation in the program for which he is coming to the United States is limited to not more than 2 years, except that such duration may be extended for one year at the written request of the government of his nationality or last residence, if (i) the accredited school providing or arranging for the provision of his education or training agrees in writing to such extension, and (ii) such extension is for the purpose of continuing the alien's education or training under the program for which he came to the United States.

(2)(A) Except as provided in subparagraph (B), the requirements of subparagraphs (A) and (B) of paragraph (1) shall not apply between the effective date of this subsection and December 31, 1980, to any alien who seeks to come to the United States to participate in an accredited program of graduate medical education or training if there would be a substantial disruption in the health services provided in such program because such alien was not permitted, because of his failure to meet the requirements, to enter the United States to participate in such program.

(B) In the administration of this subsection, the Attorney General shall take such action as may be necessary to ensure that the total number of aliens participating (at any time) in programs described in subparagraph (A) does not, because of the exemption provided by such subparagraph, exceed the total number of aliens participating in such programs on the effective date of this subsection.

Notwithstanding the provisions of section 212(a)(14) of the Immigration and Nationality Act (8 U.S.C. 1282(a)) is hereby amended to read as follows:

(a)(34) "Aliens seeking to enter the United States purpose of performing skilled or unskilled labor, unless the Secretary of Labor has determined and certified to the Secretary of State and the Attorney General that at the time of application (A) there are not sufficient workers available in the United States in the occupations in which the aliens will be employed and (B) the employment of aliens in such occupations will not adversely affect the wages and working conditions of workers in the United States who are similarly employed. In making such determinations, the Secretary of Labor may use labor market information without reference to the specific job opportunity for which certification is requested. An alien on behalf of whom a certification is sought must have an offer of employment from an employer in the United States, except that the Secretary of Labor may waive this requirement in the case of an alien of exceptional ability. The exclusion of aliens under this paragraph shall apply to preference immigrant aliens described in section 203(a)(3) and (6), and to nonpreference immigrant aliens described in section 203(a)(7). Notwithstanding any other provision of law, decisions of the Secretary of Labor made pursuant to this paragraph, including the issuance and content of regulations and the use of labor market information under this paragraph, shall be reviewable by the appropriate United States district court, but the court shall not set aside such a decision unless there is compelling evidence that the Secretary made such decision in an arbitrary and capricious manner;".

INSPECTION BY IMMIGRATION OFFICERS

SEC. 235. [8 U.S.C. 1225] (a) The inspection, other than the physical and mental examination, of aliens (including alien crewmen) seeking admission or readmission to, or the privilege of passing through the United States shall be conducted by immigration officers, except as otherwise provided in regard to special inquiry officers. All aliens arriving at ports of the United States shall be examined by one or more immigration officers at the discretion of the Attorney General and under such regulations as he may prescribe. Immigration officers are hereby authorized and empowered to board and search any vessel, aircraft, railway car, or other conveyance, or vehicle in which they believe aliens are being brought into the United States. The Attorney General and any immigration officer, including special inquiry officers, shall have power to administer oaths and to take and consider evidence of or from any person touching the privilege of any alien or person he believes or suspects to be an alien to enter, reenter, pass through, or reside in the United States or concerning any matter which is material and relevant to the enforcement of this Act and the administration of the Service, and, where such action may be necessary, to make a written record of such evidence. Any person coming into the United States may be required to state under oath the purpose or purposes for which he comes, the length of time he intends to remain in the United States, whether or not he intends to remain in the United States permanently and, if an alien, whether he intends to become a citizen thereof, and such other items of information as will aid the immigration officer in determining whether he is a national of the United States or an alien and, if the latter, whether he belongs to any of the excluded classes enumerated in

section 212. The Attorney General and any immigration officer, including special inquiry officers, shall have power to require by subpena the attendance and testimony of witnesses before immigration officers and special inquiry officers and the production of books, papers, and documents relating to the privilege of any person to enter, reenter, reside in, or pass through the United States or concerning any matter which is material and relevant to the enforcement of this Act and the administration of the Service, and to that end may invoke the aid of any court of the United States. Any United States district court within the jurisdiction of which investigations or inquiries are being conducted by an immigration officer or special inquiry officer may, in the event of neglect or refusal to respond to a subpena issued under this subsection or refusal to testify before an immigration officer or special inquiry officer, issue an order requiring such persons to appear before an immigration officer or special inquiry officer, produce books, papers, and documents if demanded, and testify, and any failure to obey such order of the court may be punished by the court as a contempt thereof.

[(b) Every alien (other than an alien crewman), and except as otherwise provided in subsection (c) of this section and in section 273(d), who may not appear to the examining immigration officer at the port of arrival to be clearly and beyond a doubt entitled to land shall be detained for further inquiry to be conducted by a special inquiry officer. The decision of the examining immigration officer, if favorable to the admission of any alien, shall be subject to challenge by any other immigration officer and such challenge shall operate to take the alien, whose privilege to land is so challenged, before a special inquiry officer for further inquiry.]

(b) Provided that an "Immigration Emergency" has not been declared an immigration officer shall insvect each alien who is required to have documentation seeking entry to the United States and shall make a determination on each alien's admissibility. (1) The decision of the immigration officer on admissibility of an alien shall be final, and not subject to further agency review or to judicial review, if the immigration officer determines an alien to be an alien crewman, a stowaway under section 273(d) of this Act, or an alien who does not present documentary evidence of U.S. citizenship, or lawful admission for permanent rsidence, or a visa or other entry document, or a certificate of identity issued under section 360(b) to support a claim of admissibility. (2) Any alien not excluded under paragraph one of this subsection who does not appear to the examining immigration officer to be clearly and beyond a doubt entitled to admission shall be detained for further inquiry by a special inquiry officer under section 236.

(c) Any alien (including an alien crewman) who may appear to the examining immigration officer or to the special inquiry officer during the examination before either of such officers to be excludable under paragraph (27), (28), or (29) of section 212(a) shall be temporarily excluded, and no further inquiry by a special inquiry officer shall be conducted until after the case is reported to the Attorney General together with any such written statement and accompanying information, if any, as the alien or his representative may desire to submit in connection therewith and such an inquiry or further inquiry is directed by the Attorney General. If the Attorney General is satisfied that the alien is excludable under any of such paragraphs on the basis of information of a confidential nature, the disclosure of which the Attorney General, in the exercise of his discretion, and after consultation with the appropriate security agencies of the Government, concludes would be prejudicial to the public interest, safety, or security, he may in his discretion order such alien to be excluded and deported without any inquiry or further inquiry by a special inquiry officer. Nothing in this subsection shall be regarded as requiring an inquiry before a special inquiry officer in the case of an alien crewman.

IMMEDIATE DEPORTATION OF ALIENS EXCLUDED FROM ADMISSION OR ENTERING IN VIOLATION OF LAW

SEC. 237. [8 U.S.C. 1227] [(a) Any alien (other than an alien crewman) arriving in the United States who is excluded under this Act, shall be immediately deported to the country whence he came, in accommodations of the same class in which he arrived, on the vessel or aircraft bringing him, unless the Attorney General, in an individual case, in his discretion, concludes that immediate deportation is not practicable or proper. The cost of the maintenance including detention expenses and expenses incident to detention of any such alien while he is being detained, as well as the transportation expense of his deportation from the United States, shall be borne by the owner or owners of the vessel or aircraft on which he arrived, except that the cost of maintenance (including detention expenses and expenses incident to detention while the alien is being detained prior to the time he is offered for deportation to the transportation line which brought him to the United States) shall not be assessed against the owner or owners of such vessel or aircraft if (1) the alien was in possession of a valid, unexpired immigrant visa, or (2) if the alien (other than an alien crewman) was in possession of a valid, unexpired nonimmigrant visa or other document authorizing such alien to apply for temporary admission to the United States, or an unexpired reentry permit issued to him, and (A) such application was made within one hundred and twenty days of the date of issuance of the visa or other document, or in the case of an alien in possession of a reentry permit, within one hundred and twenty days of the date on which the alien was last examined and admitted by the Service, or (B) in the event the application was made later than one hundred and twenty days of the date of issuance of the visa or other document or such examination and admission, if the owner or owners of such vessel or aircraft established to the satisfaction of the Attorney General that the ground of exclusion could not have been ascertained by the exercise of due diligence prior to the alien's embarkation, or (3) the person claimed United States nationality or citizenship and was in possession of an unexpired United States passport issued to him by competent authority.]

Sec. 273 (a)(1) Any alien (other than an alien crewman) arriving in the United States who is excluded under this Act, shall be immediately deported, in accommodations of the same class in which he arrived, unless the Attorney General, in an individual case in his discretion, concludes that immediate deportation is not practicable or proper. Deportation shall be to the country in which the alien boarded the vessel or aircraft in foreign territory. If such boarding occurred in territory contiguous to the United States or in any island adjacent thereto or adjacent to the United States and the alien is not a native, citizen, or subject or national of, or does not have residence in, such foreign contiguous territory or adjacent island, the deportation shall instead be to the country in which is located the port at which the alien embarked for such foreign contiguous territory or adjacent island. The cost of the maintenance, including detention expenses incident to detention of any such alien while he is being detained, shall be borne by the owner or owners of the vessel or aircraft on which he arrived, except that the cost of maintenance (including detention expenses and expenses incident to detention while the alien is being detained prior to the time he is offered for deportation to the transportation line which brought him to the United States) shall not be assessed against the owner or owners of such vessel or aircraft if (A) the alien was in possession of a valid, unexpired immigrant visa, or (B) the alien (other than an alien crewman) was in possession of a valid, unexpired nonimmigrant visa or other document authorizing such alien to apply for temporary admission to the United States, or an unexpired reentry permit issued to him, and (i) such application was made within one hundred and twenty days of the date of issuance of the visa or other document, or in the case of an alien in possession of a reentry permit, examined and admitted by the Service, or (ii) in the event the application was made later than one hundred and twenty days of the date of issuance of the visa or other document or such examination and admission, if the owner or owners of such vessels or aircraft establishes to the satisfaction of the Attorney General that the ground of exclusion could not have been ascertained by the exercise of due diligence prior to the alien's embarkation, or (C) the person claimed United States nationality or citizenship and was in possession of an unexpired United States passport issued to him by competent authority.

(2) If the government of the country designated in subsection (a)(1) will not accept the alien into its territory, the alien's deportation shall be directed by the Attorney General, in his discretion and without necessarily giving any priority or preference because of their order as herein set forth, to—

(A) the country of which the alien is a subject, citizen, or national;

(B) the country in which he was born;

(C) the country in which he has a residence; or

(D) any country which is willing to accept the alien into its territory, if deportation to any of the foregoing countries is impracticable, inadvisable or impossible.

(b) It shall be unlawful for any master, commanding officer, purser, person in charge, agent, owner, or consignee of any vessel or aircraft (1) to refuse to receive any alien (other than an alien crewman) ordered deported under this section back on board such vessel or aircraft or another vessel or aircraft owned or operated by the same interests; (2) to fail to detain any alien (other than an alien crewman) on board any such vessel or at the airport of arrival of the aircraft when required by this Act or if so ordered by an immigration officer, or to fail or refuse to deliver him for medical or other inspection, or for further medical or other inspection, as and when so ordered by such officer; (3) to refuse or fail to remove him from the United States to the country to which his exclusion and deportation has been directed; (4) to fail to pay the cost of his maintenance while being detained as required by this section or section 233 of this title; (5) to take any fee, deposit, or consideration on a contingent basis to be kept or returned in case the alien is landed or excluded; or (6) knowingly to bring to the United States any alien (other than an alien crewman) excluded or arrested and deported under any provision of

law until such alien may be lawfully entitled to reapply for admission to the United States. If it shall appear to the satisfaction of the Attorney General that any such master, commanding officer, purser, person in charge, agent, owner, or consignee of any vessel or aircraft has violated any of the provisions of this section or of section 233 of this title, such master, commanding officer, purser, person in charge, agent, owner, or consignee shall pay to the district director of customs of the district in which the port of arrival is situated or in which any vessel or aircraft of the line may be found, the sum of $500 for each violation. No such vessel or aircraft shall have clearance from any port of the United States while any such fine is unpaid or while the question of liability to pay any such fine is being determined, nor shall any such fine be remitted or refunded; except that clearance may be granted prior to the determination of such question upon the deposit with the district director of customs of a bond or undertaking approved by the Attorney General or a sum sufficient to cover such fine.

(c) An alien shall be deported on a vessel or an aircraft owned by the same person who owns the vessel or aircraft on which such alien arrived in the United States, unless it is impracticable to so deport the alien within a reasonable time. The transportation expenses of the alien's deportation shall be borne by the owner or owners of the vessel or aircraft on which the alien arrived. If the deportation is effected on a vessel or aircraft not owned by such owner or owners, the transportation expenses of the alien's deportation may be paid from the appropriation for the enforcement of this Act and recovered by civil suit from any owner, agent, or consignee of the vessel or aircraft on which the alien arrived.

(d) The Attorney General, under such conditions as are by regulations prescribed, may stay the deportation of any alien deportable under this section, if in his judgment the testimony of such alien is necessary on behalf of the United States in the prosecution of offenders against any provision of this Act or other laws of the United States. The cost of maintenance of any person so detained resulting from a stay of deportation under this subsection and a witness fee in the sum of $1 per day for each day such person is so detained may be paid from the appropriation for the enforcement of this title. Such alien may be released under bond in the penalty of not less than $500 with security approved by the Attorney General on condition that such alien shall be produced when required as a witness and for deportation, and on such other conditions as the Attorney General may prescribe.

(e) Upon the certificate of an examining medical officer to the effect that an alien ordered to be excluded and deported under this section is helpless from sickness or mental and physical disability, or infancy, if such alien is accompanied by another alien whose protection or guardianship is required by the alien ordered excluded and deported, such accompanying alien may also be excluded and deported, and the master, commanding officer, agent owner, or consignee of the vessel or aircraft in which such alien and accompanying alien arrived in the United States shall be required to return the accompanying alien in the same manner as other aliens denied admission and ordered deported under this section.

RECORDS OF ADMISSION

SEC. 240. [8 U.S.C. 1230] (a) The Attorney General shall cause to be filed, as a record of admission of each immigrant, the immigrant visa required by section 221(e) to be surrendered at the port of entry by the arriving alien to an immigration officer.

(b) The Attorney General shall cause to be filed such record of the entry into the United States of each immigrant admitted under section 211(b) and of each nonimmigrant as the Attorney General deems necessary for the enforcement of the immigration laws.

240A. Declaration of Immigration Emergency

(a) The President may declare an immigration emergency with respect to any specifically designated foreign country or countries or geographical area or areas, if the President, in his judgment, determines that:

A substantial number of aliens who lack documents authorizing entry to the United States appear to be ready to embark or have already embarked for the United States, and the aliens will travel from, or are likely to travel in transit through, the foreign country or countries or the foreign geographical area or areas; and

The normal procedures of the Immigration and Nationality Act or the current resources of the Immigration and Naturalization Service would be inadequate to respond effectively to the influx of these aliens.

(b) Within 48 hours of the declaration of any immigration emergency, the President shall inform the Speaker of the House and the President pro-tempore of the Senate of the reasons prompting the declaration. The President shall cause the declaration to be published in the Federal Register as soon as practicable. The declaration shall expire automatically 120 days after its proclamation, unless ended sooner by the President. The President may extend the declaration for additional periods of 120 days by following the procedures set forth in this subsection, if, in his judgment, the conditions listed in subsection (a) continue to exist.

Chapter 240B. Emergency Powers and Procedures.

(a) Upon the declaration of an immigration emergency under Section 240A, the President may invoke the following emergency powers and procedures:

(1) Any or all United States vessels, vehicles and aircraft, and any other vessel, vehicle or aircraft which is owned or operated by, chartered to, or otherwise controlled by one or more citizens or residents of the United States or corporations organized under the laws of the United States or of any political subdivision thereof, bound directly or indirectly for a designated foreign country or foreign geographical area may be precluded from departing from the United States or may be intercepted while en route and required to return to the United States if feasible, or to any other reasonable location until such time as it is feasible to return to the United States, or, if appropriate, allowed to proceed to any other reasonable location.

The arrival in the United States of any aliens or class of aliens who lack documents authorizing entry to the United States or who are otherwise inadmissible and who are traveling directly or indirectly from or in transit through a designated foreign country or foreign geographical area may be prevented by returning or requiring the return of such alien or any vessel, vehicle, or aircraft carrying any such alien to the designated country or area, or to some other reasonable location.

The exclusion or admission to the United States of any alien, regardless of nationality, who is traveling or has traveled to the United States directly or indirectly from or through the designated foreign country or foreign geographical area and who is not in possession of a visa or other entry document required for admission to the United States by statute or regulation may be determined under procedures established by the Attorney General (whether by regulation or otherwise), and no such alien shall be presented for inquiry before a special inquiry officer unless such presentation is authorized by the Attorney General pursuant to regulation.

(ii) Notwithstanding section 208, or any other provision of law, the Attorney General may establish by regulation or otherwise a separate procedure to consider an asylum claim advanced by an alien whose admissibility is to be determined in accordance with this paragraph.

(iii) Any alien found inadmissible to the United States pursuant to the procedures established by the Attorney General under this paragraph shall be deported to the country from whence he came. If the Attorney General determines that the alien should not or cannot practicably be removed to the country from whence the alien came, the Attorney General may deport the alien to any country described in section 243(a), without regard to the designation of the alien or the order of countries set forth in section 243(a).

(iv) Any alien admitted to the United States under this paragraph shall be admitted for such time and under such conditions as may be prescribed by the Attorney General, including the giving of a bond with sufficient surety in such sum and containing such conditions as the Attorney General shall prescribe to insure compliance with the terms and conditions of the alien's admission.

(v) No court shall have jurisdiction to review the determination of admissibility or nonadmissibility, or the determination of any asylum claim with respect to any alien who is subject to this paragraph.

(4) Every alien who is subject to the provisions of this section shall be detained pending a final determination of admissibility, or pending release on parole, or pending deportation if the alien is found excludable, unless an examining officer finds that the alien is clearly and beyond a doubt entitled to be admitted to the United States. Such detention shall be in any prison or other detention facility or elsewhere, whether maintained by the Federal Government or otherwise, as the Attorney General may direct. The Attorney General may at any time transfer an alien from one place of detention to another. No alien shall be released from detention pending a final determination of admissibility, or pending deportation if the alien is found excludable, except in the discretion of the Attorney General, and under such conditions as the Attorney General may prescribe, including release on bond. Any alien applying for admission from foreign contiguous territory may, in the discretion of the Attorney General, be required to remain outside of the United States pending a final determination of admissibility. No court shall review any decision of the Attorney General made pursuant to this paragraph to detain, to transfer or to release an alien, except that any person so detained may obtain review, in habeas corpus proceedings, on the question of whether that person falls within the category of aliens subject to detention. Nothing in this paragraph shall relieve a carrier or any other person of any liability, duty or consequence pertaining to the detention of aliens which may arise under any other provision of the Act or other law.

(5)(i) The President may exempt any source of any department, agency, or instrumentality in the executive branch from applicable environmental requirements pursuant to section 1323(a) of title 33 and sec-

tions 300j-6(b), 4903, 6961, and 7418(b) of title 42 of the United States Code.

(ii) Upon a Presidential finding, transmitted to Congress, that an exemption is necessary to respond to an immigration emergency, the President may exempt any source or action of any department, agency, or instrumentality in the executive branch which is directly and substantially related to an immigration emergency from applicable requirements of the National Environmental Policy Act, 42 U.S.C. 4331 et seq., the Costal Zone Management Act, 46 U.S.C. 1451 et seq., the Endangered Species Act, 16 U.S.C. 1531 et seq., The Fish and Wildlife Coordination Act, 16 U.S.C. 661 et seq., the Historic Preservation Act, 16 U.S.C. 470 et seq., and from the applicable requirements of any other Federal, state or local law which is intended principally to protect or preserve the environment, wildlife, or aspects of the history or heritage of the United States.

(iii) Except with respect to matters concerning the detention of aliens, an exemption under this paragraph shall lapse upon termination of an immigration emergency. In no event shall any exemption under this paragraph last more than one year. An exemption with respect to matters concerning the detention of aliens shall last until terminated by the President, or the expiration of one year, whichever occurs first. During the time period in which an exemption applies the President may, in his discretion, require that a source nonetheless meet certain environmental standards without thereby creating a private right of action to enforce that requirement.

(b)(1) During the existence of the immigration emergency, the President may order the closing or sealing of any harbor, port, airport, road or any other place, structure or location which may be used as a point of departure from the United States to a designated foreign country or foreign geographical area, if, in the President's judgment, such action is necessary to prevent the arrival in the United States of aliens who are inadmissible and who are traveling from or in transit through a designated country or area.

(2) No person shall cause any vessel, or aircraft to depart from or beyond or enter into a closed or sealed harbor, port, airport, road, place, structure or location during an immigration emergency, unless written permission has been obtained for such departure prior to the actual departure of the vessel, or aircraft.

(3) Permission for departure from or beyond or entry into a closed or sealed harbor, port, airport, road, or any other place, structure or location shall be given only for those vessels, vehicles, aircraft which are clearly shown not to be destined for a designated foreign country or foreign geographical area. The agency designated by the President under subsection (c) of this section shall prescribe the procedures to be followed in requesting departure permission. In the absence of such procedures, permission may be sought from any agency directly involved in the closing or sealing of the harbor, port, airport, road, or other place, structure or location. A final decision shall be made on any request for departure permission within 72 hours of the request, unless the person seeking such permission consents to a longer period. If no action is taken on the request within the requisite period, the request for departure permission shall be deemed denied.

(4) The district courts of the United States shall have jurisdiction to review any final decision denying permission to depart under paragraph (3) of this subsection, except that review may be obtained prior to a final administrative decision with respect to any vessel, vehicle or aircraft if irrevardble injury would occur before a final administrative decision could be obtained.

(c) Although the President may not delegate the authority to initiate those emergency powers of this section which expressly require Presidential invocation, the President may designate one or more agencies of the Federal Government to administer the provisions of chapters 240B through 240D. In the course of enforcement of these provisions, the designated agency may promulgate regulations and may request assistance from any state or local agency or from any civilian Federal agency. The President may direct that any component of the Department of Defense, including the Army, Navy, and Air Force, provide assistance, any statute, rule or regulation to the contrary notwithstanding. Any such agency or military component may assist in the actual detention, removal and transportation of an alien to the country to which he is being deported.

(d) Notwithstanding any other provision of law, any agency or military component requested or directed to render assistance or services during an immigration emergency is authorized to stop, board, make arrest of persons, inspect and seize any vessel, vehicle or aircraft which is subject to the provisions of chapters 240B through 240D.

(e) In providing assistance under chapters 240B through 240D, agencies shall have the same authority as for disaster relief under 42 U.S.C. 5149.

(f) The provisions of paragraphs (3) and (4) of subsection (a) of this section shall continue to govern any aliens subject to those provisions, regardless of the termination of the immigration emergency.

(g) The President may direct the enforcement of subsection (a) of this section beyond the territorial limits of the United States including on the high seas.

(h) Nothing in this section shall relieve any carrier or any other person of any civil or criminal liability, duty, or consequence that may arise from the transportation or the bringing of any alien to the United States.

Chapter 240C. Travel Restrictions and Licensing.

(a) Upon the declaration of an immigration emergency under Chapter 240A, it shall be unlawful for any person to cause any United States vessel, vehicle or aircraft, or any other vessel, vehicle or aircraft which is owned by, chartered to or otherwise controlled by one or more citizens or residents of the United States or corporations organized under the laws of the United States or of any political subdivision thereof, to travel or be transported to a designated foreign country or foreign geographical area or to within such distance therefrom as the President may specify, unless prior approval has been obtained from an agency designated by the President.

(b) The designated agency may, for authorized purposes, grant prior approval for travel to or around a designated foreign country or geographical area by regulation for certain classes or categories of vessels, vehicles and aircraft. The owner or operator of any vessel, vehicle, or aircraft not authorized by regulation to travel to or around a designated country or area may apply to the designated agency for a license granting permission for one or more trips to that country or area. The designated agency shall establish by regulation the procedures governing the application for and the approval and revocation of such licenses. The designated agency may authorize officials of any other United States agency to accept and transmit applications for licenses to the designated agency or to grant or deny such licenses under standards established by the designated agency.

(c) No travel to or within such distance as the President may specify from a designated foreign country or area shall be approved if it appears that such travel may result in or contribute to a violation of any statute or regulation relating to the immigration of aliens to the United States.

(d) Nothing in this section shall be construed to require the agency designated by the President to approve the travel of any vessel, vehicle or aircraft to a designated country or area or within the specified distance therefrom.

Chapter 240D. Penalties.

(a)(1) Any vessel, vehicle or aircraft involved in a violation of chapter 240B(b)(2) or chapter 240C(a) shall be forfeited and the owner, operator, and any person causing such vessel, vehicle or aircraft to be involved in the violation shall be subject to a civil fine of $10,000 for each separate act in violation of those sections. This subsection shall become effective on the day following the day of publication of the declaration of the immigration emergency in the Federal Register, except that this subsection shall be immediately effective as to any person who has learned or been informed of the existence of the declaration.

(2) All provisions of the customs laws relating to the seizure, summary and judicial forfeiture, and condemnation of property; the disposition of such property or the proceeds from the sale thereof; the remission or mitigation of such forfeiture; and the compromise of claims and the award of compensation to informers in respect of such forfeitures shall apply to seizures and forfeitures incurred or alleged to have been incurred, under the provisions of this section insofar as applicable and not inconsistent with the provisions hereof, except that duties imposed on customs officers or other persons regarding the seizure and forfeiture of property under the customs laws may be performed with respect to seizure and forfeitures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General.

(3) Whenever a conveyance is forfeited under this section the Attorney General may:

(i) retain the conveyance for official use;

(ii) sell the conveyance, in which case proceeds from any such sale shall be used to pay all proper expenses of the proceedings for forfeiture and sale including expenses of seizure, maintenance of custody, advertising, and court costs, with the remaining proceeds, if any turned over to the United States Treasury;

(iii) require that the General Services Administration, or the Federal Maritime Commission, if appropriate under 40 U.S.C. 484(i), take custody of the conveyance and remove it for disposition in accordance with law; or

(iv) dispose of the conveyance in accordance with the terms and conditions of any petition of remission or mitigation of forfeiture granted by the Attorney General.

(4) In all suits or actions brought for the forfeiture of any conveyance seized under this section, where the conveyance is claimed by any person, the burden of proof shall lie upon such claimant: Provided, that probable cause shall be first shown for the institution of such suit or action, to be judged of by the court.

(b) Any person who knowingly engages or attempts to engage in any conduct prohibited by the terms of chapter 240(b)(2) or chapter 240C(a) shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding $50,000 or by imprisonment for a term not exceeding five years, or both, for each separate prohibited act. This subsection shall become effective on the day following the day of publication of the declaration of the immigration emergency in the Federal Register, except that this subsection shall be immediately effective as to any person who has learned or been informed of the existence of the declaration.

(c) Any alien who willfully violates a condition of his admission under chapter 240B

shall be guilty of a misdemeanor and upon conviction thereof shall be fined not more than $1,000 or imprisoned for not more than one year, or both.

(d) The requirements and sanctions imposed by this section shall be in addition to those set forth by other provisions of law.

(e) Violations of any provisions of the Immigration and Nationality Act committed during the immigration emergency may be investigated by the Federal Bureau of Investigation, the Immigration and Naturalization Service, the Coast Guard, or any component of the Department of Treasury. Assistance in investigating or enforcing this section may be provided by any Federal, with the approval of the Attorney General, state or local agency including the Army, Navy, and Air Force, any statute, rule, or regulation to the contrary notwithstanding.

Chapter 240E. Definitions

As used in chapters 240A through 240D:

(1) The term "vessel" means any ship, boat, barge, submarine, raft, or other craft or structure capable of being used as a means of transportation on, under or immediately above the water.

(2) The term "vehicle" means any automobile, motorcycle, bus, truck, cart, train, or other device or structure capable of being used as a means of transportation on land.

(3) The term "aircraft" means any airplane, helicopter, glider, balloon, blimp, or other craft or structure capable of being used as a means of transportation in the air.

(4) The terms "United States vessel, vehicle or aircraft" include any vessel, vehicle, or aircraft documented, registered, licensed, or numbered under the laws of the United States or any political subdivision thereof.

(5) The term "agency" includes any executive department and components thereof, Government corporation, Government controlled corporation, or other establishment in the executive branch of the Government (including the Executive Office of the President), or any independent regulatory agency.

COUNTRIES TO WHICH ALIENS SHALL BE DEPORTED; COST OF DEPORTATION

SEC. 243. [8 U.S.C. 1253] (a) The deportation of an alien in the United States provided for in this Act, or any other Act or treaty shall be directed by the Attorney General to a country promptly designated by the alien if that country is willing to accept him into its territory, unless the Attorney General, in his discretion, concludes that deportation to such country would be prejudicial to the interests of the United States. No alien shall be permitted to make more than one such designation, nor shall any alien designate, as the place to which he wishes to be deported, any foreign territory contiguous to the United States or any island adjacent thereto or adjacent to the United States unless such alien is a native, citizen, subject, or national of, or had a residence in such designated foreign contiguous territory or adjacent island. If the government of the country designated by the alien fails finally to advise the Attorney General within three months following original inquiry whether that government will or will not accept such alien into its territory, such designation may thereafter be disregarded. Thereupon deportation of such alien shall be directed to any country of which such alien is a subject[,] national, or citizen if such country is willing to accept him into its territory. If the government of such country fails finally to advise the Attorney General or the alien within three months following the date of original inquiry, or within such other period as the Attorney General shall deem reasonable under the circumstances in a particular case, whether that government will or will not accept such alien into its territory, then such deportation shall be directed by the Attorney General within his discretion and without necessarily giving any priority or preference because of their order as herein set forth either—

(1) to the country from which such alien last entered the United States;

(2) to the country in which is located the foreign port at which such alien embarked for the United States or for foreign contiguous territory;

(3) to the country in which he was born;

(4) to the country in which the place of his birth is situated at the time he is ordered deported;

(5) to any country in which he resided prior to entering the country from which he entered the United States;

(6) to the country which had sovereignty over the birthplace of the alien at the time of his birth; or

(7) if deportation to any of the foregoing places or countries is impracticable, inadvisable, or impossible, then to any country which is willing to accept such alien into its territory.

(b) If the United States is at war and the deportation, in accordance with the provisions of subsection (a), of any alien who is deportable under any law of the United States shall be found by the Attorney General to be impracticable, inadvisable, inconvenient, or impossible because of enemy occupation of the country from which such alien came or wherein is located the foreign port at which he embarked for the United States or because of reasons connected with the war, such alien may, in the discretion of the Attorney General, be deported as follows:

(1) If such alien is a citizen or subject of a country whose recognized government is in exile, to the country in which is located that government in exile if that country will permit him to enter its territory; or

(2) if such alien is a citizen or subject of a country whose recognized government is not in exile, then to a country or any political or territorial subdivision thereof which is proximate to the country of which the alien is a citizen or subject, or, with the consent of the country of which the alien is a citizen or subject, to any other country.

(c) If deportation proceedings are instituted at any time within five years after the entry of the alien for causes existing prior to or at the time of entry, the cost of removal to the port of deportation shall be at the expense of the appropriation for the enforcement of this Act, and the deportation from such port shall be at the expense of the owner or owners of the vessels, aircraft, or other transportation lines by which such alien came to the United States, or if in the opinion of the Attorney General that is not practicable, at the expense of the appropriation for the enforcement of this Act: *Provided*, That the costs of the deportation of any such alien from such port shall not be assessed against the owner or owners of the vessels, aircraft, or other transportation lines in the case of any alien who arrived in possession of a valid unexpired immigrant visa and who was inspected and admitted to the United States for permanent residence. In the case of an alien crewman, if deportation proceedings are instituted at any time within five years after the granting of the last conditional permit to land temporarily under the provisions of section 252, the cost of removal to the port of deportation shall be at the expense of the appropriation for the enforcement of this Act and the deportation from such port shall be at the expense of the owner or owners of the vessels or aircraft by which such alien came to the United States, or if in the opinion of the Attorney General that is not practicable, at the expense of the appropriation for the enforcement of this Act.

(d) If deportation proceedings are instituted later than five years after the entry of the alien, or in the case of an alien crewman later than five years after the granting of the last conditional permit to land temporarily, the cost thereof shall be payable from the appropriation for the enforcement of this Act.

(e) A failure or refusal on the part of the master, commanding officer, agent, owner, charterer, or consignee of a vessel, aircraft, or other transportation line to comply with the order of the Attorney General to take on board, guard safely, and transport to the destination specified any alien ordered to be deported under the provisions of this Act, or a failure or refusal by any such person to comply with an order of the Attorney General to pay deportation expenses in accordance with the requirements of this section, shall be punished by the imposition of a penalty in the sum and manner prescribed in section 237(b).

(f) When in the opinion of the Attorney General the mental or physical condition of an alien being deported is such as to require personal care and attendance, the Attorney General shall, when necessary, employ a suitable person for that purpose who shall accompany such alien to his final destination, and the expense incident to such service shall be defrayed in the same manner as the expense of deporting the accompanied alien is defrayed, and any failure or refusal to defray such expenses shall be punished in the manner prescribed by subsection (e) of this section.

(g) Upon the notification by the Attorney General that any country upon request denies or unduly delays acceptance of the return of any alien who is a national, citizen, subject, or resident thereof, the Secretary of State shall instruct consular officers performing their duties in the territory of such country to discontinue the issuance of immigrant visas to nationals, citizens, subjects, or residents of such country, until such time as the Attorney General shall inform the Secretary of State that such country has accepted such alien.

[(h)(1) The Attorney General shall not deport or return any alien (other than an alien described in section 241(a)(19)) to a country if the Attorney General determines that such alien's life or freedom would be threatened in such country on account of race, religion, nationality, membership in a particular social group, or political opinion.

(2) Paragraph (1) shall not apply to any alien if the Attorney General determines that—

(A) the alien ordered, incited, assisted, or otherwise participated in the persecution of any person on account of race, religion, nationality, membership in a particular social group, or political opinion;

(B) the alien, having been convicted by a final judgment of a particularly serious crime, constitutes a danger to the community of the United States;

(C) there are serious reasons for considering that the alien has committed a serious nonpolitical crime outside the United States prior to the arrival of the alien in the United States; or

(D) there are reasonable grounds for regarding the alien as a danger to the security of the United States.]

Section 234(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)) is hereby repealed.

UNLAWFUL BRINGING OF ALIENS INTO UNITED STATES

SEC. 273. [8 U.S.C. 1323] (a) It shall be unlawful for any person, including any transportation company, or the owner, master, commanding officer, agent, charterer, or consignee of any vessel or aircraft, to bring to the United States from any place outside thereof (other than from foreign contiguous territory) any alien who does not have an unexpired visa, if a visa was required under this Act or regulations issued thereunder.

(b) If it appears to the satisfaction of the Attorney General that any alien has been so brought, such person, or transportation company, or the master, commanding officer, agent, owner, charterer, or consignee of any such vessel or aircraft, shall pay to the collector of customs of the customs district in which the port of arrival is located the sum of [$1,000] *$3000* for each alien so brought and, except in the case of any such alien who is admitted, or permitted to land temporarily, in addition, a sum equal to that paid by such alien for his transportation from the initial point of departure, indicated in his ticket, to the port of arrival, such latter sum to be delivered by the collector of customs to the alien on whose account the assessment is made. No vessel or aircraft shall be granted clearance pending the determination of the liability to the payment of such sums or while such sums remain unpaid, except that clearance may be granted prior to the determination of such question upon the deposit of an amount sufficient to cover such sums, or of a bond with sufficient surety to secure the payment thereof approved by the collector of customs.

"Such sums shall be a lien upon the vessel or aircraft involved in a violation of the provisions of subsection (a) of this section, and such vessel or aircraft may be libeled therefore in the appropriate United States Court. In addition, pending the determination of liability to the payment of such sums or while such sums remain unpaid, said vessel or aircraft may be denied clearance, or summarily seized, or both, unless a deposit is made of an amount sufficient to cover such sums or of a bond with sufficient surety to secure the payment thereof satisfactory to the Attorney General."

BRINGING IN AND HARBORING CERTAIN ALIENS

SEC. 274. [8 U.S.C. 1324] [(a) Any person, including the owner, operator, pilot, master, commanding officer, agent or consignee of any means of transportation who—

(1) brings into or lands in the United States, by any means of transportation or otherwise, or attempts, by himself or through another, to bring into or land in the United States, by any means of transportation or otherwise;

(2) knowing that he is in the United States in violation of law, and knowing or having reasonable grounds to believe that his last entry into the United States occurred less than three years prior thereto, transports, or moves, or attempts to transport or move, within the United States by means of transportation or otherwise, in furtherance of such violation of law;

(3) willfully or knowingly conceals, harbors, or shields from detection, or attempts to conceal, harbor, or shield from detection, in any place, including any building or any means of transportation; or

(4) willfully or knowingly encourages or induces, or attempts to encourage or induce, either directly or indirectly, the entry into the United States of—

any alien, including an alien crewman, not duly admitted by an immigration officer or not lawfully entitled to enter or reside within the United States under the terms of this Act or any other law relating to the immigration or expulsion of aliens, shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding $2.000 or by imprisonment for a term not exceeding five years, or both, for each alien in respect to whom any violation of this subsection occurs: *Provided, however,* That for the purposes of this section, employment (including the usual and normal practices incident to employment) shall not be deemed to constitute harboring.

(b)(1) Any vessel, vehicle, or aircraft which is used in the commission of a violation of subsection (a) shall be subject to seizure and forfeiture, except when—

(A) the owner, master, or other person in charge of such vessel, vehicle, or aircraft, was not, at the time of the alleged illegal act, a consenting party or privy thereto; or

(B) the alleged illegal act occurred while such vessel, vehicle, or aircraft was in the illegal possession of any person other than the owner, as established by the criminal laws of the United States, or of any States.

(2) The Attorney General shall, within one hundred and eighty days from the date of enactment of this Act, promulgate regulations setting forth procedures for the expeditious return to the owner, master, or other person in charge of any vessel, vehicle, or aircraft seized in violation of paragraph (1). In any such case, the owner, master, or other person in charge of such vessel, vehicle, or aircraft shall not incur any expenses, including costs of transportation, storage, damage, and attorney fees, associated with such seizure and forfeiture. In the case of a vehicle seized and forfeited pursuant to paragraph (1) subject to a valid lien or other third-party interest, the regulations shall provide for satisfaction of the third party interest without expense to the interestholder.

(3) Any conveyance subject to seizure under this section may be seized without a warrant if there is probable cause to believe the conveyance has been used in violation of subsection (a) and circumstances exist where a warrant is not constitutionally required.

(4) All provisions of law relating to the seizure, forfeiture, and disposition of vessels, vehicles, and aircraft for violations of customs law shall apply to violations of the provisions of this chapter. *Provided,* That—

(A) duties imposed on customs officers or other persons regarding the seizure of such conveyances under customs law shall apply to seizures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General; and

(B) proceedings instituted under this subsection respecting vessels shall be subject to the Supplemental Rules of Certain Admiralty and Maritime Claims.

(c) No officer or person shall have authority to make any arrest for a violation of any provision of this section except officers and employees of the Service designated by the Attorney General, either individually or as a member of a class, and all other officers whose duty it is to enforce criminal laws.]

(a) Any person who—knowing or in reckless disregard of the fact that the alien has not received prior official authorization to come to, enter, or reside in the United States, brings to or attempts to bring to the United States in any manner whatsoever, any alien, regardless of any official action which may later be taken with respect to such alien,

(1) shall, for each transaction constituting a violation of this subsection, regardless of the number of aliens involved, be guilty of a misdemeanor and upon conviction shall be punished by a mandatory fine of $2500, the imposition of which shall not be suspended by the court, and, in the court's discretion, may be punished by an additional fine of not more than an amount equal to $2500 for each such alien in respect to whom any violation of this paragraph occurs, or by imprisonment for a term not exceeding one year, or both; or

(2)(A) for a second offense under this section;

(B) for an offense done for the purpose of commercial advantage or private financial gain;

(C) for an offense in which the alien is not upon arrival immediately brought and presented to an appropriate immigration official; or

(D) for an offense during which either the offender or the alien with the knowledge of the offender, makes any false or misleading statement, or engages in any act or conduct intended to mislead any officer, agent, or employee of the United States, shall be guilty of a felony and upon conviction shall be punished by a fine not exceeding $10,000 or by imprisonment for a term not exceeding five years, or both, for each alien in respect to whom any violation of this paragraph occurs.

(b) Any person who—

(1) knowing or having reason to know that the person is an alien, brings to or attempts to bring to the United States in any manner whatsoever, any such person at a place other than a designated port of entry or place other than as designated by the Commissioner of the Immigration and Naturalization Service regardless of whether such alien has received prior official authorization to come to, enter, or reside in the United States and regardless of any future official action which may be taken with respect to such alien;

(2) knowing or in reckless disregard of the fact that the alien has come to, entered, or remains in the United States in violation of law, transports, or moves or attempts to transport or move any such alien within the United States by means of transportation or otherwise, in furtherance of such violation of law;

(3) knowing or in reckless disregard of the fact that the alien has come to, entered, or remains in the United States in violation of law, conceals, harbors, or shields from detection, any such alien in any place, including any building or any means of transportation; or

(4) knowing or having reason to know that a person is an alien, willfully encourages or induces or attempts to encourage or induce, either directly or indirectly, the entry without prior official authorization, into the United States of any such alien—

shall be guilty of a felony, and upon conviction thereof shall be punished by a fine not exceeding $10,000 or by imprisonment for a term not exceeding five years, or both, for each alien in respect to whom any violation of this subsection occurs: Provided, however, that for the purposes of this section, employment (including the usual and normal practices incident to employment) shall not be deemed to constitute harboring.

(c)(1) any conveyance, including any vessel, vehicle, or aircraft, which has been, is being, or is intended to be used, in the commission of a violation of subsections (a) or (b) shall be seized and subject to forfeiture except that—

(A) no conveyance used by any person as a common carrier shall be forfeited under the provisions of this section if the offense occurs when the conveyance is being used in the business as a common carrier unless the owner, operator, or other person in charge of the conveyance at the time of the offense was a consenting party or privy to the illegal act; and

(B) no conveyance shall be forfeited under the provisions of this section if the offense occurred while such conveyance was unlawfully in the possession of a person other than the owner in violation of the criminal laws of the United States or of any State.

(2) Any conveyance subject to seizure under this section may be seized without warrant if there is probable cause to believe the conveyance has been, is being, or is intended to be used in a violation of subsection (a) or (b) and circumstances exist where a warrant is not constitutionally required.

(3) All provisions of the customs laws relating to the seizure, summary and judicial forfeiture, and condemnation of property; the disposition of such property or the proceeds from the sale thereof; the remission or mitigation of such forfeiture; and the compromise of claims and the award of compensation to informers in respect of such forfeitures shall apply to seizures and for-

feitures incurred or alleged to have been incurred, under the provisions of this section insofar as applicable and not inconsistent with the provisions hereof, except that duties imposed on customs officers or other persons regarding the seizure and forfeiture of property under the customs laws may be performed with respect to seizure and forfeitures carried out under the provisions of this section by such officers or persons authorized for that purpose by the Attorney General.

(4) Whenever a conveyance is forfeited under this section the Attorney General may—

(A) retain the conveyance for official use;

(B) sell the conveyance, in which case the proceeds, from any such sale shall be used to pay all proper expenses of the proceedings for forfeiture and sale including expenses of seizure, maintenance of custody, advertising, and court costs;

(C) require that the General Services Administration, or the Federal Maritime Commission if appropriate under 40 U.S.C. 484 (i), take custody of the conveyance and remove it for dispositon in accordance with law; or

(D) dispose of the conveyance in accordance with the terms and conditions of any petition of remission or mitigation or forfeiture granted by the Attorney General.

(5) In all suits or actions brought for the forfeiture of any conveyance seized under this section, where the conveyance is claimed by any person, the burden of proof shall lie upon such claimant: Provided, that probable cause shall be first shown for the institution of such suit or action, to be judged of by the court. In determining whether probable cause exists, any of the following shall be prima facie *evidence, of the presumption that an alien involved in the alleged violation had not received prior official authorization to come to, enter, or reside in the United States or that such alien had come to, entered, or remained in the United States in violation of laws.*

(A) Records of any judicial or administrative proceeding in which that alien's status was an issue and in which it was determined that the alien had not received prior official authorization to come to, enter, or reside in the United States or that such alien had come to, entered, or remained in the United States in violation of law;

(B) Official records of the Immigration and Naturalization Service of State Department showing that the alien had not received prior authorization to come to, enter, or reside in the United States or had come to, entered, or remained in the United States in violation of law; and

(C) Testimony, by an immigration officer having personal knowledge of the facts concerning that alien's status, that the alien had not received prior authorization to come to, entered, or remained in the United States in violation of law.

(6) Any officer or employee of the Service designated by the Attorney General, either individually or as a member of a class, and all other Federal officers and officers of a state or political subdivision thereof whose duty it is to enforce criminal laws shall have authority to make any arrest for a violation of any provision of this section.

(d) (1) It shall be unlawful for an employer knowingly to hire an alien for employment in the United States, unless at the time of employment the alien has been lawfully admitted for permanent residence or is an alien who has been authorized to be employed by the Attorney General. Provided, that this provision shall not apply to an employer who establishes that he or she did not employ four or more persons, at the time of violation.

(2) If an alien has been employed in violation of this subsection, the employer shall be subject to a civil penalty of $500 per alien employed without authorization upon determination of a first violation. Upon determination of a subsequent violation, the employer shall pay the sum of $1000 per alien employed without authorization. Payment shall be made to the district director of the Immigration and Naturalization Service in the district where the violation occurred. In the discretion of the Attorney General, payment may be recovered by civil suit in a United States district court in the name of the United States from any employer made liable under this subsection. The Attorney General shall establish by regulation a procedure for implementing this subsection.

(3) Whenever the Attorney General has reasonable cause to believe that an employer has engaged in a pattern or practice of employment in violation of this subsection, the Attorney General may bring a civil action in the appropriate district court of the United States by filing with it a complaint setting forth facts pertaining to such pattern or practice and requesting such relief, including an application for a permanent or temporary injunction, restraining order or other order against the employer as the Attorney General deems necessary. For purposes of this paragraph the term "district court" shall include a United States magistrate."

(4) For the purposes of this section, an employer shall be presumed to have knowingly employed an alien who is not authorized for employment in the United States if the employer does not request and obtain evidence that the individual is authorized for employment as set forth in (d)(5) below; Provided, that the foregoing shall not prevent the Government from establishing knowing employment by any other means.

(5) The Attorney General shall establish by regulation a form by which every employer as described in subsection (d)(1) above, and every prospective employee of such employer, shall attest that the prospective employee is a United States citizen, a national of the United States, or has the status of an alien lawfully admitted for permanent residence, or has been authorized for employment by the Attorney General, and that the employer has examined such documents as may, by regulation, be prescribed by the Attorney General relating to such citizenship, permanent resident status, or employment authorization. Such forms shall be retained by the employer and shall be available for inspection by officers of the Immigration and Naturalization Service, for the duration of the employee's employment, and for one year following the termination of the employment.

(6) (1) Section 6(f) of the Farm Labor Contractor Registration Act of 1963, as amended, is hereby repealed.

(2) Section 5(b)(6) of the Farm Labor Contractor Registration Act of 1963, as amended, is revised to read as follows:

(6) has been found to have knowingly employed an alien not lawfully admitted for permanent residence or not authorized for permanent residence or not authorized by the Attorney General to accept employment in violation of section 274 of the Immigration and Nationality Act.

(2) by inserting after new subsection (d) the following new subsection:

(e) The provisions of this section are intended to preempt any state or local laws imposing civil or criminal sanctions upon those who employ aliens not authorized to work in the United States;

(3) the title of section 274 of such Act is amended to read as follows: "BRINGING IN, HARBORING, AND EMPLOYING CERTAIN ALIENS."

(4) the designation of section 274 in the table of contents (Title II—Immigration, Chapter 8) of such Act is amended to read as follows: "Section 274. Bringing in, harboring, and employing certain aliens."

ENTRY OF ALIEN AT IMPROPER TIME OR PLACE; MISREPRESENTATION AND CONCEALMENT OF FACTS

SEC. 275. [8 U.S.C. 1325] [Any alien who (1) enters the United States at any time or place other than as designated by immigration officers, or (2) eludes examination or inspection by immigration officers, or (3) obtains entry to the United States by a willfully false or misleading representation or the willful concealment of a material fact, shall, for the first commission of any such offenses, be guilty of a misdemeanor and upon conviction thereof be punished by imprisonment for not more than six months, or by a fine of not more than $500, or by both, and for a subsequent commission of any such offenses shall be guilty of a felony and upon conviction thereof shall be punished by imprisonment for not more than two years, or by a fine of not more than $1,000, or both.]

"275. Entry of Alien At Improper Time or Place; Misrepresentation and Concealment of Facts; Misrepresentation of Employment Status."

(a) Any alien who (1) enters the United States at any time or place other than as designated by immigration officers, or (2) eludes examination or inspection by immigration officers, or (3) obtains entry to the United States by a willfully false or misleading representation or the willful concealment of a material fact, shall, for the first commission of any such offenses, be guilty of a misdemeanor and upon conviction thereof be punished by imprisonment for not more than six months, or by a fine of not more than $500, or both, and for a subsequent commission of any such offenses shall be guilty of a felony and upon conviction thereof shall be punished by imprisonment for not more than two years, or by a fine of not more than $1,000, or both.

(b) Any person who with unlawful intent photographs, prints, or in any other manner makes, or executes, any engraving, photograph, print, or impression in the likeness of any document presented to establish United States citizenship, lawful permanent resident status or employment authorization granted by the Attorney General, as required by subsection 274(d)(5) of the Act or regulations issued thereunder; or any person who with unlawful intent presents or uses such documents, shall upon conviction be fined not to exceed $5,000 or be imprisoned not more than five years, or both.

(c) Any alien who does not have the status of an alien lawfully admitted for permanent residence, or who has not been authorized to be employed by the Attorney General, who willfully and knowingly possesses and presents any document relating to another person for the purpose of obtaining employment in the United States, shall upon conviction be fined not to exceed $5,000 or be imprisoned not more than five years, or both.

(b) the designation of section 275 in the table of contents (Title II—Immigration, Chapter 8) of such Act is amended to read as follows:

Sec. 275. Entry of alien at improper time or place; misrepresentation and concealment of facts; misrepresentation of employment status.

JURISDICTION OF DISTRICT COURTS

SEC. 279. *a* [8 U.S.C. 1329] The district courts of the United States shall have jurisdiction of all causes, civil and criminal, arising under any of the provisions of this title. It shall be the duty of the United States attorney of the proper district to prosecute every such suit when brought by the United States. Notwithstanding any other law, such prosecutions or suits may be instituted at any place in the United States at which the violation may occur or at which the person charged with a violation under section 275

or 276 may be apprehended. No suit or proceeding for a violation of any of the provisions of this title shall be settled, compromised, or discontinued without the consent of the court in which it is pending and any such settlement, compromise, or discontinuance shall be entered of record with the reasons therefor.

(b) *An action for judicial review of any administrative action arising under this Act, or regulations issued pursuant to this Act, other than a final order of deportation as provided in section 106(a) of the Act, may not be filed later than 30 days from the date of the final administrative action or from the effective date of this section, whichever is the later.*

OFFICE OF THE ATTORNEY GENERAL,
Washington, D.C.

The VICE PRESIDENT,
U.S. Senate,
Washington, D.C.

DEAR MR. VICE PRESIDENT: There is transmitted herewith the proposed Omnibus Immigration Control Act. This omnibus legislation includes the following titles:

TITLE I. Temporary Resident Status for Illegal Aliens.

TITLE II. The Unlawful Employment of Aliens Act of 1981.

TITLE III. Cuban/Haitian Temporary Resident Status Act of 1981.

TITLE IV. The Fair and Expeditious Appeal, Asylum and Exclusion Act of 1981.

TITLE V. The Immigrant Visas for Canada and Mexico Act.

TITLE VI. The Temporary Mexican Workers Act.

TITLE VII. The Immigration Emergency Act.

TITLE VIII. The Unauthorized Entry and Transportation Act.

TITLE IX. The Labor Certification Act.

TITLE X. The Emergency Interdiction Act.

The history of America has been in large part the history of immigrants. Our nation has been overwhelmingly enriched by the fifty million immigrants who have come here since the first colonists. For nearly our first century and one-half as a nation, the Congress recognized our need for new arrivals by imposing no quantitative restrictions on immigration. Since 1921, however, the government and our people have recognized the need to control the numbers of immigrants and the process by which they enter our country.

In recent years our policies, intended to effect that necessary control of our borders, have failed. Last year, the number of immigrants legally and illegally entering the United States reached a total greater than any year in our history, including the era of unrestricted immigration.

This bill represents a comprehensive and integrated approach to immigration. This legislation is premised upon the fact that there are between three and six million illegal aliens in this country and their numbers are continuing to grow from one-quarter to one-half million each year. Something must be done.

The following titles of this bill are designed to curtail illegal immigration:

TITLE I. Temporary Resident Status for Illegal Aliens.

TITLE II. Unlawful Employment of Aliens Act of 1981.

TITLE VI. The Temporary Mexican Workers Act.

TITLE IX. The Labor Certification Act.

Together, these four proposals should substantially reduce illegal immigration by expanding opportunities to work lawfully in the United States and by prohibiting the employment of illegal aliens outside of these programs.

The "Temporary Resident Status for Illegal Aliens" bill would permit illegal aliens, who were present in the United States prior to January 1, 1980, and who are not otherwise excludable, to apply for the new status of "temporary resident." This status would be renewable every three years, and after a total of ten years of continuous residence, those residents would be eligible to apply for permanent resident status if there were not other reasons to exclude them and they could demonstrate English language ability.

The United States has neither the resources, the capability, nor the motivation to uproot and deport millions of illegal aliens, many of whom have become integral members of the community. By granting limited legal status to the productive and lawabiding members of these communities, this nation will acknowledge the reality of the situation.

"The Unlawful Employment of Aliens Act" would prohibit employers of four or more employees from knowingly hiring illegal aliens. Civil fines would be assessed for each illegal alien hired and injunctions who follow a pattern or practice of hiring illegal aliens.

"The Temporary Mexican Workers Act" establishes a two-year program for the admission of nationals of Mexico for employment in jobs for which there is a shortage of domestic workers. The jobs could be in any field, skilled or unskilled, provided that there is a lack of available labor. Since the program is a pilot project and is intended as a test, it would be limited in time to a two-year period, and limited in size to 50,000 workers per year.

Under the provisions of "The Labor Certification Act", the temporary Mexican workers who will come to the United States, would be excluded from jobs in states where it was certified that there was an adequate supply of American workers. The existing H–2 temporary worker program would continue to operate.

During the trial period, this experimental program would be evaluated for its impact on American workers, the feasibility of enforcing the program's restrictions, and the overall benefit to the United States.

Mass migrations of undocumented aliens to the United States are a recent phenomenon. They are also a phenomenon for which the nation is woefully ill prepared, and the consequences of our unreadiness have been disastrous.

The 1980 Mariel boatlift brought a wave of 125,000 Cubans to the beaches of south Florida. Among those persons were criminals and mentally ill, some of whom were forcibly expelled by Fidel Castro. Notwithstanding its obligations to do so under international law, the Cuban Government has refused to allow these individuals to return to Cuba. Most of the Cubans have been resettled through the efforts of private and public agencies.

There is also a continuing migration to Florida of undocumented aliens from Haiti and elsewhere. Although the government of Haiti is willing to accept the return of Haitians deported by the United States, exclusion proceedings have been blocked by time-consuming judicial challenges to Immigration and Naturalization Service proceedings. While the foreign policy character of the Cuban and Haitian migrations differs, the domestic impact on our local communities and on the administration of our immigration laws is the same.

We must prevent another Mariel. In addition, we must act to curtail the ongoing arrivals of undocumented aliens to our shores in violation of our laws. Finally, we must deal with the recent legacy of those Cubans and Haitians who are already here.

The following titles of this bill were developed to provide adequate legal authority to deal with future migrations of undocumented aliens:

Title III. Cuban/Haitian Temporary Resident Act of 1981.

Title IV. The Fair and Expeditious Appeal, Asylum and Exclusion Act of 1981.

Title VII. The Immigration Emergency Act.

Title VIII. Unauthorized Entry and Transportation Act.

Title X. The Emergency Interdiction Act.

"The Cuban/Haitian Temporary Resident Act of 1981" would repeal the Cuban Refugee Adjustment Act of 1966 so that undocumented Cubans will not be eligible for adjustment of status upon completion of one year of physical presence in the United States.

This proposal would allow most of the undocumented Cuban and Haitian entrants to regularize their status by applying for a new "temporary resident" status. After five years of continuous residence in this country, such Cubans and Haitians could apply for permanent residence, providing they were self-sufficient, had minimal English language ability, and they were not otherwise excludable.

"The Fair and Expeditious Appeal, Asylum and Exclusion Act of 1981" grants the United States the authority to conduct expedited proceedings with respect to undocumented aliens encountered at our borders and ports of entry, and at points outside the territorial limits of the United States. Presently, an alien who enters the United States without inspection can submit his asylum request and remain in the United States while his asylum request winds its way through the labyrinth of administrative and judicial channels. Thus, there is an incentive for him to enter the United States without inspection.

Current exclusion proceedings are prescribed by section 236 of the Immigration and Nationality Act (INA). That section provides for a hearing before an immigration judge and requires that a complete record of the testimony and evidence be kept. Section 292 of the Act provides right of counsel (at no expense to the government) for any alien in an exclusion proceeding. Under 8 C.F.R. 236.2, the immigration judge must advise the alien of his right to counsel of his choice and of the availability of free legal services. A decision by the immigration judge that the alien is excludable is appealable to the Attorney General under section 236(b). The Board of Immigration Appeals (BIA) was created by the Attorney General administratively to hear such appeals (8 C.F.R., Part 3). Under 8 C.F.R. 236.7, the alien has 13 days after a written decision of exclusion is mailed to file an appeal with the BIA. An appeal from an oral decision of exclusion must be taken immediately after the decision is rendered. On request, the BIA must schedule oral hearings on the appeal. BIA decisions must be issued in writing. Under section 106 (b) of the Act, an alien under a final order of exclusion by the BIA may obtain judicial review only by habeas corpus proceedings.

"The Fair and Expeditious Appeal, Asylum and Exclusion Act" will streamline those proceedings when an alien cannot present any documentation to support a claim of admissibility. Under this proposal the initial questioning of a particular individual would be conducted by a trained Immigration and Naturalization Service asylum officer. The examination would be oral and no transcript would be made of it. In most cases involving undocumented aliens, the examining officer would make an immediate decision to exclude the alien. There would be no right to an administrative appeal. The removal or return of the alien to his home country would be accomplished as soon as possible.

"The Unauthorized Entry and Transportation Act" is based on the December 19, 1980 decision of the United States District Court for the Southern District of Florida. In the case of *United States* v. *Anaya, et al.*, No. 80–231–CR–EPS, the court dismissed the indictment of persons who were charged with unlawfully bringing undocumented Cuban

aliens into the United States in violation of section 274 of INA. The court held that section 274 does not apply to instances in which persons immediately present undocumented aliens to Immigration and Naturalization Service officials. This decision has prevented any criminal prosecutions of persons involved in bringing in undocumented aliens during the Mariel boatlift.

The result of the holding is that the United States does not have an effective criminal sanction against such conduct.

The Anaya case is in the process of appeal. Nevertheless, there is a threat of immediate harm that might arise from the lack of an effective criminal penalty for bringing undocumented aliens to our country and taking them directly to the Immigration and Naturalization Service. Therefore, this proposal would amend the seizure and forfeiture provisions for conveyances involved in violations of section 274.

"The Immigration Emergency Act" would permit the President to declare an "immigration emergency" to enable the United States to respond to the actual or threatened mass migration of visaless aliens to the United States. This proposal would amend the Immigration and Nationality Act by adding new sections 240a through 240e (8 U.S.C. 1230a through 8 U.S.C. 1230e). This legislation would enable the federal government to respond more effectively to future mass migrations. One of the ways the legislation seeks to do this is by prohibiting residents of the United States from aiding aliens in their efforts to enter the United States. The Mariel boatlift also demonstrated that in certain circumstances United States residents may be willing to lend their assistance even though the aliens may not be entitled to admission to the United States.

Several of the provisions in this Act are designed to give law enforcement authorities the power to prevent United States residents from transporting visaless aliens to the United States. Section 240B(a) authorizes the President to impose travel restrictions to a designated foreign country or area. Any conveyance under the care, custody or control of a United States resident would be prohibited from going within a specified distance of the designated foreign country or area unless prior permission has been obtained. Furthermore, section 240B(b)(1) authorizes the President to close harbors, airports, or roads which may be used by persons seeking to bring aliens to the United States. The purpose of this provision is to enable law enforcement authorities to prevent, for example, the departure of vessels from a harbor. It is obviously easier to restrict boats in a harbor than it is to try and intercept them once they are on the high seas. Effective enforcement may thus require that vessels be prevented from reaching open waters where they would be able to scatter and avoid detection. Persons removing vessels from the harbor without permission would be subject to arrest and criminal penalties.

There are also important reasons for not attempting to rely on existing emergency legislation. While the International Emergency Economic Powers Act (IEEPA), 50 U.S.C. 1701 *et seq.*, gives the President broad powers and could conceivably be invoked in a situation where there is an actual or threatened mass migration of visaless aliens to the United States, to exclusively rely on IEEPA would be unsatisfactory.

Under IEEPA, an emergency can be declared only when there is "any unusual and extraordinary threat . . . to the national security, foreign policy, or economy of the United States." It is conceivable that some situations which would merit the declaration of an immigration emergency, would also meet the criteria of IEEPA. However, there are other situations which would justify the declaration of an immigration emergency but which would not clearly be a threat to the national security, foreign policy or economy of the United States, and thus the provisions of IEEPA could not be invoked.

While IEEPA would authorize some of the actions which could be pursued under this immigration emergency legislation, such as the travel restrictions, it probably would not authorize such procedures as those designed to expedite exclusion and asylum claims, the detention of aliens pending deportation proceedings, and the interdiction of aliens coming to the United States. IEEPA was primarily designed to regulate international economic transactions and not to control noneconomic aspects of international intercourse.

IEEPA gives the President greater powers than would be needed to take care of an immigration emergency. IEEPA was drafted broadly so as to encompass a wide range of situations which would threaten the national security, foreign policy or economy of the United States. An immigration emergency, on the other hand, is a limited type of emergency for which specific powers can be delineated to respond to the situation. The public and the judiciary would more readily understand and uphold actions taken in the course of an immigration emergency if there is a specific statute authorizing such actions, rather than if supports for those actions must be sought from the statutory provisions of legislation such as IEEPA, which is not tailored to the precise problems that would arise during an immigration emergency.

The "Emergency Interdiction Act" states that the President can enter into agreements with foreign countries for the purpose of preventing illegal migration to the United States. Under such an agreement, the Coast Guard could stop a foreign flag vessel on the high seas if there is reason to believe that the vessel is destined for the United States and carrying undocumented aliens who are not entitled to enter the United States.

The basic legal framework governing immigrant admissions to the United States was established by the 1965 amendments to the Immigration and Nationality Act. These amendments retained the policy of numerically restricting certain preference categories of immigration. For the first time in our history, immigration from Western Hemisphere countries was limited, to 120,000 annually. Annual per country ceilings of 20,000 were extended to the Western Hemisphere in 1976.

With regard to refugee admissions, the Congress first dealt comprehensively with the question only recently. In the Refugee Act of 1980, Congress prescribed a uniform definition of "refugee" without geographic or ideological limitation, and established a process for the annual determination of refugee admissions by the President, after consultations with Congress.

Imposition of country ceilings of 20,000 annually, in conjunction with the new preference system and labor certification requirements added by the 1965 amendments, resulted in a drastic reduction in immigration from Canada and Mexico. The ceiling on immigration from the United States' closest neighbors should be increased. "The Immigrant Visas for Canada and Mexico Act" would create separate annual ceilings for numerically restricted immigration from Mexico and Canada raising the totals from the present 20,000 to 40,000 for each country. The unused portion of either country's allotment would be available to citizens of the other nation. The numerically restricted immigration from other countries of the world would be adjusted so as not to be affected by this change.

Under "The Immigrant Visas for Canada and Mexico Act", any unused visas in Mexico or Canada in a fiscal year would be allotted to the other country during the next fiscal year. The overall limitation on immigration from the rest of the world would be reduced from 270,000 to 230,000. Historically, the demand for immigrant visas by nationals of Mexico has exceeded the demand by nationals of Canada. For example, in fiscal year 1978 there were 17,000 immigrants from Canada as opposed to 92,000 from Mexico. These figures include both numerically and non-numerically limited immigrants. Based on this, we would assume that Mexico would use all of their 40,000 visas in the first year and Canada would use no more than 15,000 to 20,000 visas. In subsequent years the unused visas for Canada would be allocated to Mexico and would probably result in 60,000 to 65,000 visas being available each year to Mexico. Essentially there would be no increase in immigration from Canada and there would be a substantial increase in immigration from Mexico.

"The Omnibus Immigration Control Act" will allow the United States to continue as a nation that is open to immigration and that does its share to assist and resettle the refugee. This bill is necessary if this nation is to continue to provide for our people, while welcoming others who desire to contribute to this nation's continuing experiment in liberty.

I look forward to the prompt attention of Congress to this legislation.

The Office of Management and Budget has advised that the enactment of these legislative proposals is in accord with the program of the President.

Sincerely,

WILLIAM FRENCH SMITH,
Attorney General.

By Mr. CRANSTON:

S. 1766. A bill to amend the Federal Election Campaign Act of 1971 to provide that the limitations on contributions to candidates shall be waived for elections in which any candidate spends more that $35,000 from his personal funds; to the Committee on Rules and Administration.

WAIVER OF LIMITATIONS ON CAMPAIGN CONTRIBUTIONS IN CERTAIN CASES

Mr. CRANSTON. Mr. President, when the Federal Election Campaign Act became law in 1974, it was a fair and balanced package of limitations on political contributions and campaign spending.

This balance of equities was set awry by the Supreme Court in 1976 when it declared spending limits, including the $35,000 spending limit on the candidate's personal funds, to be unconstitutional. Thus a candidate for the Senate or House must abide by the $1,000 individual and the $5,000 PAC contribution limits but can make unlimited contributions to his or her own campaign.

As a result the personally wealthy candidate gained an enormous advantage. Today millions of dollars legally can be, and are, poured into the campaigns of rich candidates by the candidates themselves. Anyone can easily document this fact. Their opponents, on the other hand, must concentrate on the hard necessities of fundraisers, phone calls, and private meetings, devoting much of their limited time to the slow, laborious building of their campaign treasuries while the lucky wealthy few can luxuriate in spending their time winning votes.

Moreover, because of limits on political contributions, the candidate of average means seldom if ever raises as much money as his rich opponent spends. The whole psychology of the campaign thus favors the rich candidate. He or she can always spend more during the final

weeks and days if necessary. The money is there. The average candidate does not have the wherewithal to make that extra effort and both he and his opponent know it.

We all know this situation is unfair—it violates the basic American creed that every citizen should have an equal chance at election to Congress based on merit, character, and the ability to legislate in the people's best interest.

There is probably no way to correct completely the advantage the wealthy have in campaign spending. But we could remedy some of the inequity by a partial return to the system that existed before the 1974 law was adopted, when there were no limits on either contributions or spending.

Specifically, I am proposing that if a candidate spends more than a specified amount of his personal funds on his campaign, that act will trigger the lifting of contribution limits on his opponent or opponents. This would remove the advantage that the 1974 law as revised by the Supreme Court gives to the wealthy candidate.

Here is how my bill would work:

A candidate would be required to advise the Federal Election Commission of his plans to use his personal funds or the funds of his immediate family under the following circumstances:

First, on the date a candidate qualifies for an election or 90 days before an election—whichever is earlier—he must file with the FEC a declaration that he intends to spend no more than $35,000 of his personal funds or his immediate family's on his campaign;

Second, if he subsequently changes his mind, he must so notify the FEC at least 60 days prior to the election; and

Third, a candidate must notify the FEC and each opposing candidate within 48 hours after he actually spends more than $35,000 of his own or his immediate family's funds.

If a candidate gives notice at any of these times that he will exceed the $35,000, the limits on individual and multicandidate political committee contributions to his opponent would be waived by the FEC. Moreover, should a candidate fail to file any of the above declarations, the Commission would also waive the limits.

Under my proposal, the Commission could initiate its own investigation to determine whether any candidate has spent more than $35,000. If that investigation showed that expenditures have exceeded $35,000, the Commission would again waive the contribution limits.

If a waiver has been granted to a candidate, an individual's contributions to that particular candidate would not be counted against the individual's yearly $25,000 contribution limit.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1766

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 315(a) of the Federal Election Campaign Act of 1971 (2 U.S.C. 441a(a)) is amended by adding at the end thereof the following new paragraphs:

"(9)(A) The limitations provided in paragraphs (1)(A) and (2)(A) of this subsection shall not apply with respect to contributions made with respect to any election in which any candidate makes expenditures from his personal funds or the personal funds of his immediate family which aggregate more than $35,000.

"(B) In determining whether an individual has exceeded the limitation provided in paragraph (3) of this subsection, any amount contributed to a candidate (or his authorized political committees) in an election, with respect to which the provisions of subparagraph (A) of this paragraph are applicable shall not be counted.

"(C) In determining whether a candidate has made expenditures in excess of $35,000 under subparagraph (A), an expenditure shall be deemed to have been made by a candidate if it is made by the candidate, an authorized committee of the candidate, an agent of the candidate for the purpose of making the expenditure, or any other person authorized by the candidate, his authorized political committee, or his agent to make such expenditure.

"(D) For purposes of this paragraph the term 'immediate family' means a candidate's spouse, children, parent, grandparent, brother, half-brother, sister, or half-sister, and the spouse of any such person.

"(10) (A) Not later than the date on which a candidate qualifies for election to Federal office under the law of the appropriate State, or 90 days before the date of any such election, whichever is earlier, each candidate for election to Federal office shall file with the Commission a declaration of whether he intends to make expenditures from his personal funds of his immediate family which aggregate more than $35,000.

"(B) (i) Not later than 60 days before the date of such election, each candidate who has reason to believe that he may make expenditures from his personal funds or from the personal funds of his immediate family aggregating more than $35,000 shall notify the Commission to that effect, unless such candidate filed with the Commission a timely declaration that he intended to exceed such amount as provided in subparagraph (A).

"(C) Each candidate for election to Federal office shall notify the Commission and each other candidate for the same election within 48 hours after he, or any of his authorized committees make any expenditure, or incur any obligation to make an expenditure, from his personal funds or the personal funds of his immediate family which aggregate more than $35,000.

"(D) The Commission is authorized to determine, upon its own initiative or upon the request of any candidate for election to Federal office, whether any candidate has made expenditures or incurred obligations to make expenditures from his personal funds or the personal funds of his immediate family which aggregate more than $35,000.

"(E) If a candidate fails to file a timely declaration pursuant to this paragraph, any opposing candidate in such election shall automatically be granted a waiver of such expenditure limitations.".

SEC. 2. Section 309 (d) (1) of such Act (2 U.S.C. 437g) is amended by adding at the end thereof the following:

"(D) Any knowing and willful violations of section 315 (a) (10) shall be punishable by a fine of not more than $10,000 or imprisonment for not more than 5 years or both.".

SEC. 3. The amendments made by this Act shall be effective with respect to elections for Federal office held more than 90 days after the date of the enactment of this Act.

By Mr. CANNON:

S. 1767. A bill to transfer certain lands in Clark County, Nev., from the Department of Agriculture to the Frontier Girl Scout Council; to the Committee on Energy and Natural Resources.

TRANSFER OF CERTAIN LANDS IN CLARK COUNTY, NEV.

● Mr. CANNON. Mr. President, I introduce a bill today designed to provide for the transfer of a parcel of Forest Service land to the Frontier Girl Scout Council of Nevada. This parcel includes some 15 acres in the Mount Charleston area and has been used by the Girl Scouts as a campground for many years.

The council must make a decision shortly on whether to begin an extensive and expensive repair and building program of permanent structures necessary to the camping experience. The council does not feel it can justify the project unless it has control of the property. I believe the transfer of title makes sense both for relieving the Forest Service of its management expense and for providing camping experience for Girl Scouts in Council can proceed to upgrade the camping experience for Girl Scouts in the Las Vegas area.●

ADDITIONAL COSPONSORS

S. 569

At the request of Mr. JEPSEN, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 569, a bill to amend the Internal Revenue Code of 1954 to provide an investment tax credit for certain soil and water conservation expenditures.

S. 1034

At the request of Mr. GRASSLEY, the Senator from Michigan (Mr. RIEGLE) was added as a cosponsor of S. 1034, a bill to amend title 38, United States Code, to provide a more equitable formula for payments by the Administrator of Veterans' Affairs to States for the cost of care provided in State nursing homes to veterans eligible for such care in Veterans' Administration facilities.

S. 1131

At the request of Mr. DANFORTH, the Senator from Massachusetts (Mr. KENNEDY) was added as a cosponsor of S. 1131, a bill to require the Federal Government to pay interest on overdue payments and to take early payment discounts only when payment is timely made, and for other purposes.

S. 1215

At the request of Mr. PROXMIRE, the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 1215, a bill to clarify the circumstances under which territorial provisions in licenses to distribute and sell trademarked malt beverage products are lawful under the antitrust laws.

S. 1607

At the request of Mr. D'AMATO, the Senator from Nebraska (Mr. ZORINSKY) was added as a cosponsor of S. 1607, a bill to amend the Internal Revenue Code of 1954 to provide a minimum interest and dividend exclusion of $200 for each individual.

S. 1645

At the request of Mr. MOYNIHAN, the Senator from Maine (Mr. MITCHELL) was added as a cosponsor of S. 1645, a bill to let funds in individual retirement accounts be used to purchase collectibles.

S. 1648

At the request of Mr. HATFIELD, the Senator from New Mexico (Mr. SCHMITT) was added as a cosponsor of S. 1648, a bill entitled the "Military Spouse Retirement Equity Act."

S. 1656

At the request of Mr. DURENBERGER, the Senator from South Dakota (Mr. PRESSLER) was added as a cosponsor of S. 1656, a bill to amend the Internal Revenue Code of 1954 to clarify certain requirements which apply to mortgage subsidy bonds, and for other purposes.

S. 1696

At the request of Mr. WALLOP, the Senator from North Carolina (Mr. EAST) was added as a cosponsor of S. 1696, a bill to amend the Social Security Act to facilitate enforcement of provisions requiring suspension of benefits to inmates of prisons and other public institutions by insuring the availability of necessary information from Federal instrumentalities.

S. 1706

At the request of Mr. MITCHELL, the Senator from New Jersey (Mr. WILLIAMS), and the Senator from New Hampshire (Mr. HUMPHREY) were added as cosponsors of S. 1706, a bill to amend the Clean Air Act to better protect against interstate deposition, and for other purposes.

SENATE RESOLUTION 230

At the request of Mr. HART, the Senator from Nebraska (Mr. EXON), the Senator from Vermont (Mr. LEAHY), the Senator from California (Mr. CRANSTON), the Senator from Arkansas, (Mr. BUMPERS), and the Senator from Louisiana (Mr. JOHNSTON) were added as cosponsors of Senate Resolution 230, a resolution to express the sense of the Senate on cuts in combat readiness.

AMENDMENT NO. 556

At the request of Mr. HATCH, the Senator from Alabama (Mr. DENTON), and the Senator from Oklahoma (Mr. NICKLES) were added as cosponsors of amendment No. 556 proposed to S. 1196, an original bill to amend the Foreign Assistance Act of 1961 and the Arms Export Control Act to authorize appropriations for development and security assistance programs for fiscal year 1982, to authorize appropriations for the Peace Corps for the fiscal year 1982, to provide authorities for the Overseas Private Investment Corporation, and for other purposes.

AMENDMENT NO. 591

At the request of Mr. D'AMATO, the Senator from Arkansas (Mr. PRYOR), the Senator from Florida (Mrs. HAWKINS), the Senator from North Dakota (Mr. ANDREWS), the Senator from Wisconsin (Mr. KASTEN), and the Senator from Delaware (Mr. ROTH) were added as cosponsors of amendment No. 591 intended to be proposed to H.R. 4121, a bill making appropriations for the Treasury Department, the U.S. Postal Service, the Executive Office of the President, and certain independent agencies, for the fiscal year ending September 30, 1982, and for other purposes.

NOTICES OF HEARINGS

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, I would like to announce for the information of the Senate and the public that the Committee on Governmental Affairs will hold a hearing on the Financial Integrity Act of 1981, S. 864, on Wednesday, October 28, 1981 at 10 a.m. in room 357 of the Russell Senate Office Building. For further information please contact Link Hoewing at 224–4751.

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. GARN. Mr. President, today the Banking Committee finished the first half of its hearings on comprehensive legislation—S. 1703, S. 1720, S. 1721—to upgrade the structure and operations of depository institutions and to promote a competitive and stable financial system.

To complete the hearing process, the committee will conduct 4 days of hearings next week, with witnesses from Federal and State bank regulatory agencies, consumer groups, credit union associations and a panel of chief executive officers of different types of financial intermediaries.

In light of increasing competition among different types of financial intermediaries, I am particularly pleased that the chief executives of Citicorp, American Express, Beneficial Corp., Prudential, and Merrill Lynch will appear on a panel next Thursday to present their views on the legislation and to discuss the present and future outlook for the financial system. We have received much testimony this week about the changing competitive environment, as well as concerns about possible over-concentration of financial resources, and this panel of representatives of some of the most innovative and aggressive financial intermediaries will provide the committee with valuable insights into the financial markets' perspectives of the pending legislation.

The following is an updated schedule for next week's hearings:

SCHEDULE FOR HEARINGS

TUESDAY, OCTOBER 27, 1981

Panel

John J. Hutchinson, President, National Association of Federal Credit Unions.

Joseph N. Cugini, Chairman, Credit Union National Association.

Panel

Frederick S. Hammer, Member, Government Relations Committee, Consumer Bankers Association.

Robert B. Evans, Senior Vice President, National Consumer Finance Association.

Milton Schober, Credit Counsel, American Retail Federation.

Nicholas St. George, Task Force on Creative Finance for Manufactured Housing.

WEDNESDAY, OCTOBER 28, 1981

Panel

Angelo R. Bianchi, President, Conference of State Bank Supervisors.

National Association of State Savings and Loan Supervisors.

Muriel Siebert, Superintendent of Banks, State of New York.

Linda Tsao Yang, Savings and Loan Commissioner, State of California.

Gerald T. Mulligan, Commissioner of Banks, State of Massachusetts.

Panel

Barbara Alexander, Superintendent, Bureau of Consumer Credit, Augusta, Maine, and The American Conference of Uniform Consumer Credit Code States.

Jim Boyle, Director of Governmental Relations, Consumer Federation of America.

Ellen Broadman, Counsel, Governmental Affairs, Consumers Union.

THURSDAY, OCTOBER 29, 1981

The Honorable Paul A. Volcker, Chairman, Board of Governors of the Fedcral Reserve System.

Panel

Walter Wriston, Chairman, Citicorp, New York City, New York.

James D. Robinson III, Chairman of the Board, American Express Company, New York City, New York.

Finn M. W. Caspersen, Chairman, Beneficial Corporation, Morristown, New Jersey.

Robert A. Beck, Chairman and Chief Executive Officer, the Prudential Insurance Company of America, Newark, New Jersey.

Roger E. Birk, President and Chief Executive Officer, Merrill Lynch and Company.

FRIDAY, OCTOBER 30, 1981

Panel

The Honorable Charles E. Lord, Acting Comptroller of the Currency.

The Honorable Richard T. Pratt, Chairman, Federal Home Loan Bank Board.

The Honorable William M. Isaac, Chairman, Federal Deposit Insurance Corporation.

The Honorable Edgar F. Callahan, Chairman-designate, National Credit Union Administration.

The Honorable John S. R. Shad, Chairman, Securities and Exchange Commission.

William J. Anderson, Director, General Government Division, General Accounting Office.

SUBCOMMITTEE ON ENERGY AND MINERAL RESOURCES

Mr. WARNER. Mr. President, I would like to announce for the information of the Senate and the public that S. 669, a bill to amend the existing geothermal leasing and permitting laws, has been added to the agenda of the subcommittee on energy and mineral resources hearing scheduled for Tuesday, October 27 at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

For further information regarding this hearing you may wish to contact Mr. Roger Sindelar of the subcommittee staff at 224–4236.

ADDITIONAL STATEMENTS

THE NATIONAL SCHOOL LUNCH PROGRAM

Mr. HART. Mr. President, I am increasingly concerned about the condition of the national school lunch program. Last week, in a letter to Members of the Senate, I released statistics indicating about 350 schools had pulled out of the program this year. According to this morning's New York Times, however, that was a conservative estimate. At this point, more than 400 schools have dropped their lunch programs and more

than 3 million children no longer purchase full, nutritionally-balanced lunches.

Earlier this year, the administration assured us participation in this important nutrition program would not drop from reduced Federal support. Clearly, that has not been the case and the school lunch program is in trouble. I have proposed restoring full funding by reducing the tax deduction for business meals and entertainment by 30 percent, and earmarking the savings for school lunches. Although this proposal was defeated as an amendment to the debt limit bill, I intend to bring it before the Senate again in the near future. We must reorder our priorities with respect to federally subsidized meals.

The national school lunch program is not a welfare program and was never intended as an income security program. It is a nutrition program that is vital to our children's education and health and important to the country as a whole. I commend this morning's New York Times article by Robert Pear to my colleagues and urge them to consider carefully my proposal to restore full funding to this important program.

I ask the article be printed in the RECORD.

The article follows:

MANY STUDENTS DECIDE NOT TO BUY MORE COSTLY SCHOOL LUNCHES

(By Robert Pear)

WASHINGTON, Oct. 20.—Students in many states are choosing not to buy school lunches at the increased prices made necessary by a reduction in Federal subsidies.

State officials estimated today that participation in the national school lunch program had dropped by 15 to 30 percent, meaning that more than three million out of 26 million children were no longer buying full, nutritionally balanced meals.

In addition, more than 400 of the 94,000 schools that participated in the program have withdrawn. Federal officials predicted last March that few, if any, schools would withdraw.

School lunches were in the "social safety net of programs" that President Reagan said would be "exempt from any cuts" affecting needy families. The budget director, David A. Stockman, and Agriculture Department officials later said that the school lunch program was wasteful because it provided subsidies to many children from middle- and upper-income families.

Reduction of those subsidies has made it difficult or impossible for some school cafeterias to meet their operating costs, local officials said. The number of students buying school lunches is down by 15 to 20 percent in Connecticut, by 20 to 30 percent in New Jersey, by 30 to 35 percent in California, by 20 percent in Wisconsin, by 22 percent in Idaho and by 15 percent in Florida, according to food service officials in each of those states.

DECLINE REPORTED IN NEW YORK

Richard O. Reed, the school food director for New York State, said in a telephone interview that the number of students buying school lunches was down from last year, but he did not know by how much.

New York City participation is unchanged because lunch prices were not increased and the strict new income-eligibility standards established by Federal law and regulation will not be enforced until Nov. 16. However, Anne B. Gennings, the food service director for a school district in Oneida County, N.Y., said that participation there was off by 20 or 30 percent.

In some places, students were already avoiding school lunches because they disliked the food. Richard E. Lyng, Deputy Secretary of Agriculture, said yesterday in an interview that any drop in participation probably occurred because "students did not like the taste of the lunch."

Congress, which sets the charge for a reduced price lunch, raised the fee this year to 40 cents, or double the amount charged in the last school year. The local school authorities establish the charge for a "full price" lunch, but are required to operate on a nonprofit basis. Congress this year established a more restrictive formula for determining whether schoolchildren qualify for free or reduced-price meals. Any child may buy the "full price" lunch.

RISING COST IN CONNECTICUT

Ann R. Tolman, director of child nutrition programs in Connecticut, said that the average charge for an elementary school lunch had risen to 75 cents from 60 cents, while the average for secondary schools, formerly 70 cents, was now 85 to 90 cents.

Gene White, child nutrition director in California, said that the average charge for a full-price high school lunch had risen by 26 cents, to $1.08.

In New York State, the average charge for full price lunches has risen 10 or 20 cents and now averages 75 to 80 cents, state officials said.

In the past, as a rule, participation in the school lunch program dropped by 1 percent for each penny added to the price of a meal. Reports from school lunch directors this year indicate that that relationship still holds.

But G. William Hoagland, head of the Food and Nutrition Service in the Agriculture Department, said that local authorities were raising the charge for a full-price lunch much more than the 11 cents they had lost in Federal subsidy for the meal.

"We expected the price to go up by 10 or 15 cents," Mr. Hoagland said. "In some places, it has gone up 50 cents a meal."

The poorest children are still eligible for free lunches. State and local officials said that the decline in participation had been most noticeable among youngsters who must pay for their schools meals—that is, children from middle- and upper-income families.

When children drop out of the school lunch program, they have several alternatives. They can bring lunches from home. They can go off outside of school to buy food. They can skip lunch. Or they can buy a few items separately, such as soup and a sandwich, with no guarantee that they will receive the recommended allowance of various nutrients included in a full school lunch.

The decrease in participation was not anticipated in the public statements of Administration officials.

TESTIMONY BY STOCKMAN

For example, Mr. Stockman, testifying before the House Committee on Education and Labor on April 29, said:

"All of these dire predictions are based on an assumption. I don't believe those assumptions have been verified. It seems to me middle- and upper-income students will stay in the program and that their families will be willing to put in 30 cents more a meal because it is still a good deal.

"If there is a major retention of participation, which we believe there will be, there will be no changes in the unit costs for running these programs, and the kind of dropout, the kind of attrition that has been predicted, in my judgment, won't happen."

The Administration sought unsuccessfully to eliminate the subsidy on meals served to "non-needy" youngsters. However, Congress did agree to reduce the subsidy, and Administration officials said they would probably seek further reductions later this year.

The American School Food Service Association, an organization of school lunch directors and child nutritionists, found in a survey of its members that more than 400 schools had withdrawn from the lunch program. In each state checked independently this week, the actual number of schools pulling out of the program was higher than reported last month to the association.

Marshall L. Matz, an attorney for the association, said that in the vast majority of school districts, less than one-third of the students were eligible for free or reduced-price lunches.

"School districts cannot afford to provide those lunches," he said, "unless the Federal Government provides some degree of general assistance in addition to the special subsidy for poor children."

HIGH INTEREST RATES + INFLATION = RECESSION

● Mr. BOREN. Mr. President, this Nation is in a recession, a recession caused by high interest rates.

After months and months of optimistic economic projections by the economic spokesmen of the administration—after months and months of refusing to heed the warnings that have been coming from many quarters, including those on the floor of this Senate, it fell to the President himself to acknowledge that the Nation is in a recession.

Indeed, Mr. President, he could have done nothing else. The signs are everywhere—the gross national product fell at an annual rate of 0.6 percent in the third quarter of this year, and at the same time the Commerce Department was reporting a sharp rise in the inflation rate during the quarter. Moreover, we are told that Commerce Department economists are saying that later revisions of these preliminary estimates will include more information from September that will probably show an even larger drop in the GNP, perhaps as much as 3 percent.

Net exports have worsened during the third quarter. Business investments in plant and equipment have declined. Investment in housing is down. Spending for housing construction during the third quarter was at a level 20-percent below that of the first quarter.

New housing starts are as low as 900,000, by far one of the lowest numbers ever recorded for that industry. The automobile industry is also in trouble. After some euphoria earlier in the year, it has become painfully evident that even the introduction of the new 1982 models has had virtually no impact on the financial health of the industry and the third quarter earnings of the major auto companies due to be released soon will publicly revive the fears of a major collapse of that industry.

Are better days coming, Mr. President? As usual, the answer of economists to that question is that they can only agree to disagree. Based on past performance, I am afraid I have to heed seriously the warnings of George L. Perry of the Brookings Institute who warned the Joint Economic Committee yesterday that the Nation's economy is entering a serious recession.

Perry predicted unemployment rising to 8½ percent and corporate profits becoming depressed.

Why has all this happened? As I said in my opening statement, the culprit is high interest rates. The same high interest rates which I have been talking about on this floor day after day after day, month after month after month. The same high interest rates that have driven personal bankruptcies in this country to record heights. The same high interest rates, Mr. President, that prevent farmers from borrowing the money they need to plant next year's crop. The same high interest that have made it impossible for young couples, or anyone else for that matter, to buy a home; the same high interest rates that have prevented business expansion—that have inhibited productivity—that have littered the economic landscape of this country with the chaotic evidence of ill-conceived, misguided and mismanaged economic policy.

What is the administration's response, Mr. President? Incredibly, more of the same. In the face of this publicly declared recession, the Chairman of the Council of Economic Advisers, Murray L. Wiedenbaum, told a group of business leaders Tuesday that the administration has no intention of proposing new policies to combat this recession. We will not push the panic button, says Mr. Wiedenbaum.

The housing industry is pushing the panic button, Mr. President. The auto industry is pushing the panic button. Farmers, businessmen, and the citizens of this country, who can't buy even home appliances on credit because of high interest rates, are pushing the panic button.

Maybe someone should tell Mr. Wiedenbaum that if he thinks he is keeping his head while all about him others are losing theirs—he probably does not understand the situation.

Steps can be and must be taken to alleviate these crushing interest rates. Most forecasters are pinning their hopes for a recovery from this recession on a decline in interest rates—a decline, Mr. President, that has been predicted by the administration for months, that has failed to materialize for months, and that has absolutely no chance of occurring, in any consistent form, until coordinated efforts are made to make interest rates come down.

We in Congress can do our part. We can move resolutely for reducing the Federal deficit and balancing the budget. We can extend Presidential authority in this area through the Credit Control Act, and we can continue to apply pressure on the administration and Federal Reserve Board to assist in this effort by a prudent loosening of the money supply. We must stop the flow of scarce credit into multibillion-dollar mergers and acquisitions which are nonproductive.

Mr. President, the facts are clear. Interest rates are remaining high; even inflation, according to the latest figures, is increasing again. Action must be taken, and it must be taken now, and it must be taken by the administration. The only alternative is a worsening of an already unacceptable economic condition.●

EXPOSING SOVIET ANTISEMITISM

● Mr. HEINZ. Mr. President, amidst reports of an increase in anti-Semitic activity in the Soviet Union, Senator CLAIBORNE PELL and I chaired a hearing on October 6 to make the public aware of continuing human rights violations and growing anti-Semitic activity in the Soviet Union. It is appropriate that we commemorate the 40th anniversary of the massacre at Babi Yar in this way by expressing our strong opposition to what has become a semiofficial policy of the Soviet authorities.

Through the testimony of experts and recent visitors to the Soviet Union, our hearings have revealed evidence of a revitalized effort by the Soviet Government to crack down on human rights leaders and other innocent people of the Jewish faith. It is imperative that we show our support for the fight against Soviet anti-Semitism as we did through this hearing, by declaring that this discrimination is a matter of great concern to all Americans.

As my colleagues well understand, it is only through constant and sincere involvement with the problems of our friends and families abroad that we may one day bring to them the realization of fundamental human rights. Through this hearing and others like it, we shall continue to fight the gross injustices committed by the Soviet Union until we are satisfied that our goals have been achieved. The Jews of the Soviet Union are fighting for the same freedoms which form the basic principles of this Nation, and it is our moral obligation to aid them in their cause.

Over the next several days, I plan to bring to Senators' attention the statements made at this hearing, I begin today with the opening statements by the distinguished Senator from Rhode Island and myself, to be followed on successive days by the testimony presented by the witnesses at the hearing.

I particularly want to express my appreciation to the National Conference on Soviet Jewry and the Jewish Community Council of Greater Washington, whose staff members, Mark Levin and Buddy Sislen, respectively, did so much to set up the hearings and make arrangements for the witnesses. Without their commitment and wide knowledge of the subject, the hearing would not have been the success it was.

I submit the statements of Senator PELL and myself for printing in the RECORD.

The statements follow:

STATEMENT OF SENATOR PELL

I am pleased to be here today and to join my distinguished colleague, Senator Heinz, in chairing this hearing on anti-semitism in the Soviet Union. This hearing, as you know, commemorates the 40th anniversary of the Babi Yar massacre.

The world stood by and watched in silence in September 1941 as the Nazis murdered over 33,000 Ukranian Jews at Babi Yar, near Kiev. The Babi Yar massacre serves not only as a symbol of anti-semitism but also as a reminder to those of us who believe in human rights and fundamental freedoms that we must not remain silent or indifferent to violations of any of these rights.

As a party to many international conventions such as the United Nations Charter and the International Covenants on Human Rights and as a signatory of the Helsinki Accords, the Soviet Union has pledged respect for human rights and fundamental freedoms and accepted obligations in these areas under international law. Nevertheless, the Soviet Union has consistently and flagrantly violated these obligations in its treatment of Soviet Jews.

Through its policies and practices, the Soviet government institutes and fosters the growth of anti-semitism. There are many indications that in recent years, discrimination against Jews, particularly in the areas of education and employment, has increased. In addition, the Soviet government has placed further obstacles in the pathway of Jews who desire to emigrate to the West and has increased harassment of those who have been refused exit permits. As a member and former co-chairman of the Helsinki Commission, I am especially disturbed by these developments. I hope that this hearing will focus public attention on these violations and show the Soviet Union that discrimination against Soviet Jews is a matter of concern to all Americans.●

STATEMENT BY SENATOR JOHN HEINZ

Forty years ago, the Nazis rounded up more than 100,000 residents of Kiev, largely Jews, stripped them naked, lined them up along a ravine called Babi Yar on the outskirts of the city, and machine gunned them into a mass grave.

Today, forty years later, a bronze monuments stands at Babi Yar. But that statue, erected only after international attention was focused on its absence, omits any mention whatever of the fact that Babi Yar is the resting place of an estimated 100,000 Soviet Jews.

Today, forty years after the Nazi attempt to physically eradicate Jews, the government of the USSR persists in its attempt to eradicate all awarness of Jewish history, culture and peoplehood in the U.S.S.R.

Today, as we gather here in freedom, the Kremlin has restricted emigration to a trickle. In August, 430 Jews were permitted to leave the Soviet Union, the lowest number in 11 years. Anticipated emigration this year will total no more than 12,000, more than 40 percent below 1980, which in turn was 60 percent below 1979.

Today, as we gather here, there is no question that the repression of Soviet Jews is the harshest of any time in the last decade.

As one who has long been deeply concerned about the Soviets' abuse of the human rights of all their minorities and their treatment of Soviet Jews in particular, one thing emerges as more disturbing than anything else. It is not the oppression of Jews who apply for visas for Israel. It is not the rejection of most of the applications, the waiting in fear and anguish for years, which is the fate of most Jews who want to leave the country which does not accept them as Jews. The ugliest part of the cruel anti-Semitism which today is part of Soviet policy is its unrelenting effort to eradicate every vestige of Jewish culture and their contribution to history in the Soviet Union. All of us—Jews and non-Jews, Americans and others throughout the free world—know this is the most evil and dangerous epidemic. Those who suffer most from anti-Semitism today are the Jews in the Soviet Union.

Just as the people of the free world did not permit the lesson of Babi Yar to be lost in history, so we will not permit Soviet anti-Semitism to escape our thorough and critical examination.

That is why we are having this hearing: To lay out for all to see the harsh reality of Soviet anti-Semitism and to expose the hypocrisy of a system which claims to be free but in reality is the most repressive on earth. We will be privileged to hear testimony today from scholars and first-hand witnesses of Soviet policy. They will place on the public record the grim reality of what is happening in the U.S.S.R.

THE BOSTON SYMPHONY ORCHESTRA

● Mr. KENNEDY. Mr. President, Boston is a city that has sustained with deep affection and pride its unique character and enduring spirit throughout its colorful history. It is a progressive city, embracing new ideas and preserving cherished traditions. It is appropriate than that America's second oldest orchestra has made its home in Boston. The Boston Symphony Orchestra has brought to Massachusetts a first rate orchestra with an exciting repertory which consistently includes innovative new compositions in addition to the time honored music of the past.

The history of the Boston Symphony Orchestra is as glorious as that of the Hub itself. Many of the world's finest musicians and conductors have been welcomed to Symphony Hall to share in the joyful experience of music. And many of the world's most beloved works have been introduced to American audiences in Boston.

On October 22, the Boston Symphony Orchestra begins its second hundred years. As the symphony readies the stage for its understandably expectant audiences, it is with fondness and pride that we recall previous performances and triumphs of the Symphony's first centennial.

Yet the success of the Symphony is not measured by curtain calls and bravos at Symphony Hall alone. The many outgrowths of the symphony, including the Berkshire Music Festival at Tanglewood, the Berkshire Music Center and the beloved Boston Pops, have added new dimensions of access and acclaim.

I think each of us in Massachusetts remembers the warm reception that the Boston Symphony received in 1979 in the People's Republic of China. This extraordinary trip by the Symphony provided an unparalleled opportunity for exchange of cultural technique and accomplishment between our countries and the initiation of new and enduring international friendships.

A leading national symphony, the Boston orchestra maintains standards and commitment to musical expression by which any symphony would be proud to measure.

It is the hard work of countless individuals that makes the Symphony such an overwhelming success. As we celebrate this milestone for the Symphony it is important to remember the people who are the Symphony—the conductor, the esteemed Seiji Ozawa, the artists, the staff, and the volunteers—each of whose contribution is essential for the successful performances presented each evening.

I join the many other patrons and supporters of the Boston Symphony in extending my birthday greetings. I appreciate this opportunity to share this exciting celebration of the Boston Symphony with my colleagues in the Senate.●

REMARKS OF R. A. WARD AT AASHTO ANNUAL MEETING

● Mr. BOREN. Mr. President, recently, Mr. R. A. Ward, director of the Oklahoma Department of Transportation, ended his presidency of the American Association of State Highway Transportation Officials by delivering a speech at that organization's annual meeting in Chicago.

Dick Ward has been with the Oklahoma Department of Transportation for 36 years and has served as director of the department for the last 9 years. He was my State highway director during my 4 years as Governor of Oklahoma, and I can say that no Governor has been better or more loyally served, nor any State's citizens, than by Dick Ward.

In reading his speech to his colleagues in Chicago, I was greatly impressed by its contents, and I want to share Dick's thoughts with my colleagues. Therefore, Mr. President, I ask that the speech be printed in the RECORD.

The speech follows:

STATEMENT OF R. A. WARD

The monthly pages fall from the calendar as the leaves fall from the autumn trees. The pages of the calendar go to enrich the annals of history, as the fallen leaves enrich the earth, the mother of us all.

Autumn means the end of summer enrichment, but it heralds the summer harvest, and a time of feasting and thanksgiving for us all.

As the old song goes, "The days grow short as we approach September," but we swing with the circle of the seasons, and the fall is not a time of sadness, but a time of rejoicing.

It has been a busy year for AASHTO, and like the harvest in the fields, it has been a fruitful year for our Association, and for Transportation.

We have experienced a change, and have been faced with a challenge.

A new climate is with us, and we have faced the challenging winds of change. As we adjust to the change, and accept the challenge, we are able to assure ourselves that the change will be for the better.

At the beginning of our AASHTO year, we posed a promise, and gave ourselves a promise . . . we could, through our own efforts, assure that the America we know and love could have a renaissance—a rebirth—or not.

We promised ourselves that this rebirth would occur.

And we can see its beginning, now.

As the leaves of autumn fall from the trees, and as the ripened fruit falls to earth, and the seed it contains germinates and takes root . . . as the root spreads and establishes its territory, and then sends out leaves and limbs, so the seeds of our determination have fallen into fertile soil.

We have seen the determination sprout into ideas. We have seen the tendrils of new concepts begin to sprout and spread.

We don't have a full-grown plant, but we have healthy beginnings.

We have discovered that in the midst of change, the precepts of the American ideal is unchanging. This is still the greatest nation the world has ever known—and Transportation is its lifeline.

We have reeled under the impact of blows from several directions these past few years. We have faced energy shortages, and struggled with the problems of inflation.

We have shuddered to the point of losing our balance—but we have noticed a counterbalance. As the Irish have a fondness for saying . . . "What we lose in the swings, we gain in the roundabouts." The loss in manpower is made up in the gains in efficiency. We can't replace men with computers, but we can assign the computers some of the manual labor.

We've had a headache—and have found a few effective antidotes. We can't say that for every pain, there is a pill. But there are countermeasures, and we are adapting to the newness every day.

Our roads and our bridges are growing obsolete, day by day. So are our rail lines, our ports and our access to airports.

Our need for new alignments is taking second-best to our need to regenerate our existing facilities. We must keep transportation moving, and keep travelers safe.

To counteract our deteriorating roadways, the load is shifting. Our citizens are in this, too, and they in their own way are taking countermeasures that will help us with our own problems.

We live in a shrinking world. During this past few months, I have been privileged to walk on territory vastly removed from the prairies I call home. Everywhere, I have noted the increased need, and interest in transportation. This is especially true in the emerging nations. They look to us. And we shall not fail to provide guidance and expertise, wherever it is needed. Yes, we live in a shrinking world, with an ever swelling need.

As the world seemingly shrinks, we discover that we have been blessed with a larger vision. We can see the needs, and at the same time we can see the interaction that the future may bring, as our shrinking world merges with the future. We can visualize more clearly the benefits of shared thoughts and visions; we have always known the benefits of shared inventions and common aspirations.

As we see with our increased vision, we notice a sharpened awareness, and a retreating apathy.

No longer do the great mass of people adopt the attitude that "the government will do it". They are becoming increasingly aware that some jobs are too big for the government—that only the people can do it.

Although the schism seems large—perhaps unsurmountable—we can see signs that the majority of the world's people are reasonable, responsible, intelligent human beings. It is the contrast between the two extremes that gives us pause.

But with our sharpened awareness, we can see the beginnings of the future * * * we can see the first faint tendrils of new green growth, as this country once again braces itself for a struggle.

These last two decades of the twentieth century will lay the groundwork for the twenty-first century. May it shine on those of us who will reach that dazzling point in time, and may it continue to shine for our children and grandchildren—the citizens of a world undreamed of today.

We look toward that future with an acceptance of change.

We embrace the challenges it will bring to us now and for the years to come.

I have not said anything about the details of the work accomplished by this dedicated group of professionals during these past months.

As we meet together, we will discuss where we have been, and consider where we are going.

It is a foregone conclusion that our direction will be forward and upward.

This past year we made ourselves some promises. Now we can build on the framework of the year just passing, and begin to practice what we promise.

America will remain the bulwark of the free world—the mainspring of the future.

When we look back, we can see the evolution of acceptance through these past few years. At one time, in the not too distant past, we were impressed when money conversations resulted in the free and easy use of the words "millions of dollars".

In a short time, we were using a casual conversation the term "billions of dollars".

As a result of Congressional action last week, we are now speaking in terms of "trillions".

It's frightening, isn't it?

To bring these words into perspective, here is a comparison that I found impressive.

"One billion seconds ago, the first atomic bomb had not been exploded.

"One billion minutes ago, Jesus, whom they called Christ still walked the dusty paths in Nazareth and fished the quiet waters of Galilee.

"One billion hours ago, men were still living in caves, and traveling paths made for them by the animals in the forests and jungles.

"But, in terms of government funding, one billion dollars ago—was just yesterday."

What of tomorrow?

We have our change, and our challenge. We will gain a counter-balance for each problem that throws us off balance, and for every headache, we will discover an antidote.

The load will shift to accommodate the changing surface. We will view the shrinking world with a longer look and a larger vision to recognize the growth of our needs.

With a sharpened awareness, we will see the retreat of apathy, the acceptance of change, and we will embrace the challenge of the future.

We have made our promises. Now we will practice what we promise.●

ENERGY

● Mr. EAST. Mr. President, I call the assembly's attention to a recent article printed by the Daily Press, the basis of which was prepared by Mr. Robert D. Hershey, Jr., of the New York Times News Service.

This article poignantly reveals how many liberal economists have severely, but honestly, erred in projecting the current price and supply of oil. These analytical doomsayers have bewailed what they judged to be scarce petroleum supplies. Therefore, they claimed, if the country was to mitigate the damage wrought by an inevitable energy shortage, the Government must perpetually intervene in the market to allocate meager supplies and subsidize alternate energy forms.

Their prescription for ameliorating an energy deficient economy, I am pleased to say, has proven to be unwarranted. The time has passed for their pessimistic prophesies of escalating prices and decreasing supplies to be fulfilled. Instead, there is a world surplus of oil with stabilized and even declining prices. For this we can thank deregulation and the efficiency and efficacy of the free market; not arbitrary Government mandates and the inefficient use of tax dollars to subsidize nonconventional energy alternatives.

Much of this surplus is the result of relatively small incremental fuel costs. This proves that a fair, representative price for the ability to purchase and use energy is the best stimulant to encourage conservation. It is reprehensibly illogical for the Government to keep a lid on energy prices below the free market level while simultaneously financially encouraging conservation and alternative fuels and incurring greater Federal deficits and inflation in the process.

There is much more that must be done, however. Hans H. Landsberg of Resources for the Future, a Washington think tank, has noted that little progress has been made in industry switching to coal as a fuel. Nuclear power is not fulfilling earlier expectations. And the politics of natural gas—the only item still under Federal price control—makes full pricing of it uncertain.

Having made these points, Mr. President, I ask that the full text of the Daily Press article be printed in the RECORD.

The article follows:

OIL SURPLUS MAY LAST FOR DECADE

WASHINGTON.—The United States appears to be on the brink of winning the war it began in the 1970s for control of its energy destiny.

The evidence is everywhere: Supplies are abundant, prices have flattened, a sharp decline in oil imports has helped put OPEC in disarray, the crisis-conceived Department of Energy is to be dismantled and analysts of every stripe are busy trying to figure out why their pessimistic projections of the past eight years were so off.

America, Energy Secretary James B. Edwards observed recently, has made major progress toward "ending the siege mentality that we have all lived with since the 1973 oil crisis."

To be sure, the United States has never lacked for energy resources. Its immense coal supplies alone are sufficient to fuel the world's biggest economy for hundreds of years. Yet, the country's recent ability to match its resources with its requirements, particularly with respect to petroleum, have been remarkable indeed.

The issue now is not when the United States will run out of oil, or how to restrict consumption. Rather concern centers on how long the current "glut" of oil will last—only to the mid-1980s or into the last decade of this century.

Despite the considerable gains in energy conservation, vulnerability has not been eliminated. The economy is still very dependent on some 6 million barrels of imported oil a day. And the biggest question facing strategists is whether there will be further major supply interruptions such as arose from the 1973 Arab-Israeli war and the 1979 Iran-Iraq conflict and what to do in such an event. These concerns were highlighted again last week with the renewed Middle East tension caused by assassination of President Anwar Sadat of Egypt.

This and other factors, such as the possibility that Saudi Arabia is likely to cut production if and when it wins price uniformity within OPEC, raises questions in the minds of some about the durability of today's comfortable situation.

As to future conservation efforts, the government's basic strategy appears to be to let energy prices continue to rise, thus inducing continued conservation. At the same time, sharp penciled corporate strategists will continue to use less energy in their plants and factories and build them to use it more efficiently.

For the consumer, analysts are expecting substantial improvement in energy use. They say the limits have been nearly reached in homeowners turning down their thermostats and putting on sweaters. But new efficiency is needed in furnaces, air conditioners and other home appliances, and in automobiles.

"It is no longer a supply-limited world we're looking at," Donald A. Gunness, an economist for the Standard Oil Co. of California, said. "We're now looking at a demand-limited environment where (oil) is being pushed back into the ground, so to speak, by consumers."

Such a forecast, not unlike those of some other major oil companies, would have been nearly unthinkable as recently as 1979 when prices doubled in the wake of the Iranian revolution. As recently as last year, the spector of gasoline lines loomed once again as fighting flared up between Iran and Iraq, once leading producers within the Organization of Petroleum Exporting Countries.

Rising prices, it is becoming increasingly evident, are doing a job that exhortation, production controls, appeals to patriotism and plain gloommongering failed to do in curbing consumption.

The reversal, in fact, is so great that at a conference last week sponsored by the Americans for Energy Independence, Philip K. Verleger Jr. of Booz, Allen & Hamilton, a panelist, predicted that the Senate Energy Committee room in which the conference was held would be used in coming years to discuss ways to protect investments being made in alternate fuels.

"The current oil surplus could last five, 10 years, and perhaps longer," Verleger said.

Economists now generally concede that they woefully underestimated the effect that the sharp price increases of the 1970s would have on the nation's demand for oil.

In November 1974, the Federal Energy Administration's "Project Independence" report contained a table with five projections of total U.S. energy demand for 1985. They ranged from 102.9 quadrillion BTU's, or quads in energy parlance, to 124.9 quads, compared with the 72.8 quads the United States actually consumed in 1974. By 1980, the nation's consumption had climbed to only 76.2 quads.

At the time, it was assumed that there was a lock-step relationship between energy use and the gross national product, a belief that now looks pathetically naive, for the number of BTU's per dollar of GNP fell last year to 51,500 from 58,300 in 1974.

What's more, according to Roger W. Sant, president of Applied Energy Services Inc., of Arlington, Va., a new company that is going into the business of installing energy-efficient equipment for its clients, this decline in the energy-GNP ratio now "seems to be picking up, not slowing down" at all.

"Most of the doomsayers just underestimated the individual response to prices," Sant said. "I would not be surprised by a further halving (of the ratio) over the next 20 to 30 years."

What helped fool economists was that after the first surge in oil prices in 1973–74, energy habits in the United States changed very little. Oil was still so cheap that after the initial shock of the Arab embargo wore off, big cars made a strong comeback and the first generation of more fuel-efficient cars was virtually unsaleable.

Then followed nearly five years in which world oil prices, though rising nominally, actually declined slightly after adjusting for inflation. But in 1979, panic buying in the spot market allowed OPEC to raise prices far more than the disappearance of Iran as a major exporter would have otherwise caused. This time consumers got the message.

"Prices doubled again and they really began to bite," William W. Lewis, then an assistant secretary of energy, noted. "Everybody began to try to make adjustments."

Only this year, however, have the effects of price-induced conservation combined with world economic sluggishness and such legislative measures as automobile gas-mileage standards have caused an almost complete turnaround in the way many specialists are thinking about the energy future.

Conservation, meeting a more efficient use of energy and not just doing without, is now seen to pay big dividends. Economies can grow even as they reduce energy use. The world now seems to have plenty of natural gas as well as coal and probably more oil than had previously been recognized.

In addition, OPEC, which the U.S. government in 1974 said might have difficulty maintaining a price of $7 a barrel, may have

finally overshot the limit with current prices of $32 to $40.

"The OPEC price is now so far out of the competitive range," Sant said, that "if I were in OPEC's shoes, I'd think I'd pretty well blown it."

U.S. imports, for example, averaged only about 5.7 million barrels a day last month, down from 8 million in September 1979, and imports so far this year are running 21 percent below 1980 levels if purchases for the Strategic Petroleum Reserve are excluded.

Such reductions, emulated to a lesser extent by other Western countries and Japan, has major implications. Between the third quarter of 1978, when the price of oil was around $12 a barrel, and the end of this century, world demand for OPEC oil is now estimated by Standard of California to be 137 billion barrels less than if prices had not risen.

This means that 30 percent of OPEC's current reserves of 434 billion barrels, an amount equal to 14 Prudhoe Bays, would remain in the ground for use in the 21st century.

Much of today's brighter energy picture, however, reflects relatively stagnant business conditions and the fact that very high interest rates—not normally an accompaniment of recession—has prompted oil companies to reduce their swollen inventories.●

CHICANO EDUCATION PROJECT

● Mr. HART. Mr. President, the Chicano Education Project was started 8 years ago in Denver, Colo. Today, it is the largest, privately funded, nonprofit Hispanic organization in America working exclusively in the area of education.

I am proud of the Chicano Education Project and the work of these Coloradans in helping Chicano children get an education.

Some of the accomplishments of the project are outlined in an October 5, 1981 Newsweek article. I request it be printed in the RECORD.

The article follows:

CHICANOS IN FERMENT

Like many Chicano women in Colorado's rural San Luis Valley, Sadie Roybal, a shy young housewife, was once "afraid to do anything." But four years ago she vowed that her own two children would not drop out of school as she had, and there was no holding her back. She organized a group of chicano parents who seized control of school committees in the heavily Hispanic district, preached accountability to teachers and superintendents and eventually managed to elect a sympathetic majority on the school board. Even though the parents have suffered reverses in the last year—notably the repeal of the state's bilingual-education law—Roybal is determined to carry on. "I was feeling really frustrated for a while," she says. "But I'm not going to let this system get the best of me."

Roybal's progress parallels that of the group that provided much of her information and inspiration. The Denver-based Chicano Education Project, founded eight years ago, achieved an early success with the passage of Colorado's 1975 Bilingual and Bicultural Act, one of the country's most comprehensive bilingual-education laws. Last June triumph turned to defeat as the controversial act was repealed. But the CEP has worked to reconsolidate its support from the ground up, educating chicano parents about the school system. That, in fact, was the idea from the beginning, when Denver native Gilbert Cisneros, now 38, met Alabama-born civil-rights organizer Bill Rosser, 36, and they set out to change the circumstances that even today make the chicanos, who are 15 percent of the Colorado school population, twice as likely as Anglos to drop out and three and one-half times as likely to be put into special-education classes. With funds drawn almost entirely from private foundations, the CEP now has a fifteen-member staff whose primary concern is getting parents involved. "Unless you wake up and find out that you must participate, nothing's going to happen," says Carmen Kelly, a chicano parent who attended a recent CEP workshop.

That community-level approach was crucial to the development of the bilingual law. The legislation required school districts with non-English-speaking students to offer full-time bilingual instruction from kindergarten through third grade for students who wanted it. CEP staffers helped draft the bill after seeking recommendations from teachers, administrators and parents—many of whom helped lobby for the bill's passage. "Hispanic parents have traditionally never been involved in the legislative process," says Cisneros, "and all of a sudden they were coming to the capitol in carloads." Friends in high places didn't hurt. Ruben Valdez, then state House Speaker, and state Sen. Paul Sandoval led the fight in the legislature; they both serve on the CEP board of directors.

Eventually, however, the sweeping scope of that victory led to a backlash from those who favored a more limited program. "It alienated a lot of people," says state Education Commissioner Calvin M. Frazier. One point of contention was that the act was designed to give bilingual lessons even to English-speaking students who were "influenced" by Spanish culture. Frazier says that a majority of children in the program spoke mostly English; according to CEP, 40 percent were Anglos whose parents wanted them to learn Spanish. A state-requested outside evaluation last year found the program effective for both Anglos and chicanos, but the legislature repealed the act and replaced it with one that provides only short-term help for students whose first language is not English.

BITTER DIVISIONS

Despite the repeal, the bilingual act has a continuing legacy. One of its key provisions called for parents to monitor bilingual programs in each district, an activity that soon led to their involvement in other issues, such as testing and budgets—and in school-board politics. The effect is nowhere more obvious than in Center, Colo., a town of 1,600 in the San Luis Valley. "There's a tradition here of not educating the Spanish community because they are cheap labor," says Steve Bobst, the superintendent who arrived three years ago, when some chicano kids were still punished for speaking Spanish. Adeline Sanchez, who worked for a year as a bilingual aide in the Center schools, tried to do something about the treatment of chicano children. She joined the bilingual committee and helped wage a battle to redraw school-board district lines, which had made it difficult for a chicano to be elected. She now sits on the board. But such changes only added to the bitter divisions in Center, for which many Anglos blame CEP. "They have taken welfare people and put them in these committees and used them," says Robert Felmlee, former school-board chairman. "I think it's a revolutionary movement."

The project's other major initiative may prove just as unpopular. CEP is the force behind a 1977 lawsuit charging that Colorado's school-finance law is unconstitutional because it allows significant discrepancies in educational expenditures between wealthy and poor districts. A district-court ruling supported the plaintiffs, but the state appealed, arguing that such differences have been narrowed in good faith. Earlier this month the state Supreme Court heard final arguments on the case, and a ruling is expected by next spring.

In the meantime CEP has plenty of other causes to champion. It has prepared a model "Educational Quality Act," which seeks to hold teachers and administrators as well as students accountable to minimum-competency standards. And some staffers have moved on to develop a Center for Hispanic School Board Members, an attempt to build a national network to address educational issues. All the while, field organizers like Jennie Sanchez in Center continue to till the grass roots. "We're trying to get better education for our kids," she says. "Once people take a stand, they never go back to the way they were. That's where the hope lies."●

REVIEWING IMPLEMENTATION AS THE MADRID FOLLOW-UP MEETING RECONVENES

● Mr. DOLE. Mr. President, on October 27, the Madrid meeting of the Conference on Security and Cooperation in Europe will reconvene after a recess of 3 months. Work will resume on those problems still dividing the participants—primarily military security and human rights issues—which nearly a year of negotiations have been unable to resolve. This review conference, like the one that preceded it in Belgrade 3 years earlier, was called to monitor the progress made since the signing of the Helsinki Final Act in 1975. It was also the hope of the signatory nations that further progress could be made in the areas of security and reduction in tension in Europe, human contacts and rights, and in the free flow of ideas and information among all the countries pledged to the principles of the final act.

The U.S. delegation, ably headed by Ambassador Max Kampelman, is returning, together with its NATO allies, determined to seek adoption of a substantive and balanced concluding document by mid-December. The continuation of the already protracted negotiations beyond that time, it is widely believed, would have a very negative impact on the future of the CSCE process by raising legitimate questions as to the efficacy of the entire enterprise. A continued stalemate might indicate that East and West are unable to reach any substantive agreement of benefit to both sides, or that either side has a real interest in continuing the process begun 6 years ago.

While the attainment of substantive results, balanced in progress between both security and human rights concerns, is a goal all signatories are striving for, the United States in particular should not lose sight of the fact that the review of implementation is still one of the primary functions of the Madrid meeting. In recent months as negotiations on the concluding document have continued, there has been the danger that this all-important aspect of Madrid would be neglected or at least reduced in significance. Without a review of compliance with and progress from the original document, future statements of intent lose their forcefulness.

As the negotiations enter what is hoped will be their final stage, it is time to redress this imbalance. When the deliberations in Madrid are renewed this

week, the West should reopen the review of implementation by addressing forcefully and in detail the long list of continuing Soviet and Eastern bloc violations of final act provisions.

EASTERN BLOC CONTINUES TO VIOLATE FINAL ACT

Casting a pall on the entire proceedings at Madrid have been blatant violations of Helsinki principles, marked by the continued arrest and imprisonment of Helsinki monitors and other individuals in the Soviet Union and Czechoslovakia, in particular, and by the continued occupation of Afghanistan by the Soviet Union. The situation is all the more unacceptable when one considers that these violations continue while negotiations on provisions designed to improve human rights implementation and to advance the cause of security and cooperation in Europe take place in the conference halls at Madrid.

We cannot permit Madrid to be a forum for the negotiation of empty promises, which can be ignored with impunity. The Madrid meeting must result in the negotiation of meaningful, substantive provisions in the human rights area which can truly encourage the improvement of human rights implementation. Only such measures can honestly be said to be an effective balance for agreement to measures in other areas of the final act, notably in the security field. While a post-Madrid security forum dealing with militarily significant, verifiable and politically binding confidence-building measures (CBM's) applicable to the entire continent of Europe, to the Urals, would be a great advance for Western interests in this field, its utility in advancing security and confidence in Europe would be significantly diminished without counter-balancing and effective new human rights provisions.

As Vice Chairman of the U.S. Delegation to the Madrid meeting, I would like to wish those members of the delegation who are returning the best of success in the intensive, difficult negotiations ahead. I am sure that the delegation will continue to acquit itself in the effective, decisive manner which has marked its participation in this meeting from the very beginning.●

A REPORTER'S TALENT AND THE NATIONAL DEBATE ON ACID RAIN

● Mr. MOYNIHAN. Mr. President, one of our Nation's fortunes is our vigorous and dedicated free press. So often it is the best of our country's journalists who shape our debates here in Congress by providing us essential information for reasoned and informed decisions on matters of public policy.

One of these journalists, Mr. President, is Alan Emory, the Washington correspondent of the Watertown (N.Y.) Daily Times. Mr. Emory is in every sense the reporters' reporter—a talented and insightful writer who is able to frame the large issues of national concern with relevant accounts for those who will encounter the consequences at the local level.

Alan Emory has offered us all a series of articles on a most vital issue of national—indeed, international—concern. For some time, we have been learning more about the devastation of our pristine lakes and groundwater through a phenomenon known as "acid rain." Though we have documented the effects, and traced the sources, there have been few accounts as thorough as those written by Mr. Emory recently in the Daily Times. Mr. President, I have now introduced legislation, S. 1709, to establish a national program for controlling acid rain and I have held hearings on this matter, so I feel I can state with reasonable confidence that Mr. Emory's fine articles are a valuable contribution to our work here in the Senate.

This is, I should note, not surprising. Alan is dean of the New York press corps here in Washington, and as I read in the New York Times last Friday, the first sponsor of informal interview sessions between reporters and Washington officials—a practice Alan started in 1959 and which has since been imitated by others.

Mr. President, I ask that the series of articles written by Alan S. Emory for the Watertown Daily Times, September 19–24, 1981, on acid rain be printed at this point in the RECORD.

The articles follow:

ACID RAIN: PART I—CANADA BITTER AT U.S. "APATHY"

(By Alan Emory)

MUSKOKA LAKE, ONT.—The Convair 640 made its way up the Georgian Bay shoreline, moving over many of the 30,000 islands and on to Killarney Park, about 160 miles northwest of Toronto.

The waters of the lakes in the park were sparkling in the sunlight, but their apparent beauty was deceptive.

The lakes of Killarney are dying.

They are dying, and more than 20,000 Ontario lakes are in grave danger, while another 28,000 are threatened.

More than 200 lakes in the Adirondacks are dying or dead, with another 2,000 threatened by the same villain—acid rain.

"A real and present danger," Canadian Environment Minister John Roberts calls acid rain.

Canada and the United States "are in this mess together," says James Bruce, the deputy minister.

"How much can the system take?" asks Garth Bangay, a Canadian scientist.

Marguerite Stimpson of Port Sandfield has found only "one or two" bees on her apple trees instead of the usual dozens. She blames acid rain.

Rolf Uhde sees rainbow trout dying on his Milford Bay fish farm within hours after a big rain, and a bluish tint colors the water.

"I'm terrified," says David Gronfors, the 39-year-old proprietor of Billie Bear Lodge near Huntsville, just seven miles from Algonquin Park.

"No matter who is doing it," says Bill Ellerington, a veteran of the Ontario Natural Resources Department, "we shouldn't let them spoil the country."

Canada argues that it is acting to combat the specter of acid rain, while the United States is dragging its feet. The unhappiness surfaces readily in the rhetoric of public officials like Mr. Roberts and Ontario Environment Minister Keith Norton, but it is reflected also in the observations of the scientists, sportsmen, resort operators and outfitters.

Their concern with the environment is economic as well as ecological. Billions of dollars are at stake, in both sport fishing and forestry. The waters already have been seriously affected. Buildings are showing signs of deterioration, and vegetation may be next.

To stir up public opinion. Canadian officials are traveling around the United States making speeches, and the governments—both federal and provincial—are sponsoring seminars and trips to the affected areas for congressional aides, lawmakers and representatives of the news media.

The timing, however, may be somewhat less than ideal.

U.S.-Canadian relations are as touchy as they have been in at least a decade, and Canadian hopes for action on the environment have been confronted with American irritation over Canada's plan to reduce American ownership of energy resources north of the border from more than 78 per cent to 50 per cent.

There is talk of retaliation on both sides, and the White House has been floating stories of hostility between President Reagan and Prime Minister Trudeau.

"We are not asking the U.S. to do us a favor," Mr. Roberts told a dinner for visiting journalists in Toronto Tuesday. "U.S. interests are as much, if not more, concerned than ours. It is clear we have a joint, common problem springing from activities in both countries."

Canada says most of its acid rain comes from the industrial Ohio valley, and that some of that then turns around and floats back over the Northeastern United States, including the Adirondacks. Canada also concedes that some of the U.S. acid rain problem stems from Canadian industry, such as the Inco and Falconbridge nickel smelters at Sudbury, Ont.

An aerial survey of a major threatened area of Ontario invariably includes flying right into the thick plume of sulphurous emission from the giant stack at Inco's Sudbury plant.

Mr. Roberts characterizes acid rain as "the most important and outstanding difficulty between our two countries." He said there will be "tremendous disappointment" if the Reagan Administration and Congress fail to heed pleas for action, and he warns that an "extremely deep and extremely bitter" Canadian view of the United States could lead to "consequences" he declines to predict.

Some Canadian officials shudder privately at such rhetoric because they view it as constituting a threat on which Canada cannot make good.

ACID RAIN: PART II—TOURISM, FISHING THREATENED

(By Alan Emory)

HUNTSVILLE, ONT.—"I feel totally helpless," says David Gronfors.

The 39-year-old Gronfors operates Billie Bear Lodge here and a series of camps in Ontario and Quebec, flying fishermen to remote lakes to try their luck.

It is a $700,000 investment, including a new $150,000 helicopter and two pontooned monoplanes, and the owner, who wanted to establish a business his family could take over, is "getting a little frightened by what I see now."

What he sees—or, rather, what he does not see—is fish.

Mr. Gronfors engages in his own fish stocking program in headwater lakes, flying the rainbow trout—4,000 of them eight inches long this year—into the lakes in the spring, but "I don't think they're making it through the winter."

The reason, he suspects, is acid rain.

"I see it on the paint on my airplane," he says, "and there is scum on the windshield of my car. The vehicles are rusting up faster, and the trend seems to be worse." White powder appears on aluminum surfaces.

There was a big rain a few days ago, and

Mr. Gronfors doesn't think there has been a single bite since.

"I don't know what to do," says the fisherman-pilot, who has had his place eight years.

He is thinking of putting lime in the lakes, but adding anything could upset the environmental balance and no one knows what would happen to fish in the long run.

Mr. Gronfors sampled 20 lakes for the Province of Ontario recently and not one had a pH (acidity) rating of more than five. (Anything less than 5.5 means big trouble for fish.)

Business was good this year, he concedes, but "I can't believe the number (of fishermen) who didn't catch fish."

Jack Hurley, the 31-year-old co-owner of Algonquin Outfitters on Blue Spruce Lake, says "everyone is talking about" acid rain, and he is on the receiving end of questions when he visits sportsmen's shows in the United States. Many of the questions involve the threat to fish in the Adirondacks, where more than 200 lakes are dead or dying because of acidity.

"Next to nuclear war this could be the most depressing man-made disaster of all time," Mr. Hurley says.

He is depressed already about the prospect of losing loons and great blue heron, which feed on fish, and if the acid rain situation continues, he says, "it will definitely affect our business, especially in the spring."

Mr. Hurley says he no longer is interested in going to Killarney Park "because they say everything is dead. I wouldn't want to travel in an area where everything is dead underneath. It's a shame. These are unique lakes."

Mr. Hurley and Mr. Gronfors resent what they see as American indifference to the problem and feel that President Reagan "doesn't care enough."

Mr. Hurley doubts anything meaningful will be done and adds, "By the time they do something the lakes will be gone."

Not everyone is so gloomy.

Jack Hayden, who owns Blue Spruce Inn only about three miles from Algonquin Park, says the fishing is the best it has ever been over the last three years. He concedes that if things get really bad that could "wipe our business out."

Margurite Stimpson came to nearby Muskoka Lake the other night with leaves from bushes and trees that looked as if some one had burned cigaret holes in them, but the holes had appeared after recent rains.

The bees aren't building any nests on the Stimpson property any more, and bats are flying around in the daylight looking for mosquitoes that apparently are being killed in breeding pools.

Acid rain, says Mrs. Stimpson, and it has been getting worse this year. She adds, "I never saw anything like this before."

Her husband, Jack, says the crayfish he used to see in nearby streams have disappeared and he hasn't seen any perch recently. "I don't know what happened to them."

"Summer visitors are asking, 'What happened to our bullfrogs?' " he adds. "I wonder what's going to happen to our grandchildren."

Owners of Ontario swimming pools put in chemicals to neutralize acidity, but find after a rain they must do the work all over again.

Hugh MacKenzie, chairman of the Muskoka Lake District, fears it will be difficult to get people to invest in the region and it will be "faced with an impossible situation."

Then there is Rolf Uhde, a bearded native of Germany, who has a trout farm at Milford Bay, about 140 miles from Toronto, and who sees his fish dying, especially in the wintertime, of high-impact acidity.

The summer soil acts as a buffer, he says, but when there is a severe rain the fish die within a few hours after swimming around sideways trying to "escape."

Mr. Uhde never worries about a slow rain because the ground absorbs enough of the acidity, and he didn't bother about the acid rain problem until a couple of years ago when he went into big production.

Then he found acid rain—"no question about it"—killing hundreds of fish that died at the bottom of a pond and stayed there for days or weeks before they floated to the surface.

ACID RAIN: PART III—ACID SNOW POISONS LAKES

(By Alan Emory)

DORSET, Ont.—The black waters of Plastic Lake lap at the shore with no sign of their lethal potential.

Scientists have brought cages of fish to the lake and put them in the water, only to have the fish die within hours.

Even the algae has changed form.

The culprit appears to be acid rain.

Canada is spending about $11 million to fight acid rain this fiscal year, and Ontario another $9 million. This is close to what the United States has budgeted to meet the problem.

Although "rain" has been the focus of attention, the more serious problem is snow, especially when it melts in the spring.

The ground is then frozen hard, and its effectiveness in absorbing the moisture and acting as a buffer for the lakes is limited. The melting snow releases the acid waters in large amounts, increasing the impact on the lakes into which they flow.

The scientists measure the acidity regularly, through weirs fitted into streams as they enter lakes; through fields of collecting stations, which look like an odd assortment of pipes and screens; through laboratories, many of which are now housed in trailers but will be moved into more permanent structures.

In the 11 days between Aug. 28 and Sept. 7, experts measured an extraordinary rainfall at 10 percent of the annual depth of precipitation here, and it was so acid—the mean pH factor was about 3.7—that it accounted for about 20 percent of the normal annual load of acid.

Garth Bangay, regional director for lands of Environment Canada, the national agency dealing with acid rain, says key areas of Ontario have four times the ideal sensitivity to polluting acids and twice the sensitivity that would provide adequate protection.

In addition to the pollution carried north from the United States, he says, there are the Friday afternoon highway "parking lots" of cars moving north from Toronto and other heavily populated areas, and emissions from industrial plants like Inco, the former International Nickel Co., and Falconbridge Nickel at Sudbury, Ont.

The problem now has stretched beyond Ontario, however, and is being felt even in the Maritime Provinces. Rivers that were filled with salmon 20 years ago have none today.

Ontario water resources specialist Tom Brydges says that for every 100 pounds of sulphur dioxide that rises into the air, two-thirds comes back on land, the rest going over the ocean. Even if the emissions headed for the ocean were eliminated, the land would still be in trouble, he says.

Some of the acidity is neutralized by alkaline dust in the atmosphere and falls to earth harmlessly. The atmosphere, however, changes periodically: its content is beyond control.

Inco, under heavy government pressure, is reducing its sulphur emissions sharply, from 7,000 tons a day in 1969 to 2,500 now, and the figure will reach 1,950 by next year. Inco and Falconbridge are trying to sell off the sulphur in the form of sulphuric acid, but the market is limited.

Inco officials point out that even when their plant went on strike recently, there were still high readings of acidity in area lakes.

The Sudbury area presents a grim sight from the air. Where trees were cut down, the pollution has blocked regrowth and the soil has become too acid for much rehabilitation. There has been considerable erosion, and in places the rock is black. Trees look as if they were growing out of slag heaps.

Inco has added lime to a few sections, and they are beginning to turn green.

Liming can neutralize acidity, but it can also upset nature's balance, and adding large amounts of lime to streams and lakes can affect the fish populations in the long run.

Scandinavia, hard hit by acid rain, is spending $50 million a year on liming. A small liming program is under way in Quebec.

Dr. Bangay says a two-thirds reduction in the acid rain fallout is essential.

Alex Manson, a national air pollution expert for the Canadian government, says it would be practical to reduce sulphur emissions by 7 million tons over the next decade in the United States. That might cost $2.5 billion a year, he concedes, but it would mean only a small increase in utility rates, and very little of that would be in East Coast states.

The U.S. now accounts for about 20 million tons a year.

Dr. Brydges, a cautious man, declines to describe the situation as a "crisis," but, he adds "There is no time to waste."

ACID RAIN: PART IV—HEALTH WARNINGS SPREADING

(By Alan Emory)

WASHINGTON.—Acid rain now may be threatening human health.

Sweden has warned citizens to avoid consumption of moose and elk, which have eaten vegetation high in metal content absorbed from water.

Ground water, as well as surface water, is being affected.

Keith Norton, Ontario's environment minister, just back from a visit to Scandinavia, says that concentrations of cadmium, mercury, copper and lead had reached toxic levels for infants at a Swedish hospital that relied on an acidified body of water for its needs.

"In at least three documented cases," he said, "three kidney patients died from a high aluminum content in their bodies, which they received from the water used in the hospital's dialysis machines."

For areas of Canada and the United States sensitive to acid rain, he says, the implications "could be staggering." He notes that scientists have documented heavy metal intake by fish from lakes with high acidity.

So far the "jury is still out" on the impact on human health in Canada and the U.S. according to Canadian government scientist Garth E. Bangay. However, he warns, the level of some metals in drinking water supplies has exceeded acceptable standards, and metal concentrations in fish are also high.

Water resource specialist Tom Brydges notes that fish in some Adirondack lakes "are gone." The U.S. is committed to a 10-year study of acid rain, but Ontario's Dr. Brydges warns that it will be another 10 to 15 years after that before any abatement programs can be in place, and "considering what we have now," key parts of the environment "will be gone."

The Adirondacks are worse off than Canada, he observes, although "for sheer potential economic loss, Eastern Canada holds the record."

He says that, considering the 2,000 high-elevation Adirondack lakes, 200 of which are now "dead," the threat to the lower lakes and the existing and potential damage to buildings, "New York may have a lot more to lose."

At an Environmental Protection Agency hearing on interstate pollution here in June, Ontario experts testified that sulphur in rain

had exceeded predictions in St. Lawrence, Oneida and Onondaga Counties and matched the prediction in Essex County.

They attributed between 4 and 6 percent of the Adirondack acid rain to emissions from nickel plants in Sudbury, Ont., in 1979, 6 to 14 percent to other Canadian sources and the rest to U.S. sources, mainly industrial and power plants in the Middle West, Kentucky and West Virginia.

Canada concedes that it is impossible just to turn off the power plants, but it maintains some positive steps must be taken.

Experts cite potential losses to Canada's billion-dollars-a-year sport fishing industry and its $22 billion forest industry and says damages to U.S. buildings from acid rain could reach $2 billion a year.

Sixty percent of Canada's forest industry is in the East, where the impact of acid rain is the greatest.

Canada concedes it is probably responsible for 15 percent of the acid rain in the Northeastern U.S. but says the U.S. is responsible for at least half the acid rain in Canada.

Overall, it appears that U.S. emissions have leveled off. In Canada they seem to have declined.

What rankles Canadians is the insistence of the U.S. on further study of the problem.

"A nice copout," comments John Cooley, a Canadian fisheries and ocean expert. "The cost of a study is an absolute pittance when compared with doing something about it."

"We are not prepared to wait and lose on the scale of Scandinavia," says Dr. Bangay.

The problem has intensified with the switch of American plants from coal to oil, a process started in the Carter Administration.

However, Mr. Norton says American groups have been cooperative, and Ontario views New York State "as an ally." He says the feedback on Canadian testimony before an Albany hearing conducted by Sen. Daniel P. Moynihan, D-N.Y., last summer was very positive.

The fact that 90 percent of the acid that falls in rain and snow is neutralized does not help the situation much.

"Once a lake is dead," says Dr. Brydges solemnly, "the game is over. The biological system is beginning to give way."

He points to odd balls of algae forming in dying lakes and says. "It is a forerunner of a biological disaster to follow."

ACID RAIN-V—POWER PLANT EMISSIONS LINK TO ACID RAIN "OVERWHELMING"

(By Alan Emory)

WASHINGTON.—The circumstantial evidence linking power plant emissions to production of acid rain is "overwhelming," according to a research arm of the National Academy of Sciences.

It finds "clear evidence of serious hazard to human health and to the biosphere," and if industrial plants continue pouring sulphur and nitrogen oxide into the air the situation will become "extremely risky."

"We can't wait for 10 years of research," says a top Canadian environmental official. "We have to take some action and take it now. We can reach an international agreement on intelligent action just as we did on the Great Lakes, but the agreement must be underpinned by domestic legislation and action."

Among the moves that can be made are putting better "scrubbers" in the plants that throw the toxic emissions into the air out of huge stacks, washing coal to get rid of more sulphur, which would add about $15 a ton to fuel costs; changing to low-sulphur coal or blending high and low-sulphur coal, using limestone burners, though this may not be commercially feasible before 1990, and a type of combustion using finely ground-up coal, but that is not likely before 1995.

In the meantime, Canada has been demanding "action now," in addition to long-range research, and Canadian officials have expressed increasing unhappiness about the failure of the Reagan administration to show a sense of urgency.

The steps that Canada would like Washington to take quickly are:

Progress on last year's U.S.-Canadian memorandum of intent that serves as a preliminary to an air pollution control treaty. This would involve strict enforcement of existing U.S. laws and regulations, rather than the relaxation of restrictions that the Reagan administration has been indicating will take place.

So far the Reagan moves have run contrary to the spirit of the memorandum and earlier U.S.-Canadian talks, Canada maintains. It feels the action it is seeking in Washington is not "enormous, precipitous or costly."

Revival of working group action on drafting the clean air treaty, Canada recognizes the change of administrations in Washington slowed things down, but it wants negotiations started again, "seriously and soon," as one official put it. Washington has shown no signs of responding.

Congressional approval of a strong clean air law. Administration explanations of "streamlining" pollution curbs sound suspiciously like weakening existing safeguards to Canada, which says the science of controlling dirty air is more developed and can be used to bring the law up to date.

"It is cheaper to export pollution than to control it," one Canadian official observed wryly.

A summary of a report of a National Research Council committee on fossil fuels rejects utility industry arguments that it is not responsible for acid rain.

It cites acidified lakes where geological factors "cannot be implicated" and warns that the number of affected lakes will more than double by 1990 and that they will be larger and deeper.

"There is little probability that some factor other than emissions of sulphur and nitrogen oxides is responsible for acid rain," the report says.

It cites the widespread dispersal of toxic metals by burning coal and crude oil, smelting, municipal incineration and cement manufacture. The metals include mercury, lead, zinc and cadmium.

In addition, acid rain releases metals already in the soil so that they flow more easily into nearby lakes and streams, where they are consumed by fish.

The report warns that "there is no satisfactory technology for controlling large-scale emissions of mercury to the atmosphere."

It finds "a much more complete knowledge of the causes and consequences of acid rain" than for other pollutants, but even with acid rain, it says, the information is inadequate.

"Pollution of the atmosphere, even with trace amounts of toxicants, could have serious consequences," the report says.

Experts are calling for a National Center for Ecology and Environmental Science comparable to the center for atmospheric research and the Geological Survey.

Meanwhile, however, the report says the "picture is disturbing enough to merit prompt tightening of restrictions on atmospheric emissions from fossil fuels and other large sources, such as metal smelters and cement manufacture. Strong measures are necessary . . . to prevent further degradation of natural ecosystems."

It warns of "slow, nearly undetectable increases in a multitude of extremely toxic substances" and calls for long-term monitoring and forecasting.

As an example of what can be done, Canadians point to plans for the Ontario Hydro-electric Power Commission to reduce its plant emissions by 43 percent by 1990 regardless of electrical demand.

"The only solution," says Ontario Environment Minister Keith Norton, "is international abatement."

He criticizes Reagan administration officials for dismissing Canadian concerns "as unfounded and our request for action as extremist," and he cities drafts of a new clean air law that would lead to more pollution in the U.S.-Canadian airshed.

The Reagan position, he says, is "bloody close to an act of hostility on a friendly neighbor."

Experts say engineering technology can now control the major components of acid rain, but they also argue that in the long run only decreased reliance on coal or oil or improved control of pollutants can reduce the risk of food shortages, impaired health and a damaged environment.●

COMMEMORATING HUNGARIAN FREEDOM FIGHTER'S DAY

● Mr. DOLE. Mr. President, tomorrow, on October 23, we in the United States commemorate the valiant fight for freedom in Hungary by those who, exactly 25 years ago in 1956, close to cast off the yoke of Soviet repression in exchange for an opportunity to freely choose the conditions under which they would live.

In a gradual process, presaging the similar Prague spring of 1968 and so different from the present electric events in Poland, Imre Nagy became Prime Minister of Hungary in July 1953, and initiated a policy of liberalization away from the closed, repressive Soviet model thrust upon Hungary after World War II. He chose to end forced collectivization, end forced development of heavy industry in exchange for consumer goods production, and promised to release those citizens who had been imprisoned for their political views.

His Soviet bosses could not support this program of increased freedom and removed him from office in the spring of 1955, to be replaced by the puppet Rakosi, who was intensely disliked by the people.

After a short rule under Rakosi which lasted only until July 1956, Erno Gero, Rakosi's second in charge, took over the reign of repression and carried out the tasks of his Soviet master with even more diligence. But that short period of relaxation under Nagy had created a burning desire among the Hungarian people to be free of political repression, free to determine the destiny of their lives and their nation.

A COALITION FROM ALL WALKS OF LIFE

A few months later, on October 23, what started as a simple procession of students determined to lodge a petition of redress from the grievances inflicted upon them and their country, ended with a bloodbath when the regime ordered the police to fire into the crowd. That crowd, which had grown to a significant size, was composed of citizens from all walks of life.

The Hungarian Army joined the new revolutionary movement, distributing arms to the people. Peasants reoccupied their confiscated lands, political prisoners were freed from prisons, and Imre

Nagy was called on by the people to form a new government. In short order, Nagy formed a coalition composed of the three major parties, the social democrats, the shareholders, and the National Peasant Party and supported by the Catholic Association led by the late Cardinal Mindszenty.

On November 1, 1956, the new Hungarian Government renounced its prior commitment to the Warsaw Pact. Three days later, the Soviet tanks rolled into Budapest and other cities of Hungary and quickly ended any organized military opposition to the new Soviet agent, the self-proclaimed Communist leader, Janos Kadar. Kadar announced the formation of a Revolutionary Peasant-Worker Government composed solely of Communists and, with the help of Soviet troops, soon controlled the country.

Mr. President, 25 years later, we still find the Soviet Army maintaining a force of many thousands in Hungary. And, also, just as strong, the people of Hungary continue to crave what is due them as a people: self-determination, freedom to live where they choose, and how they choose.

We commemorate today those who died fighting for a cause and ideal so close to the hearts of all Americans: freedom. We honor those who continue that fight both from within and outside of Hungary.

This week the Congress has passed a joint resolution which the Senator from Kansas had the honor of sponsoring, in recognition of this historical event. It proclaims October 23 as Hungarian Freedom Fighter's Day, setting aside 1 day in the course of a year as a memorial to those who died in 1956—a small, but significant gesture from the American people to those in Hungary who maintain a constant vigil for that day when Hungary will be able to proclaim its independence and liberty.●

SOCIAL SECURITY

● Mr. DOLE. Mr. President, on October 15 this body agreed to a number of social security amendments designed to help insure that the old-age and survivors retirement fund could meet benefit payments next year. In addition to providing this measure of security the amendments also allowed for a nearly complete restoration of the minimum benefit for those currently on the rolls. These changes were necessary and important, but at the time we considered them, and again today, the Senator from Kansas would like to remind his colleagues that they should be under no illusion that we have taken care of the long-term social security problem or even insured the solvency of the system through the 1980's. This concern is heightened by the very recent release this week of revised estimates on the Health Insurance trust fund outgo.

As you will recall the social security amendments included a tax reallocation provision which, while keeping the overall social security tax rate the same, increased the OASI tax, decreased the disability insurance tax, and decreased the hospital insurance tax through 1985. We used the most current program data available on the trust funds status at the time this proposal was agreed to. Under those estimates the health insurance trust fund was secure to 1990.

Under the new estimates the actuaries show the reserve ratio in the health insurance trust fund to be at 4 percent on January 1, 1984. This would be substantially under the minimum amount needed to meet the cash flow demands of the medicare program. When viewed in terms of the combined reserves of the three trust funds, we would be at the dangerously low reserve ratio of 12 percent on January 1, 1985, rather than during 1988 as the actuaries had projected earlier.

Mr. President, as noted during the consideration of the social security amendments, we presume a good deal about the forecasting abilities of our actuaries. We ask them to predict with precision anticipated economic behavior and its effect on the social security trust funds as far in the future as 2040. We have to trust this information each time we make a decision in these programs.

So it is with concern we reviewed these most recent medicare estimates. Clearly whatever adjustments necessary, in the context of our recent amendments, to protect the medicare trust fund will be considered during our conference with the House on these same amendments. In viewing the long run, however, the Senator from Kansas again cautions his colleagues as to the necessity of proceeding carefully. Quick, easy solutions can get us into serious, unanticipated problems.

This Senator had been hesitant to agreeing to such proposals in the past. Interfund borrowing and reallocation are short-term measures, and were designed to do no damage. Yet we see problems already reflected in these new estimates. Problems that are not a result of, but are exacerbated by our actions. This Senator still believes these changes were necessary and correct based on the best information we had available at the time. But again, this recent problem highlights our need to undertake more substantial action for the short-term and proceed toward finding long-term solutions.●

ORDERS FOR FRIDAY

ORDER FOR RECESS UNTIL 10 A.M.

Mr. BAKER. Mr. President, I ask unanimous consent that when the Senate completes its business today it stand in recess until the hour of 10 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR THE RECOGNITION OF SENATORS PERCY AND STENNIS

Mr. BAKER. Mr. President, I ask unanimous consent that after the recognition of the two leaders under the standing order, the following Senators be recognized for not more than 15 minutes each on special order, the Senator from Illinois (Mr. PERCY) and the Senator from Mississippi (Mr. STENNIS).

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent after the time allocated to the two Senators under special orders, there be a period for the transaction of routine morning business to extend not past the hour of 11 o'clock and in which Senators may speak for not more than 3 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

APPOINTMENT BY THE VICE PRESIDENT

The PRESIDING OFFICER (Mr. WARNER). The Chair, on behalf of the Vice President, appoints the Senator from Kansas (Mr. DOLE) as a congressional adviser to the United Nations Conference of the Food and Agriculture Organization, to be held in Rome, Italy, November 7–26, 1981.

APPROPRIATIONS SCHEDULE TO DETERMINE LENGTH OF THIS SESSION

Mr. BAKER. Mr. President, as I stated this morning, the Senate will begin consideration of the first in a series of appropriation bills tomorrow, and I cannot overstate the importance of dealing expeditiously with these measures.

The first item, the Interior appropriation bill, is indeed complex, yet it is my hope that when we begin consideration of it tomorrow afternoon, we will be able to progress to the point where we can finish it on Monday. I am presently aware of 10 amendments on this side, and I am sure that there are several from the other side of the aisle as well. We must act swiftly on these amendments; they must be filed as soon as possible, and they must be void of any superfluous and extraneous matters which should be and will be dealt with by themselves later on in the session.

The Senate is in a position to chart its own course. We will determine how we proceed with the demanding appropriations schedule, and that, my friends, will play perhaps the largest role in determining when we conclude our business this session.

PROGRAM

Mr. BAKER. Mr. President, on tomorrow the Senate will convene at 10 o'clock. After the recognition of the two leaders under the standing order, recognition of two Senators for not more than 15 minutes each on special orders has been provided for.

After the expiration of time for special orders, there will be a brief period for the transaction of routine morning business to extend not past the hour of 11 a.m.

At the expiration of time for the transaction of routine morning business, the Senate will turn to the consideration

of the Standby Petroleum Allocation Act, S. 1503. It is the intention of the leadership to ask the Senate to turn the consideration of the Interior appropriation bill shortly after the hour of 12 noon on tomorrow.

Mr. President, it is not anticipated that there will be any rollcall votes on tomorrow. It is expected, however, that extensive statements and perhaps some business will be transacted in connection with both measures.

RECESS UNTIL 10 A.M. TOMORROW

Mr. BAKER. Mr. President, I know of no further business to come before the Senate and I now move, in accordance with the order previously entered, that the Senate stand in recess until the hour of 10 a.m. on tomorrow.

The motion was agreed to; and, at 10:02 p.m., the Senate recessed until Friday, October 23, 1981, at 10 a.m.

NOMINATIONS

Executive nominations received by the Senate October 22, 1981:

IN THE AIR FORCE

The following officers for appointment in the Regular Air Force, in the grade indicated, under the provisions of section 531, title 10, United States Code, with dates of rank to be determined by the Secretary of the Air Force:

To be first lieutenant

Abing, Amrit S., xxx-xx-x...
Adams, Charles A., Jr., xxx-xx-x...
Adams, Daniel J., xxx-xx-...
Adkins, Lonnie D., xxx-xx-x...

EXTENSIONS OF REMARKS

NOBEL LAUREATE JAMES TOBIN ON REAGANOMICS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LaFALCE. Mr. Speaker, as the Nobel awards are announced, the citizens of the United States may again this year be proud of the great number of these prestigious awards being given to our fellow countrymen. While we take understandable great pride in Yale Prof. James Tobin's Nobel Prize for Economic Theory, our joy must necessarily be somewhat muted by the realization that this distinguished economist and scholar has been saying for quite some time that the economic program of this administration is seriously flawed. The President's economic advisers would do well to listen to Professor Tobin's insights on the inconsistencies of their fiscal and monetary policies—and to heed some of his advice.

Last May, at an economic seminar on the Reagan economic program, Professor Tobin astutely analogized Reaganomics to an economic train with Conductor Reagan hitching a tight monetary policy engine at one end of the train and a supply-side fiscal locomotive to the other end and telling us that the economic train will carry us to full employment and disinflation at the same time. Tobin called this inconsistency devastating to the credibility of the President's program.

Of the administration's endorsement of the Federal Reserve Board's tight money policy, Professor Tobin has observed, "With all of the slack in the economy, a reasonably expansive monetary policy would produce growth without any significant increase in inflation." This is something serious for us to ponder as we watch high interest rates stifle our economic growth.

A month before receiving his award, Professor Tobin appeared before the Progressive House Staff Group for a discussion of the President's economic program. Columnist Hobart Rowen attended that meeting and excerpts from Professor Tobin's remarks appeared in the October 18, Washington Post. I commend that article to my colleagues:

TOBIN ATTACKS PRESIDENT, VOLCKER, WALL STREET

MONETARY POLICY AND HIGH INTEREST RATES

As you can see, the president got his way on both the tax cuts and budget cuts, [but following the euphoria], sober second thoughts have arisen, or maybe sober first thoughts that weren't expressed widely enough beforehand, surfaced and things are sort of in a panic both in New York and Washington. . . . The Federal Reserve monetary policy is precisely what the administration wanted the Federal Reserve to do, in fact ordered them to do, and it's not any surprise what has happened. . . .

It was apparent last winter, when the program was first set forth, that the monetary targets that the Federal Reserve was committed to—with the strong urging endorsement of the administration—were very stingy targets, and they involved a schedule of reduction in the growth of money for the next five years. . . .

[It was also apparent] that . . . the stingy monetary targets were bound to produce extraordinarily high interest rates, and those high interest rates would turn out to be an almost insurmountable hurdle to the achievement of the recovery in output and employment, which the administration was [at the same time] projecting.

And that was true even if you accepted their rather optimistic views on how fast the inflation rate would subside, and even more true if you took the more realistic view of that. Well, they went ahead with the tax and budget program. . . .

Now I must say that if you took the budget cuts and the tax cuts at the face value, as they were proposed in the economic recovery program document presented by the administration last spring, the tax cuts did not appear to be really excessive in a macroeconomic sense. . . .

BUDGET DEFICIT FEARS

Since then what has happened to change that outlook? . . . [There are] legitimate reasons for worrying about the budgetary outlook, as Wall Street is doing and as the president and his advisers are doing. . . . If you thought that the administration and the Congress would be unable to come up with subsequent budget cuts as were included in the program but not specified, then the tax cuts involved would be bigger than the budget cuts, and that would be a legitimate cause for concern. . . .

On the other hand, some of the concern seems to be triggered by the realization that the economy will not be as strong as the administration forecast. Therefore, the revenues collected from the economy will not be as large. And therefore, it will be harder to realize the administration's [hope], which involves—as it does in every administration—a balanced budget in the final year of the term of the president.

That, I don't think, is a legitimate reason either for financial markets to get upset in the way they have or for the Congress to tighten the budget. If that happens, it leaves the economy weaker than it was thought to be by the administration that made the forecast. And it's a perverse response to that kind of information to make budget policy tighter as well. That's a chasing-your-tail strategy such as Mr. Hoover tried in the 1930's. . . .

IMPACT OF INTEREST RATES ON FEDERAL DEBT

[There is] another major reason for which the budget outlook has deteriorated relative to the administration's initial forecasts. High interest rates mean, among other things, that the public debt interest is going to be higher in the budget. But the high interest rates are a deflationary factor in themselves, and so it's sort of kicking the economy twice—you kick it once with the high interest rates and you kick it again because the high interest rates [show up] in the budget [as] more expenditures. . . .

What the markets are worrying about is crowding out, whether the markets will swallow the large issues of government securities, which they foresee because of the deficits. But the fact is that if you look at the size of the debt as it would be at the end of 1984 under the Congressional Budget Office forecasts of the budget, the size of the debt will be no bigger relative to GNP than it has been—namely about 22 to 23 percent—and it was a lot higher than that in the 1960s and the 1950s. . . .

So I think that some of the concern about this is overblown and exaggerated. There is a legitimate concern. It certainly is reasonable to be concerned about the high interest rates, not simply because of inflation but because current interest rates after you subtract the rate of inflation, that real interest rates are higher than they've been in this country since the Great Depression of the 1930s. And it's very hard to foresee that the economy can stand up under those kinds of real interest rates. When you're paying prime rates for 20 percent for business borrowing and the inflation rate may be 8 or 9 percent—that's 11 percent, 12 percent real interest rate, you don't make money that way. . . .

So that's something on which everybody agrees, that the interest rates are terribly high and they ought to come down. The question is how.

VOLCKER'S THATCHER-LIKE POLICY

There are several ways that they could come down. One way in which they can come down is that we will have a recession, or we'll have at best a stagnant economy on the edge of a recession with intermittent dips in the economy, but with unemployment 7½ or 8 or more percent for a number of years. . . .

I think, in a sense, that people do not sufficiently appreciate that this is the aim of Federal Reserve policy. . . .

If you read or heard what [Paul Volcker] has said during the time he's been chairman of the board, before the Reagan administration came in and after it came in, you would know that he's embarked upon a kind of single-minded and single-institution campaign to bring the rate of inflation in this country down. And the only way he can do it, the only way the Federal Reseve can do it, is to be stingy about money stock and accept whatever high interest rates come about, and accept whatever kind of damage this does to the real economy in terms of unemployment, low production, recession, low investment, and so on in the hope that in time, enough people will be unemployed, enough union leaders will be desperate to protect the jobs of their members, enough businessmen will be like Chrysler—desperate for selling something—that they will begin to slow down the rates of wage increase and price increase in the industrial

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

sector of the economy, which are the core of our inflation.

. . . . Then you can break the inflation—eventually—but painfully and with considerable economic damage.

. . . That's basically the strategy. Now, that's the strategy of Mrs. Thatcher in England. You can observe what's going on there and see how much damage it does and see also that it does slowly work and you do bring down the inflation. There is a big difference between Mrs. Thatcher's policy in England and the similar policy in the United States because in England it's Mrs. Thatcher that headed the government and in the United States it's only Paul Volcker who expresses this policy.

It's one thing for Mrs. Thatcher to get up on national television and say, "we don't care what happens to the unemployed. We don't care what happens to the real economy in this country. We're going to stick by our guns. If you choose to waste the money we give you in inflation, too bad. There just won't be jobs for you, and that's not our fault. We told you that's the way it was going to be." If Paul Volcker tells you that in his dignified and low-key way, who hears it? I hear it because I read what Paul Volcker has to say because I have a professional interest in it. Maybe a few of you do that and all the people in the bond market and the money market [also hear it]. But that's not getting the message to the heads of unions in Des Moines, St. Louis and San Diego. And that you'd only get it, if at all, by the president saying: "That's our strategy". The president had not said that. [Instead], he said: "We'll [end] this inflation because the Federal Reserve will take care of that. But meanwhile we'll have more jobs and a lovely growth in the economy." So we're following a Thatcher policy without any of these damages, which a powerful political endorsement of the policy and explanation of the policy might give us in terms of speeding up the response.

WHAT THE FINANCIAL MARKETS WANT

Another way which interest rates could go down—and this is the way the financial markets would like it to happen—is for fiscal policy to be made a lot tighter, more budget cuts . . . achievement of the balanced budget in 1934. Then there won't be all those government securities coming into the market and crowding out private borrowers.

And they don't really care very much about what happens to the economy in the meanwhile. If the result of that [policy] is merely to add restrictive [fiscal measures] to Paul Volcker's restrictive monetary policy, then that adds to the pressure for low interest rates, but it also adds to the pressure for a recession. . . . So what they [financial markets] want to do is to put the blame for high interest rates onto the budget.

And that's what the administration is going to do now. . . . For nine months of the year, or eight months of the year, you put on your supply-side hat and you go for these tax cuts and forget or underplay the budgetary consequences and all the stuff I've just been talking about. So you don't have to worry about that. And I must say the business and financial community seeing those goodies in their tax bill also mute their criticisms of the financial policy, because they want to get the tax bill. It's not true of everybody, but it's true of a lot [of them].

Then you get the tax bill, and it's signed, sealed and delivered and now you put on your budget-balancing hat and you say, "God, this is awful. Congress has got to shape up and give us the budget cuts to make our inconsistent forecasts of last spring come true." And that's a recipe for getting further cuts in civilian, social programs in the budget on the ground that they are necessitated by financial policy, and for avoiding the possibility that this will be done by giving up the tax cuts that are so pleasant for everybody both politically and personally.

THE BETTER ROUTE: ADJUST THE POLICY MIX

Now, there's another way to go, I think. I personally agree that the mixture of monetary and fiscal policy is not a good one. That is, we have too tight a monetary policy and too easy fiscal policy. So I would like to see, I would have liked to have seen, a mixture that involved an easier monetary policy at the same time as having a smaller tax cut than we did have in the bill that was passed. And I would still like to see a shift toward that kind of mixture of policy. It would result in lower interest rates than we have now and than we are about to have over the next few years. . . .

The question is whether the Congress should do the only "giving" in getting to that mix of policy. The difference between what I said and what the guys in Wall Street are saying and what the administration is saying now, is that they want a tighter fiscal policy, but they don't want an easier monetary policy. . . . If I were a member of Congress, I wouldn't give the tighter fiscal policy without getting an assurance that it would be coordinated with an easier monetary policy. So we'd get the benefit of it in lower interest rates without sacrificing the overall progress of the economy in Paul Volcker's Thatcher-like austerity. Even then, I would still like to combine the policy with [a] wage-price policy, because I don't think we'd get tolerable progress on inflation without doing that.●

JOHANN ZABKA

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. APPLEGATE. Mr. Speaker, I would like to take this opportunity to recognize the outstanding contributions of one of my constituents, Mr. Johann Zabka, to Tuscarawas County, Ohio.

Mr. Zabka, who emigrated from Eastern Europe, settled in my congressional district many years ago and has since been an active civic and community leader.

Although it would be impossible to adequately laud all of Mr. Zabka's achievements, I would like to mention some of the particularly special ones. During this Nation's Bicentennial celebration, his "Epic Poem of Tuscarawas County, Ohio" was published and received national recognition and has since been inducted into the American Poets Hall of Fame.

He founded the Zeisberger-Heckewelder Society in Tuscarawas County, Ohio, which is administered by the Historical Society and recognizes, through the awarding of the Zeisberger-Heckewelder Medal, outstanding contributions to Tuscarawas County by individuals as well as institutions.

Mr. Zabka designed 22 commemorative medals from which 10 medals were minted to commemorate the history of Tuscarawas County and Ohio. He also designed and created a trumpet trophy which was presented to Paul Green, author of the play, "Trumpet in the Land," about Ohio history.

Mr. Zabka has also gained recognition as an artist and craftsman in the areas of design-painting, poetry, and medal design. The Ohio Association of Historical Societies and Museums recently honored him by presenting him with an "Outstanding Individual Award."

Johann Zabka's list of historical accomplishments is indeed very long. He is an outstanding citizen and we are very proud to call him our own.●

PRIME MINISTER BEGIN: A CHANCE TO BE PEACEMAKER IN THE MIDDLE EAST

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MAZZOLI. Mr. Speaker, I believe an article in the New York Times on October 17, 1981, by Mr. Edgar M. Bronfman, the chief executive officer of the Seagram Co. and president of the World Jewish Congress, is a brilliant analysis of the current situation in the Middle East.

I thank Mr. Bronfman for having added much to the quality of the thinking on this subject. I agree with his thesis that Prime Minister Menachem Begin has an opportunity—which the world earnestly hopes he accepts—to be the chief peacemaker for a region which desperately needs and is entitled to peace.

Following is Mr. Bronfman's important statement:

[From the New York Times, Oct. 17, 1981]

BE BOLD, MR. BEGIN

(By Edgar M. Bronfman)

There is only one man who, with some help from the United States, could lead the Middle East to peace: Prime Minister Menachem Begin. He stands alone as the only recognizable leader in the Middle East who has been visibly and centrally involved in the start-and-stop quest for a settlement in Sinai, Gaza, and on the West Bank.

Until now, Mr. Begin has taken no initiative but has merely responded to Anwar el-Sadat's bold visit to Jerusalem, in 1977, and its aftermath. But both Mr. Begin and Mr. Sadat failed to overcome the Israeli-Egyptian peace treaty's real stumbling block, the fate of the Palestinians.

Unless Prime Minister Begin now accepts the challenge of being the director of the

peace process, and no longer simply one of its principal actors, there will be no solution.

That will not be a simple task. Menachem Begin has been nurtured more by embattlement and war than by peace. Even as Anwar el-Sadat rose from a crucible of violence and military rule, so Menachem Begin helped establish a Jewish state by arms and the rugged message to a hostile Arab world that anyone who attacked Israel would suffer the pain of its strength.

One possible reaction to Mr. Sadat's death could be for Mr. Begin to decide that only by preparing for an inevitable war can Israel survive. Since Israel is the only stable, strong military power in the Middle East, Mr. Begin could fold his arms, stand tough as his country becomes increasingly an armed camp, and pronounce again: Don't tread on me!

What is his alternative?

While it would be foolish for Israel not to remain strong, it would be equally wrong for Prime Minister Begin, a man of many nuances and parts, not to recognize both the opportunity and responsibility that he alone now has. (It also would be equally foolish, after the latest act of terrorism in the unstable Middle East, the assassination of President Sadat, for the United States not to be even more aware of Israel's reliability.)

To speak bluntly, Mr. Begin is one of the strongest heads of government in the world, and certainly the most indomitable. Although he was narrowly re-elected, his hold on his own country is firm and unchallenged. His Government knows the Arab world and should be able to tell the difference between Palestine Liberation Organization rhetoric and the reality of genuine Palestinian needs. His Government also knows how to make distinctions between negotiating positions and outcomes—in other words, what it wants and what it can get, and what the other side expects and what it will give.

Territory and occupation have never been Israel's security. In the long run, strength and secure borders will come only from real autonomy talks and an acceptable solution for the Palestinians. Mr. Begin, for instance, must be prepared to go further than endorsing the idea of Palestinian autonomy. He must be creative, even bold.

As for the settlements, he has already given up some in Sinai, and is committed to giving up the rest in April, albeit with some difficulty. On the much tougher question of the West Bank, the Israelis are more than deeply enough entrenched to satisfy their anxieties about the risk of a surprise attack. Mr. Begin's first responsibility there is to provoke no more Arab hostilities; the next is to work to complete, rather than upset by word or deed, the autonomy phase of the Camp David agreements.

In the negotiations so far, it became increasingly obvious that President Sadat did not and could not represent the Palestinians on the West Bank, in Gaza, or scattered throughout the whole region. Somehow Prime Minister Begin must find a way to include Palestinians in the peace process, because if there is no solution to the Palestinian problem there will be no real peace. He will have to take the initiative skillfully. He will have to take chances, going even beyond where he and Mr. Sadat painfully arrived together. For while peace with Egypt is evolving, the harder problem of creating conditions of peace with the Arab world has barely begun.

Mr. Begin alone, by reason of where he has come from and where he and his country are now, can lead the Middle East to peace rather than permanent embattlement. Nothing about this will be easy. He will, in fact, now have to become, as a man of peace, even bigger than Anwar el-Sadat. An unlikely role for him? Not necessarily.

Menachem Begin surprised everyone by being so forthcoming in agreeing to return to Egypt all of the Sinai, including desperately needed oil supplies. He was severely criticized by some in his own country for doing so. It is not beyond him to surprise everyone again as he faces these even more difficult challenges.

David Ben-Gurion, who valued compromise and toughness, will always be remembered as the man who made the state of Israel possible. Menachem Begin now has a chance to make it possible for Israel to live in peace. It is infinitely harder without Anwar el-Sadat, with whom he shared the Nobel Peace Prize. But he has lived a life of challenges, and this is surely his biggest.●

A TRIBUTE TO DENVER DICKERSON

HON. JIM SANTINI

OF NEVADA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. SANTINI. Mr. Speaker, the State of Nevada mourns the loss of one of its prominent figures. Denver Dickerson, Jr., retired last year after serving laudably in many elected offices and appointed positions in both State and Federal Government.

A native of Carson City, Mr. Dickerson was born to a family actively engaged in Nevada politics. Denver's career began in 1934 as a political columnist for the Reno Evening Gazette. He later moved to Carson City to assume control of the Carson Chronicle and he will long be remembered for his Salmagundi column.

In 1941, at the age of 28, Denver was elected as the youngest speaker in the history of the Nevada State Assembly. After serving in World War II, Denver returned to politics as director of the Nevada State Employment Security Department from 1947 to 1951. Denver's career was highlighted by his service overseas. He served as press officer to the U.S. Embassy in Burma from 1952 to 1955. After serving as Senator Alan Bible's press secretary from 1957 to 1963, he was appointed by President Kennedy to serve as Lieutenant Governor of Guam. He remained in that post for 6 years.

Mr. Dickerson returned to Washington, D.C. as a staff member of the Senate Rules Committee until 1973 when he became staff director of the Joint Congressional Committee on Printing. He retained that post until his retirement in 1980.

After such a long and distinguished career in both media and the political arena, few men have retained such tremendous respect and admiration from friends, colleagues, and political opponents alike. We offer our sympathy and love to his widow, Maxine, his two children and three grandchildren, his brothers George, Harvey, Belford, and sister Norinne Buck.●

JUNE 30 DEADLINE FOR ERA

HON. JAMES L. OBERSTAR

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. OBERSTAR. Mr. Speaker, to those of us who support ratification of the Equal Rights Amendment, ERA, are all too aware of the June 30 deadline for equality.

In a few, well-chosen words in a recent editorial, the Duluth News-Tribune described the situation confronting supporters of the Equal Rights Amendment.

I urge my colleagues to consider the excellent point made by Helen Milliken of Michigan whom the News-Tribune quotes:

We cannot wait to achieve equality in the United States on a State-by-State basis.

The editorial follows:

[From the Duluth News-Tribune, Oct. 14, 1981]

WANTED: ONE MIRACLE

We, too, are hoping for a "miracle" on the Equal Rights Amendment.

With less than nine months to go before the statutory time limit for its ratification expires, the ERA is still three state legislatures short of the 38 necessary to make the amendment part of our nation's Constitution. ERA activists rallied in Washington on Monday to promote the amendment and to denounce President Reagan's state-by-state, law-by-law approach to sexual equality.

Standing on the steps of the Lincoln Memorial, Helen Milliken, wife of the Republican governor of Michigan, compared Reagan's piecemeal policies toward the sexes with Abraham Lincoln's sweeping racial policies: "The Great Emancipator did not free the slaves plantation by plantation. We cannot achieve equality for women one state at a time."

All speakers admitted ERA proponents face a stiff struggle in convincing three more states to ratify the amendment. Several conceded that it might require a "miracle" to win such approval.

Yes, we could use a miracle, if that is what it would take to convince a few more state legislators that to oppose the ERA truly is to sanction, albeit benignly, sexual inequalities under the law. And that in our minds, is unconscionable.●

PROPOSAL TO RENAME THE MAIN POST OFFICE IN HOUSTON AFTER BARBARA JORDAN

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LELAND. Mr. Speaker, today I am introducing legislation which would rename the main post office fa-

cility in my home city of Houston after one of its most outstanding citizens Ms. Barbara Charline Jordan, a lady with whom many of you have had the honor and pleasure to work when she was a Member of the U.S. House of Representatives.

Although she is no longer in the Congress, she is still very active in her home State of Texas. While she has already made far more than enough contributions to this Nation to deserve this recognition, her work is not finished and I know that we can look forward to many more contributions from her. She has proven time and again that she thrives on new challenges and excels at each new opportunity.

Even though her accomplishments and capabilities are larger than any one city, I find it very appropriate that we honor her in this modest way in the city where she was born and reared. Her accomplishments are usually listed as "firsts," something which rarely pleases her. These firsts are always described as her being the "first black woman to * * *". She prefers to be recognized for her conquests of unfair and irrational obstacles such as racism. While this factor motivates her to strive and to help others, she does not seem willing to allow herself to be praised for raising herself above it.

Despite her unwillingness to be cast as "the first black woman," I find it hard to refrain from mentioning several of these firsts: The first black woman to be elected to the Texas Senate, in 1966; the first black woman to represent a Southern State in Congress since Reconstruction; the first black keynote speaker at a Democratic National Convention. These achievements are impressive enough at face value, but, when one looks beyond them to see what philosophical approach made this woman accomplish them, there is an even more impressive array of beliefs and ideals.

She is the same woman who was truthful enough to point out that as a black American, "When that document—the U.S. Constitution—was completed on the 17th of September in 1787, I was not included in that 'We the people,' " but then later declare in the desperate hours of the Nixon impeachment proceedings, "My faith in the Constitution is whole, it is complete, it is total." Here is a woman who is capable of mixing this highly emotional awareness with intellectual idealism and not giving in to others' lack of comprehension of the situation. She never asked for special treatment, "I am neither a black politician nor a female politician. Just a politician. A professional politician;" nor does she encourage others to so do.

In her new profession, as a professor at the University of Texas' Lyndon B. Johnson School of Public Affairs, she has given the message:

There is no obstacle in the path of young people who are poor or members of minority groups that hard work and thorough preparation cannot cure. Do not call for black power, or green power, call for brain power.

As William Broyles wrote of her in 1976:

A Southern woman from the race of slaves, she dramatically affirmed, in spite of slavery, civil war, and segregation, her faith in our original ideals. She inspires the belief that one day the burden of race may be set aside.

She was fighting for her people and her country at the same time, realizing that to help one was to help the other.

The Reverend Bill Lawson, who in 1965 led almost 10,000 blacks in a protest march in Houston calling for school desegregation, said of Barbara Jordan:

She had a vision back in the sixties. Most of us couldn't see it. She saw beyond conflict to the enduring institutions, and she saw that most people, even black people, wanted to believe in them, if only they could be made to work. Within those institutions she saw that people like Sam Rayburn and Lyndon Johnson got more done. So she wed her philosophy and purpose to their practical skills. But she kept her purpose. The rest of the civil rights movement is far behind her in making that transition.

I hope that I have been successful in presenting even in a small part the greatness of this lady, Barbara Jordan, and the greatness of her philosophical blend of realism and idealism. She never insinuated that the truth should be overlooked, but that an unwarranted emphasis on problems that persist can lead a person to lose track of goals that can be accomplished. She is living proof that you can be what you really want to be, and she is a worthy role model for women and men of all races.

Barbara Jordan is one of the most noble, capable, gifted, and inspirational leaders this country has had. It is a very modest honor that I am proposing we bestow on her with this bill, but I think it can do a great deal to remind all Houstonians of what can be accomplished through application of the qualities that Barbara Jordan so abundantly possesses.●

THE TOBACCO PROGRAM

HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. HEFNER. Mr. Speaker, much has been written and said about the so-called safety net provided in the President's program of budget and tax cuts which most people believe is essential to economic recovery. This body has supported cuts in numerous social programs, education programs, aid to the handicapped programs, and health programs which will bring about significant reductions in Federal spending. Notwithstanding the safety net which the administration assured was built into this platform, a number of individuals in the needy category are going to feel the impact of these cuts in very real terms. Do we really want to go further by removing the very livelihood of individuals who are on the borderline of being needy?

Tobacco is produced principally by small farmers, many of whom totally depend on tobacco to feed, clothe, and house their families. These are farmers who have no other source of income and often find it difficult to make ends meet on the incomes they receive from tobacco production. Many others find it necessary to supplement their incomes by working at additional jobs.

Tobacco farming is not an easy job. It takes long hours of hard work, but it has provided a living for small farmers for decades. If we eliminate the price support program and thus the stability of limited production and a fair rate of return, many of them will have to cease operations with massive foreclosures on their farms.

Do we want to further tear the safety net by eliminating a program which has worked well since its inception? We should take a lesson from history on the tobacco program. When it was first proposed by Congress in 1933 in response to flooded markets and farm income losses, the farmers were given a chance to accept or reject the program of price support for limited production. In 1939, they rejected the program and within a year the market was flooded again with heavy losses to farmers. Farmers have voted for the program ever since.

We must reject this amendment or see thousands of small farmers without a crop and without incomes, in other words, unemployed. The minimal cost—representing one-tenth of 1 percent of all losses for all commodity price support programs—over the history of the program pales in comparison to the impact that elimination of the program will have on the small farmer and the economies in those producing States which depend on tobacco production.

I urge my colleagues to vote against the amendment.●

FATHER THEODORE HESBURGH OF NOTRE DAME: A MODERN MAN FOR ALL SEASONS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MAZZOLI. Mr. Speaker, recently it was my great good fortune and pleasure to have traveled back to my alma mater, the University of Notre

Dame, with Rev. Theodore M. Hesburgh, C.S.C., its longtime and distinguished president.

During our journey from Washington, Father Ted and I talked about a wide range of national and international issues, but particularly about the issue of immigration and refugee policy.

Father Hesburgh—who has headed many distinguished national panels and has participated in numerous international bodies—believes that no global problem outweighs the social, political, economic, and military effect of the migration of millions of people displaced by war, famine, and persecution.

How the world's community of nations responds to this human travail will determine whether peace or discord will mark our planet for the next score of years.

Father Hesburgh's distinguished service as chairman of the Commission on Immigration and Refugee Policy has contributed to a better understanding of this vexing and challenging subject.

Father—who has consistently appeared at the top of listings of persons influential in education and religion—has announced his retirement from the presidency of Notre Dame after 30 years at its helm. Both the length and the quality of his tenure have set standards for excellence which will be virtually impossible to match.

The announcement of his imminent departure from the office he has held since 1952 has triggered a spate of testimonials and ceremonies in his honor. The most recent of these—but certainly not the last—is the Award for Academic Leadership of the American Council on Education.

For the benefit of my colleagues in the House, Mr. Speaker, I insert in the RECORD an article about this remarkable man which appeared in the New York Times on October 13, 1981.

ABOUT EDUCATION—HESBURGH EARNED RESPECT THE HARD WAY

(By Fred M. Hechinger)

Among the actions that get college presidents into trouble are: locking horns with powerful politicians; speaking out on controversial issues; risking students' wrath by setting limits to campus protests; frequently leaving the campus on national and international missions; upsetting the traditional management of the university; serving an unpopular President and then publicly attacking that President's policies.

In his 29 years as president of the University of Notre Dame in South Bend, Ind., the Rev. Theodore M. Hesburgh has engaged in all those activities, and while people occasionally got mad at him, he has earned a measure of respect that quite possibly no current university president can match.

The 64-year-old educator-priest will leave his post at the end of the academic year. On Thursday, the American Council on Education, at its annual meeting, will honor him with its award for academic leadership.

"If a college president means anything, he has to stand up for the integrity of the institution," he said in an interview. "The university is a kind of sacred place. Nobody can be allowed to interfere, not the state, not the benefactors, not the church."

In the turbulent 1960's, he stood up to disruptive students.

"At a certain point we have to draw the line and say, 'This far and no farther. Protest, yes; but do it with civility, without violence.'" He ruled that violent protesters would be given 15 minutes for meditation and, if they then failed to stop their actions, would be expelled.

Initially angry, many students reconsidered when Father Ted, as he is generally known, wrote a tough letter to Spiro Agnew, then a Vice President with a considerable popular following, warning him and the Government to keep hands off the campuses. Later, the invasion of Cambodia and the tragedy of Kent State, where four student protesters were killed by National Guardsmen, impelled Father Hesburgh, who had never favored the Vietnam War, to speak out publicly against it.

President Nixon, who had been impressed by what he thought was Father Hesburgh's hard line against students, appointed him chairman of the Civil Rights Commission, never suspecting that the educator would lead the commission to issue an uncompromising condemnation of what is called a "major breakdown" in the enforcement of civil rights laws. Later, Father Hesburgh publicly attacked the President's antibusing policy and eventually Mr. Nixon asked for his resignation.

Last week, reminiscing late at night in his study, Father Hesburgh looked back on some of the changes he brought about.

In 1967, Notre Dame was one of the first Catholic universities to remove itself from church control, to be governed instead by a lay board which includes non-Catholics. Vatican Council II, he said, made it clear to him that a great university could not be largely clerical and that there was "a need to open up." Yet he emphasized that Notre Dame always remained a Catholic university.

Ten years ago, he added, the campus went coeducational and "we are a better university for it."

Although he stood in the front lines of the battle against discrimination and for equality, Father Hesburgh does not think students should be the only judges of their educational requirements. He deplored the decline of competition for good work. He regrets the able students "who were lost when equality slipped into egalitarianism." A university without moral and intellectual values is no university at all, he said.

"The name of the game in the 1980's is quality," he added. "We must get back out of the wild growth of the curriculum and get back into some core of knowledge—history, philosophy, theology, language, literature, mathematics, science, art and music. Otherwise we are just graduating trained seals."

The international dimension, Father Hesburgh says, is "shamefully neglected" by most universities. "With 80 percent of the world colored, we act as if it were a white world. We pretend that everything is like Main Street America. Higher education still largely ignores that dimension."

Latin America has long been one of the areas of his personal concern. "I worry about it," he said. "It has terrible needs that we could respond to. I would like a common market for the hemisphere, and a common education satellite program that would wipe out illiteracy, and a common strategy that could deal with agriculture, housing, good government and human dignity."

He firmly believes that the United States could help "put an end to torture" in Latin America. "It's an abomination and we ought to get rid of it," he said.

Father Hesburgh deplores the present reluctance among university presidents to speak out on major national and international issues. "If you are a president," he says, "you are not just responsible to your students and faculty. Anyone who isn't heard outside the campus isn't worth being heard inside."

He said he was glad when A. Bartlett Giamatti. Yale's president, recently spoke out against Moral Majority. "I wrote him a letter to tell him," he said. "His speaking out almost seemed an anomaly. Look at the attention he got."

What about the future of higher education? After the explosive growth, Father Hesburgh says, "It's not as much fun to preside over shrinkage. If you grow too fast, you get fat, but there's no easy way to shrink gracefully, and people will get hurt."

"Now," he continues, "we must ask: What is the Federal Government's responsibility? What is it that won't be done if the Federal Government doesn't do it?"

He rejects the popular notion that today's students are interested only in their own futures. "We have over 1,000 kids who give up their Wednesday lunch to help deal with hunger in the world," he says. "I suspect that a lot of pressure toward vocationalism comes from the parents, not the students." Students will be running conferences on nuclear armament on some 30 or 40 campuses in November, he said, and he is helping them.

"But you need leadership," he adds. "Higher education and every other enterprise moves forward when there is good leadership, otherwise it stagnates. We need people with vision, élan, geist, people who have standards and a certain toughness. How to get leadership gets down to every single college president who is chosen, people who do more than raise money. Of course, you need money, but if you have money and no vision, you just squander it."

Some people, he recalls, warned him against getting involved in such controversies as civil rights, lest he hurt the university. "I got very little static," he says. "You have to be yourself and people accept you as you are. Young people have to see their leaders involved."

Despite all his activism, Father Hesburgh said:

"I never felt that I wasn't very much a priest, which means a mediator and a seeker of justice and decency. Every day of my life I've offered my mass, sometimes in odd places, such as at the South Pole and in Faculty House at the University of Moscow, in the cause of peace and decency and a better world."●

INTERSTATE BRANCHING OF FINANCIAL INSTITUTIONS

HON. NORMAN D. SHUMWAY

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. SHUMWAY. Mr. Speaker, there has been a great deal of discussion of late about the need for major structural changes within the financial industry. Of immediate concern is the difficult situation in which the thrift industry finds itself. A number of specific proposals to provide the thrifts with additional asset powers and to remove unnecessary regulations are pending in both the House and Senate Banking Committees.

Among the broader structural issues to be debated in the coming months will be the matter of interstate branching of financial institutions. In this context, I am today introducing a bill—primarily for discussion purposes—to allow interstate branching within the confines of Federal judicial circuits. It has been suggested, Mr. Speaker, that if we are to modify the current prohibitions on interstate branching, we should move first to a regional or contiguous area system. My Banking Committee colleague, Mr. LAFALCE, has proposed that branching be initially allowed in standard metropolitan statistical areas. I am suggesting that, if we do implement a system of regional banking, the judicial circuit approach might well be the most equitable and consistent for the Nation as a whole.

Mr. Speaker, I have not yet reached a final position with regard to whether, at what rate, and in which fashion we should proceed to interstate branching. As the debate on this complex and important issue continues, however, it is essential that all options be fully considered. My legislation is intended to be a contribution to this effort.●

McKEESPORT TUBE MILL ANSWERS THE CHALLENGE

HON. JOSEPH M. GAYDOS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. GAYDOS. Mr. Speaker, at a time when the production of the domestic steel industry is slipping and under a fresh assault by foreign producers, I take great pleasure informing my colleagues of the opening of a new steel facility in the 20th District of Pennsylvania that sends out a strong signal our American steel industry is not about to roll over and play dead.

United States Steel Corporation's National-Duquesne Works in McKeesport, Pa., recently unveiled a multimillion dollar quench and temper line for high-strength tubular products that is second to none. It will enable the firm to stay competitive in world markets and protect American jobs in the process.

According to Mr. Albert L. Voss, general superintendent of National-Duquesne Works, the new facility more than doubles the plant's capacity for heat-treating products used by the oil and gas industries. The importance of that accomplishment cannot be underestimated. The present boom in oil and natural gas exploration has created a need for deeper drilling which causes great pressure on pipe sunk far below the surface of the Earth. One way to overcome this pressure, Mr. Voss pointed out, is to increase the wall thickness of the pipe, a costly process. A better way is the lighter, stronger pipe his plant now produces, saving in both weight and cost.

There is every reason to believe the oil and gas exploration boom will continue, thereby keeping the demand for piping at high levels. A total of 62,462 wells were sunk in 1980, it was noted, and it is predicted another 77,000 wells will be drilled this year.

"There is no doubt the new quench and temper line at the National-Duquesne Works will greatly enhance our ability to meet the continued demand for these oil country goods," Mr. Voss declared. The new line, he continued, is capable of processing all high-strength grades of pipe in lengths up through 48 feet with wall thicknesses up to 1¼ inches and sizes ranging from 7 inches through 24 inches outside diameter.

The plant gives United States Steel Corp., the single source capability of supplying the largest quench and temper size ranges in the industry for line pipe and casing with either the seamless or electric resistance weld process.

I had the privilege of attending the unveiling of the new plant and came away greatly impressed. It was obvious United States Steel, Mr. Voss and the men and women who work at the plant were very proud of the new facility, as they should be. As the congressional representative of that district, I share that pride.

It serves as a commitment of United States Steel to the McKeesport area and sends a message to foreign competitors that if they are planning to assault America's pipe producing industry, come tough because it is going to be tough.●

TRIBUTE TO THE UNITED WAY

HON. NICHOLAS MAVROULES

OF MASSACHUSETTS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MAVROULES. Mr. Speaker, the following is a tribute to the United Way written by a constitutent of mine from Swampscott, Mass., Mr. Maurice Goldsmith. This poem is dedicated to the thousands of loyal volunteers taking part in the 1981 United Way Campaign.

Be glad you can give to the United Way
Because life is worth giving
Caring, Sharing and giving
Makes life worth living
It is strange but very true
Giving just enriches you
If you give a kindly deed
If you plant a friendship seed
If you share a laugh or song
If your giving rights a wrong
Then the joy you feel and share
Makes more goodness everywhere
Be glad you can give to the United Way
Thanks to you it works for all of us every day

—MAURICE GOLDSMITH.●

REESTABLISHING A MODERATE CONSENSUS ON DEFENSE

HON. MORRIS K. UDALL

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. UDALL. Mr. Speaker, at a time when a rapidly expanding defense budget promises to conflict with other budget and economic priorities, I want to stress the need for reason and judgment in our defense policy.

Since the Vietnam war, we have found it difficult to talk about military issues. That war shattered our moderate consensus on defense, polarizing us into "hawks," who wanted to spend any amount on defense and "doves," who wanted to cut any amount from defense. I fear those distinctions still exist and hinder reasonable and informative debate.

A former colleague of mine, the first Secretary of the Air Force and a great advocate of arms control in the U.S. Senate for many years, Stuart Symington, said that a strong national defense comprised three things: a capable military, a strong dollar, and the faith and confidence of the people in their government. We have to balance complex and conflicting demands in the years ahead, not just in terms of budget but in terms of overall direction. I hope the President and the Congress can restore consensus and reason in our approach to defense matters.

First, we have to spend our defense dollars better, more selectively, with an eye toward innovation, and by re-

thinking old military doctrines. Too often we commit substantial sums to advanced weapons systems that work in theory but not in practice, and which do not make us more secure. We also must explore the kinds of wars we might have to fight in the future, and question whether the strategies for which we are now buying weapons are relevant to those kinds of conflicts.

Second, we must improve our conventional forces. I have supported innovative programs emphasizing agility and flexibility, including larger numbers of smaller, less vulnerable, and less expensive aircraft carriers with the vertical/short-take-off-and-landing Harrier "jump jet." I have also supported procuring large numbers of the less expensive diesel-electric submarines, in place of fewer nuclear submarines, to increase the quantity as well as quality of our Forces. Other programs I continue to support include the light-weight, wheeled tank for distant and isolated theaters, the A-10 "tank killer" aircraft, the surface effect ship (hovercraft) capable of 90-knot speeds, and the rapid deployment force.

Third, we need to attract and retain talented personnel. I have supported increased pay and a bonus system to make the services more financially competitive with civilian employers. Equally important, however, are neglected nonbudgetary elements of the service life that have a great effect on readiness and effectiveness. We need to reexamine our policies and traditions on officer education and career opportunities, career paths and the nature of assignments, unit cohesion, force structure, and so forth.

Fourth, the United States needs a treaty limiting strategic nuclear weapons. The nuclear arms race between the United States and the U.S.S.R. is one of the costliest elements of our defense budget. A Strategic Arms Limitation Treaty (SALT) can increase our national security while freeing us from an escalating arms race which drains billions from the national Treasury.●

LOSS OF TOPSOIL SEEN STINTING FOOD

HON. ED JONES

OF TENNESSEE

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. JONES of Tennessee. Mr. Speaker, as we are currently considering the Food and Agriculture Act of 1981, I think it is a good time to recommend to my colleagues a new book by Mr. Lester R. Brown entitled, "Building a Sustainable Society."

Mr. Brown, formerly an official at the U.S. Department of Agriculture, heads Worldwatch Institute, a Washington-based research group established in early 1975 to analyze global problems. He is the author of "World Without Borders", "By Bread Alone," and "The Twenty-Ninth Day," books that have been published in more than a dozen languages. He has written for scores of periodicals, including Saturday Review, Foreign Affairs, Scientific American, Science, the New York Times, the Washington Post, and the Wall Street Journal.

Lester Brown has been described by the Washington Post as "one of the world's most influential thinkers." On October 11, 1981, the Washington Post published the following article regarding the publication of his newest work:

LOSS OF TOPSOIL SEEN STINTING FOOD

The loss of topsoil in the United States and other countries is so severe that it could trigger food shortages in the 1980s surpassing the impact of oil shortages during the 1970s, a new study concluded yesterday.

The study, done by Lester Brown, head of the World Watch Institute, said a doubling in world food output since 1950 was achieved at the expense of severe land abuse.

"Perhaps the most serious single threat humanity now faces is the widespread loss of topsoil," Brown, an agricultural specialist, said in the study, which is being published as a book titled "Building a Sustainable Society."

"Civilization cannot survive this continuing loss of topsoil," Brown said. "If not arrested, this loss of soil could cause the food problem to unfold during the '80s as the energy problem did during the '70s."

The productivity of 34 percent of American cropland is declining because of an excessive loss of topsoil each year, Brown said.

A detailed survey by the Agriculture Department last year discovered "alarmingly high" erosion in several states. It estimated soil losses of 14.1 tons an acre in Tennessee, 11.4 tons an acre in Missouri and 10.9 tons in Mississippi.

One hundred countries now depend on the United States and Canada for grain shipments. This increased world demand has accelerated erosion problems. Brown said government in the United States and other countries must step in to promote solutions such as terracing, contour farming and minimum tillage.

In his book, I believe Lester Brown has done a superb job of graphically depicting the problems that we are facing in agriculture, especially the terrible degradation of our soil resource in producing the food and fiber necessary for our survival. For all of us interested in soil and water conservation, this is an excellent book in that it provides the necessary background to assist us in making the important decisions that lie ahead in the field of natural resources conservation.

The facts in this book are presented in such a professional manner that individuals reading the material will gain a much better understanding of just how important soil conservation is to the entire world. In order for you to obtain a "feel" for how valuable "Building a Sustainable Society" is to be soil conservation effort, I have selected some key passages which I believe are indicative of Lester Brown's dedication to this topic.

Indeed, there are signs that the food problem may unfold during the eighties as dramatically as the energy problem did during the seventies. The parallels are disturbing. Just as countries everywhere had become addicted to imported oil by the early seventies, so they have become dependent on imported grain by the early eighties. Just as the world had come to depend heavily on the Middle East for oil, so it now depends overwhelmingly on North America for grain. The final parallel is perhaps the most disturbing. Just as Middle Eastern oil is being depleted, so too are North American soils. At the existing intensity of cultivation, every ton of grain exported leads to the loss of several tons of topsoil.

Croplands are the foundation not only of agriculture but of civilization itself. When soils are eroded and crops are poorly nourished, people are often undernourished as well. Thus, the loss of soil is in some ways the most serious of the threats civilization faces. Degraded biological systems can usually recover if given the opportunity, but an inch of topsoil lost through erosion may take nature centuries to replace. Similarly, alternatives to oil can be developed, but there are no widely usable substitutes for soil in food production. Civilization can survive the exhaustion of oil reserves, but not the continuing wholesale loss of topsoil.

Since mid-century, pressures on the earth's croplands have mounted. Growing populations demand more land not only for food production but for other purposes as well. Even as the need for cropland expands, more and more farmland is being put to nonagricultural uses. Worse, the most productive croplands are the most likely to be converted to nonfarm uses.

As the eighties unfold, humanity faces a worldwide shortage of productive cropland, acute land hunger in many countries, and escalating prices for farmland almost everywhere. In a world with no excess agricultural capacity, the continuing loss of prime farmland anywhere can drive food prices upward everywhere. For most people rising food prices are the most immediate, most disastrous face of inflation, fueling political instability with desperation.●

PERSONAL EXPLANATION

HON. LARRY McDONALD

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. McDONALD. Mr. Speaker, due to a prior commitment I was unavoidably absent yesterday afternoon for two recorded votes. Although I was paired on each vote missed, I would like to state at this time how I would have voted had I been present.

"Yes" on roll No. 271, the amendment to H.R. 3603 to repeal the tobacco price support and marketing programs.

"Yes" on roll No. 272, the amendment to H.R. 3603 stating it is the intent of Congress that the tobacco price support and production control program be carried out at no cost to

the taxpayers other than incidental administrative expenses and directs the Secretary to promulgate regulations within his existing authority by January 1, 1982, to accomplish this objective.●

NATIONAL STUDENT SAFETY WEEK

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LELAND. Mr. Speaker, today I am introducing a resolution to designate the week beginning March 15, 1982, as "National Student Safety Week." This resolution seeks to recognize the important contributions made by student safety programs which involve youth in safety activities designed to prevent the needless loss of lives and injuries to our Nation's youth.

Needless injuries have occurred to thousands of school students and young adults as the evidence continues to show. In my State, each year approximately 150 Texas public school students die as a result of accidents alone. Another 84,000 are injured in accidents. During 1979, the National Safety Council released alarming national statistics: 14 million or 9.8 percent of all accidents involved the young, inexperienced driver under the age of 20. Of those 14 million, 10,700 or 16.4 percent were fatal. Accidents involving schoolbuses, pedestrians, and bicyclists were devastating as well. Schoolbus transportation accidents killed 180 persons in 1979, including 95 pupils, 5 bus drivers and 800 other persons. Injuries in schoolbus related accidents totaled about 7,500 of which 4,410 were students. Since 1935, the number of pedacycle-motor vehicle deaths has more than doubled. The number of pedacycles in use has increased 28-fold so that the death rate per 100,000 pedacycles in use is 12 times the rate of 1935. In 1979, 36 out of every 100,000 persons between the ages of 15–24 were involved in fatal accidents and accounted for 22,000 injuries. If only caution had been used, I am sure that a proportional percentage of these accidents could have been decreased.

The energy and leadership potential of young people can be channeled to help reduce the number of accidental deaths and injuries to themselves and their classmates. The number of safety projects and activities being carried out in schools and communities across this country and perhaps in your congressional district, is proof of students' desire to contribute to their own safety and the safety of others. The youth safety programs will encourage participation by and provide opportunity for elementary and high school youth to become involved in and to accept responsibility for promoting safe living for all. The national student safety program has 202 school members representing 28 States and more than 300 delegates attended its 22d annual convention last year. It is my hope that this resolution will prompt the addition of more States and schools initiating this program which engages its members in activities which promote safe living for all.

The world is not perfect and young people know it. They are alert to social shortcomings and anxious to have a hand in correcting them. They want a part in the action. They have a strong desire to use their energies and resourcefulness on current problems—to do something that counts. Working for the safety and well-being of others and themselves is an ideal proving ground.

The national student safety program, sponsored by the American Driver and Traffic Safety Education Association, has indicated that their most important goal for the year is to have a "National Student Safety Week" proclaimed in the United States. I ask that you join with me and cosponsor the resolution to help the members of this organization achieve their worthwhile goal, while encouraging youth to become involved in promoting safety in our Nation's schools and communities.●

FOOD BANK DEMONSTRATION PROJECTS

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MINETA. Mr. Speaker, I rise today in support of this amendment requiring the Secretary of Agriculture to distribute surplus dairy commodities to food banks. Section 211 of the Agriculture Act of 1980 calls for a pilot program for distribution of surplus dairy products through food banks, but as of yet, the Department of Agriculture has not implemented this program.

Having visited the food bank in Santa Clara County, I believe it is imperative that every effort is made to expedite the implementation of the food bank demonstration projects. Food banks serve as excellent supplements to programs aimed at providing food for those in need. Food banks are able to serve millions of people annually through their network of donations to agencies and food box programs. These agencies range from orphanages and runaway shelters to halfway houses and shelters for battered women. The availability of surplus dairy products will be an important addition to the food banks' ability to more adequately meet the nutritional needs of low-income people.

Recent budget cuts increase the need for the distribution of surplus dairy products through food banks. Major changes in food stamp eligibility rules and benefit reductions will adversely affect many poor and needy people. Food banks will be able to provide some relief through the distribution of surplus dairy products to those affected.

In addition, the Government's cost to store dairy products has risen sharply, totaling over $24 million for the first 9 months of fiscal year 1981. The Commodity Credit corporation spent $69.9 million during the last 5 years on storage and handling costs applicable to dairy products. Another $94 million was spent for the transportation of these dairy products during the same 5-year period. Additional losses are entailed through the deterioration and quality loss of dairy products while in storage.

Therefore, the implementation of the food bank demonstration projects will serve two important purposes: The distribution of food to those in need and the reduction of costly stockpiles of perishable dairy products.

I strongly urge you to support this amendment.●

MINING RECLAMATION RESERVE ACT OF 1981

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BAILEY. Mr. Speaker, today I have introduced, with Representatives MURPHY, GAYDOS, and MURTHA, the Mining Reclamation Reserve Act of 1981.

The intent of our measure is to clarify existing law and to eliminate any question that an accrual-basis taxpayer is entitled to take current deductions for estimated future reclamation expenses incurred when complying with the surface mining reclamation requirements of Federal and State law. Current case law under the Internal Revenue Code and technical IRS regulations are unclear as to the right of surface mining operators on this point.

Under the accrual method of accounting, an expense deduction generally cannot be taken until a liability exists and the amount of the expense can be determined with reasonable accuracy. For surface mining operators, the liability exists immediately as a consequence of the reclamation requirements imposed by the Surface Mining Reclamation and Control Act (SMCRA) and many State-enacted reclamation laws. When an application

for a surface mining permit is made, a reclamation plan is included and reviewed by the State regulatory body or the Office of Surface Mining. This reclamation plan must be approved before an operator permit is issued. This plan incurs a future liability as an operator complies with the reclamation requirements of both Federal and State law.

Under our bill, the accrual method of accounting for reclamation expenses is made available to cash-basis taxpayers and is clarified for all taxpayers who elect to use the new provision. However, once elected, the consent of the Secretary of the Treasury is required for an operator to revoke this method. Consistent with present rules relating to percentage depletion allowance and development expenditures, the election is available to mining operators on a property-by-property basis. We recognize that the Internal Revenue Service may raise a strong objection to this provision, but we believe surface mining operators should be allowed maximum flexibility in their business operations.

Eligibility for the accrual method under our bill is extended to all surface mineral mining operations, not just surface coal mining. We believe that since all surface mining operations are subject to Federal and State reclamation laws and incur the associated expense liability of compliance, they should all be eligible to elect accrual accounting and take the tax deduction.

One particular concern that the IRS has and which we feel we have more than adequately addressed is the question of what constitutes a qualified reclamation plan and a reasonably accurate estimate of expense. We have provided that the minimum standard for what qualifies as a qualified reclamation plan be the requirements of the Surface Mining Reclamation and Control Act or State requirements that are substantially similar. In many States, more stringent reclamation requirements are made of operators. Our bill provides that no qualified plan may be any less stringent than Federal reclamation requirements. With respect to the reasonable accuracy of estimated expenses, we believe that the requirements of the reclamation plan itself includes factors that bear on the reasonableness of the estimated expense. In particular, plans included geological and engineering reports that delineate the extent of future reclamation and thus the extent of the liability incurred. The Secretary of the Treasury is not precluded from challenging the accuracy of estimated expenses, nor does our bill require mining operators to obtain the advanced approval of the Secretary of their expense estimates of the reclamation plan.

I have also included a technical explanation of our bill with my statement.

The above mentioned follows:

TECHNICAL EXPLANATION OF H.R.—: THE MINERAL MINING RECLAMATION RESERVE ACT OF 1981

The bill would allow a taxpayer engaged in surface mining to elect (on a property-by-property basis) to deduct in computing its taxable income a reasonable addition to reserves established for the estimated expenses of surface mining land reclamation. Estimated expenses of surface mining land reclamation are amounts deductible by the taxpayer under the income tax that (1) are attributable to qualified reclamation activities (as defined in the bill) to be conducted in future taxable years, (2) are subject to estimation with reasonable accuracy, and (3) are allocable to minerals extracted before the end of the taxable year. Qualified reclamation activities are defined as land reclamation activities conducted under a reclamation plan submitted as part of a surface coal mining permit application under the Surface Mining Control and Reclamation Act of 1977 or under a plan submitted pursuant to a Federal or State law imposing substantially similar surface mining land reclamation requirements. Thus, a qualifying plan would have to have been submitted in order to obtain a surface mining permit and would include the items specified in section 508 of the Surface Mining Control and Reclamation Act of 1977. If the reclamation plan is revised, only the activities described in the revised plan are subject to the reserve provision.

Nonqualified land reclamation expenses (i.e., expenses for reclamation activities other than those described in the plan) would be deductible in the manner prescribed by regulations.

Estimated expenses of surface mining and reclamation that are attributable to mining activities occurring before the first taxable year for which reserve accounting is elected and which have not been previously deducted are treated as deferred expenses and may be deducted ratably over a 60-month period beginning the first month of the first taxable year for which reserve accounting is elected. If mining of a property with respect to which there are deferred expenses will be completed in less than 60 months, then the expenses can be deducted ratably over that shorter period.

The bill also provides that if a taxpayer elects reserve accounting for the first taxable year ending after enactment and has used a method of accounting reasonably similar to the new reserve method for a continuous period of one or more taxable years ending before enactment, then the taxpayer may elect to have that method treated as a valid method of accounting for that period. A prior method would be considered reasonable, if the deductions allowed using that method did not exceed those that would have been allowed using the new reserve accounting system. This election can be made with respect to only one continuous period.

The bill also provides that if the amount in any reserve for estimated expenses of surface mining land reclamation is determined to be excessive at the close of any taxable year, then the excess shall be taken into account in computing taxable income for that year. Thus, if at the conclusion of reclamation activities the reserves were not entirely expended, the excess would be included in the taxpayer's income for that year unless the excess resulted from an unreasonable addition to the reserve in a prior year in which case the prior year's income would be increased.

The provisions of the bill are elective on a property-by-property basis. A taxpayer may elect reserve accounting, without the consent of the Secretary, if the election is made not later than the time for filing the income tax return of the first taxable year ending after enactment in which the taxpayer is engaged in surface mining on the property and for which there are estimated expenses of surface mining land reclamation. Consent of the Secretary is required to elect reserve accounting beginning in any taxable year after the first post-enactment taxable year in which the taxpayer is engaged in mining on a property and has estimated reclamation expenses. The consent of the Secretary is also required to terminate the reserve accounting election.

The bill does not affect the tax treatment of expenditures for the extraction of oil or gas or for the extraction of minerals from brines or sea-water.●

THREAT OF POLAR ICE MELT

HON. JONATHAN B. BINGHAM

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BINGHAM. Mr. Speaker, according to an inconspicuous article in the Washington Post for October 21, the Antarctic ice pack has been reduced by melting nearly 1 million square miles in the last decade. This raises once again the frightening prospect that, because of the buildup of carbon dioxide in the upper atmosphere and the resultant greenhouse effect, the oceans may well rise and flood out the world's shorelines and port cities.

In the light of this, the Reagan administration's apparent lack of interest in pressing ahead with the development of solar power, as a substitute for fossil fuels, seems incredibly shortsighted.

The article follows:

ANTARCTIC ICE PACK SHRINKS DRAMATICALLY

Increased melting of sea ice has reduced the Antarctic ice pack nearly one million square miles since the early 1970s, two Columbia University scientists report.

The dramatic change, which has seen the edge of the summer ice pack retreat approximately 140 miles since 1973, could be the first physical evidence of the global warming trend that scientists have been predicting for years. They attribute the warming trend to the buildup of carbon dioxide and call it the "greenhouse effect."

If the shrinking ice pack signals a long-term change in climate, it could also cause a rise in sea level that could flood low-lying coastal areas of the world.●

LASER WEAPONS, PRO AND CON

HON. THOMAS J. DOWNEY
OF NEW YORK
IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. DOWNEY. Mr. Speaker, one of the major controversies in national defense today centers around laser weapons. According to some, laser weapons of revolutionary effectiveness are just around the corner if we will supply the necessary funding. According to others, laser weapons are Buck Rogers fantasy devices beset by insoluble problems in the real world.

To anyone interested in sorting his way through the thicket of claims and counterclaims, I recommend a very fine article by Edgar Ulsamer which ran in the August issue of Air Force magazine. Mr. Ulsamer systematically and objectively explains the basic technology of laser weapons and reviews their assets and liabilities. So that my colleagues may share his insights, I now insert the article in the RECORD.

[From Air Force Magazine, August 1981]

THE LONG LEAP TOWARD SPACE LASER WEAPONS

(By Edgar Ulsamer)

A modified NKC-135, or ALL (for Airborne Laser Laboratory) is about to demonstrate that an airborne high-energy laser device can engage an air-to-air missile over a distance of about one kilometer. Even though ALL failed to bring down the target in its first two tries, the eventual success of this experiment—which has been more than ten years in the making—will be of historical importance.

THE COHERENT LIGHT BEAM

The term laser stands for Light Amplification by Stimulated Emission of Radiation and actually is a misnomer since technically the system functions as an oscillator rather than an amplifier. The correct acronym would obviously have an unfortunate connotation, however.

Oversimplified, the laser capitalizes on and links fundamental qualities of light and matter through a fortuitous marriage of optics and electronics. Light, according to Planck's theory, consists of small units, or "bullets" of radiation.

Building on this theory, Einstein and other scientists reasoned that matter has individual and distinct energy levels that can change, up or down, only in increments equal to a quantum, or, as Einstein called it, a "photon." In that sense, laser action begins when a photon is induced to strike a molecule that—by chemical or electrical means, usually referred to as "pumping"—has been "excited" into a high-energy level. When this happens, the photon that strikes the excited molecule knocks off another (and identical) photon. Both photons leave the molecule at the same time and travel in the same direction. (The molecule, robbed of one photon, drops down to a low-energy, or stable, level.) Each photon travels on until it strikes another excited molecule and the process thus creates still more photons in the manner of a chain reaction.

The result is an avalanche of photons, all of the same size and traveling in the same direction. The final product is a light beam consisting of light waves of the same wavelength and in step with each other or "coherent," that can transmit vast amounts of thermal energy over vast distances with relatively little loss of energy. The techniques and hardware for pumping vast amounts of energy into high-energy laser test-beds and for extracting sufficient laser energy to be of military interest are as complex as the theoretical principles behind these futuristic technologies.

THE HIGH-ENERGY LASER

Low and moderate energy lasers have become commonplace in a host of applications, including medicine, science, cartography, communications, rangefinding, and target designation. The Pentagon defines a high-energy laser as a system that has an average power output of at least twenty kilowatts (equivalent to twenty-seven horsepower) or a single pulse energy of at least thirty kilojoules.

To date, the Defense Department has invested close to $2 billion in high-energy laser work. The reason for this largesse is that laser weapons appear to offer unique advantages, primarily by transmission of focused energy at the speed of light. This eliminates the requirement to "lead" the target. It takes 1/186,282 of a second for laser energy to travel one mile; in that time a supersonic target, be it either a missile or an airplane, flying at twice the speed of sound, will cover only a little more than one-eighth of an inch.

Further, future laser weapons probably will be able to handle large numbers of targets even if the targets are coming from all directions. For each "shot" the laser fires, relatively small amounts of fuel are used to generate the beam. Hence, there is the potential for getting off a large number of "shots" rapidly. Lastly, since mirrors are used to steer the laser beam, a laser weapon should be able to move rapidly from target to target over a wide field of view. But as the snail's pace and frequent setbacks encountered in the development of laser weapons amply prove, a host of factors conspires to undo much of their promise. ALL, for instance, was scheduled to shoot down its first target in 1974; now, seven years later, it may be on the verge of actually doing so.

For a laser weapon to get off a telling "shot," its beam must burn through the target's surface and destroy a vital component such as the guidance system, detonate its warhead, or ignite its fuel. The laser weapon delivers its energy instantaneously. Nevertheless, the weapon must dwell on the target long enough to destroy or damage it. Any jitter of the beam—which is difficult to suppress while vast amounts of energy are being generated—will smear its energy over a wide area and thus increase the time required to damage the target. A highly accurate beam control system in needed, therefore, to hold the beam steady on one spot on the target.

Fire control for laser weapons is especially crucial. Since lasers must be pointed with great accuracy, the fire control subsystem must be extremely accurate in telling the beam control subsystem where to point. In addition, to realize the firepower potential of a laser weapon the fire control must be quick to recognize that the target being engaged can no longer perform its mission so that the laser spends as little time dwelling on the target as possible.

The atmosphere also affects laser weapons. Depending on the wavelength of the laser energy, the atmosphere absorbs varying amounts of the laser's energy, and causes the beam to "bloom" or defocus. The atmosphere also adds jitter to the beam. Interactions between the high-power beam and the atmosphere increase the spot size on the target—thus lowering the peak intensity and increasing the required dwell-time.

The net effect of atmospheric absorption is that, for a given range, there is a critical power level beyond which the amount of energy focused on the target decreases as laser power increases. This effect is most pronounced when the line of sight to the target is fixed (as in the case where the attacker is headed directly at the laser) and the wind velocity is low. In bad weather or in the presence of clouds or aerosols such as smoke, more of the energy in the laser beam is absorbed, to limit further the range of the laser weapon.

A number of new types of lasers—beyond the current crop of laboratory devices—are beginning to take shape, including the so-called excimer and free-electron systems. The latter represents a marriage of laser and nuclear accelerator technology. Although potentially attractive because the system—if feasible—might be tuneable, meaning its wavelength can be adjusted to ease the problem of beam propagation in the atmosphere, its bulkiness would confine the free-electron laser to use on the ground.

The excimer laser concept, which also is a candidate for the bluegreen laser communications system meant to reach down to deeply submerged submarines, is thought to offer significant increases in laser efficiencies. The current generation of high-energy lasers suffers from a fundamental drawback: they deliver on the target only a fraction of the energy that is needed to drive the systems, typically about two or three percent. The excimer laser can probably cram about fifteen percent of the energy feeding it into its beam. Other advanced concepts—although somewhat further along—are the Alpha and Sigma cylindrical chemical lasers, which show promise for both space-borne and airborne applications. The Sigma device might be developed for test on a follow-on to ALL, the ALL-2, a large, wide-body aircraft that could accommodate a larger and heavier laser system.

PAST LASER WEAPONS TEST

In the course of development efforts to date, test-beds using technology developed in the HEL (high-energy laser) program have scored "firsts" for the US in engaging flying objects. The first such success was in 1973 when the Air Force used a high-energy gas dynamic laser and an Air Force-developed field test telescope to shoot down a winged drone on the Sandia Optical Range at Kirtland AFB, N.M. In 1976, the Army, using a high-energy electric laser in its Mobile Test Unit destroyed winged and helicopter drones at Redstone Arsenal, Ala. Except for ALL, the most recent tests were in March 1978 when the Navy, using a chemical laser it developed jointly with the Defense Advanced Research Projects Agency (DARPA) and using a Navy-developed pointer/tracker, engaged and destroyed, in flight, a TOW antitank missile. These tests were part of the Unified Navy Field Test Program conducted at San Juan Capistrano, Calif., at a site near Camp Pendleton, Calif.

The major objective of these experiments was to obtain experience and insight into the problems of integrating a laser of relatively high power with a pointing and tracking device and maintaining the laser beam

on the selected aimpoint. While dramatic proof of successful attainment of these technology goals, the actual shootdowns were a secondary objective.

SPACE-BASED LASER WEAPONS CONCEPTS

In May of this year, the Senate passed an amendment (at this writing there has been no corresponding action on the part of the House) to the fiscal year 1982 authorization bill that allocates $30 million to the Air Force and $20 million to DARPA for research on space-based lasers. The amendment instructs the Secretary of the Air Force to set up a special Program Management Office for weapons of this type and to conduct a "detailed system definition of the space-based laser weapons program, which shall include costs, schedule, and identification of risks. "The Air Force was instructed to report to the Armed Services Committees of the Senate and the House on the results of this study.

In the course of the hearings by the Senate Armed Services Committee that preceded passage of the amendment, Sen. John W. Warner (R-Va.) presented an assessment by Dr. John Foster, a former Director of Defense Research and Engineering—on behalf of the Defense Science Board—about the feasibility of using space-based lasers for ballistic missile defense (BMD) that concluded that "in the twenty-first century directed energy weapons such as space-based lasers are almost inevitable, but achievement of an effective space-based ballistic missile defense system is far more expensive and difficult than the most extreme enthusiasts admit.

Citing a host of as yet "unresolved" difficulties and many scientific and engineering "uncertainties," the Defense Science Board (DSB) concluded unanimously that "it is too soon to attempt to accelerate space-based laser development toward integrated space demonstration for any mission, particularly for ballistic missile defense." The DSB did recommend, however, that the potential utility of space-based laser weapons warranted an average annual increase of $50 million over the current level of effort.

The Board questioned the merits of assigning such missions as ASAT (satellite interceptor) and air defense to space-based laser weapons because these tasks "can be performed more cheaply by other technologies such as miniature homing devices and ground-based lasers."

The DSB found further that commitment to Manhattan-type projects or maximum acceleration requires commitment to chemical lasers when shorter wavelength lasers such as excimer lasers may offer far more cost-effective approaches only a few years later.

"Once technical problems for space-based BMD lasers are resolved, tremendous systems and operational considerations remain. For example, space laser sensors and weapons are vulnerable to the measure/countermeasure syndrome.

"Some advocates have suggested that space lasers will make offensive weapons obsolete, thus providing a new arms-control regime. In fact, offensive and defensive weapons always work together and in this case adversaries, unwilling to live without an offensive capabililty, would undoubtedly plan to attack space lasers with ASAT systems, including other space lasers so as to free their offensive forces.

First space laser deployments will have a powerful psychological effect, but are likely to have less revolutionary military effect for some years to come. However, it should be recognized that the other technologies for space warfare will arrive long before space lasers are deployed."

UNANSWERED QUESTIONS

The convergence of several political and "public-relations" considerations—rather than the realities of science and engineering—seems to have led to the current popularity of space-based laser BMD and fostered the illusion that the associated technologies are in hand. The media appeal of an orbiting weapon system that "zaps" an enemy's ballistic missiles with lethal rays and thus confines strategic war to the voids of the universe is, of course, obvious. Also obvious is the political attractiveness of banishing the horrors of nuclear war from US territory and the airspace above.

Unfortunately, as the Defense Science Board and the majority of all scientific and military experts point out, the laws of physics and the historical verity of measure begetting countermeasures militate against the near-term feasibility of such a system.

Those who shrug off the vast technological and engineering problems associated with an SBL-BMD (space-based laser/ballistic missile defense) system still confront a monumental obstacle: The excessive vulnerability of such a space battle station combines with the excessive incentive for the other side to attack it preemptively. The make or break element of laser weapons is variously known as the brightness factor or radiant intensity, meaning the light energy that is being focused on the target. While there are other variables, three factors are the principal determinants of radiant intensity: the power that is being generated by the laser weapon, the distance between the weapon and the target, and the size of the spot that is being "illuminated" by the beam.

For the time being, there is no evidence that major breakthroughs in power source effectiveness are around the corner. The same is true for laser systems that might be significantly more "lethal" than the family of high-energy prototype devices in existence or on the drawing boards.

(Over the long term, it is possible to hypothesize that X-ray lasers whose beam can penetrate matter would exceed the lethality of lasers operating in the visible light and infrared region. X-rays can be generated in vast quantities by nuclear detonations where they represent the major component of the so-called EMP, for electromagnetic pulse. Again, engineering reality turns out to be the spoilsport: To date, nobody has figured out how to set off a powerful nuclear blast without obliterating the X-ray laser that is to focus the blast's energy on a distant target.)

The only two variables, then, that system designers can influence are beam divergence and distance. The latter is crucial and controlled by a law of physics expressed as r^2, meaning that laser power has to go up at a "squared rate" to keep up with linear distance increases. Applied to present realities the consequence of r^2 is sobering.

The best performance to date involved the destruction of a specially prepared TOW missile by a ground-based laser developed by the Navy and DARPA, using a Hughes point/tracker system, over a distance of one kilometer. The stark realities of SBL-BMD are that these systems probably will have to function over distances of up to 10,000 kilometers, requiring a 100,000,000-fold increase in laser power delivered on the target. Even if lasers of such enormous capacity can be built, there still remains the problem of delivering that energy in a precisely focused manner on the target. The first step here is a large mirror to focus the energy. The second is to prevent jitter of the system while vast amounts of energy are being generated. ALL failed to destroy its first two targets because of unanticipated jitter, even though the distance from the laser device to the target was relatively short.

There are unresolved questions about the size of the mirror required for an SBL-BMD. Some of them involve basic uncertainties about what a constellation of laser battle stations should look like. Others hinge on the amount of radiant intensity that needs to be "fired" on the target. It is probably unrealistic to assume that the Soviets would not harden their ICBMs once the US signaled its intention to develop space-based laser battle stations. The current generation of liquid-fueled Soviet ICBMs, once caught by a high-powered laser beam, could be destroyed relatively easily. In order to save weight and boost performance, these missiles rely on thin-walled construction in their fuel section. Once that wall is breached, the laser's thermal energy, of course, would ignite the fuel, thus destroying the missile.

There is little room to doubt that the Soviet Union, as well as the US, knows how to provide relatively low-weight thermal protection, ranging from a multitude of materials and techniques used on reentry vehicles of ballistic missiles to the special tiles on the Space Shuttle. The difference in power and dwell-time required to destroy an "easy mark," such as an unshielded liquid missile, compared to what it takes to evaporate a target that incorporates passive countermeasures, is vast. Military planners in this country, of course, believe that any US SBL-BMD system must be based on the presumption that its targets, the Soviet ballistic missile forces, eventually will incorporate laser countermeasures. The size of the mirror of the weapon, its orbital altitude (and thus the approximate distance from the target), and the number of space battle stations required to provide around-the-clock coverage of the Soviet launch sites are all affected by whether or not the system has the ability to destroy thermally protected targets.

This factor, along with other, equally weighty considerations, would seem to preclude deployment of SBL-BMD systems at geostationary altitude (about 36,000 kilometers). At such an altitude, the system would be overhead at a specific point of the globe at all times and have an extremely wide range of view. In turn, this condition would reduce the number of systems required to provide constant coverage of Soviet ICBM fields.

Conversely, deployment of such a system at low orbital altitude requires a constellation of laser battle stations—probably eighteen as a minimum but possibly a far greater number—to provide around-the-clock coverage of the Soviet ICBM launch sites. Further, since the battle stations circle the globe approximately once very ninety minutes, only two or three, depending on their altitude, can provide coverage of Soviet territory at a given time. A Soviet preemptive attack, therefore, can be confined to the few SBL-BMD systems providing coverage of the launch sites during the period of a planned Soviet ICBM launch.

The rotational factor introduces a welter of other complications. Assuming that about 1,400 Soviet ICBM silos—the current inventory—must be covered at all times, each one of the two or three battle stations

positioned above them at a given moment has to be able to destroy several hundred individual missiles within a period of less than twenty minutes. The length of this "window" is determined by the need to destroy the ICBMs before they can release their MIRVed warheads and, of course, before the individual laser weapons have moved too far away from their targets.

The command and control problem that results is colossal. Presumably, the individual battle stations will have to be preprogrammed to monitor several hundred known Soviet ICBM silos, and, upon detection of launches, to attack the missiles in flight. Almost certainly, the target list stored in the battle station's computer will have to be updated several times over the lifespan of a particular weapon. Also, targets will have to be "handed over" from one SBL-BMD system to another as these weapons move in and out of the "battle zone."

Whether or not future administrations will be willing to entrust such life-and-death decisions as attacking Soviet ballistic missiles to "robots" in space remains to be seen. The requirement for a manned command post in space, on the other hand, would stress further the technological and engineering challenges associated with SBL-BMD and vastly increase costs. Further, mobile ICBMs and IRBMs (intermediate-range ballistic missiles, such as the Soviet SS-20s) almost certainly are beyond the ken of SBL-BMD, even though by the year 2000 and beyond when laser weapons of this type might become feasible, mobility of one kind or another almost certainly will have been added to all ballistic missiles.

THE DECK IS STACKED IN FAVOR OF THE OFFENSE

The small segment of a constellation of SBL-BMD satellites that matters during the decisive phase of a laser vs. ICBM battle is subject to a wide range of antisatellite measures. They run the gamut from nuclear and conventional interceptor attacks, "space mines," and decoy missiles, to countermeasures that disable the command and control or pointing elements of the laser weapons as well as attack by ground-based lasers.

Most HEL experts believe that SBL-BMD satellites can be put out of commission without need to resort to exotic technologies; current ASAT approaches—especially the US combination of high-flying aircraft and solid-propellant boosters that strew shrapnel-like matter into the path of targets—seems more than adequate.

The US ASAT that is being developed by the Air Force will use F-15 Eagle aircraft to release modified SRAMs (short-range attack missiles) at high altitude. The SRAM booster, in turn, uses a miniature homing device to release a cloud of "buckshot" into a counterorbit that causes collision with the target at extremely high velocities.

There are many advantages that accrue to this approach to the ASAT mission, not the least of which are relatively low cost, operational flexibility, and easy proliferation. SBL-BMD satellites are considered to be ideal targets for this type of ASAT. Not only are the laser battle stations bulky and in a fixed orbit but they include an extremely fragile and large mirror. The diameter of the latter probably will be in the thirty-meter range, thus making it an easy prey for the ASAT's buckshot. At the same time, the SBL-BMD weapon probably will be ineffective against the shrapnel cloud—which radiates no energy and thus is hard to detect—in terms of self-defense, assuming that the system can be provided with such an ancillary capability in the first place.

The system's vulnerability to ASAT attacks, incidentally, would not be ameliorated even if one resorts to such "far-out concepts" as using huge ground-based lasers that beam their energy at space-based mirror systems that in turn focus the energy on the target.

It can be argued also that an SBL-BMD satellite overflying the Soviet Union eventually will be extremely vulnerable to attack by ground-based Soviet lasers. While the space laser has only a second or so to disable a given Soviet ICBM, the Soviet ground-based laser has several minutes to find, track, and attack the US SBL-BMD.

Lastly, detonation of a high-yield nuclear device even at considerable distance from a laser battle station is likely to put the latter out of commission.

POLITICAL AND ECONOMIC RAMIFICATIONS

A US commitment at this time to a massive SBL-BMD development program might provide an emotional "high" for the national psyche and cause discomfiture for the Soviet Union. But, in the view of many Air Force and other Pentagon analysts, its transient, mainly propagandistic advantages would not compensate for the ensuing disadvantages. Primary here is the fact that it would take about $10 billion in R & D money to develop and "fly" a single prototype. Premature investments of this magnitude in a technology that most experts consider not yet ready for full-scale exploitation might sound the death knell for the development of such weapon systems at a later time when their underlying technologies have reached maturity.

In addition, siphoning off funds from research and development in the strategic sector obviously would slow down work on unrelated weapon programs that are ready for full-scale development.

On the other hand, there can't be any doubt about public reaction in this country if the Soviets were to give evidence of moving toward SBL-BMD. While such an eventuality is not very likely as long as the Soviets don't have an operational Space Shuttle, even a Soviet gesture in this direction would build strong political pressures for the US to start developing such a system at once.

Some defense scientists with a cynical bent suggest that the proper response would be to provide Shuttle astronauts with a small laser and have them "zap" a nearby token target to propitiate public opinion without having to launch a program that isn't ready for launching.●

LAUNCHING REAGANOMICS

HON. CLAIR W. BURGENER

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BURGENER. Mr. Speaker, under leave to extend my remarks in the RECORD, I include the following:

LAUNCHING REAGANOMICS—KNX NEWSRAD EDITORIAL

As of today, President Reagan's program for economic recovery takes legal effect. But KNX wonders if opponents of the Reagan plan would rather be right than recover.

If one word describes the Reagan program of budget slashes and tax cuts, it's controversial. Its success is anything but guaranteed. But the stakes are so high, and the nation's economic future so worrisome, that it's hard to imagine anyone actually hoping for the program's failure.

That is, until you hear from someone like Democratic House Speaker Tip O'Neill, who's reportedly enjoying the prospect of an economic bellyflop. O'Neill recently was quoted as saying, while beaming, "I think I'll sit on the sidelines for a while." What kind of loyal opposition does this country have, that hopes to profit politically from the collapse of a plan for easing economic pain?

This is no argument that the Reagan plan is flawless. Reaction across the nation may send the administration back to the drawing boards on a number of features, like military spending. But short of wars and the 1930's great depression, the current crisis of confidence is one of the most serious challenges America has ever faced. And to paraphrase the late Lyndon Johnson, President Reagan is the only President this country's got. So why not a kind of wartime bipartisan commitment to restore America's economic health? Why not efforts by both parties' leadership to make a possibly-modified Reagan plan work? Do the Democrats really believe they'll be richly rewarded in the 1982 elections for standing on the sidelines and booing?

KNX reminds the critics there's folly and danger in yelling, "Your side of the boat is sinking."●

PEPPER ACHIEVEMENTS ARE ACKNOWLEDGED

HON. BILL CHAPPELL, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. CHAPPELL. Mr. Speaker, the following editorial concerning the monumental achievements of our dear friend and mentor, CLAUDE PEPPER, appeared in one of the largest newspapers in my Congressional District, the Daytona Beach Morning Journal. The editorial was written on September 11, 1981, in observance of CLAUDE'S 81st birthday.

As we all know, CLAUDE is universally recognized for his crusade on behalf of the elderly. What is sometimes overlooked is the fact that CLAUDE PEPPER has championed the rights of the young, the poor, and civil rights for all since the days of F.D.R. His great sensitivity to the needs of the people has indeed made him a valuable and effective Member of Congress, a true patriot and statesman as well as a loyal, dedicated and productive servant of his constituency.

Mr. Speaker, we all know what an honor it is to be recognized by our local newspaper for our hard work. However, when a highly respected newspaper far removed from your Congressional District devotes an entire editorial to expound on your virtues and accomplishments, then you know that your efforts have not gone unnoticed.

The Daytona Beach Morning Journal editorial which follows truly captures the essence of CLAUDE PEPPER'S greatness as a leader and warmth as a human being. It represents a token of the great esteem his colleagues, his Nation and his State, hold for the dynamic, young octogenarian who continues to "Pepper" the national scene with his compassion, honor, intergrity and forceful leadership. He is the epitome of a true national leader and a giant among the great who have passed our way:

[From the Daytona Beach Morning Journal, Sept. 11, 1981]

MORE PEPPERS NEEDED IN WASHINGTON

Congressman Claude Pepper is known as "Mr. Aging" by his fellow senior citizens these days. But Claude Pepper was fighting for the elderly long before he thought about becoming a member of the over 65 club.

"Senator" Pepper is 81 today. And there is some irony in that Labor Day, which has been observed in this country since 1923, falls each year on or near the birth date of a man who has labored over a 52 year span as a public servant dedicated to addressing the needs of low and middle income workers.

Long before he became a senior citizen, Claude Pepper was fighting in Congress for laws which would give at least minimum health care and retirement benefits to retirees who had worked a lifetime barely earning enough to feed and house their families.

It has been said of Pepper that he was a "liberal" ahead of his time, and that he was a "liberal" in an era when people weren't suspicious of liberalism.

Pepper never has been concerned about labels. He has been concerned only about principles and convictions, which motivated him to enter public service as a state legislator in 1929, and prompted him to seek election and serve in Congress for 33 years—14 in the U.S. Senate from 1937 to 1951 and the last 19 years in the House.

Americans of all ages, not just senior citizens, owe a lot to Claude Dansen Pepper. When he went to Washington he started an immediate push for some kind of national health insurance and a minimum wage. He won on both counts, despite formidable opposition from the American Medical Association, which succeeded in delaying Medicare for many years, and opposition from most Southern congressmen who feared that a minimum wage law would lead to legislation outlawing racial segregation.

Pepper prevailed over the years because he fought for what he knew was right.

He's still winning, even though the mood in Washington seems to be turning away from the progress which has been made over the years.

As chairman of the House Select Committee on Aging, he has been challenging proposals by the Reagan administration to cut senior citizens' benefits. He has introduced legislation which would help senior citizens without destroying the integrity of the Social Security system. His proposals are supported by staff studies and have been endorsed even by some economists aligned with the Reagan administration.

When Pepper takes a position on an issue it doesn't matter to him whether a Democrat or a Republican is in the White House. He lost his seat in the Florida House after only one term because he voted against a resolution which condemned Mrs. Herbert Hoover for inviting a black man to the White House for tea.

A few years later as a freshman U.S. Senator, he was urging a New Deal president, Franklin D. Roosevelt, to use his office to push for legislation which would establish a minimum wage, old age pensions, national health insurance, and equal rights. He also pushed for legislation to abolish the poll tax which was levied in Southern states to discourage blacks from registering to vote.

A vicious smear campaign by George Smathers in 1950 temporarily removed Claude Pepper from the congressional scene. But he bounced back. And, although most of his former allies and adversaries are gone, this man of principle and integrity labors on.

Retire? He said recently he "just wouldn't have the zest for it."

It's a shame there aren't more like Claude Pepper in Washington, willing to fight for those segments of society which don't have a powerful lobbying voice in Congress.●

MARKS SUPPORTS THE FOOD AND AGRICULTURE ACT OF 1981 (H.R. 3603)

HON. MARC L. MARKS

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MARKS. Mr. Speaker, I will be necessarily absent when the vote on final passage of H.R. 3603 takes place. Were it possible for me to be present, I would have voted "aye."●

NATIONAL FOREST PRODUCTS WEEK

HON. RON MARLENEE

OF MONTANA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MARLENEE. Mr. Speaker, it is my privilege to call attention to the observance of National Forest Products Week, October 18–24.

In a proclamation noting congressional designation of National Forest Products Week, President Reagan called attention to the vital role that forests play in maintaining a healthy economy in the United States.

The President noted that more than 3 million Americans are employed in wood-dependent occupations, and that their combined production is valued at about $100 million each year.

The proclamation continued:

The contribution forests must make to our nation's welfare will remain just as great in the years ahead as in the past. To meet the needs of the future, our forests must benefit from effective timber management and from continuing research to find better ways to utilize forest products. Improved wood growth and usage will make more wood products available at affordable prices while helping to stimulate our entire economy.

With wise forest management, the demands of aesthetics and economics will remain compatible, the President said.

For myself, I would add that not only does the wood and fiber industry provide employment for millions of Americans, it also is one of the largest—perhaps the largest—user of our railroad transportation system, and a large user of the trucking system also.

It is unfortunate that, as we mark Forest Products Industry Week this year, the forest industry is in the midst of a severe slump. This is due to the disastrous drop in homebuilding across the country—due in turn to high interest rates.

The forest products industry believes that current tight money and high interest rates will only postpone, not stop, the demand for housing—which is wood's principal market. The longer the slump in homebuilding continues, the greater will be the backlog for new housing by the public. Housing prices will become even more inflationary unless the supply of new homes is increased.

Further cuts in Federal spending and balancing of the budget will bring down interest rates. Housing then will revive, and perhaps even boom, bringing with it renewed prosperity not only for the homebuilding industry but for wood products and all other suppliers of building materials.

These reflections should be emphasized as we mark 1981 National Forest Products Week in appropriate observances across the country.●

U.N. PRINCIPLE (SO-CALLED)

HON. DANIEL B. CRANE

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. DANIEL B. CRANE. Mr. Speaker, I recently came across an article that points to the blatant hypocrisy that all too often is evident in U.N. actions. Because of the extensive commitment of American funds to this international organization, I wanted to share this informative and interesting article with my colleagues.

The articles follows:

[From the New York Times, Oct. 9, 1981]

U.N. PRINCIPLE (SO-CALLED)

(By C. D. Rawicz)

When the United Nations General Assembly met recently to consider South Africa's refusal to grant Namibia (South-West Africa) independence, it voted overwhelmingly to eject from the session the one country without whose cooperation a peaceful settlement in Namibia is improbable. Not only was South Africa not allowed to speak, but also the credentials of its delegates were rejected on the grounds that the delegates did not represent the people of that country. Then, a few weeks later, the credentials of the Pol Pot "regime" of Cambodia were accepted by the same credentials committee. Many countries that denied South Africa

the right to speak vote routinely to seat the Palestine Liberation Organization on the grounds that a Middle East settlement is impossible without its participation. Why doesn't the same logic apply to Southern Africa?

There is little chance of the United Nations' destroying either South Africa or Israel. There is a real danger, however, that the issues of the Palestinians and apartheid may destroy the United Nations.

The Charter lays out a series of neutral principles intended as a yardstick for national and international conduct. All member states agree to act in accordance with them. Abuse of political prisoners; suppression of dissent; economic and social inequality on grounds of race, sex, language or religion; the use of armed force against another state all violate Charter principles. But to apply the principles to some and not to others is discriminatory, just as it is discriminatory to endow some with rights and deny them to others.

The Assembly, in singling out Israel and South Africa, is pursuing not principles but scapegoats. Without a coherent statement of reasons for action, a scapegoat may be eliminated without advancing principle. The removal of the Shah did not stop the taking of political prisoners, free the press, or enhance the civil liberties of the people of Iran. The disappearance of Israel will not necessarily house or employ the Palestinians or solve the region's intricate problems. The collapse of the white-minority Government in South Africa will not necessarily put an end to racism or guarantee regular elections.

More than 10 million refugees, half of them in Africa, are deprived of a homeland. Two resolutions of the last regular General Assembly took note of this, and urged "durable and speedy solutions." At least 13 resolutions were devoted to one group of refugees, the Palestinians. One contained an annex listing their Inalienable Rights: Palestinians have the Right to Return, and to Self-Determination, National Independence, and Sovereignty. If the Rwandan, Cambodian, Ugandan, Eritrean, Vietnamese and all refugees enjoy similar inalienable rights, these were not invoked. Palestinians have special rights not because they are displaced but because they are displaced by Israel.

Many member states violate provisions of the Universal Declaration of Human Rights. A number practice torture, deny habeas corpus, and summarily execute their citizens. Several governments are at war with sections of their populations who feel inadequately represented by the regime. Others send military forces into neighboring countries.

The last General Assembly devoted mildly worded resolutions each to Cambodia, Afghanistan, El Salvador, Lebanon, Uganda, Chad and other embattled countries. "Grave violations of human rights and fundamental freedoms" in some Latin American countries were deplored. But more than 25 resolutions denounced in detail South Africa's policies, trading partners, economics, and investors. By an overwhelming majority, the Assembly reaffirmed "the legitimacy of the struggle of the oppressed people of South Africa and their national liberation movement by all available means, including armed struggle." No other country came in for such scrutiny. Armed struggle is sanctioned not because human rights are denied but because they are denied by South Africa.

The Palestinians enjoy, in the Secretariat, a Special Unit on Palestinian Rights. But other refugees are generally treated as "humanitarian affairs." A Special Unit on Apartheid promotes the cause of South African national-liberation movements. United Nations radio broadcasts daily into South Africa in six local languages. A Convention on the Suppression and Punishment of the Crime of Apartheid endorses compilation of a blacklist of collaborators. By definition there can be only one criminal, since only one country practices apartheid, whereas many countries, legally or illegally, practice many kinds of discrimination.

It is convenient to define racism as something that happens in South Africa and self-determination as something that Israel denies. Neutral principles are not necessarily convenient, or even expedient. The extravagance of the rhetoric, the disproportionate amount of time and resources spent on these two issues, may damage the United Nations more than the evils attacked.●

ANWAR SADAT

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LEE. Mr. Speaker, I would like today to share with you the brief work of one of my constituents, a multitalented man named James Stafford who resides in the community of Auburn, N.Y.

Mr. Stafford is a highly respected lawyer and community figure. He is also, as the following will demonstrate, an accomplished poet and a man who reflects the kind of sensitivity toward the course of human events that we would like to encourage in all Americans.

I know that every Member of this Congress and virtually every peace-loving person in the world felt the loss of a friend on the recent tragic death of Egypt's President Anwar Sadat. Mr. Stafford penned the following brief epitaph which I today commend to your reading:

SADAT

Not with swords flashing
Nor tumult now that he is gone,
But with the aim to do one thing well.

To live that his light might shine on;
To bear his cross to Calvary,
Like the Christ that went before,
To be the pilot at the helm,
When the great ship sinks within the storm.

He was ready for the summons,
Without a murmer he obeyed.
He's fought the great fight,
And darkness found him unafraid!●

VOTE NO AGAINST THE MOFFETT-MARKEY AMENDMENT TO DELETE BIPARTISAN LICENSING REFORMS IN THE NRC BILL, H.R. 2330

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BROYHILL. Mr. Speaker, when the Nuclear Regulatory Commission authorization bill, H.R. 2330, reaches the House floor, I urge my colleagues to vote "Yes" for the bipartisan licensing reforms it contains, and to vote "No" against the amendment my colleague from Connecticut (Mr. MOFFETT) intends to offer to delete those reforms.

These important licensing reforms are decidedly proconsumer and anti-inflation. The bipartisan reforms would assist the NRC in reducing its backlog of licensing cases over the next 2 years, while at the same time maintaining full safety and environmental protection. For the benefit of my colleagues, the following is a point-by-point critique of the Moffett-Markey amendment:

First, the bipartisan compromise licensing reforms are needed to reduce the temporary licensing backlog at the NRC and will save electric consumers over $1 billion in replacement power costs and 63 months of licensing delays at 11 completed powerplants by the end of 1983, according to the September 1981 report of the Utility Data Institute.

Second, the licensing reforms are endorsed by Mr. DINGELL, Mr. UDALL, Mr. BEVILL, Mrs. BOUQUARD, Mr. LUJAN, Mr. OTTINGER, and Mr. BROYHILL and supported by over 10 days of hearings and consideration in both the Energy and Commerce Committee and the Appropriations Committee.

Third, NRC has requested temporary authority to issue temporary operating licenses in order to reduce the licensing backlog.

Fourth, NRC is facing an extraordinary operating license workload. During 1982 alone, 17 plants will be ready to begin operation. To date this year, NRC has issued only four operating licenses, and it never in its entire existence has issued more than six operating licenses in any 1 year. Experience, commonsense and the documentation before the committees of jurisdiction make clear that without the temporary operating authority some of these 17 plants will stand idle with the costs of delay to the utilities and their ratepayers running to billions of dollars.

Fifth, the bill authorizes NRC to issue temporary operating licenses only where environmental and safety reviews have been completed, such as

EIS, Staff Safety Evaluation Report, and Advisory Committee on Reactor Safeguards Report.

Sixth, under the bill, if licensing delays do not occur, NRC does not have to issue temporary operating licenses—no right to a temporary operating license is created.

Seventh, under the bill, temporary operating licenses are initially limited to fuel loading and low-power testing, and NRC may limit the licenses to such conditions, duration and terms as it deems necessary.

Eighth, under the till, temporary operating licenses may not be issued before public participation on the EIS is completed. In addition, public hearings are held on the construction permit, which is issued prior to final operating license.

Ninth, this compromise bill already includes language on State consultation on license amendments similar to an amendment offered by Mr. MOFFETT in committee.

Tenth, according to the bipartisan Nuclear Safety Oversight Committee, chaired by Gov. Bruce Babbitt of Arizona and appointed by President Carter, nuclear licensing reform is needed because "we believe the operating license hearing has proliferated into a process dominated by issues not related to safety and by redundant issues * * *. There is general agreement that operating license hearings have become protracted proceedings in which non-safety related * * * issues are extensively considered and in which many issues are litigated that should have been raised and decided at the construction permit hearing."

Eleventh, a new Nuclear Regulatory Commission staff report says that proliferating, uncoordinated agency edicts may be having a "negative impact" on reactor safety. The report, based on a survey of managers and operators at 12 utilities says, "the pace and nature of regulatory actions have created a potential safety problem of unknown dimensions." Utility employees surveyed said the agency staff seemed unaware of the strain that the agency's constant stream of directives places on a utility's manpower and financial resources.●

DISTRIBUTION OF SURPLUS DAIRY PRODUCTS TO FOOD BANKS

HON. LES AuCOIN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. AUCOIN. Mr. Speaker, I want to add my support for the amendment passed by the House this week which provides for the distribution of surplus dairy products to food banks. It was introduced by my colleagues Mr. PEASE and Mr. JEFFORDS, and allows food banks to distribute milk, butter, and cheese to many needy individuals around the Nation.

The Government has a tremendous amount of dairy products in storage and there is no reason why we cannot share this wealth of milk, butter, and cheese with the hungry. A study by the General Accounting Office in September found that the Commodity Credit Corporation has inventories of 518 pounds of butter, approximately 486 million pounds of cheese, and about 871 million pounds of nonfat dry milk.

The cost of storage has skyrocketed over the past few years. The Government could save some money by distributing surplus products to those who can benefit from them. GAO also found that the Government's cost to store dairy products has risen sharply, totaling over $24 million for the first 9 months of fiscal year 1981. By comparison, storage costs for fiscal years 1977-80, when inventories were at lower levels, averaged about $11 million annually.

Thirty-eight congressional districts around the country have a major food bank in operation. In my district—the First Congressional District in Oregon—the Tri-County Community Council Food Bank in Portland works actively to serve as many individuals as possible and to meet their nutritional needs. It distributes 70,000 pounds of food per month to 15,000 individuals.

This amendment will not only save the Federal Government money but it will be helping millions whose health and well-being are affected by the budget cuts in nutrition programs.●

ST. MARY OF THE ANGELS

HON. GREGORY W. CARMAN

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. CARMAN. Mr. Speaker, as this week is the 88th anniversary of St. Mary of the Angels Home on Convent Road, Syosset, Long Island, N.Y., I would like to take this opportunity to salute this fine institution dedicated to the rehabilitation of youths in need of structure and supervision.

St. Mary of the Angels today provides a home for 72 troubled youths, ranging in age from 10 to 21. St. Mary's accepts youths of all races and religions and operates on a nonprofit status. Perhaps the one word that most clearly summarizes the work accomplished by the Sisters of Mercy and the lay staff of St. Mary's is "rehabilitation"—a rehabilitation that works because it is administered with skill, care, love, and understanding. St. Mary's believes that every youngster deserves a second chance to grow up well and its programs reflect that credo.

The extensive treatment program includes diagnostic evaluation at intake, psychological and psychiatric care, academic, occupational and religious training, social work family intervention, medical and health care, and recreational experiences. All these are provided in group living situations, and coordinated by the child's treatment team. Children graduate from the campus elementary school, PS 77K, or local high schools. St. Mary's stood proud this year as one of its alumni, who recently embarked on a college education, addressed the campus graduates. He was a young man who had spent 6 years as a resident of St. Mary's. He is currently a member of the police force in Connecticut, grateful for the concern that helped him reshape his life and eager to share his reminiscences and success with today's alumni.

Dovetailing with St. Mary's educational/vocational program is its foster family program. Approximately 20 families now care for children in their homes. This program offers youngsters who no longer need the structure of St. Mary's on-campus residence and who cannot return home, the opportunity to live in a family unit. It also enables brothers and sisters to be reunited.

An active social service department, which provides supervised experience to interns from Adelphi University School of Social Work channels its efforts into providing permanency wherever possible to the lives of the children referred to St. Mary of the Angels.

Expanding its vital clinical services, St. Mary's recently launched an internship program with Hofstra University in Hempstead and Adelphi University in Garden City. With this additional staff of doctoral candidates in psychology, the staff is able to increase individual clinical care and to offer staff more consultation hours. Participation in team treatment recommendations continue as part of St. Mary's clinical service delivery to children in the home's care.

A family living program functions as a guide to both student and staff in the sensitive areas of group living, sex education, and mental and physical health. This program is a key component to St. Mary's regular medical services.

This year was highlighted by a complete renovation of the residence living quarters, one unit of which was severely damaged when a fire, causing over $100,000 in damages and the loss of nearly $3,000 a week in Government aid, roared through the complex. Students aided in the repairs, thus

making them feel a keen responsibility in restoring their homes.

Mr. Speaker, as St. Mary of the Angels looks toward the future, ever present is the need for funds to continue this vital work. The public should also be aware that St. Mary's is seeking foster homes and adoptive homes, and couples to care for young boys as surrogate parents in group homes. There is an ever-present need for dedicated, committed people to add their own stone in the building of a good foundation for these young people.●

TRIBUTE TO AL JORDAN

HON. COOPER EVANS

OF IOWA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. EVANS of Iowa. Mr. Speaker, tomorrow night I will be paying tribute to Mr. Al Jordan, president of the Iowa Credit Union League, on the occasion of his retirement. Several of his friends will be joining him to salute his many accomplishment.

A. W. (Al) Jordan joined the staff of the Iowa Credit Union League February 1, 1953, as a field representative. In March 1954, he was named managing director and in a restructuring of the league, the title was changed to president.

This first involvement in credit unions was as a member of Western Union Employees Credit Union, Des Moines, where he served as volunteer treasurer when the credit union was organized in 1938.

Prior to joining the league staff, Mr. Jordon served on the league's board of directors for the period 1948-53 and his service on the board included two terms as first vice president.

At the Iowa League Mr. Jordan has been responsible for implementing a number of programs and services. He was among the first credit union leaders in the Nation to recognize the benefits of electronic data processing of member accounts. Through its league data services, the Iowa League now handles data processing for 210 Iowa credit unions and for a number of Midwestern and Western State leagues.

Mr. Jordan has served as spokesman for credit unions before the Iowa legislature. During his tenure, the league has instituted such services as data processing, a corporation providing collection services, a marketing service, a statewide advertising program, and chartering of the Iowa League Corporate Central Credit Union, Iowa's interface with the financial system.

He serves on the board of the National Association of Retired Credit Union People and has served on several committees of the credit union movement's national trade association, the Credit Union National Association. He is a member of the Association of Credit Union League Executives (ACULE) and in 1978 participated in an ACULE-sponsored trip to Europe to study the European banking system.

Mr. Jordan is a charter member of the Iowa Society of Association Executives, presently serving on its board of directors, a trustee of Windsor Presbyterian Church, and a 25-year member of the Lions Club. He is an active member of the Greater Des Moines Chamber of Commerce and was recently appointed to the board of directors of Iowa Business Growth Co., a corporation organized to promote and assist the growth of small business. He serving along with executives of the banking and finance industry as well as associations, law, insurance, and the Iowa Development Commission. Mr. Jordan is the credit union representative on the board of directors of the Iowa Automated Clearing House Association.

When Mr. Jordan joined the Iowa Credit Union League in March 1953, there were 249 credit unions in the State with total assets of $22.1 million. Iowa credit unions ended 1980, the 50th year of league operations, with 373 credit unions serving 485,000 members and total assets of $678 million.

Without Al Jordan, the Iowa Credit Union League surely would not be the strong organization it is today. He will be missed, but I know we all wish him the best in his future endeavors.●

PARAQUAT BAN MUST BE LIFTED TO COMBAT CRIME IN UNITED STATES

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. IRELAND. Mr. Speaker, today, I am proud to join with my colleagues, Mr. EVANS, Mr. SHAW, and Mr. HUTTO, in introducing revised legislation which would lift the present ban of U.S. funding of the most effective antimarihuana smuggling measure yet devised—the spraying of paraquat on overseas marihuana fields before they are harvested.

It is obvious that once marihuana is harvested, the ability of our hard-pressed law enforcement agencies to intercept this multi-million-dollar crop diminishes with every mile the crop gets from Colombia, Jamaica, and the other overseas sources our bill is designed to affect.

Our bill has already, in effect, been the subject of extensive hearings and attention by the Foreign Affairs Committee this year, and is part of the provisions of the foreign aid bill not awaiting House action.

Because of the importance of lifting the ban on U.S. funding of overseas paraquat spraying, particularly in Colombia, and because of the possibility that the foreign aid authorization—H.R. 3566—may not reach the floor this year, we have determined to offer the language already approved by the committee as a separate bill, and to urge prompt congressional action.

In August, following on the work of the committee in approving the paraquat legislation, and the Congress in approving participation by the military in tracking and apprehending narcotics smugglers before they reach our shores, the Attorney General's task force on violent crime issued specific recommendations for narcotics control.

Because the need for herbicide spraying was prominently mentioned in the antinarcotics section, I would like to quote Recommendation No. 16, at this point, because it places in perspective what my colleagues and I are attempting with our legislation:

(Excerpt from Attorney General's tax force on violent crime report concerning narcotics, Recommendation No. 16)

The Attorney General should support the implementation of a clear, coherent and consistent enforcement policy with regard to narcotics and dangerous drugs, reflecting an unequivocal commitment to combatting international and domestic drug trafficking and including:

(a) a foreign policy to accomplish the interdiction and eradication of illicit drugs wherever cultivated, processed, or transported; *including the use of responsible herbicides domestically and internationally.* (emphasis added)

(b) a border policy designed to effectively detect and intercept the illegal importation of narcotics, including the use of military assistance.

(c) a legislative program fashioned to support the enforcement policy and to improve the criminal justice system . . .

Mr. Speaker, the Congress has already taken a giant step toward implementing these excellent and far-reaching recommendations, and has already moved toward the specific recommendation on herbicide spraying. It is my feeling that disputes over the foreign aid bill in general should not be allowed to hamstring the antinarcotics efforts we all agree must be at the top of our anticrime agenda.

It is no accident that three of the Members introducing this bill today are from Florida. Our State is being literally buried under drug money—an estimated $7 billion every year.

Honest businesses and honest businessmen are being driven out. Banks are being flooded with so much drug money they must take 3 days to count cash from honest businesses, thus entailing further losses for people already hard pressed in today's economy.

And, frankly, political corruption remains a major potential problem

whenever you have so much money concentrated in an area, and so many smugglers willing to use whatever means necessary—including murder—to protect their business.

The Foreign Affairs Committee and subcommittee hearings examined the issue of the possible health effects of use of paraquat as an antimarihuana measure, a frequent issue raised by those who would, with the best of motives, hamstring our antimarihuana efforts.

Some key points need to be made about the so-called health issue regarding paraquat:

First, the House Select Committee on Narcotics Abuse and Control held extensive hearings on this issue in 1980, and concluded that the health effects had been exaggerated, and legislated upon without proper investigation.

Second, the National Institute on Drug Abuse has been steadily reducing its concern regarding potential paraquat problems, particularly as NIDA increases its concern, due to thorough studies, of the health effects of smoking marihuana in general.

Third, the specific herbicide in question, paraquat, is already in common use in the United States, particularly in areas where protecting fruit and vegetable crops from weeds is a major concern.

Fourth, a 1978 United Nations Narcotics Laboratory study found that the health hazards of smoking marihuana sprayed with paraquat were remote, and the U.N. Fund for Drug Abuse and Control went on to recommend paraquat to all nations as the safest, most effective agent for marihuana control.

Fifth, responsible U.S. private studies have backed up the U.N. findings, such as research by the University of Mississippi—where paraquat is used to protect crops—indicating that 98.9 percent of any paraquat sprayed on the leaf is burned during the smoking process, before it reaches the user's lungs.

While the above should relieve any existing anxieties over the so-called health issue, other red herrings often raised in the paraquat matter include the effectiveness of the herbicide, and the cost of a paraquat program.

Mr. Speaker, effectiveness is a foregone conclusion in the wake of the 10 years of paraquat use in Mexico. Acting on the U.N. recommendations, Mexico embarked on the world's most extensive paraquat spraying operations.

Before the spraying operation became widespread in Mexico, our neighbor supplied some 85 percent of all the marihuana smuggled into the United States. Now, Mexico supplies 11 percent.

Because of the effectiveness of paraquat, the smugglers were forced to move their operations from nearby Mexico to Colombia and some other sources more difficult to reach, and Colombia now supplies roughly the same percentage of our imported marihuana once supplied by Mexico.

However, unless we lift the ban on U.S. funding of overseas paraquat spraying, Colombia and other nations will continue to claim they cannot afford such operations, and the smugglers can operate with a free hand.

Having said that, is paraquat spraying prohibitively costly, as the marihuana smuggling lobby has attempted to claim? No, not at all, particularly when measured against the cost to the U.S. taxpayer, and to the American people, of marihuana and drug-related crime.

The Mexican program, which was vast in both scope and ambition, cost only $10 million over 10 years. Colombia, a far smaller program in terms of territory to be covered, could hardly be expected to cost more than Mexico. Claims that a Colombian paraquat-spraying operation would cost U.S. taxpayers some $250 million, as some press accounts have indicated from the promarihuana lobby, are simply absurd.

Mr. Speaker, our legislation, which has already been approved by the Foreign Affairs Committee as part of the foreign aid authorization, has, we feel, become essentially noncontroversial because of the studies we have listed above, and because of the clear consensus that herbicide spraying is the best—the only—way to go in combatting marihuana growth and smuggling.

We urge prompt consideration of this legislation, in the spirit of the Attorney General's task force on violent crime antinarcotics recommendations, which Congress has already advanced in such a timely and responsible way.

A copy of our legislation is presented for the RECORD:

H.R. 4822

A bill to amend the Foreign Assistance Act of 1961 to repeal the prohibition against the use of international narcotics control assistance funds for spraying certain herbicides to eradicate marihuana.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) subsection (d) of section 481 of the Foreign Assistance Act of 1961 is repealed.

(b)(1) Assistance provided from funds appropriated, before the enactment of this Act, to carry out section 481 of the Foreign Assitance Act of 1961 may be made available for purposes prohibited by subsection (d) of such section as in effect immediately before the enactment of this Act.

(2) Funds appropriated for the fiscal year 1980 to carry out section 481 of the Foreign Assistance Act of 1961 which were obligated for assistance for the Republic of Columbia may be used for purposes other than those set forth in section 482(a)(2) of that Act as in effect immediately before the enactment of the International Security and Development Cooperation Act of 1980.

(3) Paragraphs (1) and (2) of this subsection shall apply only to the extent provided in advance in an appropriations Act. For such purpose, the funds described in those paragraphs are authorized to be made available for the purposes specified in those paragraphs.●

JEWS OF ETHIOPIA FACING A NEW GENOCIDE

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LANTOS. Mr. Speaker, the tragic situation now facing the Jews of Ethiopia is just beginning to receive public attention. The Ethiopian Jews are suffering under conditions which some have called a new genocide.

I would like to bring to my colleagues' attention excerpts from a recent article in the New York Times:

[From the New York Times, Oct. 4, 1981]

ETHIOPIA'S BLACK JEWS, A PERILED COMMUNITY

(By Simcha Jacobovici)

TORONTO.—Once again, Jews are victims. This time, the Falashas, the black Jews of Ethiopia, face possible extinction. What is more, few Jews, in Israel and elsewhere, seem to care or will take action.

In Israel, international and other domestic matters on the political agenda have overshadowed the Falashas' plight. As a result, their fate has been tied to bureaucratism that apparently is being covered up, to a lack of lobbyists for their cause, to diplomatic concerns, and to seeming indifference.

The Falashas' latest troubles began in 1974 with the Marxist revolution, which deposed Emperor Haile Selassie and led to armed conflict—between Ethiopia and Somalia, Government forces and Eritrean secessionists. In 1975, the year Israel's Chief Rabbis reaffirmed the Falashas' Jewishness, the new regime, led by Lieut. Col. Mengistu Haile Mariam, promised land reform for feudal, agrarian Ethiopia, hoping to win the support of serfs and of Jews, who had been the only minority denied the right to own land. The landed aristocracy, fearing the loss of its holdings to the landless Jews, decided to destroy them. Ethiopian refugees report that Falashas are being murdered, raped and sold into slavery. Through forced conversion, dispersal, hunger, disease and violence, the number of Falashas has been reduced to fewer than 10,000, from some 28,000 in 1975.

About two million Ethipians have fled to refugee camps in Djibouti, Somalia, and the Sudan, where many die from malnutrition and hunger-related diseases. According to refugees I have interviewed, and a report by the Canadian Association for Ethiopian Jews, amid all this suffering, landowners who resist the regime have resurrected superstitions: It is the Falashas' "evil eye" that is causing all the calamities. Refugees, seeking scapegoats for their misery, have turned against the Falashas. Jewish and non-Jewish refugees arriving in the West in recent months report that while Ethiopian forces have gained increasing control over the rebellious provinces and have begun to prevent rampant killing, they have stepped up anti-ethnic, especially "anti-Zionist,"

policies. Jews have been arrested for practicing religious rituals, security forces intimidate villagers by searching for "Zionist agents," and 40 Jewish communal workers and teachers are in prison.

A British doctor, Isaac Gottlieb, who has visited the Falashas numerous times, told me that in Ethiopia "it seems that everyone belongs to one side or another. The Jews are supported by no one. They are caught in a deadly crossfire and are the targets of vicious attacks." Secrecy continues to shroud the Falashas' fate. In September 1979, Yigael Yadin, then Deputy Prime Minister, told me that secrecy was necessary to ensure success for rescue efforts. Earlier, in January, the few Falashas in Israel had demonstrated against the secrecy policy and what they said was Government inaction. From March to May 1979, the North American Jewish Students' Network sponsored a speaking tour for Zacharius Yona, an Ethiopian Jew. These two events, and the publicity they generated, forced the first public Knesset debate on the Falashas, on Nov. 14, 1979. Critics of the rescue program argued that secrecy had yielded almost no results, that time was running out. Advocates of publicity won the day. The Knesset unanimously adopted a resolution that "the Government . . . should not keep silent but should . . . [help] our Jewish brothers from Ethiopia." The Jerusalem Post, on Oct. 30, 1979, said in an editorial: "The Falashas . . . have been neglected. And that neglect must be considered mortal." Finally, in November 1979, Mr. Begin established an interministerial committee to study rescue options. In 1980, 665 Falashas were rescued, compared with only five in the two preceding years. Overall, there are about 1,300 in Israel.

Graenum Berger of Pelham, N.Y., past president of the American Association for Ethiopian Jews, argues that present rescue efforts are "meager" and that "the whole program of saving this politically helpless community has been attended by too much secrecy."

This year, 3,000 to 4,000 African refugees could go to America; it seems this quota will not be met and that visas will go unused.

As a relief worker who had been in Ethiopia told me: "Incredible as it seems, Ethiopian Jewry is vanishing while the rest of the world pays little attention.●

IN SUPPORT OF GREGG RESEARCH BILL

HON. JAMES H. SCHEUER

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. SCHEUER. Mr. Speaker, I am pleased to be introducing legislation with my colleague from New Hampshire which addresses one of our most pressing and potentially devastating envoronmental problems—the phenomenon of acid precipitation. It is a problem that does not respect national or international borders. It has placed severe stains on relations between States and between nations.

I am all too familiar with the problems of acid rain. I represent the State of New York, which is a downwind receptor of acid rain. I serve on the Health and Environment Subcommittee, which will consider all regulatory legislation pertaining to acid rain. I also chair the Subcommittee on Natural Resources, Agriculture Research and Environment of the Committee on Science and Technology. Our subcommittee has held six hearings this year on the impact of air pollution on the environment and much of the testimony received was directed toward the acid rain phenomenon.

On September 18 and 19, the Natural Resources Subcommittee held 2 days of hearings on this subject in Lake Placid, New York. During the course of those hearings, it became clear to me that there is pronounced divisiveness between regions of the country thought to be sources of the problem and regions who view themselves as victims. We also conducted a technical briefing with Canadian Members of Parliament and Government officials which brought into sharp focus the manner in which acid rain has adversely affected our relations with that nation.

Because of the transnational and multistate nature of the problem, Federal action is necessary if we are to control acid rain.

The cost of delaying congressional action may be enormous in terms of cleanup and potential injury to the environment. Lakes and streams may take years, perhaps decades, to acidify. However, the effects of acid rain are believed to be cumulative and, as the National Academy of Sciences noted in its recent report ("Atmosphere-Biosphere Interactions"), the longer action is delayed, the greater will be the damage. That report stated that at the current rate of emissions, the number of acidified lakes can be expected to double by 1990.

The Ontario Ministry of Environment has observed that an acid lake will eventually recover if the acid loadings are eliminated or greatly reduced; but a return to normal conditions will certainly take years or even decades, while absorbing everyone's expenditures. Other effects, such as damage to buildings and statues, are irreversible.

On the other hand, regulation without an adequate data base may result in unwarranted costs. A regulatory requirement mandating scrubbers for powerplants, for example, would require large capital and operating expenses which will be borne by industry and ultimately by the public for years to come. The economic risk of requiring pollution control technology that may not have a measurable impact on the problem of acid rain is enormous. It is estimated to amount to billions of dollars annually.

Accordingly, it is crucial that we examine the existing data to determine the degree of certainty in this area and to determine the appropriate level of control technology required to limit future damage.

Mr. Speaker, this legislation, by enhancing acid rain research and monitoring, will help to reduce the uncertainties involved in estimating both the costs and the benefits of regulating acid rain. It also will reduce any time lag which might occur between the accumulation of hard scientific evidence and the adoption of effective acid rain control program.●

UTILITY DATA INSTITUTE STUDY OF NUCLEAR LICENSING DATA

HON. JAMES T. BROYHILL

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BROYHILL. Mr. Speaker, the House is expected to continue consideration of H.R. 2330, the Nuclear Regulatory Commission authorization bill next week. I would like to include in the RECORD for my colleagues the following information from the American Nuclear Energy Council with regard to the Moffett-Markey amendment to H.R. 2330.

[From the American Nuclear Energy Council, Oct. 21, 1981]

NRC FISCAL YEAR 1982-83 AUTHORIZATION BILL FLOOR ACTION

The Nuclear Regulatory Commission fiscal year 1982-83 Authorization bill is scheduled for floor action this week.

Congressman Moffett intends to offer an amendment to strike the provision granting NRC authority to issue temporary operating licenses for nuclear power plants. This amendment should be defeated.

The NRC Authorization bill, including the temporary operating provision, is a joint product of the two committees of jurisdiction. It enjoys the bipartisan support of the chairmen of both committees (Udall and Dingell) and the ranking minority members (Lujan and Broyhill). The temporary operating provision is based on extensive hearing records before both committees.

Mr. Moffett's support for his motion to strike is a report just issued by his Government Operations subcommittee which attempts to explain away the extensive delays being projected in issuance by NRC of nuclear plant operating licenses.

In evaluating the Moffett report, you should be aware that it is based on a one-half day hearing at which only NRC was invited to testify. The views of industry and others were neither sought nor welcomed. The "exhaustive investigation" to which Mr. Moffett refers relates to a separate investigation by his subcommittee of the NRC inspection program—a subject totally unrelated to licensing delays.

This one-half day hearing is in contrast to the numerous days of hearings and markup before the Interior and Insular Affairs Committee, the Energy and Commerce Committee and the Appropriations Committee which specifically document the licensing delays and the need for the temporary operating authority.

You should also be aware that, contrary to Mr. Moffett's allegation, the estimates of delay are based on NRC's own monthly re-

ports to the Congress—not on industry estimates. It is true that the industry's delay estimates are somewhat higher, but even the NRC numbers document a serious delay problem.

The fact is that NRC is facing an extraordinary operating license workload. During 1982 alone, 17 plants will be ready to begin operation. To date this year, NRC has issued only four operating licenses, and never in its entire existence has it issued more than six operating licenses in any one year. Experience, common sense and the documentation before the committees of jurisdiction make clear that without the temporary operating authority some of these 17 plants will stand idle with the cost of delay to the utilities and their ratepayers running to billions of dollars.

On the other hand, if there are no delays, the existence of the temporary operating authority should be of no concern to Mr. Moffett; since its use by NRC is discretionary, if there are no delays it is clear that the authority would not be invoked. An analysis of the Moffett report is attached.

Action: Reject the Moffett amendment to strike the temporary operating license authority.

MOFFETT REPORT: "LICENSING SPEEDUP, SAFETY DELAY: NRC OVERSIGHT; FAULTY PREMISES EQUALS FAULTY CONCLUSIONS

The Moffett report concludes that the substantial delays in the issuance of operating licenses which NRC has been projecting in monthly reports to Congress beginning last January are either a figment of the imagination, or, alternatively, are the exclusive responsibility of the industry and not the NRC. Also, in a non sequitur, the report concludes that NRC efforts to reduce these "imaginary" licensing delays has detracted from its on-going safety programs. While the sparse record compiled by the subcommittee in a one-half day hearing is intended to give some support to these conclusions, it does not comport with the facts as determined independently by the NRC, DOE, other congressional committees of jurisdiction, and as confirmed by the industry.

As required by the House Appropriations Subcommittee on Energy and Water Development the NRC last January began filing reports with the Congress on the status of nuclear reactor licensing proceedings. The January report estimated that during 1981-82 NRC would not be ready to issue operating licenses for 11 plants for a total of 79 months after the dates construction would be completed and the plants would be ready to begin producing electricity. Including two plants which then held only zero power licenses, the estimate would be 13 plants delayed for a total of 90 months.

As noted above, these figures were originally reported to Congress by the NRC last January and monthly since then. Beginning in April, DOE began independently to report licensing delay figures, which have been consistently comparable with the NRC numbers. In addition, the American Nuclear Energy Council has been reporting its own estimates since January. While the industry estimates of delay generally range higher than NRC or DOE, the differences are not significant. Even the lower NRC and DOE numbers underscore the seriousness of the delay problem.

The Moffett report points to the fact that NRC's estimates of delay have been reduced since originally reported last January as evidence of the fact that the delay problem has been overestimated or, in fact, never existed. This ignores the fact that, in the interim, on its own initiative and at the urging of the Congress, NRC has taken a number of steps to get licensing back on schedule. For example, in April alone NRC was able to report to Congress that due to revisions which it was implementing in its licensing procedures and a better utilization of its manpower, expected delays were reduced by a total of 29 months. Thus, the Moffett report attempts to convert successful efforts by NRC to reduce estimated delays into evidence that they never existed.

In spite of improvements in licensing schedules which NRC has been able to report, the delay problem still remains serious. NRC's most recent report to Congress (September 30) still estimates that during 1981-1982 operation of several reactors will be delayed for a total of 21 months. NRC does not estimate any delays for plants due to come on line in 1983; however, the industry's own estimates project that through the end of 1983 that 11 plants will be delayed by a total of 63 months.

It is significant that the Moffett report completely fails to address the projections for delays in the 1983 plants.

It is also significant that the Moffett report ignores the delays being experienced in the issuance of new construction permits. The fact is that NRC has not issued a construction permit since before the Three Mile Island incident. It has failed to date even to issue the new regulations which it says must precede issuance of any construction permits. The fact is that there are pending before NRC Applications for eight construction permits for an average of more than 80 months since they were filed—with an average additional 17 months to go before such permits are issued. This is almost five times as long as it took NRC to process these applications as late as 1977.

Because Chairman Moffett chooses to ignore the fact of continuing licensing delays, the report concludes that there is no need to enact the temporary operating authority now pending before the Congress in the NRC fiscal year 1982-83 authorization bill. In reaching this conclusion, the report stands alone in opposition to the NRC and all of the committees of the House and Senate which have legislative jurisdiction over NRC. A majority of the NRC commissioners have requested and continue to favor some form of temporary licensing authority. Such authority has been included in H.R. 4255, jointly sponsored by the House Interior and Insular Affairs Committee and the Energy and Commerce Committee. A similar provision, reported unanimously by the Senate Environment and Public Works Committee, is pending before the Senate for floor action. Extensive records on the need for such authority have been compiled by each of these committees, as well as the Appropriations Committee. One will search the records of the Moffett subcommittee in vain for more than a cursory treatment of the subject. In view of the overwhelming support for such temporary operating authority, the paucity of the Moffett subcommittee record on the subject speaks for itself.

The Moffett report also attempts to suggest that NRC efforts to reduce licensing delays have "delayed, deferred or neglected" other programs "directly related to safeguarding the public health and safety from harm from nuclear accidents." The connection simply has not been substantiated. It is true that NRC has reallocated to licensing work certain personnel which had been diverted from such work in the immediate aftermath of the Three Mile Island incident. This reallocation was made possible either because that work had been completed or was considered to be of relatively lower priority and nonsafety related. Specifically, Moffett alleges that the reallocation of manpower "has been and may continue to be detrimental to that already weak inspection program." The record makes clear, however, that the reallocation involved no Office of Inspection and Enforcement personnel. It may be that certain NRC programs are behind schedule, as the report alleges. If so, it may be due in part to Three Mile Island related activity, and in part to lack of form management in NRC which was evidenced over the last several years. With the new management now in place at NRC there is good reason to believe that this situation is being addressed. However, the report does not support any conclusion that this situation is due to the attention appropriately being given to the licensing delay problem.

The Moffett report discounts the substantial cost of licensing delays to utilities and their ratepayers. On average, a completed nuclear power plant standing idle costs about $1 million for every day of delay, taking into account purchased power and capital charges. Thus, according to the industry estimates, the 63 months of delay expected to be encountered through the end of 1983 will produce unnecessary regulatory costs of between $1.5 and $2 billion. Some who apparently believe that idle capital has no costs, contend that it is not appropriate to allocate capital charges against the cost of delay. Even if this were true, the costs to utilities and their ratepayers due to licensing delays would be in the billion dollar range. Although Moffett dismisses these costs as "the comparatively minor costs of administrative delay," it does not appear that they should or would be so readily dismissed by a majority of his colleagues who are currently wrestling with painful billion dollar federal budget cuts—or by the ratepayers who eventually will end up paying them.●

DIATRIBES OF A DEMAGOG

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. WYDEN. Mr. Speaker, I have introduced legislation to isolate Libyan leader Muammar Qadhafi. My bill H.R. 4797 would impose a $10 per barrel fee on Libyan crude through the end of 1982. The revenues from this fee would go toward purchases for the strategic petroleum reserve. Beginning in 1983, my legislation would then impose a ban on further imports of crude from Libya.

If there is any doubt in the minds of my colleagues about the danger Muammar Qadhafi poses for northern Africa and the Middle East, I would like to share transcripts of his radio broadcasts to the Egyptian people when President Anwar Sadat was assassinated.

These diatribes by demagog Qadhafi reinforce my belief that the United

States must end our cozy relationship with Libya in which we condemn him, yet simultaneously buy his oil—thus bankrolling the bloodshed he exports throughout the world.

LIBYA—AL-QADHAFI'S STATEMENT TO EGYPTIAN PEOPLE, OCTOBER 6, 1981

Oh great Egyptian people, oh Egyptian Arab people, oh fraternal Egyptian people: I allow myself to address you from the historic town of Sabhah because I see it as my duty to our fraternal Egyptian people to congratulate them on this day, to congratulate them on the daring action carried out by a group of their devoted sons in the armed forces. This action was an execution of the sentence passed on 19 November 1979 by the Arab People's Court of death by shooting for high treason against the Arab nation.

This sentence was ridiculed by As-Sadat and was regarded as not being backed by the will of the Arab people to carry it out. But here it is confirmed now to the world and to As-Sadat in the final moments of his ominous and predestined end. The sentence was passed by the Arab People's Court—a court not controlled by As-Sadat or any government. It was set up by the Arab people at the Arab people's general congress, the will of the Arab nation.

As-Sadat used to laugh about that day and ridicule the prosecution, the lawyers and the judges who passed sentence on him, and he used to laugh loudly. This is the fate of one who scorned the will of the nation and its ability to punish those who rebel against it. This daring action has taken Egypt out of the dock in which the Arab nation placed the people of Egypt after they were accused of cowardice, submissiveness, capitulation to As-Sadat, to the Israeli enemy, to America. This daring action this morning took Egypt out of the dock of cowardice and submissiveness. This action has brought honor to the Arab nation and has honored above all the Egyptian people. It has erased the shame, submissiveness and capitulation from the brow of every Egyptian. It has honored every Egyptian.

We feel in these hours that the souls of the thousands of martyrs who fell against the Israelis for the liberation of Palestine are hovering today in salute to the Egyptian people and their courageous sons.

This is the punishment for humiliating the great man, the man who made the contemporary history of the Arab nation—Jamal 'Abd an-Nasir. The sound of the gunfire was saying: This is the punishment for the one who attacked Jamal 'Abd an-Nasir's base in Iobrule and a revenge for Jamal Abd an-Nasir. This is the punishment of the one who made blood run among the brothers, the loved ones, the Egyptians and the Libyans.

TRIPOLI INCITES EGYPTIANS TO REVOLUTION—CALL TO MARCH

Free and honorable people of Egypt; sons of Egypt in the armed forces, in factories and in the fields; sons of the peasants; toiling workers, students in schools, secondary schools, institutes and colleges; men and women, who rose with 'Abd an-Nasir, and who built the High Dam and nationalized the Suez Canal; makers of the socialist laws; you who led the march of the struggle of your nation: As-Sadat's face has disappeared. The ugly face has disappeared with all its shame, capitulation and defeat. As-Sadat has died. Some of his ministers have died. Shame and treason have died with him.

Close your ranks and march on the premises of the radio and announce to the world that Arab Egypt is alive and will stay alive, marching along the path of revolution—the path of 'Abd an-Nasir. With your free men you have now paved the way for your march. Proceed with the revolution and announce that it is a popular revolution.

CALL TO PREVENT FUNERAL

Arab people of Egypt: Who killed tyrant As-Sadat? They are your sons who killed him. Thus, you Arab people of Egypt have opened the road to freedom. You have killed tyrant As-Sadat.

For this reason, you great Arab people of Egypt should not allow yourselves to be taken as fools. You must now join in a popular revolutionary march from all over Egypt, from the rural and urban areas as well as from the desert areas, toward Cairo so that you may seize the radio station and issue your revolutionary statements. You great Egyptian people must take over the radio and declare the birth of new Egypt, free Egypt, Egypt that has been cleansed of all agents and traitors.

Great Arab people of Egypt: You must besiege the hospital in which the corpse of As-Sadat was placed. You must, great people, frustrate the designs of the traitors, the aides of As-Sadat, who might try to depict the traitor as a martyr and who might prepare a large funeral for him. You heroic people who have killed the tyrant should beseige the hospital to prevent the dogs from entering it, because the dogs will try to turn the dead tyrant into a martyr, if they manage to have a funeral march for him. You people must burn the corpse of the traitor As-Sadat.

Great Arab people: It still remains for you to liquidate the remaining traitors. It still remains for you to march now so that the sun of tomorrow may rise with Egypt becoming a jamahiriyah, becoming a people's jamahiriyah and ruled by the people.●

CANCUN, THE ADMINISTRATION AND THE MULTILATERAL DEVELOPMENT BANKS

HON. THOMAS B. EVANS, JR.

OF DELAWARE

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. EVANS of Delaware. Mr. Speaker, this week in Cancun, President Reagan will get his first taste of the north-south debate. In similar attempts in the past, little has emerged beyond highly emotional rhetoric in which most of the world's ills are laid at the feet of the developed countries. The Soviet Bloc and the OPEC countries—and the developing countries themselves—have largely avoided criticism. Nonetheless, we must return to the negotiating table with a constructive attitude and an open mind.

There are those in this country and some in Congress who argue that the United States can go it alone, paying little heed to the developing nations of the Third World. But advocates of this position are closing a blind eye to the growing importance of developing countries. With each passing day, our vital interests become increasingly intertwined with the Third World.

Traditionally our foreign aid programs have been based largely on achieving humanitarian goals. Today, there are many pragmatic reasons to continue these programs. All of them stem from our interdependence with the Third World.

The United States is critically dependent on developing countries for a whole range of strategic raw materials that are vital to our economy. One of the world's poorest and least stable countries—Zaire—supplies us with over 90 percent of our cobalt needs. Without Jamaican bauxite supplies, our aluminum industry would grind to a halt. We now import over 50 percent of our needs for 20 of the 35 minerals designated as "strategic or critical."

Developing countries as a group are our single largest export market, accounting for nearly 40 percent of all U.S. exports. They continue to be our fastest growing market, but demand will grow only as economic development in these countries takes place.

Many are also important to us for foreign policy reasons. From a strategic standpoint, they occupy critical points on the globe: Thailand, Pakistan, Sudan, Turkey, and Jamaica are but a few examples.

We simply cannot neglect the Third World if we are to serve our own interests. The explosive population growth in developing countries means that the world population will increase by 2 billion before the end of the century. Without cooperative attempts to greatly expand food production, widespread starvation will result in many parts of the world. This specter is something from which no developed country can insulate itself.

From a foreign policy perspective, we are locked in a battle for the hearts and minds of developing countries. Make no mistake about it. The Soviets—and their Cuban and Libyan proxies—are hard at work creating discontent, taking advantage of the economic instability, and seeking to extend their influence. In Sudan, it is terrorists trained in Libya; in El Salvador, it is Cuban weapons and advisors. By contrast, the United States has traditionally relied on humanitarian and economic assistance rather than military intervention. It is a comparison that should not be lost on developing countries. It should be noted for the record that the Soviets declined an invitation to participate in the Cancun Conference.

When the President arrives in Cancun, he may be surprised to find a more constructive attitude—less sterile rhetoric—than has characterized early north-south sessions. Whether in deference to a new U.S. administration or whether in recognition of the economic and budgetary problems faced by

donor countries, one notices a cooling of the temperature of the rhetoric from all but the most strident developing countries. Five years ago, Mahbub ul Haq, an influential spokesman for Third World interests, called for international taxation for foreign aid and for changes in the voting structures at the institutions now dominated by the industrial countries—the World Bank and the International Monetary Fund. Today he is calling for directing the bulk of existing foreign aid to the poorest countries—instead of middle-income countries—and for modest increases in food and energy development assistance.

Carlos Fuentes, former Mexican Ambassador to France and head of his country's delegation to the last north-south conference, claims the Third World will no longer pursue massive resource transfer schemes but will work for cooperative solutions to decrease trade barriers, to increase food production, and energy development.

Our European and Japanese friends are ready to begin serious discussions with the developing world. Without mineral and energy resources of their own and facing the dwindling markets for their products in the industrial world, the economic and social prosperity of the Third World becomes vital to their own well-being.

One of the central themes of the Cancun Conference will be United States participation in the multilateral development banks. As a recent Department of the Treasury draft report reaffirmed, the World Bank and the regional development banks are the most effective form of development assistance yet designed. With some fine tuning to reflect more closely U.S. policy preferences, the Reagan administration could and should give the multilateral development banks the full weight of its support.

That these multilateral development institutions are the most effective vehicle for promoting economic development should now be quite clear. While this administration began its term with a healthy degree of skepticism regarding these institutions, a recently completed study by the Department of Treasury demonstrates once again that the multilateral development banks serve the interests of both north and south. This fact was further underscored by a recent article in a Soviet journal which condemned the multilateral development banks as a "tool for spreading capitalism in developing countries." To this we must answer: "Guilty as charged." One of the conclusions in the Treasury Department's assessment deserves particular emphasis. The World Bank and the regional development banks are extremely cost-effective means of supporting development, when compared to bilateral foreign assistance. As we strive to balance the budget by 1984, we should keep in mind that every U.S. contribution to the multilateral development banks is compounded by a multiple of five due to the contributions of other donor countries.

President Reagan gave the World Bank and its sister institutions a rhetorical pat on the back at last month's World Bank-IMF meeting, but it was clear from his statement that the central thrust of this administration's strategy for development is reliance on the private sector. I agree with President Reagan on the importance of private sector development on the need for free and open markets. But, practically speaking, that will not occur in most Third World countries without public sector involvement. The missing ingredient is the existence of a sound economic and physical infrastructure. Without water and sewers, a country like Haiti cannot hope to develop a tourist industry. Without a functioning railway from Port Sudan to Khartoum, Sudan cannot effectively develop its vast agricultural potential or even move basic imports in or exports out of the country. The private sector has traditionally left the construction of roads, dams, sewers, port facilities, and the like to the public sector. Similarly, investments in human capital such as disease eradication, vocational education and training have typically been accomplished at least in partnership with the public sector. Government participation in these efforts in the Third World is even more critical. In most poverty stricken Third World countries there is little hope of either private capital formation or government revenues sufficient to permit the developing country to finance its own infrastructure development.

As the Treasury report concludes, the multilateral development banks are ideally designed to finance and oversee the construction of those infrastructure-type projects which provide the foundation on which developing countries can build. Commercial lenders also stress the importance of the multilateral lending institutions in performing a catalytic role by encouraging more foreign investment in developing countries.

The President has reminded developing countries that the United States developed, from a barren frontier to the world's foremost economic power with only the occasional infusion of foreign capital. While true, it must be remembered that there are many differences between the world of today and that faced by the emerging United States. We were blessed by a favorable combination of bountiful resources, cheap energy, a hospitable climate, virtually unlimited markets, and two wide oceans to afford us decades of safety from foreign influences. No developing country today faces such happy circumstances. Most have only a few products to export with declining terms of trade, scarce energy, stiff competition for markets, and so forth.

Even if conditions were perfect for economic growth in developing countries, we could not afford to wait for the long-term, incremental development to catch hold in the Third World the way it did in the United States. Pressures from growing populations, social unrest, rising expectations, and increasing economic deprivation have combined to give developing countries and their beleaguered leaders little time to find solutions. Progress must continue at a steady pace, or friendly governments will be unable to contain those forces which are attempting to capitalize on economic and social unrest.

The United States created considerable anxiety at the recent World Bank-IMF meeting when the administration unveiled its tougher stand on multilateral lending. Whether intended or not, the message received by most foreign delegates was that America was beginning its withdrawal from the same institutions created decades ago at American insistence. There was general amazement that the United States could be seriously contemplating something so counterproductive to its own interests.

The message we should be sending is that we understand the value of the World Bank and the regional development banks to the countries of both the south and the north. With the administration's assessment of the banks in hand, the time and setting are right for a reaffirmation of support for these institutions. Just as only a Republican President could have dramatically broken with tradition and established a bridge of communication with China and its 1 billion inhabitants, so only a Republican President can begin to forge a coalition of political support for the multilateral development banks.

In today's political atmosphere, there is less support for this type of assistance than at any time since World War II. And yet, there have been a few times in our history when it has been more important. President Reagan has a marvelous opportunity for leadership on this issue. We should all hope he takes that opportunity.●

LIFTING BAN ON PARAQUAT

HON. E. CLAY SHAW, JR.

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. SHAW. Mr. Speaker, I support the bill introduced by my Florida colleague, Representative ANDY IRELAND. As elected Representatives from the State in the Union hardest hit by illegal narcotic activity, which affects every Floridian, we are working to-

gether to relieve our State of this ugly burden of fear, corruption, and lawlessness.

My years as mayor of the city of Fort Lauderdale left me convinced that local authorities are no match for the organization, resources, and cunning of Florida's drug dealers. Those underground tycoons deal in more Florida dollars than in any other field in State business except tourism. These executive criminals have transformed south Florida from a tropical paradise into a jungle of fear, and have corrupted once-honest establishments and formerly pleasant communities.

How can we put them out of business? In addition to enlisting the support of military personnel and resources, we must strive to dry up their sources—attack the problem at its primary source. Prevent the production of drugs at their inception, stop the harvests.

The most effective herbicide ever used to destroy marihuana in the fields is known as paraquat. The initial scare over paraquat, provoked by the Secretary of Health and Human Services (HEW) Joseph Califano in 1978, has proved to be overblown, practically nonexistent. Legislation motivated by that fear—namely, the Percy amendment, which prevents foreign nations from using U.S. aid money to finance paraquat operations, has survived. It is a piece of legislation that hampers our efforts to fight the war on drugs; it is senseless to prohibit foreign countries receiving U.S. aid from using the most effective means at their disposal to destroy marihuana in the fields.

How can we convince our countries that we are serious about controlling drug trafficking if we prohibit them from using paraquat? Large-scale destruction of marihuana crops must be our goal; we must pass this legislation.●

ADMINISTRATION DOUBLETALK: CUTTING THE BUDGET BUT ADDING SIX $50,000 DEFENSE EXECUTIVES

HON. DOUG WALGREN

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. WALGREN. Mr. Speaker, we all should be dismayed to learn that Secretary of Defense Caspar Weinberger and the Office of Management and Budget are asking the Congress to create five new top-salaried assistant secretaries in the Department of Defense while the administration has and is proposing unprecedented cuts in virtually every Federal agency and program. Regrettably, today the House Armed Services approved a bill approving the five and adding a sixth.

During a time of severe budget austerity at all levels of Government, it is difficult to understand how the administration can ask for new executive level positions, especially in a Department that already has 19 assistant secretaries. It is sadly inconsistent, in my view, to be adding these top-salaried slots at the same time the President is asking Congress to reduce programs that benefit so many citizens and local governments. Adding six new slots, at $52,750 each, is an unfair request to the American taxpayer, who will foot the bill.

It is also hard to understand why Defense needs these new slots when DOD is compared with other Cabinet departments. With 19 positions currently in existence, it already has more assistant secretaries than any other department. The Department of Health and Human Services, an agency with a larger budget, has only seven. The Department of Transportation has only four. The average number of assistant secretaries in all other departments is seven.

Furthermore, there has been little justification given by the administration for creating these positions, which were abolished in 1978 to save money. The Department stated in a July 30 hearing that planning for the utilization of the additional secretary positions in the services is still tentative. The Department also indicated that there have been changes in the world situation since 1978, when the positions were abolished. However, Department officials failed to specify what changes require these new top spots. The country is not at war.

What will this cost us? The Department has not fully clarified the price of this proposal. While the Department's letter to the Speaker says that enactment will "result in no increase to the budgetary requirements of the Department," the fact is that these positions now carry with them a salary of $52,750, which multiplied times six totals $316,500; $316,500 is only a small drop in the defense bucket of $181 billion; but $300,000 is a staggering amount of money to most Americans. Most people have never seen $300,000. Furthermore, throughout the bureaucracy, the creation of new assistant secretary positions has inevitably resulted in the creation of new schedule C positions available for political appointment. Assistant secretaries always need special assistants for this and that. Though the Department may be able to aborb the cost of supporting positions at this time, I would not be surprised to see increases in the future. That is simply a measure of the fact that excess funds were approved for the Defense Department in the first place.

It should also be noted that under section 5317 of title 5 of the United States Code, the Civil Service Reform Act, the President has available a pool of 34 executive level positions that he can use to establish assistant secretary slots in any department. Thus, rather than ask Congress to add new ones, why does not the President use the pool, a pool designed to give the President flexibility to meet his needs? This was not answered by the administration either.

Finally, and probably most important, building a strong defense and insuring national security do not depend on the number of high-level, highly paid executives running the Department. A strong defense requires motivated, dedicated servicemen and women. It requires the cultivation of sensitive diplomacy and cooperative efforts with all nations across the globe. In my view, our country would make a better investment by pursuing these goals than hiring more assistant secretaries.

In short, the Department has not made a compelling case for this request. When everyone else is asked to restrain spending and cut out waste, the Department of Defense should bear its fair share as well. Adding six new $52,000 executives is not the way.

I have expressed my concerns to Secretary Weinberger and OMB Director David Stockman. I hope my colleagues will join me in opposing this bill when it comes before the House.●

LIFTING THE BAN ON PARAQUAT SPRAYING

HON. EARL HUTTO

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. HUTTO. Mr. Speaker, I join with my fellow colleagues in expressing my support for swift action in regards to lifting the present ban on herbicide spraying of marihuana crops.

I could reiterate the effects drug smuggling is having on our Nation's businesses, specifically in Florida, and further quote numerous reports and investigation results that stress the remote health hazards attributed to smoking paraquat treated marihuana. I would, rather, emphasize the urgency with which we need to successfully control this ever-increasing supply of marihuana from our South American neighbors.

It is my belief we in the Congress have the responsibility to utilize every available resource to put a stop to this apparently limitless influx of marihuana into the United States. In my home State of Florida, money generated from drug sales has been estimated to be $7 billion yearly. To put this in

perspective, the State of Florida appropriated $9.3 billion in 1981 to accommodate the needs of 10 million residents. At the same time, a small group of individuals were able to generate over two-thirds of this amount in illegal drug sales.

I am sure we all agree that our Nation's drug problems has continued to escalate despite our many efforts to force it to do otherwise. And while I commend our many dedicated police and drug enforcement officials who face this impossible and seemingly never ending battle against drug smugglers, I sincerely believe that tax dollars used to combat drug smuggling could not be wiser spent than funding programs that spray marihuana destroying herbicides.

I urge the Congress to take prompt action to lift this present ban on paraquat spraying as an effective step toward reducing the influx of marihuana into the United States.●

MOBIL OIL DAY IN JOLIET

HON. GEORGE M. O'BRIEN

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. O'BRIEN. Mr. Speaker, I have the distinct privilege of representing Joliet, Ill., and its fine citizens in this body. For that reason, and with a good deal of hometown pride, I would like to bring an advertisement that appeared on the op-ed page of today's New York Times to the attention of my colleagues. This advertisement, entitled "Fair, warm, and not at all sticky," describes the relationship between Joliet and one of its businesses, the Mobil Oil Co. As all who read the article will see, Joliet is a city with a constructive attitude toward business. This attitude is grounded in the knowledge that productive and meaningful jobs are the greatest asset that a city can have, along with the workers to fill them. Such jobs are only created when businesses start up, or maintain their operations. And Joliet is set on keeping the jobs that it has and attracting new ones. I commend Joliet for this approach. And I commend Mobil Oil Co., for having merited the "Mobil Oil Day" that Joliet bestowed upon it.

[From the New York Times, Oct. 22, 1981]

FAIR, WARM, AND NOT AT ALL STICKY

Every specialty has its jargon, and sometimes this makes the simple and commonplace sound complicated and exotic. TV weather persons, for example, hardly ever say that "tomorrow is going to be wet, raw, and generally nasty." No indeed. Instead they talk of highs and lows and temperature-humidity indices, and if you pay close attention, and catch the words "anticipated precipitation," you may even remember to carry an umbrella.

Perhaps because the weather is so pervasive in general conversation, individuals, governments and businessmen too have adopted some of the meteorologists' pet phrases. We hear talk of a "business climate," or even of many "business climates," as in the "business climate in the Sun Belt," or the "Snow Belt," or whatever other belt has become the fashion of the day. And Washington, of course, is perceived as the center of either storms of sunshine, businesswise, although nobody really knows why the stock market often forgets to say "gesundheit" when a president sneezes.

And so, to strike a blow for precision and clarity in defining the business climate, we'd like to offer a case history, as well as a definition. The case history involves Joliet, Illinois. And the definition is this: a good business climate is simply people working together, in their best interest, which often coincides with the general good.

Joliet is a city of almost 80,000, located 40 miles southwest of Chicago. (Its surrounding area has a population almost three times as large.) Some 350 manufacturers call Joliet home, including Mobil, which operates a refinery there. Our plant employs 630 people, and the Joliet Region Chamber of Commerce & Industry tells us that because these 630 are gainfully employed, about 1,000 others work to meet their needs, in places like schools, banks, stores, restaurants, and other establishments. There's nothing remarkable in the numbers; economists call it the ripple effect, and it happens all the time.

Nor is it remarkable that Mobil pays its share of taxes to support schools and municipal services, and contributes to at least 29 local organizations, charities, colleges, libraries, and cultural groups. We're sure the other 349 manufacturers in Joliet do no less.

Because all these things are the norm for businesses today, we were surprised, flattered, and honored when the chamber recently saw fit to salute us at an event they called "Mobil Oil Day." The chamber noted that the Joliet area has grown by a third in the last decade, and decided that honoring a different business each year was one way to help this growth continue.

We're proud to have had our turn in the Joliet spotlight. And we're obviously delighted that the business climate, in Joliet, remains so salubrious. But we also recognize that many companies all across America have equally good relationships with their home communities. Business, generally, is a good neighbor, and most communities recognize this fact.

From time to time, out of political motivations or for reasons of radical chic, individuals may try to chill the business climate. On such occasions we try to set the record straight, or point out the consequences of a contemplated action. And the American system, of which business is an integral part, usually adapts.

So when it comes to the business climate, we're glad that most people recognize there's little need to tinker with the American system. And we're glad that, in countless communities like Joliet, people are working to keep the climate fair, warm, and not at all sticky.●

ECONOMIC ALTERNATIVES

HON. WILLIAM D. FORD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. FORD of Michigan. Mr. Speaker, the column in today's Washington Post by Hobart Rowen which I am inserting in the CONGRESSIONAL RECORD states clearly the concerns I share with writers and serious observers of our economy on the Washington level.

The economic situation across the Nation is going from bad to worse, and in my State of Michigan, it is a disaster. We need a change and we need one fast. That is why I have cosponsored H.R. 4504—the Udall-Obey Emergency Tax Cut Act of 1981. It is a sound measure that would reduce Government borrowing by $40 million next year by phasing in tax cuts for individuals and providing small tax reductions for the richest—25 percent of all taxpayers. It also strips the new Tax Code of numerous provisions which are close to corporate welfare. The plan offers significant new incentives to American industry, gives the majority of Americans a larger tax cut next year than can be expected under the administration's tax program, and balances the budget in 1983-84.

The time has come: We must do more than just talk about high interest rates and massive deficits. The House must adopt a prudent tax policy that will promote a balanced budget and reduce the Government's involvement in the credit markets.

Hobart Rowen has adeptly stated the problems with the tax bill. The Udall-Obey substitute is a good start at a solution.

[From the Washington Post, Oct. 22, 1981]

THE REAGAN RECESSION

(By Hobart Rowen)

Surprise, surprise, the economy is in a recession! For weeks analysts outside the Reagan administration have been warning that nothing else could develop from the inherent conflicts in Reaganomics, which pits a highly restrictive policy of monetarism against an excessively stimulative fiscal policy.

But last weekend, for the first time, after receiving a memorandum from Economic Council Chairman Murray L. Weidenbaum outlining the pervasive decline in the economy (every industrial sector except defense showed a fall-off in September), President Reagan was willing to label the current situation a recession, albeit a slight one. Weidenbaum followed up with a public statement saying that "we have anticipated for some time that this situation could arise."

Back in March, Weidenbaum was beginning to admit that 1981 would be a disappointing year. But at the beginning, the Reagan program, as announced and defined, pretended there would be no recession. The economic assumptions published at the beginning of the year—relying on supply-side magic—called for an increase of 1.1 percent in real economic activity in the current cal-

endar year, soaring to a 4.2 percent gain in 1982, followed by a 5 percent gain in 1983.

Such rose-colored expectations have not yet officially been discarded, but they can be junked. Yet Weidenbaum is still insisting that "the forces are already in motion to reverse current downward tendencies, even though several more months of poor economic statistics are a likely probability." Those "forces" are the first stage of the individual and business tax cuts, and a decline (from high peaks) in short- and long-term interest rates.

But don't make any bets that this prediction is any better than others the administration has made so far. The individual tax cut on Oct. 1 is of piddling dimension, and the business cuts—even though retroactive to Jan. 1, 1981—won't help the economy until next year. More significant, perhaps, is the new uncertainty over next year's tax cuts.

And as for interest rates, the administration originally far underestimated how high they would go and hence the dampening of real economic growth as well as the drain on the budget to service the national debt. Now, there has been a modest reduction from the peaks, but nothing yet to reduce the crunch on business expansion, or to ease the real depression in housing and cars.

Treasury Secretary Donald T. Regan, in a moment of candor last Friday, admitted that in the case of the administration's efforts to prevent disaster in the savings and loan industry "we actually don't know what's going on."

One wonders whether that can't be said of the administration's approach to other problems in the nation's economy. For example, President Reagan did not oppose the "All Savers" Certificate proposed by the savings industry as a bail-out for their sickness—although he had plenty of warning that it was bad legislation of dubious value to the S&Ls, and a positive additional bonanza for upper-bracket earners.

Now the administration is discovering that the Treasury will take a terrible bath through the tax-free status of the All Savers. Moreover, according to some private analysts, so much money has been shoveled into the All Savers that the economy has suffered directly: economists report that money that might have gone into down payments for cars was tucked instead into All-Savers.

It would be hard to exaggerate the extent to which the crucial error of Reagan's approach to economic problems lies in the horrible 1981 tax legislation. Nobel economics laureate James Tobin put it exactly the right way the other day when he said that the "disgraceful" bill "really made a shambles of the American tax system."

Congress and the president together, yielding to almost every greedy pressure, "gave up all pretense that this country [should] make any attempt to check the accumulation of dynastic wealth, or try to render things more equal in the next generation," Tobin said.

There is a certain immorality to the tax bill, as Tobin suggests. But let's put that question aside and deal for the moment only with the macro-economic effect: with a recession a certainty, the economic growth prospects that might have generated extra tax revenue are not in view. Therefore, it is time for reality to replace the supplysiders' mumbo-jumbo (call it voodoo economics, if you will), and aim policy toward a partial withdrawal of the tax cut. This in turn can encourage the Federal Reserve to ease up on its drastic monetary policy.●

PARAQUAT BAN

HON. BILLY LEE EVANS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. EVANS of Georgia. Mr. Speaker, today I am pleased to join with my colleagues from the neighboring State of Florida, Mr. IRELAND, Mr. SHAW, and Mr. HUTTO, to introduce legislation which has already received overwhelming support from all members of the House Foreign Affairs Committee. This bill will allow the use of the herbicide, paraquat, in overseas marihuana eradication programs.

I look at this bill as the single most important legislation that we could enact this year to help stem the tide of drugs flowing into this country.

The controversy over paraquat stems from an amendment to the 1961 Foreign Assistance Act which prohibited U.S. financial assistance to any foreign country that was using a herbicide on marihuana that might be found harmful by the Secretary of Health and Human Services (HHS) to smokers. Former Secretary Joseph Califano then determined that there was a possibility of harm which required the State Department to withdraw any support to Mexico in their marihuana eradication program.

As a member of the Select Committee on Narcotics Abuse and Control, I chaired hearings in the 96th Congress on the health consequences of paraquat-contaminated marihuana on possible smokers of the drug in this country. My conclusion and the conclusion of the other members of the committee at the termination of those hearings was that HHS had overextrapolated its figures in its determination that paraquat was harmful to humans, considering the level of contamination found.

We determined that given the amount of contaminated marihuana on the U.S. market, and the persistence and amounts of exposure, it is extremely unlikely if not impossible that any serious health consequence would result to smokers in the United States from a foreign, national paraquat eradication program. In my opinion it is clear that HHS was passing judgment given worse-case assumptions, far beyond reality, and determined possible harm rather than probable harm.

To sum up the importance of the paraquat program and the potential impact it has on the flow of marihuana, allow me to point out some basic facts about the Mexican program—a proven effective program. According to a Drug Enforcement Administration study, the Mexicans eradicated approximately 7.2 million kilos of marihuana in 1976. The Mexicans, however, were only able to confiscate through law enforcement means, 403,930 kilos. My research further indicates that the combined effort of United States seizures and Mexican seizures only totals 501,183 kilos of marihuana. Therefore, one can easily see that this program has proven to be cost-effective. Between the Mexican seizures and the Mexican eradication program, my estimation shows that eradication is responsible for 94 percent of the marihuana taken off the market. One cannot emphasize enough the potential impact that such a program can have if other source countries launch the same attack on marihuana. Mexico has gone from the No. 1 source country for 85 percent of the marihuana coming into the United States to less than 10 percent.

As with Florida, my home State of Georgia, because of its proximity to the South American source countries, is inundated with marihuana. The readily available amounts are so great that it is forcing the distributors of the drug into a younger and younger market every year. According to NIDA studies some 16 million Americans are now regular users; and among high school seniors, about 1 in 10 are daily smokers averaging 3½ joints a day. I have calls coming into my office daily from concerned parents and teachers about the harmful effect this drug is having on our young people. I know this is a matter of national concern, and no doubt similar feelings have been expressed from parents in every State.

I will not sit on the sidelines and continue to see this massive influx of drugs coming into our country affecting more and more children every year and destroying more and more families. We know we have an effective program that can destroy this menace. This eradication program is the best thing we have got going, and I intend to fight to the finish to see that this bill passes the House of Representatives and is signed by the President. I urge all Members to join in the battle against drug use and offer their support for this vital legislation.●

THE INTEREST RATE REFORM ACT

HON. BILL McCOLLUM

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. McCOLLUM. Mr. Speaker, today I have introduced the Interest Rate Reform Act of 1981. The purpose of this bill is to bring down the intolerable rates of interest existing in this country; provide a fixed and logical relationship between the rate of inflation, the interest rate paid by the U.S. Government on debt issues, and interest charged on loans in the market-

place; assure that the public is protected in the future from unreasonable profitmaking through interest rates by those who might be tempted to take advantage of changing economic climates and attending uncertainties; and provide a uniformity of interest rate ceilings thoughout the Nation.

High interest rates have placed loans of any sort out of reach for all but the wealthiest of Americans and the largest of businesses. No longer can young American families afford to buy single-family dwellings. Small businesses cannot borrow money and are having difficulty paying back loans they already have with many facing the possibility of bankruptcy in the coming months if high interest rates persist. The entire economic recovery plan of President Reagan is in jeopardy without it having the time necessary to work. It is an understatement to say that high interest rates must come down, and since the free market forces, which I much prefer, are not working, Congress must act to assure that these interest rates do come down.

Why do we have continued high interest rates when the rate of inflation is considerably below where it was a few months ago and the prospects of keeping it down are brighter than they have been in years? The answer lies in the law of supply and demand in the marketplace, since interest rates are nothing more than the price of money. The forces at play have been difficult to analyze and are even more elusive of control, even in our highly regulated banking system. In order to control inflation it has been and continues to be necessary for the Federal Reserve to maintain a tight monetary policy and avoid the creation of dollars while laws which will reduce budget deficits and stimulate savings and investment take effect. At the same time, the huge borrowing by the Treasury necessitated by the runaway deficits created by the follies of past Congresses and administrations reduces the supply of available money to consumers and businesses even more. On the other hand, the demand for money at any rate of interest by those few who can afford the high rate remains substantially greater than the supply and will for the forseeable future unless there is a major recession or economic collapse, which none of us want. With these conditions, market forces alone are not going to bring interest rates down.

On a more specific level there are a number of forces at work in keeping the interest rates high. One of these is the greed of the money market center banks and other huge financial interests which are simply making a big profit and appear unwilling to sacrifice these profits at the moment even though they should know that their greed will cost them in the long run. Another significant factor is simply the high rate of interest the Department of the Treasury is willing to pay on bills and notes it sells to finance the debt presumably under the assumption that it must make all of these sales planned each week no matter what the market rate of interest in order to meet the Government's cash flow obligations. Under the present conditions the Treasury debt obligation rates are the central force most directly influencing the interest rates of the underlying financial markets of the country, both the interest rate paid to depositors and investors and interest rates charged to borrowers, since in the money business one is a direct function of the other. Consequently, any realistic control over interest rates charged the public must be accompanied by related controls on the interest rate paid by the Federal Government when it sells Federal debt obligations. Hence comes the rationale behind the Interest Rate Reform Act of 1981.

The bill I have introduced calls for a gradual week-by-week reduction in the amount of interest or yield which the Treasury is allowed to pay on bills or notes—or any other debt obligation issued by any agency or instrumentality—until such point as the rate of interest or yield is equal to an amount 4 percent greater than the percentage increase in the consumer price index over the preceding 12 months—the most widely accepted measure of the rate of inflation. At this point the Treasury is locked into maintaining a ceiling on the amount of interest it is able to pay on the sale of any such obligations at the constant level of 4 percent above the current 12 month CPI increase, using the latest figures available from the Department of Labor at the time of each auction or sale of debt. This differential provides a reasonable profit rate for those who deal in Government obligations and who must take into account inflation.

Now the Treasury may not like this proposal at first blush, but I suspect upon study and reflection the first-thought arguments against it will fade. Assuming the phasein factor, the weekly reduction of one-fourth of 1 percent, is appropriate, and data unavailable to me may show some other factor more appropriate the Treasury should be able to sustain a week or two where all of the bills and notes it would like to have sold are not completely sold because the buyers want a greater return of their money. With the appropriate reduction factor, the demand forces of the marketplace should level off any initial distortion and result in the sale of virtually all obligations offered the following week at the next reduced level and allow for any lost sales to be made up in a relatively short period of time. Once the constant relationship factor between the Federal debt obligation rate ceiling and the rate of inflation is established, there should be no difficulty whatsoever making market.

The rest of this bill provides for a national usury law tied to the Federal debt obligation rate ceiling. It provides that the maximum legal rate of interest which may be charged cannot be greater than 6 percent more than the current Federal debt obligation rate. This provides for high enough real interest above the rate of inflation for lenders to be able to make higher risk loans to the less creditworthy, who are most often the general public who have the greatest suffering when the amount of available money is choked off. The market forces would compel the prime rate to be considerably lower. Further, there is an exemption provided from the usury ceiling for loans which do not exceed a total of $2,500 and those which do exceed $500,000 made to any person or business entity within a 180-day period. This exemption should allow the availability of money to the consumer and the small loan, high-risk person where it might not otherwise be available under an interest ceiling, as well as facilitate the making of very large loans.

The Interest Rate Reform Act of 1981 is designed to be a workable piece of legislation that fits together with the other portions of the President's economic recovery plan. It provides a missing link, the need for which was obscured by historic economic assumptions about the relationship of interest rates and inflation in the marketplace. I believe that it is innovative and will work. I urge my colleagues, the administration, and those in the business, financial, and academic community to analyze it carefully and critically. I have high hopes that the reasoning I have presented is sufficiently clear that many of my fellow Members in Congress will join in cosponsoring this critical piece of legislation and that it will move swiftly through the Halls of both bodies and onto the President's desk so that we may have relief from those exorbitant interest rates before things get completely out of hand.

The Interest Rate Reform Act of 1981 which I have proposed today may make it sound to some as though I am abandoning the principles of free enterprise which I have long advocated. This is not so. In my judgment there are very few areas where Federal intervention and regulation are justified and wherever possible they should be eliminated. However, there will always be some areas where the Government must step in and restrict those who would obstruct the benefits of the free enterprise system to the vast majority of Americans for their own personal greed and benefit. Such has historically been the case with banks and money markets.

We have always had State usury laws in this country and usury laws have been a deep part of the entire Western culture. Historically, they have been necessary for a healthy economy and, although some have argued strongly against them, it is my judgment that the public interest is best served by correcting the defects pointed out by the critics, but maintaining the basic concept. So it is, I believe, with the bill I have introduced. It supersedes many diverse State laws which over the years in many cases have become archaic anyway and in light of the current economic upheaval might as well not be on the books. With the interstate nature of the flow of money and commerce, a uniform national usury law is essential and certainly this is the appropriate time to enact it.

The text of the bill is as follows:

H.R. 4826

A bill to reduce interest rates by limiting the rate of interest which the United States Government may pay on debt obligations issued by the United States and by establishing a national indexed usury ceiling.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Interest Rate Reform Act of 1981".

SEC. 2. (a)(1) No officer or employee of the United States may sell any debt obligation of the United States, or of any agency or instrumentality of the United States, bearing interest at a rate, or at a discount from face value, yielding a rate of return greater than fifteen percent or one-fourth of one percent less than the average auction price for Treasury bills at the auction held the week prior to the date of the enactment of this Act, whichever is greater.

(2) After such date, such maximum interest rate or yield shall be reduced by one-fourth of one percent per week until such maximum interest rate or yield is four percent greater than the increase, expressed as a percentage, in the Consumer Price Index during the most recent twelve month period preceding the sale of the debt obligation involved for which figures are available.

(b) After reaching the point where such maximum rate or yield is four percent greater than the increase in the Consumer Price Index during the period described in subsection (a)(2), all such officers and employees shall maintain such maximum interest rate or yield at such level.

SEC. 3. (a) Notwithstanding any other provision of law, the maximum legal rate of interest shall be not greater than six percent above the currently effective rate provided in section 2.

(b)(1) All contracts and assurances for the loan or forbearance in money or other thing of value at more than the legal rate of interest are void as to the excess of interest over the legal rate of interest.

(2) The principal, with legal rate of interest, may be recovered on any such contract or assurance, but not the excess of interest. Such excess of interest, if already paid, may be recovered from the lender or forbearer even though payment was made to an assignee. If the lender or forbearer refuses, before suit is brought, a tender of the principal with legal rate of interest or refuses a demand by the borrower for the refund of any excess interest already collected, such lender or forbearer shall pay the costs and attorneys fees incurred by the debtor in the prosecution or defense of any suit brought with regard to the contract or assurance.

(3) A court having jurisdiction may grant equitable or declaratory relief for any such excess of interest and to that end may compel the necessary discovery from the lender or forbearer.

(c) Subsections (a) and (b) shall not apply with respect to any one or more contracts or assurances which do not exceed a total of $2,500 or which do exceed a total of $500,000 made to any person or business entity, including related or affiliated persons or business entities, within any 180 day period.

(d)(1) No person may hereafter plead or set up the taking of more than the legal rate of interest as a defense to any action brought against such person to recover damages on, or to enforce payment of or other remedy on any mortgage, bond, note, or other obligation executed or assumed by such person, except that this section shall not apply to any action which is now pending or to any suit or action instituted subsequent to the date of the enactment of this Act upon any mortgage, bond, note, or other obligation executed or assumed by such person prior to the date of the enactment of this Act.

(2) This Act shall not prevent any State or territory of the United States from allowing such defenses or imposing criminal sanctions with regard to contracts or assurances bearing interest or yielding a rate of return greater than twice the legal rate of interest calculated under section 2 as of the effective date of such contract or assurance.

SEC. 4. All references to interest rates and yields in sections 2 and 3 mean simple interest annualized over a one-year period.

SEC. 5. A reasonable charge for origination fees, finder's fees, delinquency fees and commissions, and actual costs of recording and filing fees and of documentary and intangible taxes shall not be considered interest under this Act.●

WPPSS TO CLOSE TWO NUCLEAR PROJECTS THIS WEEK

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BONKER. Mr. Speaker, the Washington Public Power Supply System is deciding this week how best to shut down two of its five partially built nuclear power plants in Washington State.

The Supply System will either mothball the projects to permit, it will be said, studies of their future to proceed in an orderly manner, or the projects will be canceled. There are many who feel that they will never be completed in either case.

Northeast utilities, major electric consumers, and WPPSS turned to these options after the latest estimates of the costs of completing the two plants—a staggering $11.8 billion—showed that they had outstripped the financing capacity of the region and the patience of Wall Street analysts. The region's ratepayers now face truly enormous construction bills.

Ironically, the two plants were big factors in their own demise. During their 4-year construction history, costs skyrocketed, rising more than 500 percent since they were first announced and 300 percent after construction commenced. Retail electricity price projections rose, too, and energy forecasters knew that higher prices would make energy conservation more attractive. They gradually lowered their projections of the Northwest's power needs, and much of the justification for building the two plants, which have a combined capacity of nearly 2,500 megawatts, simply evaporated.

Now the Northwest is stuck with two large nuclear plants that are 22 and 13 percent, respectively, complete. They represent investments of $2.25 billion and would require hundreds of millions of additional dollars for complete cancellation.

The outlook for finishing them is quite bleak. WPPSS and the region's electric utility industry ignored critics of the plants for too long. In February 1979 I seriously questioned the wisdom of pressing ahead with the entire five-plant program. Had my advice been heeded then, termination of these two plants would have saved the region most of a $3 billion debt—savings to the ratepayers or money which could be supporting energy conservation programs, renewable energy resource development and other cost-effective actions to address the region's energy needs. Instead, that investment is sitting idle.

The Northwest must now be on guard to avoid a repeat of this tragic fiasco. The entities and individuals who decide to build big powerplants and who oversee their construction must be held more accountable to the ratepayers who must foot the bills.

Initiative 394, which will be on the Washington State ballot on November 3, is one option. It would require voter approval of public utility bonds for major power projects; it would not create the electric power doomsday in the State that some of its opponents are fond of predicting.

Although the initiative is not likely to make big powerplant construction any easier, it should make it better by enhancing accountability. If Washington voters give themselves this task, they undoubtedly will not have much patience with construction mismanagement and needless cost overruns, but I think they can be trusted to recognize legitimate power needs and to authorize expenditures to meet those needs.

The Northwest has entered an era of unprecedented power cost increases. Electric utility accountability has never been more important; it deserves

thoughtful debate and reasoned analysis. Everyone would be better served if critics of the initiative would take that approach and drop the misleading rhetoric that has been all too prevalent in their campaign thus far.

The painful sessions at WPPSS this week show that the issues at stake are much too important to do otherwise.●

REDUCTION IN FORCE

HON. WALTER E. FAUNTROY

OF WASHINGTON, D.C.

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. FAUNTROY. Mr. Speaker, during his budget announcement in March of this year, President Reagan stated that $1.3 billion would be saved as a result of reductions in Federal personnel, including $400 million in savings for fiscal year 1981. More recently, the White House has indicated that it expects to reduce the Federal Government's payroll by some 75,000 employees.

These statements have caused alarm to rush through the ranks of Federal employees. While many of these employees have already felt the blow of the President's reduction in force program and many more can expect a similar fate, the full impact is still uncertain.

In recent weeks, my office has been besieged with complaints from victims and potential victims of the RIF. Long-term career Government servants, employees with families and other obligations, and even war veterans have felt the pinch of the RIF.

Lives are being disrupted, unemployment is increasing, and still, the White House has been unclear as to how far and how deep these cuts will go.

Various figures, ranging from 4,000 to 10,000 have been used to describe the number of job losses to date in the Washington metropolitan area. Our Federal Government Service Task Force is expected to produce reasonably firm figures in short order. The losses however are growing.

Just yesterday, a Vietnam veteran with 10 years service to our Government came to my office. He has been RIF'd by the Drug Enforcement Agency. Three employees of the Department of Health and Human Services also came, uncertain of their future. Two of them have been employed with the Federal Government for 26 years each, and the other had been employed for 15 years. They have received a general RIF notice effective October 31, and may be forced to suddenly compete in the private sector for jobs after a career of Government service.

To confront this mounting problem, I have today introduced a bill to provide possible relief to individuals whose lives, livelihoods, and families are threatened by this unclear, apparently arbitrary RIF program now underway.

This bill has three major provisions:

1. It requires that the Office of Management and Budget establish, maintain, and distribute a National Register of RIF'd employees.

2. It disallows the heads of Federal agencies or departments from appointing persons to positions in those agencies or departments if qualified RIF'd individuals are available for the positions. This feature in effect provides a right of first refusal to affected employees, and

3. It provides for appeal to the courts in the event a RIF'd individual is not satisfied that a determination by an agency or department head is in compliance with the provisions of the bill.

This bill goes further than current laws and regulations in that it virtually guarantees a RIF'd individual a job if an agency or department decides to hire someone.

Under the current system: re-employment priority lists are kept, employee displacement programs operate, bumping and preference procedures are available such as veteran's preference, but there is no re-employment as a matter of right. Under my bill, if anyone is hired, it will have to be a qualified RIF'd individual.

Other legislation designed to complement this bill is now under serious consideration. For example, I am aware that entry level and low-level service jobs are perhaps hardest hit by the RIF. Security guards, food-service employees, and others have little or no recourse.

The work that these types of Federal employees have performed is now contracted out in large measure to large corporations. The savings to the Government is highly questionable. I am considering legislation to either freeze this approach or to allow it only where there is a clear and demonstrable savings to the Government.

Hopefully this bill and others which may be introduced will help to reduce the doubt, remove the uncertainty, and ease the pain of a seemingly out-of-control Federal personnel reduction program.

Thank you.●

PETITION TO OUST SECRETARY OF THE INTERIOR

HON. DICK CHENEY

OF WYOMING

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. CHENEY. Mr. Speaker, members of the Sierra Club recently visited Washington to deliver a petition calling for the removal of James Watt as Secretary of the Interior. I personally think James Watt is doing a fine job and would like to insert into the RECORD a resolution recently adopted by Outdoors Unlimited, Inc., in support of the Secretary.

RESOLUTION OF OUTDOORS UNLIMITED, INC., KAYSVILLE, UTAH

Whereas our nation has enunciated a policy of energy self-sufficiency, but until recent months has pursued policies that killed the ability to accomplish this goal; and

Whereas extreme national policies of unrealistic regulation and control have created unneeded, unnecessary cost for the consumers of food, fiber, and mineral products; and

Whereas the environmental societies have personalized and emotionalized a nationwide aggression against Secretary of Interior, James Watt; and

Whereas these same organizations have used this personal attack against a man, his philosophies, and his religion to gain membership for their groups; and

Whereas Outdoors Unlimited, Inc., a multiple use organization representing over 5,000 members and affiliates, firmly believes that issues and decisions of national policy should be determined one at a time, based upon facts and accomplished results; and

Whereas the aggressive actions of the preservationist societies are tending to make a symbol of Jim Watt which makes it difficult to debate issues on their merit, each in turn;

Now therefore by it resolved by Outdoors Unlimited, Inc. assembled at its annual meeting that we compliment President Reagan on his program of wise and common sense useage of natural resources in the West and for his public support of Secretary Watt; and

Be it further resolved that we support the administration by the Secretary of Interior in all of those policies which are designed to accomplish responsible sustained multiple use management of western public lands and the water and natural resources found thereon; and

Be it further resolved that we support Secretary Watt in his administration of this policy, but encourage the Secretary to give greater attention to the public presentation of the administration goals and policies for public land management; and

Be it further resolved that copies of this resolution be sent to President Ronald Reagan, to Secretary of Interior James Watt, and to the Governors and members of Congress in the public land states.

Dated this 10th day of October, 1981.●

EXPLORING NEW APPROACHES TO ECONOMIC DEVELOPMENT

HON. RICHARD A. GEPHARDT

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. GEPHARDT. Mr. Speaker, this past weekend, Democratic officials from every level of government and all parts of the country came together in Baltimore to discuss the crucial issues confronting not only our party, but the Nation as a whole.

As the first meeting of the Democratic Strategy Council, the sessions represented the inauguration of a unique effort to seek policies to solve our many complex problems. The weekend was no love-in, but did foster constructive debate on the directions the country should take to meet the challenges of the 1980's.

A major topic of discussion, of course, was the future of our economy. Along with the distinguished gentleman from Colorado, Mr. WIRTH, I offered to the council a draft economic policy statement to provide a framework for debate on this fundamental issue. It is our hope that it will encourage discussion and help create a clear Democratic economic strategy. I want to call it to the attention of my colleagues, and insert it in the RECORD at this point.

EXPLORING NEW APPROACHES TO ECONOMIC DEVELOPMENT

America cannot solve the complex problems of the 1980's with the simplistic economic nostrums of the 1920's.

In the post-war period, America's economy, and the world's, have undergone changes as profound as those that transformed our nation from an agrarian economy in the 19th century to a manufacturing power in the 20th.

New centers of resources and power have emerged around the world: trading nations of Japan and southeast Asia; OPEC with its petrodollars and stranglehold over world energy supplies; a re-vitalized western European economic community and Euro-currency market; strategically important mineral-rich, developing nations and new industrial giants like Brazil.

Increasingly, America's economic future is tied to others in a global economy of multinational corporations, new forms of money, and electronic transfers of funds that cross national boundaries. Our level of imports and exports increased ten-fold in the last decade. Today one American job in seven depends directly on our exports.

Changes bring new challenges. Once the undisputed master of world trade, America is under challenge in developing markets around the world by technologically advanced, aggressive trading nations from Asia to Latin America. Yet our productivity, personal savings, and capital investment are lagging behind our principal competitors.

At home, we have witnessed changes equally profound. Nearly 90 percent of the new jobs created in the last 10 years were in the service industry. Two-thirds of the American workforce today is engaged in offering services of some kind rather than producing manufactured goods. That percentage is growing. More than 50 percent of our gross national product is now derived from the development, storage, processing, and dissemination of information.

We also face demographic changes, with profound implications for future economic growth. The Baby Boom and the massive influx of women into our workforce is slowing down. In the future, we will see fewer new workers entering our economy and more workers staying longer, thus bringing new challenges of training and re-training to the fore.

At the same time, unemployment among minorities is at a record high, betraying the promise of equal opportunity. Hundreds of thousands of unemployed minority youths are threatening to become a permament underclass.

Underlying all of these changes in our economy is a condition traditional economic theory said could not occur—persistent stagflation the combination of both high inflation and unemployment that has sapped our economic vitality for more than a decade, robbing millions of Americans of the opportunity for productive work, security, and hope in the future.

The only genuinely new approach offered by the Republican party today is the fundamental contradiction between its fiscal and monetary policy. This Administration coupled deep, across-the-board tax cuts, aimed at generating high levels of growth, with tight monetary targets and high interest rates which reduce the capacity of our economy to grow. What is gained by fiscal stimulus is denied by monetary restraint and thoroughly confused by defense and energy policy. But, as if in an economic shell game, the Reagan Administration proclaims with a straight face targets of 13 percent nominal economic growth side-by-side with monetary targets of 3½ to 6 percent—seemingly oblivious to this fundamental contradiction.

We can expect that the Administration will increasingly substitute exhortations of faith for economic policy, and in the coming months will step up the rhetoric of blame, pointing the finger at scapegoats—the Congress and even Wall Street—when its economic policies were to fail. But even if all its policies were to work, the Administration is heading us toward an economic era whose time has passed.

The Democratic Party cannot shrink from the responsiblity to lead. A dynamic, expanding American economy, with stable prices, remains the surest engine of social progress and increased opportunity for all our people and the fundamental guarantor of American national security and strength.

In the 1930's, the Democratic Party led our nation in meeting the challenge of world-wide economic depression and collapse. Franklin Roosevelt's leadership ushered in a generation of growth, prosperity, and increased security in America unmatched in world history. The Deomcratic Party must meet the new challenges of our economic age today with equal boldness, innovation, creativity, and leadership.

Our challenge is not just to relieve the symptoms of our current economic difficulties—double-digit interest rates, high inflation, and widespread joblessness—as important as those goals are. We must rebuild and re-invigorate America's productive capacity. We must foster a technological revolution in every sector of our economy, from the new high-tech growth industries to our aging industrial base. We must restore America's competitive edge around the world and reassert American economic leadership.

CONSENSUS POLITICS: BUSINESS, LABOR, AND GOVERNMENT

Nearly every industrialized democracy, including our principal trading partners and competitors, has inaugurated new patterns of cooperation among business, labor, and government to marshal the national resources and investment behind increased productivity, economic development, and growth. This Administration's policies are setting such an effort back by a generation, poisoning labor-business relations, and for the first time in 50 years, barring organized labor from a meaningful role in our national dialogue.

Clearly, America must move beyond old antagonism to a new era of cooperation among business, labor, and government—from the shop floor to national development projects—in the interest of national growth. We must learn from, encourage, and build upon successful developments in new labor-management cooperation. And we must confirm that, in the coming decades, there is a significant public role in the development of all of our economic resources. The government has a major role to play—this role must be carefully thought through, defined and constructed.

A consensus-based approach can harness the resources and unique contributions of all sectors in our society: the capital investment of business; the enormous resources of pension funds; the role of government; a commitment by business and labor to restrain inflationary costs and contract settlements; and a balanced commitment to maintain environmental health and safety standards.

FOSTERING A TECHNOLOGICAL REVOLUTION TO INCREASE PRODUCTIVITY

A technological revolution will take place in the next two decades as certainly as the industrial revolution occurred during the 18th and 19th centuries. We want to speed its arrival and harness its potential.

We must assure that resources flow into the new, rapidly expanding industries of the future in which America retains an international competitive lead—computers, telecommunications, agriculture, photovoltaics, health research, and bio-technology. And we must encourage the application of new technology to America's aging industrial base.

We will only achieve those goals by careful targeting of our tax and economic policies. A Democratic alternative must reward research and development, risk-taking by small business, industrial productivity and investment, and discourage non-productive speculation.

The new information and idea-intensive high-tech and service industries provide increasing numbers of new jobs for American workers and must continue to outdistance their competitors, who are posing an increasing challenge especially in the burgeoning international marketplace. To a large extent our future economic growth depends upon our attention to this sector.

To accelerate the pace of innovation in these growth industries the tax code should encourage greater investment in high technology and information industries. We must address the special difficulties these industries face in forming capital investment because of enormous risks and the lack of compensating incentives.

At a minimum, perverse tax incentives that steer capital into less productive investments must be neutralized. Real capital formation, rather than incentives for mergers, will better reflect the present trends toward innovation, decentralization, productivity and job creation.

Because small business plays such a critical role in promoting innovation, high technology, and new ideas and jobs, we must develop special incentives to assist small business to acquire necessary capital.

The remainder of this century brings the challenges of modernizing our industrial capacity in an information age, and competing with increasingly aggressive foreign businesses. We must respond with a concerted national effort to retool our industrial base, and transfer the fruits of the technological revolution to our basic manufacturing in-

dustries. We must encourage the strong trend toward the export of our national "thoughtware" to the world, just as we have encouraged the export of manufactured products in the past.

Today, most of American industry operates on a base of capital stock designed for a period of cheap energy that will never return. This reality dictates that we cannot ignore the advances made in alternative energy strategies. A balanced national energy program, including solar, conservation, and other alternatives is imperative for our national economy as well as for our international security.

PROMOTING BASIC RESEARCH AND DEVELOPMENT

To restore America's competitive edge and to promote the productivity gains essential for economic growth and lower inflation, we must support sharply increased research and development. American ingenuity and innovation have always spearheaded American economic leadership; in the future world economy, this leadership will be even more important.

Managers of industry must look beyond their quarterly balance sheets; labor leaders must embrace technological change in return for a more productive, full-employment economy; government must expand its leading role as a catalyst for basic research and development.

Our government's past investments in science, in the space program, and in basic physical and bio-medical research have helped propel America's high technology industry to world leadership. To reduce this commitment now, as the Republican Administration has done, when these investments hold the key to our future economic growth, is simply irresponsible.

THE WORK FORCE IN A CHANGING NATIONAL ECONOMY

The Department of Labor reports that the United States dropped from second to seventh in the measured "skill endowment" of our workers. At a time when other nations maintain continuing commitments to train and develop their work force, this Administration's answer to job displacement is to reduce incentives for the working poor, slash programs for training, and starve national institutions of higher education.

An economy changing as radically and as rapidly as ours must pioneer new ways to train and retrain American workers. Tax credits and other incentives should be used to encourage management, labor and communities to train existing work forces to master new employment opportunities. The evidence is clear that there is no dearth of new business starts in the United States. What is needed is a concerted effort to combine these with retrained work forces and existing infrastructures of schools, hospitals, transportation, and other expensive public services.

ATTACKING STRUCTURAL UNEMPLOYMENT

While we dedicate our energies and efforts towards workers in transition, we must also reaffirm our commitment to remove the barriers which have set apart far too many Americans—particularly minority youths—from any role in a productive work force. Hundreds of thousands of young people in our nation have never held a job. Many of these young people cannot read and write at all. Unless this pattern is reversed, we can anticipate increasing public disillusionment with our education system, and increased costs to the economy. Reform now, harnessing the resources and commitment of business, labor, and government, must be part of a national commitment to basic skill training. The imperatives of the future will not tolerate neglect of our nation's young.

INVESTING IN PHYSICAL CAPITAL

The physical infrastructure of our nation is rapidly deteriorating. For example, one in five bridges needs to be replaced, more than one-half the nation's roads are in disrepair; America is losing billions of dollars in coal exports because of massive bottlenecks in our harbors and ports. In these times of austerity, difficult decisions have to be made as to what investments are made at what levels of government and what should be made privately.

PROMOTING FISCAL DISCIPLINE

Clearly, no strategy for restoring America's competitive edge abroad and revitalizing productivity at home can be successful unless it controls the inflationary spiral that has crippled our economy. The most important immediate signal government can send to financial markets about its seriousness to control inflation is fiscal discipline. A helpful set of guidelines was outlined by the House Democratic Caucus in its statement of April 8, 1981.

Fiscal and tax policy should be coordinated with a clear understanding of the implications for the deficit. The Administration's Kemp-Roth tax bill threatens massive deficits, record interest rates, and continuing inflationary pressures.

Tax policy must be fair. Tax reduction should be targetted to those most injured by inflation and coming payroll tax increases, and toward our broader national economic goals: greater savings, greater equity, and economic growth.

ATTACKING INFLATION AT ITS ROOTS

Restrictive monetary policy cannot be tolerated as the country's only anti-inflation program. We cannot assume that fortunate weather and depressed world oil prices will continue to discourage price hikes. And we cannot depend on sharply increased defense expenditures to order a rapidly changing world economy.

A serious assault on inflation must attack the inflationary spiral at its roots: our declining productivity, the escalating wage-price spiral, and our massive dependence on foreign oil.

In today's discussion, we have augmented the dialogue concerning the inevitable trends driving our economy. As outlined above, it is imperative that we explore a variety of new strategies to re-invigorate American productivity and restore our nation's competitive edge abroad.

The wage-price spiral, spurred by fears of continuing inflation, feeds on itself and feeds the fires of inflation. It becomes a self-fulfilling prophecy as wages chase rising prices and prices rise to reflect the increased labor costs. Increased productivity is the long-range answer to keeping inflation under control, but we must address as well the incentives in our system that encourage prices and wages to escalate out of control. As the House Democratic Caucus said in its statement of Economic Principles, "Our nation needs an incomes policy: a flexible set of methods for combatting inflationary wage and price trends." Here again we can apply the needed template of consensus government.

Such a policy can only be devised with the cooperation of business, labor, and government. This Administration has so poisoned relations with organized labor that its leaders resigned from the Council on Productivity and called for a protest on Solidarity Day. We need to again explore the potential of equitable and effective incomes policies. And obviously such exploration will occur only under Democratic leadership.

Finally, only a resident of another planet could fail to see the effects of foreign oil pricing decisions on America's inflation rate this past decade. This nation cannot remain dangerously dependent on foreign oil for decades to come without risking all of its prospects for economic recovery on the future of an unstable, volatile part of the world.

This Administration seems bent on systematically dismantling all of the incentives for energy conservation and production of alternative fuels that a Democratic President and Congress enacted over the last four years. A serious program to reduce inflation must include a serious program to reduce dependence on OPEC oil. The Democratic Party must continue to support a balanced energy program to help achieve these goals.

UPHOLDING AMERICA'S VALUES

No American economic program—any more than a foreign policy—can long endure without the support and trust of the American people. And no program will win that trust that betrays the values on which America is based.

In every period of national challenge in our history, the American people have been willing to sacrifice—so long as they understood that sacrifice would be fairly shared. This Administration has drawn a safety net for the most privileged and powerful in American society, while middle-income families, the needy, older citizens, minorities, children from poorer homes, have all fallen through. We must continue to defend those most in need and insist that sacrifices be shared equitably.

This nation can meet the challenge of national recovery without losing its values. We can, and we must, maintain the momentum of increased opportunity for minorities and women. Equal rights is no threat to economic growth; its a 200-year-old promise of the American Constitution. We can, and we must, maintain the standards of a decent society to those who need our assistance and our aid. We need not turn away from the noblest impulses in our national character. We need not be hard-hearted to be hard-nosed.

Finally, we must not permit America to become divided into separate and unequal societies. Our enduring strength has been our unity, and only as one people, united in common cause, can we restore America's economic strength.●

SOCIAL SECURITY PROBLEMS

HON. CARROLL HUBBARD, JR.

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. HUBBARD. Mr. Speaker, one of the major challenges that Congress faces is how to come to grips with the problems of the social security system. Mr. George H. Keller, Jr., of 636 Country Club Lane, Hopkinsville, Ky., a city that I represent, has written me concerning a number of ideas that he has on how to preserve the integrity of the system. I believe that Mr.

Keller's letter is one which should be shared with my colleagues and I wish to do so at this time. The letter follows:

DEAR CONGRESSMAN HUBBARD: The problems of the Social Security System are of concern to all of us who depend on its benefits or who will depend on them. I know you are concerned with preserving the integrity of the System. Changes must be made—that much is clear. In seeking ways to guarantee that integrity, I suggest you give consideration to the following:

(1) Benefits now being received, regardless of what they may be, represent the moral obligation of the government and should be continued for those presently receiving those benefits. Cuts should be phased in and apply only to future recipients. The President in his recent address used very clever language that could be interpreted as a pledge to either retain cuts in minimum benefits as approved by the Congress or restore them. This is an issue about which there should be no ambiguity. Anyone who received benefits of any kind a month ago should continue to receive them. Congress can act to guarantee that—just as it has acted to deny the minimum payments. That action must be reversed. I trust you will support such action. The ending of future minimum payments to future beneficiaries, the educational benefits, etc. should be phased in with significant lead time so as to be as non-disruptive as possible.

(2) There should be a reappraisal of the basis upon which the inflation rate used as a base for determining cost of living increments is determined. The new guide should be one that more accurately reflects the actual inflation rate experienced by retired persons. This would result in savings at essentially no penalty to the recipients.

(3) If the retirement age is raised, and it probably should be, then care should be taken to provide for early retirement based upon legitimate disability with no penalty.

(4) A modest increase in the tax rate coupled with reasonable savings measures would be entirely acceptable to me, and the polls indicate it would be to the majority of Americans. I have read that a 1.5% increase in the tax now would offset all projected deficits. With some netted savings, the increase could probably be on the order of .5-.75% and would be preferable to large reductions in benefits and breaking faith with present recipients.

Sincerely,

GEORGE H. KELLER, JR.●

GEORGE WILL: WHO IS OUR MIDEAST "PILLAR"?

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LANTOS. Mr. Speaker, one of our most respected commentators—and as I understand it one of the President's favorite political writers—analyzed the question of the Saudi arms sale with exceptional clarity and insight. I commend Mr. Will for his penetrating piece and commend the following article to my colleagues:

WHO IS OUR MIDEAST "PILLAR"?

As a bass fisherman casting with light line and a high wind, I have produced some dreadful snarls. But I have rarely seen anything as snarled as the AWACS argument. The argument is less about hardware than about the suspicion that there is afoot a radical reorientation of U.S. policy. It is about how much weight the Saudi regime can bear. And it is about adopting the Saudi approach to peace, which means accommodating the group the Saudis sponsor, the PLO.

Regarding AWACS, the Administration has entangled a sensible question (how can we protect Saudi Arabia?) with a nutty question (how can we make Saudi Arabia the center of American policy in the Middle East?). The Administration downgraded Sadat by elevating the Saudis to a "pillar" of U.S. policy. The Shah was a pillar. So was Sadat. Now Saudi Arabia is called a pillar. That reminds me of Lincoln's lesson: if you call a tail a leg, how many legs has a dog got? Five? No, four, because calling a tail a leg does not make it a leg. In any debate about which nation can be counted as a pillar, it cannot hurt to notice the obvious: Israel is the only nation in the region where we know we can land a plane tomorrow.

A Partner? Grasping for ground for praising the Saudis, the Administration cites the Saudi role in the most recent "settlement" in southern Lebanon. But that was a defeat for Israel. The Syrian missiles which precipitated the crisis remain.

The Administration says Saudi Arabia's moderation makes it a plausible partner in a "strategic consensus." But the Administration says Saudi friendship is so tenuous it must be bought with AWACS. Perhaps Saudi Arabia's policy is ambiguous, and it is so because Saudi Arabia's position is ambiguous: for cultural reasons it cannot be pro-Soviet, but for political reasons it dare not be pro-American. However, the premise of the AWACS sale is that the Saudis want to be helpful. The sale needs a new premise unless the Saudis endorse the Camp David process and especially the multinational force for the Sinai.

As Carter did with SALT II, Reagan chose to get into a game of "chicken" with Congress, thereby risking paralysis in government, discord in the country and disrespect in the world. He assumed that Congress, afraid of being blamed for that, would flinch. Reagan's men must not have noted that, regarding SALT II, Congress did not flinch and was not blamed for the damage Carter caused.

The Administration has chosen to poison our politics by impugning the motives of opponents, implying that they are craven about "the Israeli lobby." This libel comes from people inexhaustibly obsequious toward a Saudi regime that molests U.S. interests while refusing even slight compromise to help the President out of the AWACS crisis his men have caused.

At first, a reason for gritting one's teeth and supporting the sale was to prevent the President's Middle East policy from becoming a shambles. But a policy of treating Saudi Arabia as a pillar is inherently a shambles. A remaining reason for approving the sale is that if it is disapproved the Administration may spend three years offering abject apologies to the Saudis.

Speaking of abjection, consider the musings of ex-presidents Ford and Carter in favor of accommodating a terrorist organization, the PLO. The musings are a reminder of why Ford's Presidency made Carter's Presidency possible, and why the country refused to renew either. In their airborne press conference, Carter was in character, laying down the law about abstract "rights" and sermonizing about how Israel is violating "the heritage of the Jews." But Carter is consistent. The logic of his Administration's initial policy of pushing for a "comprehensive" settlement, which would have maximized the leverage of the most extreme party at the table, pointed to an embrace of the PLO. Indeed, Sadat went to Jerusalem to derail Carter's policy. But now Carter and Ford have retreated from solemn commitments. As presidents, Ford and Carter pledged that the United States would not deal with the PLO until the PLO acknowledges Israel's right to exist. But now they have prepared the ground for the burial of those pledges. They have done so while they and the Reagan Administration (which should ponder the fates of Ford and Carter) urge Israel to trust U.S. reliability while the United States arms Israel's enemy.

Keystone: Sadat's death suggested that being America's friend can be fatal. The Administration's solicitousness toward Saudi Arabia suggests that a nation need not be friendly to garner the benefits of U.S. friendship. But if the Administration is determined to treat Saudi Arabia as the keystone of U.S. policy, it must try to sanitize the PLO, which Saudi Arabia finances. Candidate Reagan said: "Unlike President Carter, I have no hesitation branding the PLO as a terrorist organization." President-elect Reagan said: "I think the PLO has proven that it is a terrorist organization." Yet President Reagan allows the PLO to maintain an office in Washington.

Regarding the PLO, Ford and Carter spoke the language of inevitability. An approach to the PLO "has to happen," it "has to take place." (Ford), the dealings "have to be done" (Carter). But if accommodation of the PLO is, as Ford and Carter say, inevitable, the PLO has no need to abandon the terrorism and intransigence that have won it the status of an inevitability. Heaven preserve us from small minds bandying large notions of what history says "has to take place," and playing fast and loose with the nation's honor. Leaving honor aside, where it frequently has been left, let this be said: our ex-presidents are pushing Egypt toward radicalism and Israel toward South Vietnam's fate.

Bruno Kreisky, Austria's Chancellor, holds the Olympic record for fawning over the PLO, but even he was momentarily sobered by the PLO statement about shaking the hand that pulled the trigger to kill Sadat. When Ford and Carter urged appeasing the PLO, they were flying home from the funeral of a man who opposed the PLO and paid with his life. They could have found a more tasteful time to advocate rewarding those who execrated Sadat while he lived and rejoiced at his death.●

HUMAN RIGHTS—THE PHILIPPINES

HON. DON BONKER

OF WASHINGTON

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. BONKER. Mr. Speaker, while the House was in recess during the Columbus Day district work period, the Reagan administration sent another message to the repressors of the world.

At the Asian Development Bank the administration's representative voted in favor of a $27 million loan to the Philippines. Before this action, the United States had been opposing by abstention nonbasic human needs multilateral development bank loans to the Philippines because of that country's poor human rights record.

For 8 years Marcos has relied on martial law, military force, imprisonment of opponents, torture, corruption, incomprehensible plebiscites, rigged elections, attacks on the church, total control of the mass media, and the massive spending of borrowed funds to remain in power. The administration claims there have been improvements in the human rights record and Vice President Bush told Marcos at his inauguration, "We love your adherence to democratic principles and to the democratic process."

No reputable group following events in that troubled land would agree with the administration's assessment and change of vote. All the laws and decrees that institutionalize repression remain in force; and last June Cardinal Sin told members of the Catholic Bishop Conference of the Philippines that "the state is making a mockery of the constitutional provision regarding freedom of religion."

Once again by its actions and its policies, the Reagan administration has alined the United States with a regime that is at war with its own people. When will our policymakers learn that dictators come and go but the people will remain.

Three administrations—Nixon, Ford, and Carter—took great care not to endorse Marcos and maintained correct but distant relations with him. Only the future will tell whether the Philippines will go the way of other dictators we have embraced. In the meantime, the people continue to suffer.●

STRATEGIC DEFENSE PROGRAM

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. SKELTON. Mr. Speaker, a constituent of mine, Jerry Lovejoy, a retired Air Force captain with 21 years of service, recently wrote me concerning several elements of President Reagan's strategic program. I feel that his opinions, which are those of a person with expertise concerning strategic weapons systems and national defense, should be shared with the entire membership of the House. I include excerpts from a recent letter from Captain Lovejoy:

First, let me give you a little of my background. I recently retired as a Captain from the United States Air Force after 21 years of service. My last four years were spent as a Missile Combat Crew Commander and a Wing Command Post Controller at Whiteman AFB, Missouri. I am not suggesting that I am an expert on national defense, however, I do believe I have a much better understanding of President Reagan's decision than the average American citizen. My opinions, therefore, are based on my recent air force assignment at Whiteman AFB, my personal feelings, and last, but not least, as a taxpayer.

The underlying factor or bottom line regarding our national defense is deterrence. Deterrence can be achieved many ways as we have seen and heard. I am saying President Reagan's plan is the most logical, common sense approach looking at it from a military, budgetary, and environmental standpoint while still achieving a very high level of deterrence.

The part of his plan which deals with upgrading and improving Command, Control and Communication is vital to the success of the plan and is the key to it all. The basic fact is this; upgrade and improve Command, Control and Communication and you have decreased vulnerability. By decreasing vulnerability you have increased deterrence. Even though potential adversaries know where our missiles are located they can be assured that most will launch on time and on target. It is not necessary to implement an entirely new, astronomically costly system when using part of the existing system will accomplish exactly the same result, deterrence.

Although I do not have a flying background while in the air force I have been in Strategic Air Command for the past four years and do have an opinion on the portion of President Reagan's plan concerning the B-1 Bomber which I would like to also convey to you. It is very simple. The B-52 has outlasted her time and to continue to have a strong Nuclear Triad Force we have got to get the ball rolling for a replacement bomber. It is my understanding that the Stealth Bomber is still too far from production to be of help anytime soon. Yes, it will be costly perfecting and building essentially two bombers at the same time. The B-1 should have been in our inventory today, but that's water under the bridge. The B-52 will not (cannot) last waiting for the Stealth Bomber. The B-1 is the answer to fill the gap.●

OIL MAN WANTS DEPARTMENT OF ENERGY

HON. MICKEY LELAND

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. LELAND. Mr. Speaker, I find and I think my colleagues will agree, that the administration has an avowed philosophy that deregulation policies are an important step toward meeting certain national goals. The deregulation of oil and the pending deregulation of gas are steps toward lessening our dependence on foreign oil sources. This national priority, as the administration refers to it, is in glaring contrast to the administration's advocation of the elimination of the Department of Energy.

The Department of Energy, through centralized government planning, is necessary to lessen our dependence on foreign oil sources. In order to coordinate research, disperse information, and implement effective long-range programs, the DOE must stay intact. We must remember the national priority to lessen our dependence on foreign oil sources when we are faced with legislation which contemplates the dismantling of the DOE.

I have in my own State of Texas an excellent example of the DOE's effectiveness in reaching our national priority of lessening our oil dependence. Mr. George Mitchell is chairman and president of Mitchell Energy and Development Corp., the largest independent oil operator participating in a DOE program that provides incentives to recover additional hydrocarbons from old reservoirs by injecting fluids or gases into them, otherwise called enhanced recovery—an invaluable resource.

These Federal incentive programs which the DOE effectively implements, mean the difference between corporate profits and losses. We need centralized planning and long-range thinking in order to maintain these domestic profits.

I do not doubt that there are serious problems with the DOE, nonetheless, we must not take the position of throwing the baby out with the bath water.

Houston enjoys the reputation of having a flourishing economy where jobs are plentiful and economic opportunity is on the upswing. Houston's stable economy assures it of an even brighter future. The resources which promise these opportunities for Houston are the oil, gas, and petrochemical industries.

Mr. Mitchell must be accredited for an appreciable contribution to this affluence. Therefore, I offer this article as an illustration for my distinguished colleagues to consider:

LOCAL OIL MAN MITCHELL FEELS ENERGY DEPARTMENT SHOULD NOT BE SCRAPPED

(By James R. Pierobon)

Not every Texas oil man is rejoicing over the proposed elimination of the Department of Energy.

George P. Mitchell, chariman and president of Mitchell Energy & Development Corp., heeaquartered at the Woodlands north of Houston, strongly opposes President Reagan's campaign promise to do away with the $11 billion agency because he says the country and the industry need a way to coordinate national energy policy.

"We still need a focal point, some long-range thinking and some agency with the president's ear," Mitchell said.

"Congress needs someone to supply energy scenarios during the next 10 years. We still have to have centralized government planning and unified concepts to make the whole thing fit together."

Regan promised to surrender many of the DOE's responsibilities to the free market and appointed former South Carolina Gov. James B. Edwards as energy secretary to

assist in the first eradication of a Cabinet agency.

Abolishing the DOE, a pain in the neck for many Texas energy companies since its creation four years ago, would translate into federal budget savings of approximately $1.7 billion in fiscal 1982 which began Oct. 1. It is part of Reagan's bold effort to slash roughly $75 billion in federal spending and balance the budget by 1984.

Already, Edwards has terminated about 5,300 of the 20,000 DOE jobs.

Many Energy Department employees and programs will not be eliminated but simply transferred to other agencies and units of the federal government.

For instance, the building of atomic weapons, the strategic petroleum reserve and the DOE's sizable research function all will continue elsewhere, according to a spokeman for David Stockman, director of the Office of Management and Budget.

Connie Stuart, a press aide to Edwards, said the petroleum reserve probably is headed for the Interior Department; research may be routed to the National Science Foundation; and atomic weapons will end up probably in the hands of the Defense Department.

Mitchell, who has testified before congressional committees and served in an advisory capacity to governmental agencies, said if these responsibilities "filter through layers of another agency, we won't see the kinds of actions we need. They're not going to save that much money because they're going to scatter so many people and responsibilities to other departments. I think it's a mistake."

One of those "actions" would be a planned reaction to a cutoff of crude oil from the Middle East. That ever-present threat could become a reality if drastic acts, such as the assassination of Egypt's President Anwar Sadat Tuesday, were to spread to neighboring countries.

In the wake of the Sadat slaying, oil analysts said a new realignment of power in the Middle East would bode ill for the U.S. energy interests.

"We've still got 10 years to break OPEC's back," Mitchell said. "There's a good chance Saudi Arabia and the whole Mideast will go that way before 10 years are up.

"I think Reagan should use DOE simply to coordinate certain functions with as little constraint on the private sector. Yet we have to make it fit into the total economy. Energy is a very important cornerstone. It's one of the greatest causes of inflation worldwide the last seven years. This world oil glut is only temporary, too," Mitchell added.

In no uncertain terms, Mitchell considered a leading spokesman for independent oil and gas producers, feels that the Energy Department should be retained as is. He thinks 10,000 of the remaining 14,700 jobs can be eliminated, leaving the rest up to the private sector.

Unlike many Texas oil and gas companies, Mitchell has worked closely with DOE in the past and might have something to lose if the DOE is scrapped.

Mitchell Energy is the largest independent oil operator participating in a DOE program that provides incentives to recover additional hydrocarbons from old reservoirs by injecting fluids or gases into them, otherwise enhanced recovery.

In the past, Mitchell has said federal incentive programs can mean the difference between corporate profit and loss. He's gone to the federal well for funding on a smattering of other development efforts, including a $553,000 contribution in 1978 for a hydraulic fracture treatment for a gas well in Limestone County, Texas, and a $5.5 million grant for two projects tapping natural gas reserves in the Appalachians.

The DOE's Stuart said there is talk of reinstating the Energy Research and Development Administration as part of the reorganization. But it would be set up as a "less than Cabinet-level" agency.

ERDA was created by former President Nixon in 1974 and abolished in 1976 by former President Ford.

The legislation to formally abolish DOE won't go to Congress until late November or early December, Stuart said. Congress then is expected to take about five months to debate the issue and vote.●

FOOD STAMP BLOCK GRANT PROGRAM FOR PUERTO RICO

HON. JIM MATTOX

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MATTOX. Mr. Speaker, Tuesday I presented a statement of opposition to the proposal to make a block grant to the government of the Commonwealth of Puerto Rico in lieu of food stamp program participation by island residents. At that time I suggested the local government, instead of issuing stamps redeemable for foodstuffs, as the program is intended to do, might simply send checks to recipients.

A number of Members have since commented to me on that possibility, none favorably. While ignoring the basic intent of such a block grant and the primary purpose of the entire program so blatantly might seem hypothetical and even farfetched, I have been informed that that is precisely what is being considered by commonwealth officials.

I do not oppose the block grant approach, per se. A good argument could be made that local government should be allowed to formulate a local food stamp program to assist its needy individuals according to local economic standards. However, turning what is basically a program to enhance nutrition into one that is merely a money welfare handout is quite another matter. I believe there are very few Members who would not strongly oppose such an idea.

It is my understanding that the block-grant proposal includes requirements that any locally devised program for Puerto Rico be approved by the Secretary of Agriculture. I think it only prudent that Congress be clearly on record as advising the Secretary that it is the intent of Congress that those grant funds be expended only in accordance with the basic principles of the food stamp program. Anything less would be a travesty and leave Congress and the administration open to justified criticism. Thank you.●

PACIFIC HOSPITAL OF LONG BEACH—THE FIRST 25 YEARS

HON. GLENN M. ANDERSON

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. ANDERSON. Mr. Speaker, this year the Pacific Hospital of Long Beach marks 25 years of providing quality health care, community service, and civic involvement to the city and people of Long Beach, Calif.

The hospital recently celebrated this auspicious occasion with a silver jamboree, and many of those in attendance were present 25 years ago when the hospital opened. They were joined by physicians, staff, volunteers, board members, and friends of the hospital to commemorate the years of special caring and compassion that is embodied in the people who work at Pacific Hospital of Long Beach.

To further highlight the importance of this 25th anniversary, the hospital's foundation is sponsoring a "Halloween happening," which will take place this Saturday, October 24.

Because this event is such an exceptional experience for the many who both work and receive care at Pacific Hospital, I would like to take just a few minutes of my colleagues' time, Mr. Speaker, in order to chronicle the history and nature of Pacific Hospital of Long Beach.

The Pacific Hospital of Long Beach is a modern, 208 bed community nonprofit hospital, providing medical, surgical, and ancillary services for both inpatients and outpatients. The hospital's specialties include opthalmology, geriatric care, and rehabilitation therapy. Their history of care to the community stretches back to 1932, when a group of civic minded citizens and dedicated doctors banded together for the creation of the Pacific Clinic Hospital, the present hospital's forerunner. The next addition came soon after, when Magnolia Hospital entered the fold in 1934. In 1944, Los Cerritos Maternity Hospital was acquired, and care to future mothers was expanded. Because of the growing need for additional facilities, a formal, nonprofit corporation was formed the following year, and its duties were to provide for the planning and expansion of what is today called the Pacific Hospital of Long Beach. That dream was realized in 1956, when the present hospital opened. At that time it had a 92 bed capacity, but the city of Long Beach, recognizing the need for an ever larger hospital to cope with the huge population increase in the post World War II era, funded construction of a 96 bed addition which became operational in 1961.

Pacific Hospital's pride in its accomplishment is evidenced by the com-

ments of Dr. Maurice Ikenberry, president of the hospital's board of directors.

Pacific Hospital has always demonstrated a quest for excellence in patient care. No effort has been spared to provide the most modern equipment required by physicians and employees for the diagnosis and treatment of illness.

Such words ring true—the hospital added its west wing as recently as June of 1978. While no beds were added, Pacific Hospital's Intensive Care Unit has three eight-bed modules providing the most up-to-date equipment available, as well as one of the finest laboratories in the city. Chief of staff, Dr. Fred Seligman has pointed out—

Our progress will not stop with the completion of the West Wing * * * we will continue to strive for the finest personnel and equipment to meet the needs of the community.

Other members of the hospital's administrative staff echo his sentiments. William G. Hayter, chairman of the hospital's foundation said:

Pacific Hospital of Long Beach has taken an active role in holistic health, community service, and education. The quarterly eye forums, which are sponsored by the foundation are presented free of charge to the general public. These forums feature prominent opthalmologists speaking on diseases of the eye and their treatment.

In addition to the eye forums, Mr. Speaker, Pacific Hospital conducts periodic diabetes workshops at which the causes and treatment of diabetes are discussed and suggestions for everyday life as a diabetic are reviewed. Free glaucoma screening is offered on alternate Wednesdays of each month, with physicians donating their time and skills, and guild members staffing the clinic. All other costs are met as a community service by the Pacific Hospital of Long Beach.

Rehabilitation therapy also plays a large role at the hospital. The physical medicine and occupational therapy departments were recently expanded, emphasizing the hospital's awareness of this therapy as an important facet of health care. The united stroke program, whose purpose is to aid in the resocialization of stroke victims and their families, meets weekly at the hospital. Trained volunteers lead these groups and encourage participants to share mutual concerns with each other. The support of others who have experienced a stroke aids greatly in the recovery process.

So, Mr. Speaker, all that the Pacific Hospital has been, and is, will be honored at the Halloween happening. According to Ron J. Huddleston, executive director of the foundation—

The funds generated through this event will assist the foundation in their continuing efforts to provide needed medical equipment for the hospital. The interest and dedication of the members of the foundation's board of trustees is an integral factor and a necessary part of the future. The foundation is fortunate to have this caliber of trustees involved and actively serving the needs of the organization.

In conclusion Mr. Speaker, let me say that my wife, Lee, and I agree with these comments wholeheartedly. We congratulate all associated with the Pacific Hospital of Long Beach on this most joyous occasion, and endorse most strongly the words of Pacific Hospital's administrator, Charles E. Johnston, when he says:

The hospital's accomplishments and achievements continue to grow. I am looking forward with enthusiasm to being a part of the next 25 years.

We look forward to sharing the next decades with them as well.●

A TRIBUTE TO FATHER JOHN G. BERRIS

HON. NORMAN Y. MINETA

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. MINETA. Mr. Speaker, it gives me great pleasure to rise today on behalf of Congressman DON EDWARDS and myself to salute Father John G. Berris, who is retiring as the pastor of St. Nicholas Greek Orthodox Church after serving in our community for the past 14 years. On November 7, 1981, his congregation will be honoring him with a testimonial dinner to demonstrate their deep esteem and love.

We have known Father Berris for many years and have always appreciated his friendship, care, and concern for all people. He was born in Connecticut in 1918 and was ordained as a deacon on September 27, 1944, and as a priest on October 8, 1944. His first parish was in Vandergrift, Pa., and he distinguished himself with his involvement in the war relief fund and other civic affairs.

In 1946, Father Berris was assigned to a pastorate in Steubenville, Ohio, where he served for 12 years. He was the first pastor of the Holy Cross Parish, and under his leadership and guidance the church building and community center were purchased and developed. During his years in Ohio he became very active at the district level of the church. He was a founder of the Tri-State Greek Orthodox Clergy and served as its president for three consecutive terms. He was also a founder of the Tri-State Choir Federation and of the Tri-State Philoptochos Federation in 1947.

Under the direction of his archbishop, Father Berris helped to establish parishes in West Virginia and Ohio and was instrumental in establishing a new diocese for the area with headquarters in Pittsburgh, Pa. He was also instrumental in organizing the first pan-orthodox fellowship and the first Anglican Episcopal and Orthodox fellowship.

During this period, he was selected to be one of the original nine delegates of the Greek Orthodox Church to the American Council of Churches.

In 1959, Father Berris moved to St. John the Divine Parish in Jacksonville, Fla., where he worked to establish mission parishes in Georgia and Florida. He also organized the Greek Orthodox chaplaincees at both Florida State University and the University of Florida. He developed radio and television broadcasts to communicate with his parishioners and involved himself and his congregation in community, interfaith and cultural activities.

In August of 1962, Father Berris moved to Salt Lake City, Utah, and served most of the State of Utah and parts of Nevada, Idaho, and Wyoming for 5 years. He was a founder and a regular participant in the interfaith forum and held memberships on the Governor's advisory committee, the State mental health and geriatrics committees, and on the State juvenile council.

His last congregation has been at St. Nicholas in San Jose, where he has been since 1967. During his pastorate, the parish educational building was constructed, the church administrative offices were relocated, and numerous improvements were made to the church facilities. His achievements here have included the establishment of a mission parish in Santa Cruz, creation of the annual Greek Letters Day ceremonies at the San Jose City Hall, sponsorship of the annual Greek Independence Day activities to include civic leaders, and service as a chaplain to the Veterans' Administration hospital. In addition, Father Berris was the motivating force behind the establishment and operation of the annual St. Nicholas religious, cultural, and food festival.

While in San Jose, he was elected by the priests of the diocese as their representative to the archdiocese prysbeters council where he served two terms. He has also served as a director of the St. Nicholas Boys Home since its formation 10 years ago. The home has expanded and now has three halfway house facilities to tend to the needs of troubled boys and girls.

Father Berris has been recognized on the national level for his knowledge of and interest in Greek American affairs. For example, he was one of 160 Greek Americans who were invited to the White House to meet with former President Jimmy Carter to discuss the Turkish arms embargo and the invasion of Cyprus.

Mr. Speaker, Mr. EDWARDS and I ask you to join us and all our colleagues in the House of Representatives to join St. Nicholas Greek Orthodox Church in paying tribute to an outstanding member of the clergy and our community.●

OVERTIME PAY FOR INSPECTORS

HON. BILL FRENZEL

OF MINNESOTA

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. FRENZEL. Mr. Speaker, today I am introducing, for discussion purposes, H.R. 4820, a bill that incorporates certain changes recommended by the administration with respect to rates of overtime pay for inspectors and other U.S. Customs Service personnel and the reimbursement of overtime expenses by commercial users.

I commend the administration for its efforts to begin the restructure of the overtime system for the Customs Service in order to eliminate abuses and to conform the current system to normal Government practice. The administration's proposal also provides for reimbursement of overtime costs by commercial users who require custom's services during holidays, Sundays, or overtime periods. This reimbursement would not apply, as is the case under current law, to overtime services provided at land border crossings.

Basically, the bill would reduce from double time to time-and-a-half the basic rate of compensation for overtime with a minimum 2-hour callout rather than a block payment of 4 hours for each 2-hour period or fraction thereof lasting at least 1 hour. On Sundays the rate also would be time-and-a-half unless Sunday was part of a regular work shift in which case a 25-percent premium would apply instead. Double time would be paid for holidays. No person could have total overtime earnings in excess of the maximum GS-15 salary, rather than the current maximum hourly rate of GS-10, step 1.

The extensive use of overtime by the U.S. Customs Service has been a subject of concern to the Congress for a number of years. The Ways and Means Committee continuously reviews overtime expenditures and reimbursement, and has encouraged Customs to further reduce overtime and provide more efficient delivery of services. In addition, for the past 3 years, Congress has imposed a cap on yearly overtime payments for individual customs officers; the cap for fiscal year 1982 will be $25,000.

However, in my view, overtime costs remain excessive and a continuing high level of overtime hours contributes to abnormal working conditions where customs officers have little time for personal lives and where their salaries can far exceed the GS level for which they are hired. In addition, excessive overtime has in the past led to outright abuse resulting, through less-than-responsible scheduling, in maximum overtime payments for minimum hours worked. Other abuses include overcharges to users who otherwise would divide the cost of overtime services.

I believe Customs Service personnel ought to be paid overtime premiums for extra, disruptive assignments. Until we have complete hearings, I do not know exactly what is appropriate, but it is obvious that the current system needs overhaul.

The unique mandate of the Customs Service requires a greater use of overtime than most other Government agencies. Inspectional services and other clearance procedures are controlled to some degree by carrier requests and by transportation timetables set independently of the Customs Service. However, a number of steps can be taken to reduce the amount of overtime such as improved scheduling, the use of part-time employees, and the elimination of abuses in the assignment and authorization of overtime.

The bill I am introducing today will, I hope, serve as a discussion draft of the needed legislated changes on overtime rates and reimbursement requirements that should go hand in hand with continued management efforts to improve the overtime structure. I hope the administration, the Congress, and the Customs Service can work together to obtain a legislative package that will assure the most efficient operation of this important agency.●

REAGAN SHOULD ACT ON ULSTER

HON. EDWARD J. DERWINSKI

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Mr. DERWINSKI. Mr. Speaker, a tragedy which has long frustrated many Americans is the ongoing strife in Northern Ireland. Does this merely represent an internal British problem or does it have obvious international implications? I believe the latter is the case.

Therefore, I was especially interested in a recent article in the Chicago Tribune's editorial section on Monday, October 5, by the resident Washington correspondent, Mike Kilian. The article follows:

REAGAN SHOULD ACT ON ULSTER

(By Mike Kilian)

WASHINGTON.—If Ronald Reagan would only act, the United States could accomplish a great deal just now toward ending the strife in Northern Ireland.

Margaret Thatcher's smug intransigence on the problem has paralyzed only her own government. Events are now moving despite her, and—for the first time in months—in a positive direction.

The Irish Republican Army hunger strike, which embroiled Belfast and other Ulster cities in successive rounds of violence all this summer, is over. James Boswell once jotted in a notebook: "Saw three men hanged. Effect diminished as each went." The same has happened with Long Kesh H Block men.

When hunger striker Bobby Sand died, Northern Ireland seemed ready to tear itself apart. The Catholic community, bitterly frustrated by near catastrophic unemployment and Mrs. Thatcher's refusal to do anything about Ulster but fly the British flag, exploded.

Murder and mayhem ran through the streets, and attracted the world's press. At one point, ABC News had seven television camera crews in Northern Ireland. Sympathy for the hunger strikers reached record levels, in Ulster, in the Irish Republic, and in the United States. Though imprisoned, hunger strikers were elected to both the British and Irish parliaments. Contributions to IRA front groups in America doubled.

Yet, with each succeeding death, the violent response was a little less, the news coverage less, and sympathy less. Ten men died, but seven took themselves off the strike or were taken off by their families. Another six were still on the strike, in relatively early stages, but even if they had stuck it out until the end, it would not be the same. Too many people have come to see the IRA as criminals and as intransigent and thickheaded as Mrs. Thatcher.

The British Prime Minister will of course hail the end of the hunger strike as a great victory, and now will do nothing, as has been her policy. But it won't be the same for her this time, either.

The British Labor Party made history last week by breaking ranks with the country's long-standing united front on Northern Ireland. By an overwhelming vote, Labor come out in support of British withdrawal from Ulster and reunification of the Irish island.

Mrs. Thatcher may face strong opposition on her Ulster policy from within her own party. Senior British foreign service officers have for some time felt that Britain's goal in Northern Ireland should be extrication, not a permanently flying flag. Many in Britain's business community feel the same.

In a cabinet reshuffle, Mrs. Thatcher dumped her useless Northern Ireland secretary, Humphrey Atkins, and replaced him with her employment minister, James Prior. The apparent motive was to get Prior, who opposed her failing fiscal policies, out of her economic way.

But the result may be a movement toward a new initiative in Ireland. Prior is a strong politician with a powerful base of his own in Mrs. Thatcher's Conservative Party. On a recent visit to Washington, Prior made it clear that he views Northern Ireland as separate and distinct from the rest of the United Kingdom.

In the Irish Republic, Dr. Garret FitzGerald, the new prime minister, made some history himself in a Dublin radio interview in which he took his Catholic countrymen to task for making Ireland so inhospitable to the million Protestants in the North whose acquiescence is needed for unification to succeed. He suggested major changes in Irish custom and law in what amounted to a call for separation of church and state.

All of this is plowing fertile ground. If Reagan would act, if he would pick up his telephone and call his friend and ideological partner Maggie, if he would tell her that the United States insists that London-Dublin talks on Northern Ireland resume and that Britain declare its goal one of

being out of Ulster, greater events could be set in motion.

If he would set about an American aid program to relieve the joblessness that is so much at the heart of the Irish troubles, he would accomplish a great deal of good as well.

Unemployment in Northern Ireland is now 20 per cent. In its Catholic community, it's now 50 per cent. Good grief, we've resumed aid to Argentina. Why can't Reagan help this poor little province with 1.5 million people? Some 40 per cent of our population has roots there.

Reagan may be brave at taking an assassin's bullet, but is he that afraid of "the Iron Lady?" Does he fear offending that woman so much that he's willing to let the misery over there go on and on?

Or is it something else? Is it that, like Mrs. Thatcher, he just doesn't care about human misery or suffering?●

NATIONAL BUSINESS WOMEN'S WEEK

HON. GERALDINE A. FERRARO

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Thursday, October 22, 1981

● Ms. FERRARO. Mr. Speaker, business and professional women have made tremendous strides in their respective fields during the past 15 years in improving the status of women in the work force. It is fitting that these achievements are highlighted during this third week in October which the President has declared as National Business Women's Week. But it is also important to reflect on the task that remains ahead to insure greater opportunities for women to become more visible in positions of leadership.

The time is past for us to just expend our energies in getting women hired primarily to satisfy the advocates of tokenism. In the wake of picking up the gauntlet to attack the budget cutbacks and the unemployed status of millions of our fellow Americans, our survival will depend largely upon the coordinated effort of talented individuals whose gender will be little or no consequence in view of the quality of commitment and level of competence they will bring to address the complex social, economic, and political problems that hang like albatrosses around our necks.

Time does not allow us the luxury of engaging in moot arguments which focus on the traditional status and role of women accompanied by a yearning to return to that halcyon period. We have a cadre of professional women waiting in the wings, bursting with energy and creativity, asking to be given an opportunity to assume their share of the responsibility in making the system work for all. We cannot afford to defer their dreams. Let us as a body affirm the contributions that have been made by women in the economic, civic, legislative, and cultural advancement of our Nation and renew our determination to increase our efforts toward eliminating the disparities in salaries, career opportunities, and advancement that will accord them the full equality they so richly deserve.●

SENATE—*Friday, October 23, 1981*

(Legislative day of Wednesday, October 14, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable JOHN W. WARNER, a Senator from the State of Virginia.

PRAYER

The Reverend Robert S. Strain, associate in the Prayer Breakfast Fellowship, Washington, D.C., offered the following prayer:

Good morning. Let us be silent for just a moment to acknowledge God's presence and to sense His spirit here.

Lord—Almighty God—hear our prayers as we meet today. So many matters are pressing, and demands made on all sides. Our request is that Your spirit will be a sanctuary to us now, with love, joy, and peace calming us through the day. Let our minds know true knowledge, and on every issue before us give someone among us a word of instruction that will keep our hearts on the right path.

Your providence has made us one Nation, under God, with liberty and justice for all. We are grateful, and again today we thank You for preserving us. You have kept us a free people, and through this Republic have fostered the hope of freedom in many lands. With patriots everywhere we remember those who denied themselves in their day to win the liberty we defend in ours. May all see that God is the strong defender who takes the case of those who won His cause.

With fearful regard for Jesus Christ, who said that *Whoever exalts himself will be humbled, and whoever humbles himself will be exalted* (Matthew 13:12), we ask in His name that Your grace, mercy, and peace prevail in this place. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., October 23, 1981.

To the Senate:

Under the provisions of Rule I, Section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable JOHN W. WARNER, a Senator from the State of Virginia, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. WARNER thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. The majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

THE IMPORTANT AWACS VOTE

Mr. BAKER. Mr. President, with the important AWACS vote less than a week away, I call to my colleagues' attention to an article which appeared in the October 18, 1981 edition of the New York Times.

The story consolidates valuable facts in a most useful manner, as evidenced by this paragraph:

Unlike the Shah, the ruling family in Saudi Arabia was not installed by a foreign power. There is little poverty, no all-pervasive secret police, no traditional political opposition, no Moslem clergy bent on meddling in politics. And Saudi Arabia has already had its Islamic revolution—it happened in the 18th century.

Mr. President, I ask unanimous consent that this article be printed in its entirety in the RECORD.

There being no objection, the article was ordered to be printed in the RECORD, as follows:

SAUDIS UNDER PRESSURE: A SPECTER OF INSTABILITY?

(By Thomas L. Friedman)

CAIRO, Oct. 17.—At his news conference on Oct. 1, President Reagan vowed that the United States would never permit Saudi Arabia "to be an Iran."

The warning was a graphic one, conjuring up the specter of virulent anti-Americanism, religious fanaticism and political strife. The President seemed to be saying that the United States would be able to control such turmoil in Saudi Arabia.

The question of the desert kingdom's stability is central to the debate over whether the United States should sell the Saudis AWACS surveillance planes. If the Saudi royal family was forced from power as happened to the Shah in Iran, the AWACS might fall into hostile hands.

Arab affairs specialists interviewed in the United States, London and the Middle East contend that there is no reason to doubt that the Saudi royal family can deal effectively with internal and external challenges for the immediate future.

LONG-TERM DANGERS SEEN

In the long term, however, they argue that a variety of changes are at work that could produce either severe domestic unrest or a fundamental change in the political outlook of the regime.

Most important, they feel the United States has no real way of intervening effectively if Saudi Arabia is threatened internally. The Rapid Deployment Force, they say, is geared almost entirely to protecting Saudi Arabia from the threat of invasion by the Soviet Union or one of its allies. The force would probably prove useless against domestic subversion, according to the specialists.

Unlike the Shah, the ruling family in Saudi Arabia was not installed by a foreign power. There is little poverty, no all-pervasive secret police, no traditional political opposition, no Moslem clergy bent on meddling in politics. And Saudi Arabia has already had its Islamic revolution—it happened in the 18th century.

Yet the experts contend that Saudi Arabia, though not an Iran, could be swept by instability capable of fostering violent change and a prolonged cutoff in oil production.

A MASSIVE SOCIAL TRANSFORMATION

"The potential sources for destabilization in Saudi Arabia grow out of the fact that Saudi society is undergoing a massive social transformation in a very short time," said Nadav Safran, a professor of government at Harvard University.

Professor Safran, who is completing a major study on the desert kingdom, said the Saudi Government assumed that such a transformation was possible without undermining the country's stability.

"That assumption flies in the face of all the evidence of history," Mr. Safran said. "No society has gone through that kind of transformation without an upheaval. But the historical record also shows that such an upheaval can take generations to materialize. Saudi Arabia can go on for 10 to 15 years without problems and it can blow up tomorrow."

The roots of Saudi Arabia's political system lie in a delicate alliance formed in 1730 between a Moslem fundamentalist preacher, Mohammed ibn Abdul Wahab, and a charismatic Bedouin tribesman, Emir Mohammed ibn Saud. Ibn Saud provided the sword and Abdul Wahab the ideology as the two attempted to subdue the warring tribes of the Arabian desert.

Ibn Saud's direct descendant—Abdul Aziz ibn Saud—completed this task nearly 50 years ago "by the will of Allah and the strength of his right hand." After consolidating his tribe's grip over the entire Arabian Peninsula, he forged a modern nation named after his family and guided by the austere Islamic principles of Abdul Wahab.

STRAINS OF RAPID MODERNIZATION

Since then, the alliance between the various tribes, the Saud family and the Islamic leadership has formed the foundation of the Saudi nation. But that foundation is now sagging under the strains of rapid modernization, oil wealth and a flood of imported values and ideas. The rapid pace of development has given birth to new social groups—administrators, skilled laborers, army officers and professionals—that are not part of either the religious hierarchy, the ruling family or the tribal order.

"Modernization has lured young Bedouins from the desert to the city, weakening the tribal structure," said Gary Samore, a research associate at the Harvard University Center for Science and International Affairs. "The ruling family is being challenged from two sides: the new classes calling for the creation of political parties and participatory government and the old classes calling for the regime to slow down and tighten the grip of Islamic and tribal institutions."

The royal family is made up of 4,000 to 5,000 princes who are interspersed throughout the bureaucracy. Abdul Aziz alone had more than 40 wives and 36 surviving sons, who make up the current inner circle of the Saudi royal family. They are divided into cliques that reflect not only bloodlines—sons of the same mother tend to form political units—but also political outlook.

King Khaled, the ailing, 69-year-old monarch, nominally rules the country while

Crown Prince Fahd, 60, the heir apparent, acts as chief executive.

"MODERNISTS" AND "TRADITIONALISTS"

Crown Prince Fahd leads the "modernist" wing of the royal family while Prince Abdullah, commander of the National Guard and the number three man in the hierarchy, heads the more "traditionalist" branch.

With the family leadership so large, it is widely believed that a random assassination would not change the immediate course of Saudi history.

But what the system cannot take, experts on Saudi Arabia say, is an irreconcilable division in the family, brought on by the stresses.

The kinds of pressure that can arise were reflected in the takeover of the Great Mosque of Mecca in November 1979 by orthodox Moslem tribesmen intent on curbing Westernization in the Saudi regime. Crown Prince Fahd responded by promising a greater say for all groups in the country's affairs, through the creation of a constitution and a popular assembly. But traditional elements in the ruling family blocked their formation, according to specialists on Saudi Arabia.

The prospect of an interfamily feud becomes all the more frightening, added Mr. Samore, because of the new tools available to opposing groups. Princes now have ministries, and in some cases army units, that they exploit as power bases. Prince Abdullah, for instance, controls the tribal-supported National Guard, while Prince Sultan, his half-brother and rival for the throne, controls the regular army.

"It is easily possible to imagine either a failed palace coup leading to a civil war or disaffected princes and commoners joining together in search of change," Mr. Samore said.

But Herman F. Eilts, former United States Ambassador to Saudi Arabia, disagrees. "If there is one thing I learned during my stay in Saudi Arabia it's that there is a tremendous amount of resilience in the royal family," said Mr. Eilts.

Although the family has a major interest in sticking together, this has not prevented damaging internecine conflicts in the past.

In August 1962, for instance, three discontented senior princes defected to Egypt, from where they launched a propaganda campaign against their brothers. They complained of the Saudi regime's close ties to the United States and called for the establishment of constitutional monarchy.

FEW SUPPORT "FREE PRINCES"

Few Saudis rushed to support the "free princes," as they called themselves, and they eventually returned to the fold. That might not be the case in the future. Saudis who studied in the West and returned to find themselves running a system over which they had no say might provide a powerful base of support for an antimonarchist Arab nationalist coalition.

"They are not seething with discontent, nor are they deeply alienated," a Saudi affairs specialist said. "But they don't appear to be deeply loyal either."

There is, however, one group that could force change on its own—the army.

The Saudi armed forces, with 67,000 members, are divided up into four very distinct units—the regular army, the national guard, the air force and the navy. As a fighting unit, the Saudi Army is currently on the level of the Egyptian Army before the 1967 war with Israel, according to military experts familiar with Arab forces.

USUAL GRUMBLING IN SAUDI ARMY

There is the usual amount of grumbling in the Saudi Army about the political leadership, but no more than in the force of any other third world country, said Anthony Cordesman, a fellow of the Wilson Center, who spent several years working for the Defense Department in the Persian Gulf.

"Saudi soldiers are recruited in their teens and their whole life is oriented to becoming professional soldiers," Mr. Cordesman said. "If they get the impression that the United States would give preference to Israel's security needs to the point of denying Saudi Arabia the weapons required for its defense, or if it perceives that mounting corruption and waste would prevent them from becoming a truly professional force, they could become very dangerous."

Having watched Arab kings in Iraq, Libya, Egypt and Yemen fall victim to military coups, the Saudi ruling family has built many safeguards into its military system.

For example, the only force stationed in the capital is the Royal Guard—a 1,000-man unit distinguished by its loyalty to the monarchy. The regular army is based in four military cities—all of them outside major urban areas: Kharj, 60 miles south of Riyadh, Tobuk near the border with Israel, Batin near Iraq and Khamis Mushait close to North Yemen. Thus, if an army unit were to move against civilian centers, there would be plenty of warning time.

SAFEGUARDS IN THE ARMED FORCES

The training and recruitment of soldiers is structured to mix age, ethnic and regional groups, making it difficult for like-minded leaders to coalesce as they did in the Egyptian and Syrian Armies.

In addition, each unit is able to counter a threat from the other: the air force has the jets, but the army has the ground-to-air missiles. The army has the tanks, but the national guard, the main internal security force, is equiped with antitank weapons.

Some analysts argue that the most devastating threat to American interests in the Middle East could come not from a change in the Saudi regime—either by internal or external means—but from a change in policy by the present ruling family.

"In the Arab world, considerations of political survival swamp all other considerations of policy," said a Middle Eastern specialist in the United States. "We have a signal with the assassination in Egypt: those who are associated with the United States get killed. Sadat is dead. Qadhafi is alive. It is entirely possible the Saudis could see their own political survival wrapped up in distancing themselves from the United States."

Some might argue that the Saudis are too tied to the West to change directions. But even slight policy shifts by such an important country could have a global impact. A reduction of just 2 million barrels a day in Saudi Arabia's oil production could at times spell the difference between worldwide glut and shortage.

"Sometimes," an Arab affairs specialist said, "it's the marginal decisions that make all the difference."

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, under the previous order, at 11 o'clock the Senate will proceed to the consideration of S. 1503, the Standby Petroleum Allocation Act, for 1 hour under a time agreement. It is the intention of the leadership that at the expiration of that hour, at approximately 12 noon, to ask the Senate to turn to the consideration of H.R. 4035, the Interior appropriations bill.

I expect that opening statements, beginning debate, perhaps the disposition of amendments that may be done without rollcall votes, will be dealt with today.

Mr. President, I do not anticipate asking the Senate to remain in session late today in view of the very late hour of the session yesterday in order that the Senate could complete action on the foreign assistance bill.

ORDER FOR RECESS UNTIL MONDAY, OCTOBER 26, 1981, AT 10 A.M.

Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 10 a.m. on Monday.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I have no further requirement for my time under the standing order. I am prepared to yield to any Senator or yield the remainder of my time to the control of the distinguished minority leader.

Mr ROBERT C. BYRD. Mr. President, I thank the majority leader. I accept his offer. If he should have need for some of the time back, I will yield it back.

Mr. BAKER. Mr. President, I yield the remainder of my time under the standing order to the minority leader.

RECOGNITION OF THE MINORITY LEADER

The ACTING PRESIDENT pro tempore. The minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Wisconsin.

THE GENOCIDE CONVENTION AND THE WORLD COURT

Mr. PROXMIRE. Mr. President, the Liberty Lobby's White Paper on the Genocide Convention alleges that:

> Ratification of the Genocide Convention would have the unfortunate but certain side-effect of repealing the Connally Reservation, six key words inserted into the resolution accepting the jurisdiction of the World Court in 1946. . . . Without them, the World Court would make its own determination of what is to be deemed domestic and foreign matters, subjecting American citizens to the jurisdiction of aliens.

Mr. President, I can well understand how any American who is not an expert in international law would find such an allegation frightening. Unfortunately, the allegation represents a lack of understanding of the treaty, a lack of understanding of the "Connally Reservation" and an abysmal lack of knowledge of existing United States treaty practice.

WHAT DOES THE GENOCIDE CONVENTION SAY?

Mr. President, first, let me turn to the actual wording of the Genocide Convention.

Article IX of the Genocide Convention provides that:

> Disputes between the Contracting Parties relating to the interpretation, application or fulfillment of the present Convention, including those relating to the responsibility of a State for genocide or for any of the other

acts enumerated in Article III, shall be submitted to the International Court of Justice at the request of any of the parties to the dispute.

Does this mean that another nation can haul Americans before the World Court or any foreign court? Absolutely not.

The language refers to disputes "between the Contracting Parties". In plain English that means disputes between nations which have signed and ratified the Genocide Convention. Not foreign nations and U.S. citizens.

In addition, the understanding recommended by the Foreign Relations Committee makes it clear that the United States reserves the right to see that all Americans—all Americans—charged with genocide are tried before American courts with every constitutional guarantee, and the proposed implementing legislation directs the Secretary of State to see that any extradition treaties that we consider in the future say just that.

THE UNITED STATES AND THE WORLD COURT

But that is just the beginning, Mr. President. You may ask "C'mon, PROXMIRE, that article may not result in Americans going before foreign Courts but it certainly violates our sovereignty by letting the World Court meddle in our affairs."

That is a fair question, Mr. President, but let us look at the record.

During the Foreign Relations Committee hearings on the Genocide Convention in 1970, the committee examined this question very carefully. And what did they find?

They found that language providing for the referral of disputes to the World Court—the language of article IX to which the Liberty Lobby objects—was already contained in 27 multilateral treaties, 2 bilateral treaties and 19 commercial treaties.

That is 48 treaties, Mr. President, which are on the books in which the United States has agreed to referral of disputes to the World Court.

Has this diminished our sovereignty in any way? Of course not.

Has the Liberty Lobby or any other group been able to cite one case, just one, in which this language has hurt U.S. sovereignty in any way? Absolutely not.

This record is important, Mr. President, because it clearly demonstrates that this language providing for referrals of treaty disputes to the World Court is accepted American practice, ratified time and again, by the Senate and it has never hurt American interests.

For that reason, Mr. President, I ask unanimous consent that a list of these treaties be reprinted in the RECORD at the conclusion of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered. (See exhibit 1.)

"RECIPROCITY"—A SAFEGUARD AGAINST COMMUNIST TREACHERY

Mr. PROXMIRE. But perhaps genocide is different, Mr. President. Even though the record is clear that the language providing for the referral of disputes to the World Court has never harmed American interests, it is fair to ask whether unfounded allegations of American genocide might permit the Soviet Union and its allies an attempt to embarrass the United States.

The answer is loud and clear: No way.

No Communist state can ever haul the United States before the World Court on charges of genocide. Why? Because of the principle of "reciprocity."

What the Liberty Lobby's white paper conveniently omits is the principle of reciprocity. This is a solid principle of international law which states that if any nation—in this case, the Soviet Union and its allies—ratifies any convention with a reservation, we have the right to use that reservation against them in any dispute we have with them.

The Soviet Union and its allies have all ratified the Genocide Convention with a reservation stating that they will decide for themselves what cases they will permit to go to the World Court. While the Liberty Lobby is all too quick to praise the willingness of Soviet diplomats and degrade our own American diplomats, they have missed the significance of this Communist action. By establishing that reservation, the Communist nations have automatically provided us with the right to invoke the Communist reservation in any attempt they might make to bring the United States before the World Court under this treaty. The Communist diplomats have outsmarted themselves and have tied their own hands in any attempt to embarrass America.

Mr. President, it is time for groups such as Liberty Lobby to stop giving Communist diplomats credit where it is not deserved.

THE CONNALLY RESERVATION

Mr. President, I have attempted to show that first, the language of this Convention is language which the U.S. Senate has approved in at least 48 treaties; second, that there has never been a case cited in which this language has harmed U.S. sovereignty or security in any way; and third, that the reservations invoked by the Soviet Union and its allies have given us the very weapon, through the doctrine of reciprocity, to prevent Communist nations from attempting political grandstanding against us.

Finally, I would like to turn to the Connally reservation, which was my starting point for this discussion.

When the statute for the World Court was drafted, it contained two ways in which cases could come before the Court.

The first is contained in article 36(1) of the Court's statute and it provides for the World Court to decide "all cases which the Parties refer to it and all matters specifically provided for in the Charter of the United Nations or in treaties and conventions in force".

That is precisely the case which applies to the Genocide Convention.

The second way that cases can come to the Court is under article 36(2) of its statute—the so-called compulsory jurisdiction statute. In effect, this article provides that a nation may accept the jurisdiction of the court as compulsory "in relation to any other state accepting the same obligation" in all legal disputes concerning interpretation of a treaty, a question of international law, breaches of international obligations and reparations for a breach of international obligations.

In giving its advice and consent to that second paragraph of article 36, the Senate provided that compulsory jurisdiction of the Court—the four cases I have just cited—would not apply to matters within the United States' domestic jurisdiction—and here are the six words of the amendment offered by Senator Tom Connally—"as determined by the United States."

There are two points that I want to emphasize here, Mr. President.

First, the reason that the Genocide Convention falls under article 36(1) is that the Genocide Convention specifically provides for referral of international disputes to the World Court and that is exactly the case we have here. Article 36(2) to which the Connally reservation applies refers to interpretation of international treaties for which no mechanism of interpretation is provided.

Therefore, the mere mention of the Connally reservation is entirely misleading and that is a conclusion shared by the State Department in their testimony as well as our own Foreign Relations Committee in their reports on the Genocide Convention.

It is their considered opinion, shared by the overwhelming majority of international law scholars, that allegations such as the one Liberty Lobby is making is mixing apples and oranges.

Second, as I have demonstrated earlier, this language providing for the referral of disputes to the World Court has been used time and again without undermining our sovereignty one iota.

IN CONCLUSION

Mr. President, the Genocide Convention is a treaty which seeks to extend to other nations a fundamental principle which is as American as apple pie: the right to live. The dignity of man is the guiding inspiration of all of our great American documents—the Declaration of Independence, the Constitution, the Bill of Rights—and it is a principle I am not afraid to share with the world.

For far too long, organizations such as Liberty Lobby have misled Americans by telling them of the great wisdom of the Soviet diplomats and their supporters, but, as I have clearly shown with the principle of reciprocity, here is one case where the Communists have hoisted themselves on their own petard. Why is there not one word about that in the Liberty Lobby White Paper? Not one word. All we read is how Americans are fools easily duped. I have greater faith than that in the American people and know that they will not long be misled by sophistry when the facts are made available to them on how this treaty is in their interest.

Mr. President, I yield the floor.

EXHIBIT 1

TREATIES AND OTHER INTERNATIONAL AGREEMENTS OF THE UNITED STATES CONTAINING PROVISIONS FOR SUBMISSION OF DISPUTES TO THE INTERNATIONAL COURT OF JUSTICE, AS OF MAY 22, 1970

I. MULTILATERAL

Protocol on military obligations in certain cases of double nationality, concluded at The Hague, April 12, 1930: 50 Stat. 1317; TS 913.[1]

Convention for limiting the manufacture and regulation of narcotic drugs, concluded at Geneva, July 13, 1931: 48 Stat. 1543; TS 863.[1]

Convention on international civil aviation (ICAO), opened for signature at Chicago December 7, 1944: 61 Stat. 1180; TIAS 1591.[2]

Constitution of the Food and Agriculture Organization of the United Nations (FAO), signed at Quebec October 16, 1945 as amended (1950): 60 Stat. 1886; TIAS 1554, 12 UST 980; TIAS 4803.

Constitution of the United Nations Educational, Scientific, and Cultural Organization (UNESCO), concluded at London November 16, 1945: 61 Stat. 2495; TIAS 1580.

Convention on the Privileges and Immunities of the United Nations, dated February 13, 1946: 1 UNTS 16.

Constitution of the World Health Organization (WHO), opened for signature at New York July 22, 1946: 62 Stat. (3) 2679; TIAS 1868.

Instrument for the amendment of the constitution of the International Labor Organization (ILO), dated at Montreal October 9, 1946: 62 Stat. 3485; TIAS 1868.

Convention on Road Traffic, dated at Geneva September 19, 1949: 3 UST 3008; TIAS 2487.

International Sanitary Regulations (WHO Regulations No. 2), adopted by the Fourth World Assembly at Geneva May 25, 1951: 7 UST 2255; TIAS 3625.

Treaty of Peace with Japan, signed at San Francisco September 8, 1951: 3 UST 3169; TIAS 2490.

Universal copyright convention, dated at Geneva September 6, 1952: 6 UST 2731; TIAS 3324.

Constitution of the Intergovernmental Committee for European Migration (ICEM): 6 UST 603; TIAS 3197.

Protocol amending the slavery convention of September 25, 1926 (46 Stat. 2183; TS 778), opened for signature at New York December 7, 1953: UST 479; TIAS 3532.

Protocol limiting and regulating the cultivation of the poppy plant and the production of, and international and wholesale trade in, and use of opium, open for signature at New York from June 23 to December 31, 1953: 14 UST 10; TIAS 5273.

International convention for the prevention of pollution of the sea by oil, signed at London May 12, 1954: 12 UST 2989; TIAS 4900.

Supplementary convention on the abolition of slavery, the slave trade, and institutions and practices similar to slavery. Done at Geneva September 7, 1956: 18 UST 3201; TIAS 6418.

Statute of the International Atomic Energy Agency, done at New York October 26, 1956: 8 UST 1093; TIAS 3873.

The Antarctic Treaty, signed at Washington December 1, 1969:[3] 12 UST 794; TIAS

Constitution of the International Rice Commission as amended at Saigon November 19, 1960: 13 UST 2403; TIAS 5204.

Agreement for establishment of the Indo-Pacific Fisheries Council as amended at Karachi January 6–23, 1961: 13 UST 2511; TIAS 5218.

Agreement for facilitating the international circulation of visual and auditory materials of an educational, scientific and cultural character, done at Lake Success July 15, 1949: TIAS 6116; 17 UST 1578.

Convention on the settlement of investment disputes between states and nationals of other states, done at Washington March 18, 1965: 17 UST 1270; TIAS 6090.

Single convention on narcotic drugs, 1961, done at New York March 30, 1961: TIAS 6298; 18 UST 1407.

Protocol relating to the status of refugees. Done at New York January 31, 1967: TIAS 6577; 19 UST 6223.

Optional protocol to the Vienna convention on consular relations concerning the compulsory settlement of disputes. Done at Vienna April 24, 1963: TIAS 6820; 21 UST.

Convention on offenses and certain other acts committed on board aircraft. Done at Tokyo September 14, 1963: 20 UST 2941; TIAS 6768.

APPENDIX I.—A

The agreement of Paris, on reparation from Germany, on the establishment of an inter-Allied reparation agency and on restitution of monetary gold, opened for signature at Paris January 14, 1946 (61 Stat. (3) 3157; TIAS 1655), was signed on behalf of the United States on that date. It is followed by a *Resolution No. 8 on recourse to the International Court of Justice:* "The Delegates of Albania, Australia, Belgium, Denmark, France, Luxembourg, the Netherlands, Norway, Czechoslovakia and Yugoslavia recommend that: 'Subject to the provisions of Article 3 of Part I of the foregoing Agreement, the Signatory Governments agree to have recourse to the International Court of Justice for the solution of every conflict of law or competence arising out of the provisions of the foregoing Agreement which has not been submitted to the Parties concerned to amicable solution or arbitration'." (*Department of State Bulletin*, January 27, 1946, p. 124.)

All the other signatories to the Paris agreement had advised of their accession to this Resolution, as of July 22, 1948.

APPENDIX I.—B

With respect to the four Geneva conventions of August 12, 1949, for the protection of war victims, relating to: Condition of wounded and sick of the armed forces in the field (6 UST 3114; TIAS 3362); condition of wounded, sick or shipwrecked members of the armed forces at sea (6 UST 3217; TIAS 3363); treatment of prisoners of war (6 UST 3316; TIAS 3364); and protection of civilian persons in time of war (6 UST 3516; TIAS 3365). The following resolution was adopted on August 12, 1949, by the Conference of Geneva:

Resolution I.—The Conference recommends that, in the case of a dispute relating to the interpretation or application of the present Conventions which cannot be settled by other means, the High Contracting Parties concerned endeavor to agree between themselves to refer such dispute to the International Court of Justice.

II. BILATERAL

A. Commercial treaties with:

Country and date, Treaty

Belgium, Feb. 21, 1961, 14 UST 1284; TIAS 5432.

China, Nov. 4, 1946, 63 Stat. (2) 1299; TIAS 1871.

Denmark, Oct. 1, 1951, 12 UST 908; TIAS 4797.

Ethiopia, Sept. 7, 1951, 4 UST 2134; TIAS 2864.

France, Nov. 25, 1959, 11 UST 2398; TIAS 4625.

Germany, F.R., Oct. 29, 1954, 7 UST 1839; TIAS 3593.

Greece, Aug. 3, 1951, 5 UST (2) 1829; TIAS 3057.

Iran, Aug. 15, 1955, 8 UST 899; TIAS 3853.

Ireland, Jan. 21 1950, 1 UST 785; TIAS 2155.

Israel, Aug. 23, 1951, 5 UST 550; TIAS 2948.

Italy, Feb. 2, 1948, 63 Stat. (2) 2255; TIAS 1965.

Japan, Apr. 2, 1953, 4 UST 2063; TIAS 2863.

Korea, Nov. 28, 1956, 8 UST 2217; TIAS 3947.

Luxembourg, Feb. 23, 1962, 14 UST 261; TIAS 5306.

Netherlands, Mar. 27, 1956, 8 UST 2043; TIAS 3942.

Nicaragua, Jan. 21, 1956, 9 UST 449; TIAS 4024.

Pakistan, Nov. 12, 1959, 12 UST 110; TIAS 4683.

Togo, Feb. 8, 1966, TIAS 6193; 18 UST 1.

Viet-Nam, Apr. 3, 1961, 12 UST 1703, TIAS 4890.

B. Other bilateral agreements:[4]

Treaty with Canada relating to cooperative development of water resources of the Columbia River Basin, Jan. 17, 1961, 15 UST 1555; TIAS 5638.

Consular Convention with Korea, Jan. 8, 1963, 14 UST 1637; TIAS 5469.

RECOGNITION OF SENATOR PERCY

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Illinois is recognized for not to exceed 15 minutes.

THE 25TH ANNIVERSARY OF THE HUNGARIAN REVOLUTION

Mr. PERCY. Mr. President, today we commemorate a very special anniversary among all those which it is the privilege of the U.S. Congress to note.

Twenty-five years ago today, Hungarian citizens decided that their freedom was more important than their safety. Thousands of them stood up and were counted. They were counted for basic human rights and the dignity of the in-

---

[1] By reference to the PCIJ. (References to the ICJ in place of the PCIJ in these cases is provided for by Article 37 of the Statute of the ICJ.)

[2] Appeals procedure from decision of the Council permits reference to the PCIJ (ICJ) if parties to dispute have accepted the Statute of the PCIJ (ICJ).

[3] Reference to the ICJ is subject to consent, in each case, of all parties to the dispute. 4780.

[4] In addition the United States concluded economic cooperation and aid agreements with 17 countries in 1948 which contain provisions for referral of disputes to the International Court of Justice subject, however, to the self-judging domestic jurisdiction reservation of the United States.

dividual. They were counted for the rights of peoples to political self-expression and national identity. They were counted for the right to require that a nation's rulers be responsive to the peoples' needs and welfare.

There Hungarian freedom fighters paid dearly for their courage. Many of them paid with their lives, as the bright hopes of October 1956 were extinguished by Soviet tanks.

Some of the more fortunate were able to escape. Some found their way to our shores to start a new life in America and, in time, to become American citizens. I know that all Americans join with me today in reaffirming our welcome to these Hungarian-Americans, and our gratitude and respect for their contributions to our commerce, industry, arts, and professions.

None of the sacrifices of the Hungarian freedom fighters of 1956 was in vain. Their very name has taken an historic place as an international symbol of the irrepressible human spirit. The Hungarian freedom fighter stands forever for man's willingness to struggle against all odds for those rights and values he holds dear, and for the sacred traditions and identity of his native land. The American heritage has taken renewed hope and determination from the Hungarian freedom fighter's example. So too have free men everywhere. So too have men and women who, for now, can only wish they were free.

Force, repression, and violations of individual and national rights seemed to win in November 1956. But all of us know how hollow and illusory this temporary victory was. It is the oppressor who is condemned to live in fear and by instruments of fear.

Ironically, the sacrifices of the freedom fighters of 1956 have had their lasting, beneficial impact even within Communist Hungary itself. A government somewhat more responsive to the Hungarian people's spiritual as well as material needs has gradually evolved. That government would have its own logical explanation of the forces that have made for these incremental changes. But you and I know that the real source is the soul of the Hungarian nation, the same source, and the same soul, of the Hungarian freedom fighters to whom we pay honor and tribute here today.

Mr. PELL. Mr. President, will the Senator yield?

Mr. PERCY. I am pleased to yield to the distinguished Senator from Rhode Island.

Mr. PELL. I thank the Senator.

The ACTING PRESIDENT pro tempore. The Senator from Rhode Island is recognized.

THE 25TH ANNIVERSARY OF THE HUNGARIAN REVOLUTION

Mr. PELL. Mr. President, I wish to join my colleague, Senator PERCY, in marking October 23 as the 25th anniversary of the Hungarian revolution. On that date in 1956 the world was electrified by the spontaneous uprising of those brave Hungarians who sought freedom and independence for their nation. The term "freedom fighter" took on new meaning and will always be indelibly linked with the Hungarians of 1956.

The event has particular poignancy for me personally, and particular relevance to the situation in Europe today. My father was the last prewar American Minister to Hungary and, after the war, I established the American Consulate General in Bratislava, Czechoslovakia, formerly called Pozony when capital of Hungary.

Then at the time of the Hungarian revolution, I was at the bridge at Andau and spent a year in Austria as Vice President of the International Rescue Committee charged with helping Hungarian refugees. Throughout this time I saw both high hope and deep despair. The end of World War II lifted the yoke of Nazi occupation from Central Europe. But before long a new yoke, that of Stalinist Russia, fell over most of the region. Efforts to break away grew almost everywhere—East Germany, Poland, Czechoslovakia—but succeeded only in Yugoslavia and later in Albania.

Then in 1956 the Hungarian people rebelled against the ruling clique of former party boss Matyas Rakosi and called for the popular Imre Nagy to take over. On October 23 the growing discontent boiled over, partly in echo of developments in Poland, where new leadership more responsive to the people's wishes had come to power, and partly in reaction against an incident where security forces had opened fire on a crowd at the radio station in Budapest. The Hungarians also called for an end to Soviet military occupation of their land, and after Nagy was swept into authority on October 24, he sought to negotiate Soviet withdrawal. The Soviets seemed to tolerate Nagy at first, perhaps hoping that small changes could prevent the further spread of the revolution.

But the clamor grew for fundamental changes in domestic and foreign policy—including a call for Hungary to withdraw from the Warsaw Pact—which Nagy endorsed. Then on November 2, some Soviet forces which had moved out of Hungary during the previous week began to return, and on the night of November 3–4, they struck with massive force against ill-equipped and poorly organized Hungarian resistance forces. Nagy took refuge in the Yugoslav Embassy, but was later seized by the Soviets. He was replaced on November 4 by Janos Kadar, who remains party chief to this day.

It is a testimony to the resilience of the Hungarian people and to the practicality of their leaders that Hungary in recent years has become a minor economic miracle—the result of an economic policy which places major emphasis on individual incentives and quality control. Not surprisingly, the domestic political situation has also relaxed, although there is no serious challenge to Communist Party control.

Perhaps most importantly, Hungarians are permitted to travel abroad almost without restriction, and millions do so each year. The United States and Hungary have developed a positive relationship, despite obvious differences, and I believe that this relationship contributes to the improved economic and social conditions in Hungary. It also underscores the deep concern which millions of Americans feel for the Hungarian people.

I had the good fortune to come to know personally many brave Hungarians who had been involved in the revolution. Much of our effort was directed at saving lives and assisting many thousands of victims of the invasion and the Soviet-inspired crackdown which followed. I am proud to have been a part of this effort, and to have shared in its many successes. I am only disappointed that we could not do more for those who fought so bravely.

The situation in Central Europe today has many of the same elements of uncertainty, hope and challenge which were so evident 25 years ago. Poland today is engaged in perhaps the most dramatic internal social and political ferment ever to affect the Soviet Empire, certainly the most dramatic since Hungary in 1956 and Czechoslovakia in 1968. But the stakes are higher now. The concrete benefits in trade and human contacts for the peoples of the region, which have grown across the artificial barriers of Central Europe, would be seriously jeopardized by a return to cold war confrontation. There is more to lose now. Furthermore, the dangers of armed confrontation have multiplied in this most heavily armed and strategically essential corner of the globe.

Poland has suffered before from the tragic accident of her geography. The present experiment carries both the hope for lasting improvements and the continuing threat of Soviet military action. It is all the more essential, therefore, that the Polish people and their well-wishers everywhere avoid giving Moscow any reason to invade, whether to prevent public disorder, the disruption of the Warsaw Pact or the removal of the Communist Party from its leadership role. The Catholic Church has played a crucial role both in championing the efforts of the Polish people for greater personal and political freedom, and in cautioning against excesses which threaten the gains already achieved.

Americans should also lower their voices. Clearly, statements by high U.S. officials on the possible use of nuclear weapons in Europe, on alleged U.S. vulnerability in strategic systems and on the supposed inevitability of a Soviet invasion of Poland, poison the climate and heighten the dangers.

It seems almost that some people would prefer that Moscow act to confirm our worst fears, in order to justify a tighter

alliance structure and massive increases in defense spending. Such a course is both unwise and dangerous. And one of the direct consequences is that the peoples of Central Europe, particularly the Poles, but also the Hungarians, Czechs, Slovaks, Germans, and others, come under increasing pressure and increasing threat, and the fragile gains of the past decade are jeopardized.

It is fitting that we note this 25th anniversary of one of the major events in post-World War II history. But it is even more important that we learn the appropriate lessons from that event and from the sequence of events since then. The peoples of Central Europe want peace and a better life. They need lower tensions between East and West. Those who truly support them and their aspirations for improved living conditions should commit themselves anew to work for a climate of international calm under which the creative diversity of the peoples of the region can grow and thrive.

HUNGARIAN FREEDOM FIGHTERS DAY

● Mr. WEICKER. Mr. President, today we celebrate Hungarian Freedom Fighters Day. Twenty-five years ago, on October 23, 1956, Hungarian students demonstrated in the streets of Budapest to protest Russian domination of their government and wealth and the brutal intimidating methods of the Russian-backed state security police. A great feeling ran through Hungarians that day. They were tired of keeping their anger to themselves. Their repressed emotions burst forth with fury. People poured into the streets to join the students. Together, they marched chanting slogans against the oppressors and singing old Hungarian hymns long banished by Communist fiat. Then suddenly, the crowd was fired upon. Several workers fell bloodied to the ground. The people shouted in rage. At that moment the soul of a nation rebelled.

Hungarian soldiers, forced to choose between communism and patriotism passed out arms to their countrymen and joined in the revolution. In the following days as Russian tanks moved in to beat down the uprising, the new freedom fighters banded together and fought back with the fierceness of a people with liberty in their grasp. For 6 days, they drove back the tanks, fighting them with old guns, bottles of gasoline, and stones, On October 29, the tanks departed; the city appeared won.

Hungarians reveled in their freedom. The one party system was immediately abolished; free elections were promised; local councils sprung up everywhere. The prisons were opened; the secret police fled. A joyous throng accompanied the freed Cardinal Mindszenty through the square to the palace, above which the hammer and sickle had been torn down. Once again, the old Hungarian flag furled in the breeze, if only briefly.

On November 4, the tanks returned. With a brutality that enraged the world, they rolled over the heart of a city and a people whose only crime was wanting freedom without having the rifles to win and keep it. The Hungarians fought bravely, stretching the inevitable for days, until finally, they were crushed. Thousands were killed in the fighting. In the weeks that followed, some were executed; more were shipped off like cattle to concentration camps. Over 190,000 Hungarians fled the land that had been their ancestral homeland for a thousand years; others were unable to escape.

Mr. President, freedom and liberty are so much a part of our lives here in the United States that we can go a whole year without giving them a thought. Then along comes the Fourth of July and we get our dose of fireworks, parades, and star spangled banners. We eat cake and ice cream and hear speeches about Washington and Jefferson. Feeling good about our country, we sleep soundly at night, and in the morning we go on with the business of our lives. Not all the people in the world are so fortunate.

There will be no fireworks in Hungary this year; no brilliant flares to brighten the night with celebration. Nor will there be displays of joy in East Germany, in Czechoslovakia, in Lithuania, in Bulgaria, in Poland, in Afghanistan, and in all the other countries under the dark shadow of the Soviet empire. Freedom for these people is not a parade or a red, white, and blue hat or a baseball game. Freedom is a burning coal buried deep in their souls, a small warmth that gives hope to the spirit.

Mr. President, in the darkened lands where tanks and rifles rule, the flame of freedom in the human spirits must never be allowed to die. We must continue to send the message to the people of Hungary—that we have not forgotten them. We care about their plight and pray for their future. The flame must be kept burning until the hopeful day when it explodes across the night like Roman candles in a blazing light of freedom.

I would like to quote a poem now from the collection entitled "From the Hungarian Revolution," edited by David Ray. The title is "October Twenty-Third."

The earth is in pain and the walls lie down
And the earth is a blue trumpet of victory,
Because from the stone of the deep moist prison
Man is born again under the sun's glory.

Our wrinkled bodies grow supple with new sense,
Our drained faces burn in the sunlight,
Our fainting steps march every way at once,
Our freedom grins in our hands like a birthright.

Our hearts rise out of darkness, opening,
The purple flower clambers out of the earth,
Out of dark slavery our light is ripening,
Weaponless, the conquerors come forth.

Today, we honor the Hungarian freedom fighters. We remember their courage and their cause. We remember October 23, 1956, and we will never lose hope of such moments triumphing again.●

THE 25TH ANNIVERSARY OF THE HUNGARIAN REVOLUTION

● Mr. LUGAR. Mr. President, two things have always stood out among those qualities that impress American people.

One is the embodiment in the individual lives of those high ideals of freedom and self-expression on which our country was founded and for which it stands.

The other is substantial individual contribution to the life, welfare, and prosperity of our communities across America.

On both scores the Hungarian freedom fighters impressed all of us 25 years ago. Even more remarkably, they continue to impress us.

Their individual struggles and sacrifices for the freedom and identity of their country a quarter century ago continues to symbolize for Americans the highest embodiment of our own national ideals.

Many of the Hungarian freedom fighters found refuge here in America, earned American citizenship, and have made significant contributions to American communities through their skilled work and their cohesive family life. My own State of Indiana is enriched by the contributions of many such Hungarian Americans.

Mr. President, I am proud to join here today in this fitting tribute to the living anniversary of the Hungarian revolution of 1956 and its freedom fighters.●

NATIONAL BUSINESS WOMEN'S WEEK

Mr. PERCY. Mr. President, it is a great pleasure for me to join the Illinois Federation of Business and Professional Women's Clubs' 10,000 members in their celebration of October 18–24 as National Business Women's Week.

The Illinois Federation is an important part of a national organization founded in 1919 and dedicated to the economic interest and growth of business and professional women. Today, the National Federation of Business and Professional Women's Clubs is composed of over 3,700 clubs in all 50 States, the District of Columbia, the Virgin Islands and Puerto Rico, with over 162,000 members. The goals of its membership are to elevate the standards of women in business and the professions and to extend opportunities to business and professional women through education along lines of industrial, scientific, and vocational activities.

Key to BPW's education activities is the Business and Professional Women's Club Foundation in Washington, D.C. It functions as a resource center and library and is a unique source of data on

matters relating to business and professional women. The BPW Foundation offers management and training seminars and gives more than $300,000 annually in career advancement scholarships for working women over the age of 25. Corporations and private foundations make 35 percent of the contributions to the foundation; the remainder comes from BPW members across the United States through their respective federations. The BPW Foundation is celebrating its 25th anniversary this year, and special recognition will be given this week to its quarter century of achievement on behalf of business and professional women in this country.

Mr. President, National Business Women's Week was first celebrated in 1928 to dramatize the contributions of women to the business and professional life of the country. As more and more women enter the work force and as they attain the ranks of senior management in increasing numbers, it is more fitting and timely than ever that we set aside this week every year to honor the achievements of the organization that has worked so dilligently in their behalf for more than 60 years.

I salute the Illinois Federation of Business and Professional Women's Clubs, and its parent organization, for their efforts on behalf of working women, for their energy and steadfastness in the pursuit of equal opportunity for women, and for their outstanding contribution to the discussion and implementation of public policy during the last half century. I value my friendship with BPW members all over the State of Illinois and I am delighted to have joined in this way in the celebration of National Business Women's Week.

NOMINATION OF JOHN R. VAN DE WATER TO THE NATIONAL LABOR RELATIONS BOARD

Mr. PERCY. Mr. President, I recently had the pleasure of endorsing the nomination of John R. Van de Water to be a member and the Chairman of the National Labor Relations Board.

Mr. Van de Water, who is currently serving as Board Chairman by virtue of a recess appointment, and I have known each other since our student days at the University of Chicago. He would appear to be eminently qualified for this post and I look forward to positive Senate action in the near future.

Mr. President, I ask unanimous consent that the statement I submitted to the Senate Labor and Human Resources Committee, on the occasion of Chairman Van de Water's confirmation hearing, be printed in the RECORD at this point.

There being no objection, the statement was ordered to be printed in the RECORD, as follows:

STATEMENT OF SENATOR CHARLES H. PERCY ON THE NOMINATION OF JOHN R. VAN DE WATER TO THE NATIONAL LABOR RELATIONS BOARD

Mr. Chairman, it is my privilege this afternoon to introduce to this Committee Mr. John Van de Water, President Reagan's nominee for a full term as a member of the National Labor Relations Board and the person who, if confirmed by the Senate will continue to serve as NLRB Chairman, as he has during his recent, interim appointment.

Although John Van de Water is not at present a resident of the State of Illinois, we nonetheless are proud to claim him as one of our own by virtue of his graduation in 1939 from my own alma mater, the University of Chicago, and in 1941 from its law school. John and I were at the University together in those days although I would point out that he did much better than I in his post-graduate education. He finished law school and I dropped out.

In the intervening years, he has combined a career in teaching with one in industrial relations. Since 1949, he has been President of Van de Water Associates, Inc., consultants to management. He created and served as the first Director of the California State Bar program for the Continuing Education of the Legal Profession. He has served as Director of the Executive Program for UCLA's Graduate School of Management, and has served as a member of that school's faculty for 20 years.

He also served as Adjunct Professor of Industrial Relations and Management at the Graduate School of Business Administration, University of Southern California. At the time of his nomination, he was establishing an Executive Education program for San Diego, California, while serving as Director of Executive Education and Professor of Industrial Relations and Management at San Diego University. He has taught labor law to both labor and management and has stressed the absolute necessity of obedience to this country's labor laws.

Mr. Chairman, a little over a year ago, I announced my opposition on the Senate floor to the pattern that former President Carter was establishing in his appointments to the National Labor Relations Board. I felt that the Board, in order to meet its statutory obligations to labor and management in this country, needed balance among its membership and, in particular, more appointees who had had experience in industrial relations outside of the federal government. I reaffirmed my long held belief that continuing respect for the NLRB, its decisions, and for our labor law in general depends on the perception of both business and labor that they can get a fair deal when their cases come before the Board.

At that time, I expressed concern also over the decline in the rate of federal court affirmance of Board decisions during the previous few years. The 1-out-of-3 chance for a court reversal of a Board decision, which existed at the time, was a serious problem, not only because it created a greater workload for the courts and the Board itself, and increased costs to both labor and management, but also because it called into question the fundamental ability of the Board to make judgments that will stick and of its ability to interpret the law.

The nomination of John Van de Water, and of Board Member Bob Hunter, just recently confirmed by the Senate, represent what I consider to be a good faith effort by President Reagan to reverse the decline of the affirmance of Board decisions and bring more credibility to those decisions.

His honesty is absolute. I have always found him to be objective. His ability can be judged by his distinguished record as both a teacher and a doer in the field of industrial relations. In short, Mr. Chairman, I feel we have here a candidate who, if confirmed, will bring balance, prudence, and the respect of labor and management to his service as Board Chairman. To confirm that last point, Mr. Chairman, let me close with a quote from Communications Workers of America District 11 Vice President, William C. Demers of California, which appeared in a recent issue of *CWA Pride:*

"I know only that my relationship with him has indicated to me that he is a gentleman of honesty and integrity. A man who believes in people. A compassionate man. A man who espouses the philosophy that 'It is not who is right but what is right.'

"I believe, based on my knowledge of Mr. Van de Water, that . . . he will endeavor to be evenhanded and to bring labor and management closer together."

Mr. Chairman, there is no better testimony than that. This concludes my formal remarks.

HELP FOR THE HOUSING INDUSTRY

Mr. PERCY. Mr. President, I recently had the opportunity to meet with homebuilders and realtors from several regions within the State of Illinois. It was, as always, a great pleasure to meet with these concerned and hardworking people who are a vital part of the economy of our State.

Our meetings were several of a series I have had during the last 2 years with homebuilders and realtors from all over the State, in which we have sat down together and attempted to work out some practical and reasonable solutions to the problems that have devastated the homebuilding industry in Illinois.

The news they brought me last month was not unexpected, and it was very grim indeed. I was deeply moved by one particular group of homebuilders as they, one by one, told me of once successful homebuilders—their personal friends and associates—who are now facing bankruptcy because of the damage done by uncontrolled inflation and high interest rates.

The condition of the housing industry is no surprise to my colleagues who, I am certain, have heard from realtors, homebuilders, and suppliers in their own States. But few, if any, States in the country have suffered as severe a setback as Illinois. According to the figures provided to me by Advance Mortgage Corp. for housing permits in major metropolitan areas, private housing permits in the Chicago area for the first half of 1981 represented an almost unbelievable 95-percent decrease from 1978, the last good year for the industry. The rest of the State is suffering as well from a major decrease in activity, and sales are depressed everywhere in Illinois.

I have pledged my continued efforts to every homebuilder and realtor in Illinois to do all I can to restore our economy to health and to preserve the housing industry as one of the major components of our economic system and as a provider of a profoundly important service to the people of this country.

First and foremost among my efforts has been my unqualified support for President Reagan's budget and tax proposals, both of which were enacted into law in August and which I believe will

make a fundamental change in the economy—for the better. For the first time, the future looks a bit brighter than in previous years. Washington has heeded the call for change and has enacted an economic recovery program that promises growth, jobs, and a stable business climate. I am pleased to say that the President's economic recovery program enjoys wide support in Illinois, including the housing industry. Once this program begins to take effect, I believe the Federal Reserve will ease up on interest rates. In the meantime, I have taken other action which I hope will improve conditions for the housing industry in my State.

Among the many provisions incorporated into the President's tax reduction legislation, I was particularly pleased to vote for the creation of the all savers certificate, supported by the National Association of Homebuilders, the National Association of Realtors and others, as a means of directly assisting the industry. Financial institutions will be able to issue special, tax-free certificates for the next 15 months, of which 75 percent of the proceeds must be used for residential and agricultural financing. I supported this measure, offered by Senator BENTSEN, because I know so well of the serious condition of the housing industry in Illinois. Additional savings should be generated by changes in IRA and Keogh retirement plans, which will increase the tax benefits available to individuals who are saving for their own retirements. As a principal cosponsor of the small savers interest income tax exclusion provision of current law, I continue to believe that the encouragement of greater individual savings is a key to our economic recovery.

Of special interest to me in the last few years has been the possibility of expanding the sources of home mortgage financing. Major changes have occurred in the last few years in our traditional financial institutions and additional proposals are currently pending in Congress which, if enacted, will mean an even more dramatic alteration in the structure and function of financial institutions as we have known them.

I do not know how or when action on new financial institutions legislation will be completed, nor how I will vote on the final package when it is sent to the Senate from the Banking Committee for consideration. What I do know is that the housing industry should not be made to suffer while our banking system undergoes what perhaps can be characterized as the most radical transformation in its history. We must not wait for action to be completed on new bills before we ask the question of how homeownership will be financed in the future. The fact of the matter is that countless individuals and young couples all over the country with steady sources of income and good credit ratings are precluded from homeownership right now.

To expand the sources of home financing both now and in the future, I supported the passage of legislation that protected the ability of local governments to issue mortgage revenue bonds and urged the Secretary of the Treasury earlier this year to expedite the issuance of regulations to implement that law. I expect to support legislation, currently pending, which will make technical corrections to the mortgage revenue bond statute and simplify the procedures under which this type of home financing can take place.

For several years, I have been working with homebuilder organizations and a few of my Senate colleagues to make available for housing investment the huge resources of the private pension funds of this country. On September 29, I enthusiastically joined the distinguished Senator from Utah (Mr. HATCH) in introducing S. 1678, a bill to amend the Employee Retirement Income Security Act (ERISA) to provide that an investment by a private pension plan in a residential mortgage is neither a prohibited transaction nor a violation of the "prudent man" rule. After almost a year of correspondence and negotiation with the Federal agencies concerned with housing and ERISA, I have come to the conclusion that legislation is the only answer to eliminating the artificial barriers in ERISA that unreasonably restrict the ability of pension fund trustees to invest in home mortgages.

I will be delighted to work with Chairman HATCH and the other cosponsors on behalf of this worthy legislation and I can assure him of the solid support of all the people in the housing industry in Illinois with whom I have consulted, particularly the homebuilders. We are all anxious to see this industry restored to a condition of vigor and dynamic growth that will be so important to the economic recovery of this country. In the long and short term, it will benefit industry and consumer alike.

Mr. President, it has been my privilege for many years to work with the outstanding homebuilder and realtor organizations in Illinois. Their friendship, advice, and counsel have been of immeasurable help to me in many respects, but especially as we have worked together in the last 2 years on what the Federal response should be to the problems of the housing industry. I wish to express my appreciation today to all of them. Their energy and creativity never cease to amaze me, and their courage in the face of economic adversity unprecedented in recent years is an inspiration to us all.

FEEDING THE WORLD, LEADING THE WORLD

Mr. PERCY. Mr. President, it is well known that the United States exports a huge part of its agricultural product. According to the U.S. Agriculture Department, 38 percent of our farm acreage is devoted to exporting and one of every two jobs in farming hinges on exports. The USDA projects the value of the 1981 farm crop that will be exported at nearly $44 billion, an increase over what we exported last year. Even when our agricultural imports are taken into account—mostly items like coffee and sugar—we still recorded a $26 billion agricultural trade surplus last year. USDA expects the 1981 surplus to be even larger.

Without these surpluses, our trade ledger would stand in the red by a very large amount. Agricultural exports are simply essential to our international balance-of-trade position.

I am proud that my own State of Illinois leads the Nation in the export of agricultural products. Corn and soybeans are the two commodities that dominate Illinois' export sector, but we are strong in a wide variety of other agricultural exports, too.

On the manufacturing side, Illinois is the Nation's No. 2 exporter. One of the reasons for the State's top ranking is the preeminence of the Caterpillar Tractor Co., which exports nearly 50 percent of its U.S. production.

No one knows exporting as well as Lee Morgan, chairman of Caterpillar, and when he speaks, there is good reason to listen.

Earlier this month, on October 5, Lee Morgan spoke on the vitality of exporting before the Rotary of Davenport, Iowa. In his address, Mr. Morgan said:

> Further expansion of U.S. exports is necessary if we are to reverse the trade deficits of recent years. We must increase exports of both agricultural products and manufactured goods . . . and for many reasons in addition to the need for an improved trade balance.

I commend this speech to my colleagues for Mr. Morgan's discussion of the several reasons why expanded exporting is crucial to our economy.

Mr. President, I ask unanimous consent that Lee Morgan's address be included in the RECORD in full at the close of my remarks.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

(See exhibit 1.)

At the close of his remarks, Lee Morgan makes a valuable economic observation. I should like to quote that passage because it is important to remember:

> I started out talking about the agricultural richness, of Iowa and Illinois . . . the importance of agricultural exports to the U.S. economy . . . and the need for America to increase its export volume of both manufactured and agricultural goods. For that to happen, we must restore America's competitiveness . . . both through private sector and governmental action . . . and the world's governments must move away from policies of protectionism and economic nationalism.
>
> Just as Illinois and Iowa help feed the world, our country can help lead the world to more prosperity . . . and, ultimately—we fervently hope—to a more peaceful, fulfilling life for all people.

EXHIBIT 1

ILLINOIS AND IOWA: THE ONE-TWO PUNCH IN EXPORTS

(By Lee L. Morgan)

I always welcome the chance to come to the Quad Cities. The short trip up here is refreshing, and it's a pleasure to see the

cornfields in early fall. This is an area of beauty . . . and an area of agricultural richness that few places in the world can equal.

Our two states, in fact—Illinois and Iowa—lead the nation in export of agricultural produce. Illinois ships more ag products abroad than any other state, and Iowa is a close second. We literally help feed much of the world . . . and the abundance of our land generates export income that dramatically helps the economic well-being of the rest of America.

Last year the United States—led by Illinois and Iowa—exported almost $43 billion in agricultural produce . . . while imports were only $17 billion. That gave the country a positive agricultural trade balance of $26 billion.

But in total trade . . . including manufactured goods and petroleum products . . . the United States had a deficit last year of more than $36 billion.

A positive balance in agriculture . . . a negative balance overall.

In fact, without the $26 billion positive contribution from agriculture, our national trade deficit would have soared to $62 billion—and that would have been a heavy blow to our already shaky economy.

The people of Illinois and Iowa have a right to be proud. Their stewardship of the land contributes enormously to the country's economy, and ultimately benefits all Americans.

But further expansion of U.S. exports is necessary if we are to reverse the trade deficits of recent years. We must increase exports of both agricultural products and manufactured goods . . . and for many reasons in addition to the need for an improved trade balance.

One reason, of course, is that exports create jobs. Last year for example, about 47 percent of Caterpillar's U.S. production was exported. Those exports thus provided jobs for nearly half of our U.S. employees . . . including many employees here in the Quad Cities area . . . a total of 31,000 employees at Caterpillar facilities across the United States.

That's only part of the story. Caterpillar exports also result in jobs for suppliers and others whose livelihood depends on Caterpillar's presence; and we have a lot of suppliers in the Quad Cities area.

Consider two congressional districts: the First District of Iowa and the Nineteenth District of Illinois. Our 1980 purchases in these two districts totaled just over $100 million . . . from 537 suppliers. Almost half those purchases were made possible by Caterpillar exports. That translates into roughly 1,700 supplier jobs in Jim Leach's and Tom Railsback's districts . . . made possible by Caterpillar exports.

Increased export volume also enables companies to benefit from economies of scale, to spread the costs of research development, production, and marketing over a broader customer base. And export sales provide an extra source of capital for investment, as additional cash enters the U.S. capital stream.

The list of benefits goes on. Export sales generate more taxable income as a source of governmental revenues. Expanded export volume helps us pay for oil imports and essential raw materials. Exports help fight inflation and raise productivity.

And the President's Export Council contends that export expansion would help restore U.S. economic, military, and diplomatic credibility . . . thus assisting the pursuit of a more peaceful and prosperous world.

We need the benefits of export business . . . and, equally so, we need the benefits of imports. Trade is a two-way street.

In fact, the only way in the long run to increase our exports is to also increase our imports.

Our exports need to find foreign buyers with the dollars necessary to buy our goods and services. In general, these dollars are obtained when Americans import and pay for foreign goods and services.

Thus, imports put dollars in the hands of foreigners—which can then be used to buy our exports. It follows that restrictions on imports will result in fewer dollars in the hands of those in other countries who might want to buy our corn, soybeans, tractors, machinery, chemicals, and other products—unless we wish to make up the difference by loans or transfer payments, that in turn increase U.S. budget deficits. The better alternative is free and open trade.

We have an administration in Washington that strongly supports expanded trade. Business leaders are almost unanimous in their endorsement of more trade. And I recently saw a survey that showed the vast majority of Americans support governmental programs that would encourage businesses to engage in more international trade.

Why, then—with all these benefits to be derived from international trade, and with support for expanded trade from so many sectors of our society—why, then, has America lost its leadership position in trade?

And we have lost it. West Germany now exports more manufactured goods than we do and Japan is not far behind us. Both maintain a better trade balance than we do.

The total volume of world trade last year increased only 1 percent, and this year trade volume may show a decline. If that should happen, it would mark only the second such interruption in the long postwar pattern of growth.

The core of the problem within the United States is that many American industries have lost their competitiveness. And a major problem throughout the world—including our own country—is the growing economic nationalism that hampers open flow of goods and services.

To restore America's international competitiveness, we must do several things. First, of course, we must strengthen the domestic economy. The ball is rolling to get that done.

The Reagan administration, with bipartisan support from Congress, is attacking the overriding problem of inflation. Tax reform, reduced government spending, a more stable and predictable monetary policy, suspension of counter-productive and excessive regulations—all these things are starting to happen.

We're seeing some growth-stimulating actions at the state level, too. In Illinois, for example, recent passage of an Investment Tax Credit and steps toward reform of our costly state unemployment compensation system will help Illinois companies be more competitive in world markets * * * as lower costs help improve price-value ratios of Illinois products.

The Administration in Washington has placed high priority on removal of trade disincentives that hamstring efforts to boost exports. And managers of American companies increasingly are taking steps needed to improve productivity: capital investment, expanded research and engineering programs, overhaul of operations . . . in particular, better use of human resources. At Caterpillar—as just one example—we recently completed an intensive, year-long, worldwide study of human resources and human resources strategies.

A major conclusion: people want to get more involved in their work. They want to contribute more. Our conference teams came up with dozens of specific proposals about better utilization of the work force; we are already actively pursuing many of them.

The days of treating people as extensions of tools are long gone. The concept of labor as a "commodity" never had any validity, in my opinion. Also gone is the absurd notion that "managers think but workers work"—implying that people in the factories lack brainpower or willingness to employ it.

I believe that the combination of private sector and government action will revitalize the U.S. economy. And a healthy, dynamic, domestic economy will let us become more competitive in the world marketplace. Some of the recovery medicine is bitter, and causing short-term hardship . . . especially to those selling capital goods when interest rates are near 20 percent . . . but it's medicine we must take for long-term well-being.

Along with improvements in our U.S. competitiveness, there has to be a change in the competitive atmosphere around the world—a lessening of economic nationalism.

Competition is the life of business—hobbling restrictions the death of it. That's true internationally . . . as well as here in America. We need fewer restrictions on free competition in world trade. We need a freer flow of goods and services across national borders . . . and laws or codes that enhance competition, not destroy it.

Governments around the world—including our own—too often are responding to sluggish economies by initiating new forms of trade protectionism, new rules to isolate national economies.

In the early postwar years, governments used import duties—tariffs—as the primary means of isolating their economies. Tariffs still exist, of course—but they're relatively less prevalent, less of a problem. A series of multilateral trade negotiations under the auspices of the General Agreement on Tariffs and Trade—known as GATT—has successfully reduced the use of tariffs around the world. Today, non-tariff barriers are the bigger problem.

GATT has identified 800 forms of non-tariff barriers that circumvent its rules against traditional formal tariffs. From 1974 to 1979, the proportion of the world's manufactured exports covered by import restrictions jumped from 13 percent to about 21 percent. One British economist concludes that we are moving into an area of "managed trade."

U.S. Trade Representative Bill Brock has said, "People are just finding ingenious ways to reduce the opportunity for international trade" . . . and that's true.

One of the simplest forms of non-tariff barrier is the "voluntary" import quota. Country A voluntarily agrees to limit shipments of a product to Country B. The unspoken understanding is that if Country A doesn't cut back, Country B will simply impose some sort of "nonvoluntary" quota.

More complex non-tariff barriers involve methods of setting standards on imports . . . customs evaluations . . . export subsidies . . . government procurement rules . . . and a host of others.

The service sector is another area where protectionism is spreading. A current example—transborder data flow.

This expression refers to the increasing flow of information across national borders, such as airline reservations, financial data, market information, and countless other forms of information.

Countries, understandably, want to ensure that national security and the privacy of individual citizens aren't jeopardized when

such information is sent to other countries. But it's easy for government regulation of data transmissions to turn into serious obstacles to international trade.

The Organization for Economic Cooperation and Development (OECD—an international association of free-world, industrialized countries) has been working on this issue. OECD has developed a set of guidelines that strike a balance between concerns about protection of individual privacy and the need to maintain the free international flow of information. The guidelines are voluntary, but include a set of basic principles which companies are urged to observe in gathering, using, and handling personal data.

Caterpillar supports these guidelines. We hope that if other corporations in OECD member countries voluntarily observe the guidelines, burdensome new government regulations on transborder data flows can be avoided.

Some of the most dangerous forms of economic nationalism are in the field of international investment.

Attempts by governments to manipulate foreign investment to support their national economic goals can do real harm to the free flow of goods and services. Such manipulations can ultimately lead to trade wars with grave political consequences.

One method of manipulation is through performance requirements. A company may have to guarantee minimum employment and export levels, for example, before it can invest in a host country. Just recently, an industrialized country placed these requirements on some potential U.S. investors:

A requirement that the investor bank only with that country's banks and use only their advertising agencies and public accountants;

A requirement that the investor company purchase a specific percentage of its input requirements from local supplier; and

Pressure to move certain manufacturing operations from the United States to the host country.

Such performance requirements generate effects similar to import quotas. The flow of goods and services is artificially restricted. Quotas would be prohibited under the GATT trading rules, but there are no applicable international rules when countries use their investment policies to achieve the same purposes.

We believe it's time to strengthen multilateral discipline and restraint over government actions which distort international investment and trade. In the long run, it is clearly in the interest of all concerned to improve the global efficiency of the international investment system, especially as it affects international trade.

The world's a highly interdependent place . . . and getting more so. All countries need the benefits of export business, just as all countries need the benefits of imports.

Increased trade, for example, is the best way of helping most less developed countries, as Secretary of State Haig said just two weeks ago before the United Nations. He laid out two choices for the world's nations:

"A future of sustainable growth . . . expansion of world trade . . . and reduction of poverty (on the one hand . . . or, the alternative), a future of economic stagnation . . . rising protectionism . . . and the spread of poverty."

Protectionism and stagnation—or expanded trade and economic growth. . . .

Third World diplomats stood in line to congratulate him on that message.

I started out talking about the agricultural richness of Iowa and Illinois . . . the importance of agricultural exports to the U.S. economy . . . and the need for America to increase its export volume of both manufactured and agricultural goods. For that to happen, we must restore America's competitiveness . . . both through private sector and governmental action . . . and the world's governments must move away from policies of protectionism and economic nationalism.

Benefits will accrue to all nations, not to the United States alone. Those benefits can be reckoned in economic terms . . . yes, and also in terms of international understanding and peace among the nations.

Just as Illinois and Iowa help feed the world, our country can help lead the world to more prosperity . . . and, ultimately—we fervently hope—to a more peaceful, fulfilling life for all people.

RECOGNITION OF SENATOR STENNIS

The ACTING PRESIDENT pro tempore. Under the previous order, the Senator from Mississippi is recognized for a period not to exceed 15 minutes.

Mr. STENNIS. I thank the Chair.

S. 1768—INVESTMENT OF SOCIAL SECURITY TRUST FUNDS

Mr. STENNIS. Mr. President, the matter to which I will discuss is important both moneywise and in principle. It is a part of an effort to secure and increase the yield on the social security system trust funds. We also want to assure that social security collections are in fact treated and handled as trust funds. This is not money owned by the Government. It is owned by and held in trust for the people who have paid the money in. The measure that I will propose refers to the manner in which the trust funds are invested and the interest earned on them.

I am proposing changing the custom of investing these trust funds in Government obligations that pay less than the current going interest rate. This results in a lesser yield to the trust fund and, therefore, less money in the trust fund at the end of the year. That is favoring the other departments of Government and saving money so far as the interest on the national debt is concerned but this is at the expense of a fund that is not owned by the Government. As I say, it belongs in trust to the people who paid that money in.

The social security payroll taxes are required by law to be placed in three separate trust funds, these being the old age and survivors insurance trust fund, the disability insurance trust fund, and the hospital insurance trust fund. Those who manage these trust funds act in a fiduciary capacity and have a high degree of responsibility to insure that the trust funds receive the highest possible yield consistent with the safety of the investment. Good business practices demand this and present and future retirees are entitled to nothing less.

I was, therefore, surprised if not shocked, Mr. President, to learn that, in fiscal year 1981, the social security trust funds earned only 8.3 percent on a portfolio which, on June 3, 1980, had assets of almost $47 billion. During the same period, money market funds, which were invested exclusively in Government securities, earned 13.5 percent or more.

That difference, Mr. President, was at the expense of the social security trust funds. It benefited the general fund of the Treasury, but the fact remains that those funds were not general funds and did not belong to the Treasury. They belonged to the people who paid them in.

We are not talking about insignificant amounts, Mr. President. If the social security trust funds had paid a return of as much as money market funds earned, then they would have earned about $2 billion more than they did in calendar year 1980. This would have erased about 60 percent of the deficit which the trust funds incurred in calendar year 1980.

This was no accident, Mr. President. It was deliberately done. I know there was no moral wrongdoing, no violation of law, and I impute only integrity to the Board—nothing less than that. It is a discretionary matter that the existing law permits and addresses to their judgment. It is the responsibility of Congress to remedy that chuckhole, close it, and provide, as I have already outlined, that the funds must be invested in Government securities which will pay the highest level of return consistent with the safety of the investment. The trust funds should certainly earn what the market will safely bring.

I emphasize again that I am not imputing any bad motives to the trustees charged with the investment of these funds.

At present social security trust funds can by law be invested in any Government or Government-guaranteed securities. Despite this, and with securities having a substantially higher yield available, over 90 percent of the money was invested in so-called Treasury Department special issues. In fiscal year 1980, most of these special issues carried an interest rate of 7 percent. Only $6.3 billion of these special issues carried an interest rate in the range of 9 percent.

These funds, as I said on October 15, are managed by the Treasury, and it appears that, instead of making every effort to maximize the return on the social security trust funds, those managing the funds acted in the interest of the Treasury and deliberately minimized the return on the trust funds, thereby favoring a reduction of the interest on the national debt.

This is a situation that cannot be countenanced, Mr. President. I hope some day to see a surplus in social security funds, plus a margin of safety. Present and future retirees are entitled to the assurance that their trust funds are safe and secure. If we are to ever get to that point, several actions must be taken including absolute assurance that every dollar in the trust funds earns the maximum amount available consistent with the safety of the investment. I want to see a social security system which is solid and secure and which is financially able to stand on its own bottom.

I sincerely believe that it is a mistake to prefer general fund obligations and interest payments over the best interests of the social security fund assets. The trustees of the social security fund must recognize the fiduciary nature of their actions and make every effort, as prudent businessmen, to increase the return to the social security trust funds.

As I have said, Mr. President, if this bill had been law, it would have benefited the trust funds by $2 billion in 1980. I

have confidence that the Committee on Finance will look into this matter and report out legislation which will correct what to me is an intolerable situation. It is for this reason that I introduce this bill.

I would certainly like to see a hearing on these matters, to make sure we have all the facts and to see what the alternatives there are. The money belongs to those people who paid it in. It is held by the Government in trust, and the Government is supposed to get the highest rate of interest Government securities are paying, and then put that money, earned by way of interest, back into the fund, for the benefit of those people who paid it in and for the benefit of present and future retirees.

Mr. President, I ask unanimous consent to have the bill printed in the RECORD and that it be appropriately referred.

The ACTING PRESIDENT pro tempore. The bill will be received and appropriately referred; and, without objection, the bill will be printed in the RECORD.

There being no objection, the text of the bill was ordered to be printed in the RECORD, as follows:

S. 1768

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 201(d) of the Social Security Act is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "It shall be the duty of the Board of Trustees to invest such portion of the Trust Funds as is not, in its judgment, required to meet current withdrawals, and such investments shall be made so as to secure the maximum possible inerest yield, commensurate with the safety of the Trust Funds."; and

(2) by striking out "which are not due or callable until after the expiration of four years from the end of such calendar month" and inserting in lieu thereof the following: ", all marketable interest-bearing obligations which are not obligations of the United States but which are guaranteed as to both principal and interest by the United States, and all marketable federally sponsored agency interest-bearing obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States".

(b) Section 1817(c) of such Act is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "It shall be the duty of the Board of Trustees to invest such portion of the Trust Fund as is not, in its judgment, required to meet current withdrawals, and such investments shall be made so as to secure the maximum possible interest yield, commensurate with the safety of the Trust Fund."; and

(2) by striking out "which are not due or callable until after the expiration of 4 years from the end of such calendar month" and inserting in lieu thereof the following: ", all marketable interest-bearing obligations which are not obligations of the United States but which are guaranteed as to both principal and interest by the United States, and all marketable federally sponsored agency interest-bearing obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States".

(c) Section 1841(c) of such Act is amended—

(1) by striking out the first sentence and inserting in lieu thereof the following: "It shall be the duty of the Board of Trustees to invest such portion of the Trust Fund as is not, in its judgment, required to meet current withdrawals, and such investments shall be made so as to secure the maximum possible interest yields, commensurate with the safety of the Trust Fund."; and

(2) by striking out "which are not due or callable until after the expiration of 4 years from the end of such calendar month" and inserting in lieu thereof the following: ", all marketable interest-bearing obligations which are not obligations of the United States but which are guaranteed as to both principal and interest by the United States, and all marketable federally sponsored agency interest-bearing obligations that are designated in the laws authorizing their issuance as lawful investments for fiduciary and trust funds under the control and authority of the United States or any officer of the United States".

CRIMINAL LAW ENFORCEMENT BILLS

Mr. STENNIS. Mr. President, under our system of government the role of the Federal Government in combating crime is somewhat limited. However, in proper cases, especially those involving interstate transactions and activities, the Federal authorities can and do play important and vital roles. Many crimes do in fact involve interstate activities and transactions. This is particularly true of traditional organized crime syndicates and other criminal groups, such as narcotic and smuggling rings and prison gangs.

Mr. President, I was a district prosecuting attorney for several years, and later I was a circuit judge, a trial judge of unlimited criminal and civil jurisdiction. So I have spent years in the courtroom, dealing part of the time with the matter of crime. I know by experience something about the practical side, but it has been a good while since I was a judge; and things have developed that are far worse in this field than anything I encountered, especially in connection with the drug traffic.

Crimes of all types are on the increase. This is particularly true of organized crime and other crimes which make use of interstate facilities or cross State lines. This is a very serious and important matter and, as a Federal legislator, I am very anxious that the hand of the Federal Government in fighting this type of crime be strengthened to the greatest extent possible. It is, therefore, very important that we act promptly to give the Federal authorities the tools and authority they need, including new statutes to deal with and support those aspects of criminal activities which are proper and legitimate concerns and targets of the Federal Government.

Therefore, I was very pleased to join with the distinguished Senator from Georgia, Senator NUNN, and others in cosponsoring three bills which, in my opinion, would give Federal law enforcement agencies and Federal courts important new powers and tools to use in the never-ending war against crime and other criminal activities. These bills would be particularly effective against organized crime and its use of violence and extortion. Violence and extortion—that, unfortunately, is the tune of the times.

The first of these bills is S. 814, Organized Crime Act of 1981. It is specifically designed to assist the Federal Government in combating the violent aspects of organized criminal activity. However, it would be of general application and therefore would also serve to bolster the Government's efforts to fight all violent crimes. Such crimes have become one of our most serious and alarming domestic problems, and we must do everything we can to suppress them and punish the criminals.

The second bill is S. 1163, Labor Racketeering Act of 1981. There is a great deal of evidence which suggests that, through a system of payoffs, blackmail, and other criminal activities, the Nation's waterfronts are increasingly being dominated by organized criminal activities. S. 1163 is designed to help ease the problems of corruption on the Nation's waterfronts. It increases criminal penalties for violation of the Taft-Hartley Act and provides for the immediate suspension of convicted persons from union offices. It is designed not only to suppress and punish crime but to rid labor organizations and employee pension plans of the influence of persons convicted of criminal offenses.

The third bill is S. 732, legislation to strengthen the fight against organized crime and illegal narcotics. The purpose of this bill is to make financial and tax records an effective tool in piercing the veil of secrecy that protects those at the top of any organized crime ring, whether it be drug smuggling operations or traditional criminal activities carried on by organized crime. This bill passed the Senate as an amendment to the Economic Recovery Tax Act of 1981, but, unfortunately, was eliminated in the House-Senate conference.

I referred to my experience in the courtroom as part of the background that makes me realize the difficulties in connection with effective law enforcement and the difficulties that go with the problem.

I am not satisfied just to hear somebody talk about it or just to read about it. I went out and contacted law enforcement officers in my State, men I personally knew, and knew to be responsible, reliable, and experienced. I talked to the policemen, to the sheriffs, to their chief deputies. I talked to the prosecuting attorneys, not in one place but in several.

These matters are the hard realities; they are problems that permeate almost every segment of other criminal activities.

I will not describe the matters in detail, but there is a ring of runners of narcotics that has been cut off from one area of entrance into the United States, through very effective Federal and State cooperation, and the drug runners have started bringing it in at another place. Part of that route to the marketplace, and the big money, comes through my State.

So, experience with these things makes us realize what it is and makes us more inclined to try to do something about it.

The evidence indicates that the one law enforcement agency that organized crime fears most is the Internal Revenue Service. For a number of reasons, one being the antidisclosure provisions of the Tax Reform Act of 1978, the IRS has almost withdrawn from the battle against organized crime.

I believe that the IRS should once again become the force in crime fighting that it was in the days of bootlegging and rumrunners. If S. 732 is passed, it can do just that. I feel that this is very well reasoned legislation and will retain the very important privacy safeguards and prohibitions against disclosure which will prevent the repetition of past abuses. At the same time, it will enable the IRS to cooperate once again with the fight against ever-increasing organized criminal activities and narcotics problems facing the Nation.

Mr. President, stamping out criminal activities, and particularly organized crime and the violent crimes arising therefrom, is one of the most vital and important functions of our Government. As I stated at the outset, these bills will give Federal law enforcement agencies and Federal courts important new tools to strengthen them in the fight against the wave of organized and violent crime which is sweeping this country. The activities against which these bills are directed fall squarely within Federal jurisdiction and will enable Federal law enforcement agencies to play important roles, in cooperation with the police authorities of the States, in fighting and punishing those who perpetrate crimes of an interstate nature or which are otherwise within the jurisdiction of Federal authorities.

I highly commend the Senator from Georgia and the other cosponsors of these bills on the fine work they did in developing the facts and drafting this important legislation. I was glad to join in cosponsoring these bills. I hope that they will ultimately be passed by both Houses and be signed into law. If that occurs, we will have taken a significant step forward in providing new weapons for use against organized crime syndicates, narcotic and smuggling rings, and other criminal activities.

That is the background of my knowledge of the problem, and I have pride in the work that has been done on these bills by the Senator from Georgia (Mr. NUNN), who held the hearings, and others who contributed to the drafting of these measures.

I will support these proposals in every way I can, so that they can help solve the problems. I do not want to get our Armed Forces into primary activities of enforcing the law, but some modification of the law in order to make more possible the enforcement of a law such as this would be justified. I would be willing to do what I could to help bring about a reasonable and limited modification of our law with reference to the activities of our armed forces, particularly those that pertain to covering matters beyond our shoreline.

Mr. President, I appreciate the Senate having allocated this time to me, and giving me an opportunity to get into the record and out into the public domain the knowledge I have of this problem, and an outline of what I believe is the beginning of a necessary step in the field of law enforcement. I pledge to follow up on this matter and to follow it through with reference to obtaining the necessary legislation.

Mr. President, how much time do I have remaining?

The ACTING PRESIDENT pro tempore. The Senator has a minute-and-a-half remaining.

Mr. STENNIS. I thank the Chair. I yield the floor.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. Under the previous order, there will now be a period for the transaction of routine morning business for not to extend beyond the hour of 11 a.m. with statements therein limited to 3 minutes each.

Mr. STENNIS. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

SOVIET ELITE PERCEPTIONS OF THE UNITED STATES

Mr. MATHIAS. Mr. President, during the Labor Day recess, Senator CRANSTON and I spent a week in Moscow talking with various Soviet officials trying to assess first-hand the prospects for a constructive dialog between the superpowers. I shall be reporting on that trip in full to the Committee on Foreign Relations and will not anticipate myself here.

I would like, however, to mention one strong impression that those talks left with me. It was of the vast discrepancies between how we, in the United States, and how they, in the Soviet Union, often view the same event. Our interpretation of identical empirical data, of specific events—such as what happened in Afghanistan, or what did not happen on SALT II—diverge dramatically and dangerously.

Soviet Foreign Minister Andrei Gromyko, for example, appeared to be genuinely convinced that SALT II was still alive, if not kicking. We may have disabused him of that idea, but only with the greatest difficulty, so tenaciously did he cling to it.

The danger of allowing such misperceptions to exist outside the framework of a continuing dialog are obvious. Left to itself, the Soviet Union will only become more introverted and regressive and difficult to deal with. So, without relaxing our own standards—without, for example, ratifying the situation in Afghanistan, or accepting a SALT agreement that is inadequate to our needs—we must keep some sort of continuing dialog going. The negotiations scheduled to begin on November 30 in Geneva on theater nuclear forces are a welcome beginning.

As if to underscore my own impressions of the misperceptions rampant in the Soviet Union, the U.S. International Communication Agency has just released a research report entitled "Soviet Elites: World View and Perceptions of the U.S." This is an update of a 1980 USICA study, prepared by Gregory Guroff and Steven Grant of the Office of Research, which broke new ground in revealing to us the distorted prism through which Soviet citizens view us and the rest of the world.

Centuries ago Robert Burns wrote:

Oh, wad some power the giftie gie us
To see oursels as others see us!
It wad frae monie a blunder free us,
An' foolish notion.

No power has yet given us that priceless gift. But every now and then we get some insight into how others see us. The USICA study provides insights in abundance. It merits serious attention because, no matter how convinced we are of the correctness of our own world view, in any relationship there are two sides and we cannot lightly dismiss the views of the opposing side, no matter how benighted they seem, except at grave peril to ourselves.

If it were not upwards of 40 pages long, I would introduce the entire ICA report into the RECORD because it deserves wide circulation. In the interests of economy, however, I would like to call my colleagues' attention to the longer study and ask unanimous consent that a brief summary of the report be printed in the RECORD at this point.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

SOVIET ELITE PERCEPTIONS OF THE U.S.

This report—updating a 1980 USICA study—describes the views of members of the middle to upper-middle levels of the Soviet official world, who are primarily of Slavic nationality and mainly resident in Moscow. The data come from in-depth interviewing of 160 West Europeans and Americans who have long-time and recent contact with members of the Soviet elite. These interviews—with diplomats, journalists, businessmen, and academics—provide surrogate information about the world view of Soviet elites.

Soviet elites mix fear and optimism in their world outlook. Fear arises from a continuing sense of encirclement, from a view that the USSR is the only great power that faces every other major power as an adversary, and from an awareness of mounting domestic problems. These fears are in part balanced by a perception of their increased military strength, some Third World successes, and a sense, until recently, that the U.S. had retreated from its world role.

Foreign policy attitudes of Soviet elites are conditioned by their historical view of the Soviet Union as "acted upon"—that the USSR acts defensively and would not be the aggressor in any war.

They do not accept the way in which the U.S. applies the concept of "linkage" to the Soviet Union.

They place detente in the narrow context of Europe alone, seeing it as a way to gain stability and establish Soviet legitimacy there.

With rising concern over the faltering domestic economy, Soviet elites openly discuss and complain about the perceived costs of

Soviet foreign policy—economic and military assistance.

THE SOVIET-AMERICAN RELATIONSHIP

The superpower relationship remains the single most important international concern for these Soviets. The downturn in relations has created doubt about ultimate U.S. intentions toward the Soviet Union and there is a sense of increased American hostility toward the USSR. However, there remains a feeling that the chaotic and frightening outside world can best be regulated through the cooperative efforts of the two superpowers—although this is seen as less feasible than it was a few years ago.

Soviet elites perceive the American threat as follows:

The U.S. is the only power that can severely damage the USSR.

Direct confrontation is most likely to arise unintendedly from third-country issues in which each superpower has a major stake.

The U.S. is the omnipresent obstacle to Soviet objectives and expansion—though these Soviets would use the term "security," arguing that the Soviet Union is not an expansionist power.

The U.S. is technologically more sophisticated and economically stronger. With a determined effort, it could upset the current parity in arms.

The American arms buildup is less an immediate military threat than it is economic warfare designed to bankrupt the Soviet economy.

American embargoes on grain and technology have adversely affected the Soviet economy—a further indication of the U.S. desire to wage economic warfare.

These Soviets believe that recent U.S. policy has been basically anti-Soviet, albeit inconsistent and unpredictable in its implementation.

Soviet elite attitudes toward the Reagan administration are in flux. Some hope remains that this administration will be like Nixon's. But the earlier wait-and-see attitude is waning. Currently, there is a serious debate over whether or not they can do business with this administration.

The administration has established high credibility for its determination to expand American military capabilities. The main Soviet question is whether this is a prelude to arms negotiations or a drive for military superiority. Most elites suspect the latter, but hope for the former.

SOVIET GLOBAL CONCERNS

There is a striking discrepancy in Soviet elite attitudes toward China. China is viewed as the enemy and the primary long-term threat to the USSR. But even those who recognize that China is not currently a military threat still exhibit a visceral fear of the Chinese arising from deep racial, ethnic, ideological, and historical animosities.

Afghanistan has receded as an issue, replaced largely by concern over Poland. Soviet elites assert their inherent right to deal with instability on their own borders, although they increasingly admit that they miscalculated both Western reaction and the difficulties they would encounter in Afghanistan.

Most elites deny that the USSR had broader aims of expansion beyond Afghanistan. They seem confused about U.S. interest in such a remote area, and why it should affect the superpower relationship. However, while seeing Western reactions as inappropriate, they have accepted the persistent fact of Western concern.

Whether or not Soviet elites understand the linkage between Afghanistan and Western reactions, they understand instinctively the importance of Poland to East-West relations. Soviets are distinctly unsympathetic to the Poles, seeing them as ungrateful for Soviet rescue of the Polish nation in World War II and for Soviet protection and aid since. Few elites believe that intervention is imminent. Yet, they seem to accept unquestioningly that if activities in Poland were defined as anti-Soviet (or anti-Russian) they would have a natural right to act.

Few, if any, Soviet elites see Western Europe as a military threat. NATO is seen largely as an extension of American power into Europe—the mirror image of the USSR's Warsaw Pact, and thus unsettling.

Soviet elites prefer to see and deal with Western European countries in bilateral terms. They downplay or avoid discussing European institutions, such as the EC, which suggest movement toward greater integration. Their attitudes toward individual countries vary, but they are most ambivalent about the Germans. West Germany is admired, disliked, even feared.

UNDERSTANDING U.S. SOCIAL/POLITICAL PROGRESS

Soviet elites greatly value personal relationships as underpinning international relations. They see the continuity in their system as a great strength, while viewing the changing cast of American political personalities as both a systemic weakeness and an obstacle to their understanding of the U.S.

Soviet elites' understanding of U.S. policy and society varies greatly in breadth and depth. The most sophisticated students of American life have a basic grasp of the mechanics of American government, often with an amazing command of factual detail about individuals and institutions. There may even be a small handful of specialists who have developed a real "feel" for the U.S. foreign policy process, but they have great difficulty communicating their understanding to other elements within the Soviet elite.

The very openness of Western societies most confuses Soviet elites. They find it virtually impossible to understand the role of such diverse elements as the media, a loyal opposition, or public opinion—which are controlled or nonexistent in their own society.

Soviet elites' ambivalence is most pronounced in their attitudes toward American society. The concept of freedom is both admired and dreaded. To them it means the ability to travel freely, at home and abroad, to be socially, geographically, and occupationally mobile. This kind of freedom is treasured by Soviet elites, prized mostly for its absence in their own society. But American freedom is also perceived as license, lack of control verging on anarchy, and loss of security.

Finally, while condemning the U.S. for being too materialistic, Soviet elites are unself-consciously materialistic themselves. Nonetheless, they assert that they have retained many of the traditional, even spiritual, values of family, friendship, and nature which provide life with security and meaning, and view the U.S. as a place where these values have all but disappeared.

THE DETERIORATING ECONOMY

Mr. EAGLETON. Mr. President, by any fair evaluation, the economy is deteriorating very, very rapidly. The figures and statistics are very ominous on a number of fronts: Inflation, unemployment, long-term interest rates, auto sales, housing starts, business bankruptcies and closings, et cetera. Pick whatever statistic you like and the prospect is the same—grim.

Mr. President, I ask unanimous consent to have printed in the RECORD three items which I urge my colleagues to read.

First, the now famous speech by Henry Kaufman, vice president and chief economist of Salomon Bros., delivered before the National Press Club on April 22, 1981. Kaufman predicted the economic dilemma we are now in. He was right and he was early.

Second, Mr. Kaufman's more recent speech, which he delivered before the Financial Executives Institute 50th International Conference in New York City on October 12, 1981.

Third, an article by former Secretary of the Treasury and former chief executive officer of the Bendix Corp., Mr. W. Michael Blumenthal. Mr. Blumenthal who is currently chairman of the Burroughs Corp., points out to President Reagan some very valuable lessons he might learn from mistakes made during the Carter administration when President Carter "lost the opportunity to show decisive leadership by adjusting his program to fit new conditions."

President Reagan must now realize that he has a major economic dilemma on his hands. The tax cut signed into law in August was so bloated as to make nightmarish Federal deficits inevitable for years and years to come. Even the President's closest economic advisers recognize this and whisper it in private. President Reagan must act and act now to rectify those excesses. If he does not, he will remain the captive of monetarist economics. He will be traveling the road of Milton Friedman and Margaret Thatcher. It is a catch-22 road of grave economic consequences.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

THE POTENTIAL FOR CONFLICT IN NATIONAL POLICIES AND IN FINANCIAL MARKETS

(By Henry Kaufman)

When I was asked to address the National Press Club, I readily accepted the invitation because I believe it is more important now than ever before that there be an ongoing exchange of views between our political and financial centers. Many members of this distinguished Club contribute to the assessment of the critical issues facing our nation. More than any other group of journalists, you are responsible for monitoring the links between politics and economics, and for discerning the differences between the political ideal of what should be and the reality of what is and what will be. This task, especially where it involves economics and finance, has become formidable in recent years. No longer can we rest assured that our economy and financial markets will behave in the classical cyclical pattern, with all the predictability which that implies. This assurance has been shattered by structural changes, by many inept national stabilization strategies, and by some external shocks.

The economic recovery that began last summer can also be distinguished from earlier business expansions in a variety of ways. These unusual elements include the following: (1) The economy is incorrectly perceived as brittle, when it actually has good momentum; incidentally, similar misconceptions were held at some earlier comparable periods. (2) Inflation is not about to be resolved. (3) Fiscal policy will continue to be expansionary. (4) Therefore, a great burden will be placed on monetary policy and on the financial markets. The net result is likely to be conflicts in national policies and in financial markets.

UNDERESTIMATING THE ECONOMY

Underestimating the underlying momentum of the economy is reflected in prelimi-

nary economic statistics and in many forecasts. This shortcoming in the preliminary data was vividly illustrated a few months ago by the large upward revisions in Gross National Product data for the past decade. For example, for the economic expansion in the years 1976 through 1979, real GNP was revised upward by $148 billion total, or 5.7 percent, business outlays for plant and equipment by $71 billion, or 8.5 percent, and personal savings as a percentage of disposable income averaged 0.7 percentage point higher. The errors contained in many of the preliminary statistics serve notice on us all to recognize the inadequacies of a lot of current information.

The inadequate recognition in many forecasts of the underlying strengths of the economy can be ascribed to the failure to realize the economic impact of a more liberated financial system. What years ago would have been regarded as large, punishing increases in interest rates no longer brings to a quick end an overheated business boom, or rapidly restores the economy to stability. The adaptation of finance to inflation has changed all that.

Consider these differences between two periods 14 years apart. In 1966, when the economy experienced the first full-fledged credit crunch, markets were tight and extremely apprehensive, as interest rates reached the then lofty highs of 6 percent for the prime loan rate and 5.56 percent for three-month Treasury bills. Indeed, the mortgage and housing markets virtually ceased to function when corporate bond rates broke out of a 100-year trading range and exceeded 6 percent. By contrast in the past six months when the prime touched a record of 21.50 percent and three-month Treasury bills 17.05 percent, financial markets were not even as taut or as apprehensive as they had been back in 1966. I find no comfort in this change. Yet, it does suggest two things. One is the extent to which climbing interest rates have lost their restrictive influence on the economy. The other is the rocket trajectory that interest rates may follow if we continue to rely upon them as the main force for stabilizing the economy. Indeed, in contrast to the past, it seems that any given increase in interest rates is less inhibiting, and any decline is more stimulating.

The misreading of the implications of interest rate increases in the second half of 1980 was partly responsible for many of the "double dip" economic projections for 1981—projections that seem to me to be highly unlikely to hit the mark. The 5 percent annual rate of real growth estimated on a preliminary basis for the first quarter shows remarkable economic resiliency, reflecting the strength of a more service-oriented—and consequently less cyclically vulnerable—economy, the support from a very expansionary fiscal policy, continued high levels of consumer spending, and evidence of a new surge in business expenditures.

In fact, the heady interest rates thus far in this business recovery have been a fundamental element of support to the business picture, because high financing costs have forced business to maintain low inventories. All this transpired without a full cyclical rebound in new housing activity and in domestic auto production. A cyclical participation by these two laggard sectors would have caused anxieties about economic overheating instead of "double dip." While the auto market may continue to show moderate improvement for the balance of the year, there are no such prospects for new housing. Construction activity is the victim of spiraling costs, diminishing incentives to provide financing, and limited credit. The pressure on deposit-type institutions specializing in housing financing cannot be lifted quickly. Their capital has been impaired by their inability to join the ranks of those institutions that have adjusted to a new world of finance by means of more or less fixed spreads against floating costs. This is the new key to financial viability.

AN EXPANSIONARY FISCAL POLICY

While some slowing in the pace of economic activity is probable this quarter, another acceleration is in prospect for the second half. The powerful stimulative combination of large tax cuts and sizable increases in defense spending is likely to more than offset the restraining influence of a slowing in Federal expenditures, even with some presumed revenue feedback from the tax cut. Think of it in these terms for fiscal 1982, according to the Administration's proposals, stimulants from tax cuts will amount to $54 billion and increases in defense spending with total $27 billion. But, constraints resulting from the sharply slower growth of non-defense outlays of the Government will total $46 billion. The stimulants are bound to have a greater demand multiplier impact than the negative impact coming from a slower growth in non-defense outlays.

The influence on our economy caused by the rise in defense expenditures—expenditures that I believe are vital to our nation—is probably not fully appreciated. We have not had a flourishing defense sector for well over a decade. The last giant step-up in defense outlays was during the height of the Vietnam War from 1966 to 1968, when real defense spending ballooned by an average annual rate of 13.7 percent. During that period, the rate of inflation was low. The GNP deflator averaged only 3.5 percent, the U.S. budget deficit averaged only $12.6 billion a year. From 1969 through 1978, defense outlays contracted in real terms by 3.9 percent yearly. Now, the average annual increase in real defense outlays, as proposed by the Administration, will be roughly 9 percent a year from fiscal 1981 through 1984. And this time around, the increase is coming when inflation is high and budget deficits are large (see Table 1).

Early signs of the potential impact of increased military expenditures are beginning to be seen. For example, the monthly military prime contract awards of the Defense Department averaged 30 percent higher in 1980 than in 1978—twice as large as average awards during the 1966–68 era (see Chart 1). Unfilled defense orders at manufacturers totaled $63 billion early this year, compared with $48 billion a year ago, and $35 billion at the start of 1978 (see Chart 2).

I do not question the goals of the new Administration. Lowering the profile of our Government's role in economic life is laudable and deserves support. The new fiscal policy, however, is exceedingly expansionary, does not pursue a course that fights inflation vigorously along the way, and will place nearly all the anti-inflation efforts squarely on monetary policy.

I am not convinced that there is real historical evidence to suggest that across-the-board tax cuts will quickly encourage Americans to work harder or to save more. Can it really be assumed during the next year or two that this fiscal strategy will reduce wage settlement increases to single digits, or will remove the rigidities in our wage and price structure? Calling attention to the beneficial impacts of earlier tax cuts is misleading. There is no precedent for taxes being lowered against a backdrop of rising defense expenditures and high inflation. I suspect that inflationary expectations will not be curbed by the slowing in the growth of Federal expenditures; expectations will remain high because the financing requirements of the Government will remain high.

At this time, it is also important to recognize that beating inflation becomes more difficult as an economic expansion ages. I am not talking here about the next quarter or two. When a business recovery is young, inflation is slowed temporarily by a variety of transitory forces. Productivity, benefiting from low utilization of resources, jumps sharply. Demands are held to moderate proportions by business through conservative inventory policies and modest increases in capital outlays. If inflation is to be blunted as the economy continues to grow, fiscal expansion should then quickly move to neutrality. Unfortunately, this is not the direction that fiscal policy is heading during the next few years. There is one aspect of inflation from which we should learn at least one lesson from the past—namely, that once an economic expansion moves beyond its infancy both wage and price pressure persist. By next year, this current business recovery will be well out of its infancy. This may well present an unusual problem because the inflation rate has remained disquietingly high, even in the infancy of the business recovery. Furthermore, a much desired acceleration in investments in business capital can exert substantial upward pressure on wages and prices because such investments vie for resources that become scarce in the mature phases of expansion.

As I follow the debate concerning the new economic policy proposals, I find that such labels as "economic liberal" or "economic conservative" have lost all their meaning. Many of my economist friends, who were, I thought, conservative tell me that the economy is brittle. This was once the buzzword of my friends with liberal identities. They are now fearful of too large a fiscal stimulus. On the other hand, my conservative friends, who always advocated a balanced budget, now say a budget deficit to finance tax cuts is part of the essential transition for rebalancing the role of our Government. When many of my liberal friends were in power, the Federal Reserve was implicitly saddled with the burden of limiting excesses in the economy. Now, my conservative friends have made this an explicit assignment, while continuing with an expansionary fiscal policy.

THE UNUSUAL FEATURES OF THE FINANCIAL SETTING

Heavy reliance upon monetary policy to arrest a wage and price spiral and to temporarily halt other excesses is not new. What today is different from the past is the precarious state of our credit markets even before the current economic recovery moves out of its infancy. Let me illustrate how precarious the financial footings of the private sector are at this early stage of the business recovery.

In the household sector, the financial progress is deceiving. While mortgage and installment debt payment relative to personal income was reduced significantly, this ratio still stood at 21 percent in the fourth quarter of 1980—higher than at any time prior to 1977.

In the business sector, hardly any improvement is visible in corporate balance sheets or in the quality of corporate earnings. Typically, business corporations fund short-term liabilities by financing long, both at the tail end of recession and in the first year or so of business recovery. In the past 20 to 30 years, each of these temporary measures has done little more than interrupt, briefly, an otherwise constant deterioration in the structure of corporate balance sheets. A corporate funding effort was only briefly undertaken last year from about May through July, when an unrivaled volume of new corporate bonds reached the market. Thereafter, because interest rates rose sharply and were very volatile, business coporations adopted an atypical financing strategy for this phase of the business cycle, by resorting primarily to short-term credit facilities.

As a consequence, business corporations are moving through the first year of the current business expansion having done little, if anything, to redress their drastically

weakened financial positions. The ratio of liquid assets to short-term liabilities for all nonfinancal business corporations was only marginally above 1979's record low of 0.65 by year-end 1980. The ratio of corporate long-term debt to short-term debt continued to decline, reaching a record low of 2.6 to 1. The interest expense of corporations in 1980 equalled a record high 45 percent of net profits before taxes, as compared with only 14 percent for the 1960s. All these facts take on added meaning if we consider that, as an economic recovery matures, the financial position of corporations becomes more strained.

FINANCIAL IMPLICATIONS

With this backdrop in mind, what can be said about financial prospects for the U.S. during the next year or so, given the heavy influences on fiscal expansion and monetary restraint? As noted earlier, the U.S. Government will continue to be a large demander of credit. According to the Administration's own estimates, the U.S. Treasury's net new cash needs will total an estimated $62 billion in fiscal 1982 (consisting of the unified budget deficit and the borrowings of the budget agencies, which obtain funds directly from the Treasury). These demands crowd out many business and household borrowers. Hardly a week goes by in which the Treasury is not a net borrower short term. Every month, there is a short-dated coupon issue. Two out of every three months, a mammoth long bond issue is sold.

As corporate borrowing continues to increase, corporate liquidity will erode further. Short-term liabilities will mount. The availability of long-term funds will shrink due to the preferences of investors for short-term high-yielding investments, and the preempting of long-term funds by the U.S. Government.

The availability of funds for housing will continue to be constrained. The savings deposit institutions specializing in housing will try to escape from their specialized functions, and, during this transition most of them will behave more like convalescents than vibrant institutions.

In the credit markets, shorter maturity financing through commercial paper and shorter-dated bonds will accelerate. This will penalize not only business corporations but also state and local Governments, which, in particular, have pressing requirements to finance long term due to the nature of their underlying projects.

In the direct lending market, the importance of commercial banks will increase, but the increasing demands on them will strain their rather slim capital structure.

When the burden of restraining a headstrong economy falls heavily on monetary policy, then higher interest rates are bound to result. Under the monetarist approach, it is difficult to say how high interest rates will go but it is safe to say they will go very much higher than the levels prevailing currently in all maturity sectors. The reasons are found in several features contained in monetarism. For example, a central element of monetarism is to raise, or lower interest rates to whatever level is required to maintain the growth of the money supply within a predetermined targeted range. This, by itself, suggests the continuation of both interest rate volatility and volatility in the yield curve with the likelihood, however, that a negative yield curve will tend to dominate the financial markets for the next year. A negative yield curve will direct more funds away from long markets and will, therefore, further destabilize our debt structure.

Let me also call your attention to two other aspects of major importance concerning monetary policy that will continue to come into play in the period ahead. They involve the perception of risk and the role of financial institutions in thwarting the intentions of the new monetarism to stabilize the economy.

The abandonment of interest rate management a year and a half ago carried with it the underlying argument that greater interest rate volatility would heighten the perception of risk in financial decisionmaking that was previously lacking. Despite the experience of sharp swings in interest rates and the persistence of an inverted yield curve, credit seems to be readily available at some price. Consequently, a perceived interest rate risk is still lacking under monetarism in our new evolving credit system. The interest rate risk is being taken out of both investing and lending decisions through the creation of new floating rate instruments and the sharp increase in short-term financing. As a result, adaptive institutions push hard to create more debt; the supply of credit is controlled by interest rate spreads rather than by interest rate levels. This, in turn, fosters the perception that there is little risk of credit denial under any set of monetary policy rules. Indeed, this perception may be reinforced by monetarism. The mechanics of monetarism imply that interest rates will be allowed to act as self-correcting force in restoring the rise of money growth to its targeted path. This has been clearly evident in the past nine months, when a sharp surge in money supply was accompanied by rising interest rates, and a slowing in recent months was followed by a fall in rates.

Thus, it appears, the inherent promise of monetarism is made, that once a rapid rise in money growth is halted, interest rates will be allowed to sink rapidly. This creates the ongoing expectation that the market will not be disciplined by credit denial or lastingly high interest rates. Risks will be perceived as high only when interest rates rise to unexpected heights in a brief period, or when non-monetarist tactics are employed to limit the ability of financial institutions to expand liabilities.

In other words, I would expect financial institutions to continue to push hard to create new debt as interest rates rise, and that we in the securities industry will use all our ingenuity to develop many new credit instruments to drive the credit creation mechanism forward. As a result, the gap between classically defined money and debt and nominal GNP will widen until an excruciating high interest rate level crunches the operating decisions of some in the real world.

SOME PREREQUISITES

In forging an effective national seabilization policy, we should recognize that the American economy is as yet far from brittle, but rather is resilient and that the most urgent need is to strike hard against inflation. In this effort, we face formidable obstacles. Inflation is deeply embedded in our expectations and patterns of behavior, and knocking down the inflation rate as we move to a higher utilization of real resources would be an exceptional feat. Massive tax cuts, large leaps in defense spending, and a slowdown in other Government outlays will not, in my opinion, be enough. These measures will place an extraordinary strain on monetary policy, leading to further distortions in financial markets, much higher interst rates, and additional fragility of our financial system.

No one can design a full set of policy prescriptions that will alleviate our problems easily. I applaud the Administration's proposals to strengthen our national defense, to deregulate a variety of business activities, and to find new ways to improve productivity. At best, I can only suggest a few priorities as I see them from my vantage point in the business and financial community.

To fight inflation head on, the need is for the Government to achieve a balanced budget in fiscal 1982. This would chop inflationary expectations and, of equal importance, would reduce the role of the Government as a powerful demander of credit, thereby freeing savings to finance the private sector. An across-the-board tax cut is inappropriate. A balanced budget achieved through selective tax cuts and tough controls on expenditures would reduce the chances of a credit clash. What we are faced with now is the need for investment incentives more broadly-based than accelerated depreciation. The capital gains tax and double taxation of dividends should be eliminated. This would enhance the capacity for new equity financing and reduce the reliance on debt. The need is for our Government to enforce competitive wage and price practices and not leave adjustments in some sectors to the vagaries of markets where competition is imperfect. The need is also to recognize that mechanical monetarism should not be the main bulwark against inflation. Financial intermediaries should experience the penalties of monetary restraint and not just pass them along to others. Otherwise, the real world will become the hostage of financial institutions.

I believe we have an opportunity to steer the economy back to stability. This opportunity lies in our willingess to do the most difficult thing first—such as balancing the budget next year and enforcing vigorous price competition in economic markets. Such initiatives would strike the hardest blow against inflation and in favor of the credibility of Government to manage effectively.

CATCH 22 IN THE AMERICAN ECONOMY AND CREDIT MARKETS

(By Henry Kaufman)

There is an increasing uneasiness about our business and financial prospects, not just on Wall Street but throughout the nation. Conditions in our economy and financial markets are far from ideal at this stage of the current business recovery, which is only one year old and is already showing signs of faltering. In no way has the present expansion had the consistency and vitality of past comparable periods. Financial markets have been under tremendous pressure. These market manifestations historically occur at the end of an economic boom rather than at the start of a recovery.

Extricating ourselves from this unusual setting of a premature weakening in the business cycle and taut financial markets will be arduous. We are encumbered by years of misbehavior as a nation and as individual participants in the social, business and financial process. In addition, despite the Administration's best intentions to do the right thing, its program is creating conflicts in the economy and the markets. The root of this problem is the butting of heads between a stimulative fiscal policy and a Fed policy of monetarism. This combination is continuing to foster the "sputter and spurt economy" we have come to know so well. The underlying risk in this policy conflict is that our credit system will weaken further and, in turn, our economy will experience a greater deterioration.

We are now caught up in a world of Catch 22 situations, a sort of paradox wherein one set of events is contradicted by another set of events through the very nature of the situation. Escapes, if any, are few and hold real problems. The chances of going wrong in anything we do are many. In today's predicament, as in all Catch 22 traps, the best-intended decisions may produce wrong results; measures of relief for some may produce unanticipated pain for others. Under these circumstances, we must regard it as an achievement if our economy continues to sputter and spurt. To expect more, would be downright unrealistic.

There is no parallel in the postwar period for the current business expansion, which began only four quarters ago in the third quarter of 1980. These four quarters have in-

cluded two consecutive quarters of growth, a subsequent quarter of contraction, and another that was either down a little or at best flat. In contrast, in each of the business recoveries in the post World War II period, economic growth was generated in every quarter of the first year. These first-year economic recoveries produced real gains of about 7 percent on average compared with only an estimated 2 percent–2½ percent for the past 12 months. The most glaring weaknesses in the current cyclical upswing have been in the housing and auto sectors. Typically, these are very strong in the initial phases of a business recovery, together with cyclical support from consumption, Federal spending and, to a lesser extent than in the past, from renewed capital outlays by business.

The roots of the present-day sputter and spurt economy go back before 1981—perhaps as early as 1978, when many lenders and borrowers were misled by the resiliency in the economy when interest rates, rising to new highs, failed to precipitate a recession. The experience in the first half of 1980 should also be viewed as part of this sputter and spurt. The so-called business recession in 1980, brief but dramatic to be sure, was induced by the imposition of credit controls and ended with their removal, only to be followed by more sputter and spurt.

The Reagan Administration, upon assuming office early this year, was faced with this tricky economic pattern. It was confronted with many structural changes and embedded problems, long in the making, that needed solutions. For the moment, it is sufficient to say that in the past few decades, our consumption and life style have overwhelmed our industrial and innovative zeal. Our living standards have been threatened by runaway oil prices and inflation. The role of the dollar as the key reserve currency and our position as the effective leader of the Free World have been undermined by the loss of our international competitive strength and by the relative weakening of our military power.

FISCAL POLICY: INTENTIONS VERSUS RESULTS

The new Administration has endeavored to resolve these problems by a combination of tax reductions, reduced civilian governmental expenditures, increased military outlays, deregulation of business activity and monetary discipline which depends on the monetarist approach. Unfortunately, the Administration launched its fiscal program without factoring in the potential for conflict between a stimulative fiscal policy and a Federal Reserve policy of monetarism.

As matters now stand, it will be difficult to avoid a very large budget deficit in fiscal 1982, that is, the fiscal year which began this October 1. At the outset, the budgetary choices may have been difficult, but they were clear-cut given our obvious problems of curbing inflation and with achieving sustainable real growth. If most of the step-up in defense spending is essential for national security reasons (which I agree with), then the tax cut should have been viewed as a discretionary decision and would have been prudent only if the resultant budget were in reasonable balance.

The actual interaction of these programs is likely to result in a very large U.S. Treasury financing deficit of $80–85 billion in fiscal 1982. The magnitude and scope of the U.S. Treasury cash needs alone are awesome for a sputter and spurt economy. There is not even the promised relief of a profile of declining budgetary requirements, since my fiscal 1982 estimates compare roughly with $81 billion in fiscal 1980. For the next six months alone, the U.S. Treasury will borrow about $60–65 billion net—a record takedown for this period.

These huge cash needs will require the Treasury to enlarge offerings in nearly all maturity sectors. For example, the weekly bill offerings will rise to $10 billion in the current year compared with $9 billion at the end of fiscal 1981 and $5.7 billion five years ago. The monthly two-year note, which averaged $4.1 billion just two years ago, will increase to an estimated $5.25 billion next year.

Because of the current policy of reducing taxes over the next two and a half years, flexibility in fiscal policy has been clipped. Eliminating part of the tax cut in the later years would do little to relieve the immediate deficit, and further cutting of budgetary expenditures poses difficult trade-offs. Of the estimated increase of $60 billion in Federal expenditures in fiscal 1982, roughly $30 billion is for defense, $10 billion is for debt servicing, and $20 billion is for everything else combined. Less spending for defense may help alleviate current problems for the domestic economy, but only at the possible cost of difficult-to-ascertain political and economic risks later on.

On the other hand, if reduced civilian expenditures are to be emphasized, then they will have to be much larger than officially requested in order that the present difficulties in the credit markets be ameliorated. Even here, however, a Catch 22 situation could arise. A monetarist credit policy might not be able to react quickly enough, following the introduction of a tough fiscal stance, to avoid an economic contraction. In addition, large cutbacks in Federal spending may, to some extent, increase the budgetary needs of state and local governments, thus transferring the cash needs from a strong borrower to weaker ones.

Conceptually, it is, of course, true that budget deficits need not be inflationary as long as the central bank does not monetize the debt through the creation of an excessive volume of new reserves or as long as the country is in a real recession when non-Federal credit demands are weak. However, it would be folly to asume that state and local governments, corporations and consumers will readily forego some of their credits demands simply because the U.S. Treasury has large cash needs. These sectors will fight for the limited funds available by bidding up the price of money as, in fact, they have been doing for some time. The onset of a recession would eventually reduce these private sector demands. But an economy which continues to sputter and spurt will maintain the high volume of private sector credit demands.

THE CREDIT OPTIONS

Our current problems are intensified by the continued decline of liquidity in our credit system, which neither the policies of fiscal stimulus nor monetarism is about to reverse. Indeed, a noose is now tightening around the credit markets, painful in some sectors, but not yet too uncomfortable in others.

Housing: Housing and housing financing institutions are among the sectors bound up most tightly. Housing activity, again at a new low, is once more a victim of high interest rates. Earlier, many had claimed that housing would be on a more equal footing with other credit demanders because of the invention of variable interest rate mortgages, the transformation of the mortgage from a local to a national securities obligation, and an array of governmental support programs. Quite understandably, these changes have not sustained housing because the other two key demanders—the Federal Government and business—will always win. The reasons are clear-cut. The cash needs of the U.S. Government are never restrained by interest rates.

Business corporations also have access to a wide range of financing alternatives, often financing long-term projects through short-term borrowings. In addition, they at least try to pass along interest payments to their price structure. Unless housing recovers soon—something which I believe is unlikely—the structure of the housing market will undergo further change. There will be some shift toward renting, thus firming this market. New home construction will continue to be caught up in the cross fire of high interest rates and high building costs.

The convalescence for housing financing institutions, however, is far from complete. Their revitalization hinges largely on a very substantial fall in interest rates and a prolonged period of a sharply sloped positive yield curve. A sputter and spurt economy will not facilitate the creation of such an interest rate structure; a prolonged recession, of course, would. In the meantime, a number of new measures have been introduced to alleviate the pressure on these institutions.

One is an extended borrowing facility at the Federal Reserve discount window. These borrowings have risen to around $400 million, but the restrictions accompanying them do not re-establish these institutions as vibrant organizations. Rather, they help them to go on convalescing.

Another measure—the All Savers certificate—will probably be of some marginal help to the savings deposit institutions but here, too, some Catch 22 aspects are evident. Commercial banks as well as savings banks and savings and loan associations are authorized to issue these certificates. As a result, the most deposit-starved institutions are not the only issuers. In addition, the cost of doing business will increase for the deposit institutions to the extent to which passbook savers transfer into All Savers. The advent of the All Savers is also unlikely to increase the overall new flow of savings in the United States.

Consequently, the channeling of savings flows away from money market mutual funds and into deposit institutions will have adverse market repercussions. Money market mutual funds finance the U.S. Treasury, business corporations and commercial banks through their purchases of Treasury bills, commercial paper, bankers' acceptances and negotiable CDs. These borrowers are powerful bidders for funds and their financing decisions are relatively insensitive to interest rate levels.

The third measure that has been designed to benefit housing financing institutions—namely, the regulation allowing these institutions to write off the loss on securities investments over the life of the investment—also has broad market implications. On the one hand, the sale from portfolio of discount U.S. Government, municipal and corporate and mortgages improves the liquidity of the thrift institutions. On the other, the markets for these obligations will come under greater pressure because of these sales, particularly at a time when both corporate and municipal secondary markets are losing their resiliency.

All three measures are interesting departures from recent trends toward deregulation and from letting the market-determined price of money allocate credit. Indeed, these are new forms of credit allocation schemes. They raise the question of how other sectors would be accommodated if they become incapacitated in the credit markets.

Municipals: The municipal bond market is also hanging on tenterhooks and its vitality will continue to be sapped by a sputter and spurt economy that is being manipulated by fiscal stimulus and monetarism. Because I have written in detail about this market recently,[1] let me merely summarize the dilemma. The market in tax-exempt securities has been placed at a disadvantage by the recent tax cuts, by the issuance of the All Savers certificates and by the slowing of Federal grants and aids which may swell state and local budgetary requirements.

State and local governments are finding it

[1] "The Crowding of the Municipal Bond Market," Salomon Brothers Inc. August 1981.

difficult to adapt their financing to the new world of spread banking—an institutional technique that attempts to establish rates of return on assets at a fixed differential against the floating cost of liabilities. The municipal market is further handicapped by only a small volume of purchases by commercial banks. In the old days, banks were the largest institutional investor.

Pressed by strong loan demand, commercial banks are taking down only about 16 percent of state and municipal net new issuance this year. In the 1960s and 1970s, there were several years when these banks bought anywhere from 60 percent to 100 percent of the net new supply. Moreover, the high level of short-term interest rates in the taxable fixed-income sector is drawing the savings into money market funds that otherwise would have moved at least partly into tax-exempts. Another handicap that municipals face is the lack of support from the kind of futures market which has been very helpful in the distribution of U.S. Governments and, to a lesser extent, to corporates and mortgages.

Business Corporations: The Catch 22 in business finance is gradually surfacing. Corporate dependence on short-term financing continues to rise at an alarming pace. Financing alternatives in the bond market have been drastically reduced. Many corporate managements, in their financing strategies, have decided to tough it out in the short-term borrowing sector for the duration, which means until there is a large decline in long-term interest rates, of the order of 200–300 points in corporate bond yields.

The persistence of short-term corporate financing, at a time when liquidity and capitalization ratios were already historically low, has been unprecedented. The ratio of net new bond and stock issues to total corporate external financing will be an estimated 27 percent this year. It was 44 percent in 1980. The last time corporations made a meaningful effort to fund liabilities back in 1975 and 1976, this ratio was 94 percent and 53 percent, respectively. Because corporations failed to fund short-term debt to any significant extent, the ratio of long-term to short-term market debt hit a record low of 2.4 to 1 at midyear and the ratio of liquid assets to short market debt fell to an unprecedented low of 0.60 to 1.

The challenges facing corporate financial officers are not only awesome but treacherous. Financing long today at 17 percent to 19 percent interest costs, depending on the credit rating, must be based either on strong convictions about a continued high level of long-term interest rates and/or the need to preserve financing alternatives by a business which has ongoing financing needs and/or a direct arbitraging opportunity.

The decision to remain short should reflect the capacity to tap short-term funds under all market conditions or, alternatively, limited borrowing requirements, and the ability to maintain a good credit rating despite the growth of short-term debt.

Regardless of where business has been financing, the high level of interest rates, combined with the rapid growth of the variable interest rate cost structure, is taking its toll on corporate profits. The spotty recovery in profits during the past year is due not only to the equally spotty economic recovery but also to the rising volume of interest payments—payments which are increasingly uncontrollable in cases where short-term financing is dominant.

For example, the interest expense of nonfinancial corporations accounted for 30 percent of profits before taxes during the first half of 1981. This ratio averaged 25 percent in the 1970s and only 19 percent in the 1960s. In the past, the development of only spotty strength in profits has been one of the harbingers of a flight to conservative business financing practices.

Another precursor has been the tightening of short-term credit availability. The first harbinger is here. The second is still to show itself. I would strongly suspect that the boom in commercial paper issuance is unlikely to be a sustaining phenomenon.

The Catch 22 for business finance revolves around the following. Meaningful funding of liabilities can only be facilitated in business recessions and in the early part of a business recessions and in the early part of a business recovery. This has not happened in the past few years. An economy moving ahead vigorously—or even sputtering and spurting—will keep corporate external financing needs high. Against such a backdrop, corporations could at best only curtail the deterioration in their liability structure. More likely, corporations will risk increasing their dependence for funds on overloaded volatile sectors of the credit market—commercial paper and bank loans.

Under nearly all circumstances, except in a deep and prolonged recession, the pressing need to fund corporate liabilities places a high floor under corporate bond yields. A fall of just 200–300 basis points in long-term interest rates will bring out a long line of new corporate bond issuers. To avoid mishaps over the near term, corporations may attempt to gain some breathing space for a few years by resorting to the issuance of notes in the two to four-year maturity range.

In a macro sense, the deterioration of liquidity in our credit structure reveals broader and more disturbing implications. Loans and investments are generating less cash flow than was true some years ago. As a result, fictions have been created in market terminology. Investors and lenders hold many assets that are classified as either liquid or short term, and borrowers denote these claims as current liabilities.

But, in fact, their liquidity under our more liberal credit practices often hinges on the availability of new funds and the functioning of a secondary market. The secondary market is highly active in the money market but has shrunk in some sectors of the long market. When money supply growth slows down, as is expected with monetarism, then the self-generating cash capabilities of these instruments are vital if they are to be fully liquid assets.

Banks: Now, at first blush, it would seem that the commercial banks have fared well in the financial turmoil of recent years. They have moved into spread banking, generated higher profits, and in some areas have even enlarged their market share. We should recognize, however, the changing role of commercial banks and their underlying liquidity problems.

Banks hold a small volume of liquid assets for this stage of the business cycle. Their net increase in holdings of U.S. Governments and municipals will total an estimated $35 billion for 1980 and 1981 combined. In 1975 and 1976, these investments increased by $51 billion (on a much smaller base).

Concurrently, bank capital continues to be a shrinking proportion of bank assets. The new structure of our credit system places banks more akin to a lender of last resort, rather than as just another financing source. At one time, the open securities market were an important source of liquidity to the banks. Corporations issued short-term securities and bonds to pay off bank loans. Today, commercial paper issuance is booming, to be sure; bank lending is strong, but corporate bond issuance is at a low ebb; banks are financing corporate permanent working capital and capital outlays with short-dated liabilities. They are also the contingent source of liquidity for the commercial paper market with back-up lines of credit.

Indeed, a new off-balance sheet banking accommodation—the credit line—is flourishing. These credit lines encourage corporations to finance short because they are assured of access to funds—regardless of market conditions. As of the end of July, these unused credit lines totaled $340 billion as compared with only $175 billion in 1977.

Bank assets in the same period have grown from $880 billion to $1,225 billion. By assuring access to credit, these lines are a form of credit allocation, encouraging shorter-dated financing for corporations, and complicating the task of monetary policy which, when it moves to restraint, wants the private sector to adopt prudent practices and to perceive uncertainty ahead.

MONETARISM

Now, let me turn to monetarism and explain why, combined with fiscal stimulus, it is contributing to sputter and spurt economic activity and to potential credit problems that may have adverse economic consequences. From a financial perspective, these distinguishing features of monetarism are worth noting.

Monetarism means a steady and moderate injection of money. This approach contributes importantly to wide swings in interest rates and, in turn, encourages risk aversion by both demanders and suppliers of funds. These wide swings in interest rates occur in both short and long maturities, with the greater volatility at the short end because monetarism must take short rates to whatever level is required to slow the growth of money.

As a result, the yield curve, which is heavily influenced over short-term intervals by the Federal Reserve's need to hit its monetary target, swings widely. Consequently, the markets do not benefit from prolonged periods of a positively sloped yield curve as was evident for long periods in previous business expansions. Under monetarism, financial markets benefit from such a curve only during recessions.

This nondiscretionary procedure does not encourage the reliquefication of the credit system in the early part of a business recovery. The wide fluctuations in interest rates induce issuers to stay short and encourage investors to buy bonds only when they can anticipate a sharp rise in bond prices. Instead of becoming long-term buyers, bond investors become traders, reinforcing price volatility. Additionally, when fiscal stimulus is combined with monetarism, crowding out is inevitable as long as the economy has momentum to sputter and spurt. This is clearly attested by the recent events in the credit market.

The other phenomenon to which monetarism and fiscal stimulus have contributed are very high real rates of return in the fixed-income markets. One reason is that monetarism encourages financial deregulation and innovation, both of which intensify interest rate combat. Another reason is that monetarism never holds forth the threat of permanently high interest rates, which would quickly force participants to adjust their economic action.

Instead, monetarism promises lower interest rates quickly once the growth of money is under control and, therefore, in turn, creates the expectation that the real cost of funds will not be punishing. Moreover, by borrowing short or resorting to floating rate financing, demanders of credit do not bear the real rate of return risk inherent in a long bond issue, particularly if they can pass interest costs into product pricing over the short term.

The decision to borrow by a corporation will be negatively influenced only if there is a conviction by its financial managers that both short and long-term interest rates will stay indefinitely above the inflation rate.

Today, we have high nominal and real interest rates. No one can really claim that

this interest rate structure is more efficient than the lower levels prevailing during the credit crunch of 1966, or those in the financial crises of 1970 and 1974. What benefits have come from all of this? Are we really in an improved position? I believe not. Housing has not achieved the viability it sought. Corporate balance sheets are weaker. State and local governments are under terrible pressure not only in the services they provide but in the markets where they finance some of these services. The economy is reduced to sputtering and spurting, sputtering and spurting.

We are now again in the sputtering phase of this economic pattern. Whether or not the economy will next spurt or stall out completely depends very much on the path of monetary policy. Much depends on how the Federal Reserve interprets its monetarist responsibilities. M1–B shift adjusted, for example, is well below the officially targeted growth for the year, creating the leeway for a further liberal infusion of bank reserves.

Concurrently, the broader monetary aggregates, such as M2 and M3, are above their targeted ranges, suggesting caution in reserve infusion. The monetary targeting is also muddied at present by the inception of the All Savers certificates. Assuming that the Fed chooses to go on emphasizing M1–B, the large infusion of reserves coupled with fiscal stimulation should induce another economic spurt.

For the financial markets, such a posture may induce somewhat lower short-term interest rates for the very near term, but no lasting relief simply because monetary growth above the targeted ranges for all aggregates is bound to reassert itself. At the same time, commitments of funds in bonds would have to be made in the strong belief that a substantial business contraction is starting because bond market strength cannot be sustained by fiscal stimulation and monetarism. At the first sign of another economic spurt, led perhaps by vigorous monetary growth, bond investors will shed their enthusiasm and scramble back to the money market; corporate issuers will feel a greater need for long-term funds; and long-term bond yields will surge to new highs on very little volume.

Unfortunately, some pain will continue to be inflicted on the economy and credit markets. We have backed ourselves into a difficult corner. Looking back, the preferred policy approach, as I stated last April in Washington, should have been the following: a sharp thrust to a balanced budget in fiscal 1982; tax reductions limited to spurring investment incentives; and a monetary policy based on broader credit measures and regulations that will foster a greater perception of risk by financial intermediaries. Such an approach would have contributed to reducing inflationary expectations, reliquefying the credit system and thus providing the base for meaningful economic growth. Looking forward, policies of fiscal stimulus and monetarism encourage clashes in the markets, resulting in economic sputter and spurt and even running the risk of more dangerous economic and financial consequences.

[From Business Week, Oct. 26, 1981]

What Ronald Reagan Can Learn From Jimmy Carter

(By Michael Blumenthal)

No one can blame Ronald Reagan for being more than a little puzzled these days. Only two months ago he scored stunning victories on taxes and the budget. Reaganomics was off to a flying start, and the President was being hailed as another Roosevelt, resolutely leading the country to the high ground of prosperity without inflation.

Yet today, a few short weeks later, little is going according to plan. Instead of basking in the warm glow of the electorate's gratitude for promises delivered and a job well done, President Reagan finds himself with more economic problems than ever. With the ink on his tax and budget bills hardly dry, he is back asking for more spending cuts from an increasingly fractious Congress. His trial balloons on a Social Security stretchout, on the school lunch program, or on the defense budget are getting nowhere, and even going on TV—always a strong move for him in the past—does not seem to help. The stock and bond markets hit new lows before they finally rallied, while interest rates stay stubbornly high. The budget deficit is rising, and business confidence remains decidedly mixed. The gross national product is stalled, there is talk of serious recession, and grumbling can be heard even among the President's most dedicated supporters.

Confronting this sudden and cruel change in the economic climate, President Reagan, in fact, is facing the first real and possibly decisive crisis in economic decision-making of his young Administration. He wil hardly be lacking for advice. While much of it is bound to be contradictory, one suspects that a strong, underlying theme of the counsel will be to dig in and "hang tough," to stick to his supply-side economic programs, and to wait until Wall Street and the rest of the doubters here and abroad see the light and fall into line. The evidence thus far suggests that the President is determined to follow that line.

It is a mistake, and it is not going to work. The events of recent weeks show that sooner or later—and the sooner the better—President Reagan will have to think of something new or different to arrest the erosion of confidence in his programs. The question is: What?

The Carter Example

It may be a novel and unattractive thought for him, but my own strong advice to the President is that he take a deep breath, swallow his pride, and heed how the Carter Administration missed opportunities under similar circumstances. Failing that, there is every chance that, irony of ironies, he will founder on the same economic shoals that contributed to his predecessor's undoing and prove once again that history does tend to repeat itself.

A good place for President Reagan to look for the answers might be to contemplate seriously the three basic, often unpalatable, rules of macroeconomic management that I tried—with limited success—to urge on President Carter.

First, in economics things are rarely what they seem.

Second, beware of simple solutions to complex problems such as inflation and economic growth, however politically attractive they sound.

Third, and above all, there really is no free lunch—not for the voters, and unfortunately not for politicians or even for dedicated and deserving Presidents.

These are hard lessons for any President to learn, and my own former boss, Jimmy Carter, never quite managed to do it. He often seemed to accept the rules "in principle." But somehow he never quite acted on them consistently and pragmatically, however sincerely he might have been determined to do so.

The results, of course, is history. President Carter, at least, can now contemplate with leisure and a measure of philosophical detachment the pitfalls of economic decision-making that played him so many dirty tricks.

Ronald Reagan has a much tougher job. It is difficult to make the right moves, with the day-to-day pressures of the office on him, the memory still fresh of big successes only a few weeks old, but with even the most recent economic predictions suddenly and frustratingly suspect. Yet it is urgent that President Reagan review his assumptions and his policies and act to correct them without delay. In doing so, he should look at the Carter experience, which in many ways resembles the situation he now faces.

The ideology and assumptions underlying old-fashioned liberalism and Keynesianism led President Carter into trouble. The longer he stuck to his earlier program, the worse things got. The theories of "supply-side economics" and monetarism—Reaganomics—threaten to give President Reagan the same kind of trouble. The longer he holds on to his cherished ideas, the tougher it will be for him as well. Retreating reluctantly, step by step, cost Jimmy Carter his credibility. Ronald Reagan, following the same approach, runs the risk of suffering a similar fate.

A Formula for Reform

As a candidate, Jimmy Carter stood for budget balance and responsible economic management, having pledged to lower unemployment and lick inflation all at the same time. His campaign advisers had presented him with a set of seemingly simple and effective ideas of how to make it all happen.

First, stimulate the economy with tax cuts and rebates, aimed mainly at the poor. Second, step up programs to train workers and reduce urban blight. And, third, reform the income tax system fundamentally to eliminate its myriad inequities and perversities favoring taxpayers and businesses in the upper brackets over those lower on the economic ladder.

There were other strings to President Carter's bow—an energy program to lessen dependence on OPEC and strict rules to keep the environment healthy and clean, to name only two. But the tax and spending programs were the heart of his economics. His campaign advisers had projected the computer runs to show that it would all come together. The economy would grow, while urban and youth unemployment declined—without inflation. Tax reform would yield some of the revenue to fund the changes and help bring the budget into balance—in four years or less.

Candidate Carter based his campaign on this program, and the polls showed that the voters shared his faith. Tax reform, in particular, proved quite popular. So it all seemed to make a good deal of sense—the economics and the politics of it—and in office Mr. Carter lost no time proposing ways to translate his program into reality.

Yet almost from the start events evolved differently from what was expected. The economy was moving up, not down—even before the tax cuts and spending programs had become law. Where the slack was expected to moderate inflation, price rises accelerated. Productivity fell, and so did business confidence and the dollar.

As for the idea of tax reform, that suddenly seemed to have far fewer supporters than his fiscal-reform theorists had assumed. It was other people's loopholes, not their own, the voters wanted plugged, thereby canceling out congressional backing for tax reforms in the most frustrating way. Things were not helped when Senator Russell B. Long (D-La.), chairman of the Senate Finance Committee, with the smile of a cherub, pronounced the idea a goner by explaining that he had long ago learned the basic tax lesson from his late Uncle Earl: "Don't tax you, don't tax me, tax the fellow behind that tree!"

As the economic clouds darkened for him in 1977, President Carter's fundamental mistake was to keep trying to apply the ideas he had started out with and that quite evidently had not worked the first time around. Moreover, economic conditions had been fundamentally altered by a new oil crisis, an uncertain economy, a growing inflation psychology, and a dangerous erosion of the dollar's value in the international arena.

So there was ample reason for a basic change in approach. Yet for too long Jimmy Carter just kept plugging along, convinced

that he would ultimately be right, that Wall Street would see the light, and that his program would work in the end. Whenever he made changes in his economic programs, it was always with reluctance, always too little, and always too late.

Why? Well, for one thing, he ignored the three basic rules of economic management:

THINGS WERE NOT WHAT THEY HAD SEEMED

The economy was supposed to weaken, but it did not. The jobs programs were supposed to make a big dent in youth unemployment, but that did not happen either. The predictions about spending, saving, and investment turned out wrong because the new inflation psychology had not been taken into account when the numbers were being crunched. As for the tax bill, all the talk of reform was turning people off rather than on.

THE SOLUTIONS WERE TOO SIMPLE

An economy as complex as ours is affected by many often contradictory forces and moods. Change comes slowly, uncertainly, painfully. Inflation, unemployment, growth, and business confidence—all of these are part of a complex equation, and each is the product of many diverse influences and factors. To suggest that a single theory or set of ideas—tax reforms, job programs, budget-pruning—will alter the course decisively and surely is to misunderstand profoundly how tough and contradictory macroeconomic management is bound to be.

THERE IS NO FREE LUNCH

When inflation is rising, productivity is low, economic growth stalled, and the international economy in disarray, there is no solution that is not slow and painful. No politician can for long escape this harsh truth.

But the final and probably most significant reason why change came so hard was that Carter and his closest advisers believed for too long, even when the statistics were telling a different tale, that their original economic policies had been right. And they clung tenaciously to the mistaken notion that to change course was politically the kiss of death—that it was better to ignore the new numbers and hang tough.

The critical error here was not just the failure to appreciate the chronic unreliability of the economic prognostications and to count on their flawed predictions well past the point of no return. While this was serious, the worst mistake was to act on the false premise that the President did, in fact, have a choice between "standing firm" or changing course. Against the background of changing conditions, such a choice never existed. To stand firm really meant to opt for a policy of constant small retreats and compromises, for a gradual though reluctant step-by-step withdrawal from stated positions. And in the public perception, with one big change, the President is a leader, with lots of little changes, he is vacillating.

It was for this process of small retreats that President Carter in fact opted when he thought he was choosing to stand firm, and it was this process that caused him to be perceived, rightly or wrongly, as an uncertain economic leader and ultimately cost him his credibility.

So Jimmy Carter, by not understanding the realities of Washington macroeconomic decisionmaking, made a fateful error both on critical political and on economic grounds—an error he would repeat several times until it was too late.

I still recall the agonizing efforts to persuade him to back off from the push for tax reforms, long after their irrelevance to the country's economic condition had become abundantly clear. Taxpayers were worried about inflation, and business concern over low productivity and deficit spending was undermining confidence. Yet the President judged the political risks of making a decisive shift too great. "Jimmy simply can't abandon his proposals and go forward with another plan," Rosalynn Carter passionately insisted to me one night over drinks on the Truman balcony. "It's wrong, and politically disastrous besides."

The battle over the fiscal 1980 budget was no different. With inflation the big concern for all Americans, even staunch Democrats and long-time supporters of social programs now worried first and foremost about the threat of the trend of price escalation that was seemingly running out of control.

AGAIN, AVOIDING THE RISKS

It was probably President Carter's last chance to get back on top. A decisively different budget, one designed to deal unequivocally with the inflation threat, might have turned expectations in his favor and restored faith in his capacity to make the economy work. But to seize the issue meant turning away from a prior course, from the programs on energy and from spending initiatives that he had championed. Once again the President opted for avoiding the risks of substantial change—and again that course gained him nothing in the end.

Returning from the Tokyo Summit in the summer of 1979, I recall sitting alone with him in his private quarters aboard Air Force One. It was my last effort to convince him to "hit the ground running" on inflation and on energy by announcing major budget cuts and a bold new approach to stimulate energy production. As was his habit, he listened politely and impassively. But he never followed through, because others thought that to change was to admit defeat and even court political disaster.

So the sterile battles over the budget within his Administration continued to be fought, essentially, over public-relations issues—such as whether to show a deficit for 1980 just below or just above $30 billion.

The story was repeated over and over again—on minimum wages, on the energy bill, on the decontrol of gasoline. Whatever the issue, even when the merits of the situation cried out for a new approach, there was always the fatal hesitation to act, born of the conviction that to change was politically wrong.

THE HARD LESSONS

Thus Jimmy Carter retreated inch by inch, cutting his losses one thin slice at a time, and lost the opportunity to show decisive leadership by adjusting his programs to fit new conditions.

Reform taxes or lower them for business? Job programs or really severe budget cuts? Higher interest rates or a dangerously weaker dollar? Much less regulation or less productivity? Most Presidents come into office promising to make these hard choices, and most seek to avoid them whenever they can. This is because the free lunch, the simple solution that promises results without pain, appears so much more appealing and lower in risk. And that is why the simple ideology, the promise of an easy way out, has so much allure. And then, when things do not work out, Presidents cling for too long to the notion that to change courses is politically bad, and they retain the forlorn hope that the real pain can yet be avoided.

It really cannot. The sooner a President learns this lesson and acts on it, the better off he will be. To take the plunge and accept the downside of adjusting course decisively when the first game plan comes apart surely carries with it its own set of risks, but it is the only way to survive.

Is Jimmy Carter's successor listening? Ronald Reagan also had a set of simple and politically attractive ideas to solve our economics ills—supply-side economics. Cut taxes predictably and massively, his advisers said, and the revenue loss to the Treasury will be more than made up by a buoyant economy. As the old story goes, cut the price and make it up on the quantity.

Better-motivated taxpayers will work harder and save more. Cut nondefense spending, eliminate government waste and business will regain the confidence to invest. Presto: Expectations will perk up, productivity will rise, the economy will expand, budget balance will be restored, and inflation will be licked.

A BEGUILING FORMULA

As a prescription for economic management, it is a formula as beguiling as it is simple. To eradicate the nation's twin economic woes of inflation and slow growth and also make everyone happy with lower taxes has the irresistible appeal that would warm any politician's heart. No wonder President Reagan quickly became a true believer. He promised it to us in his campaign—and fundamentally he delivered what he promised on taxes and the budget.

In one important way, President Reagan's situation is different from that of Jimmy Carter. He succeeded where Carter failed: He got his program passed by Congress. But beyond that he faces a roughly analogous situation.

The original Reagan budget and tax cuts—the latter substantially subverted by a late bidding contest for a political victory with the Democrats in Congress—are being questioned much as the Carter proposals were, and the evidence is piling up that the economy is not acting the way it was supposed to. Supply-side economics, the country and the markets are saying, is not, after all, the simple solution to our economic problems it was expected to be. The free lunch counter is closed.

It's not really surprising. Reagonomics is new and untried—an article of faith without track record or historical precedent. There never were any data to support the supply-side ideas.

TOO GOOD TO BE TRUE

The theory that you can lick inflation by running a loose fiscal policy, cutting taxes heavily for individual taxpayers rather than skewing the reductions to stimulate investment, had a lot of political appeal, but it was always too good to be true. The tax bill pushed through Congress by President Reagan will cost the Treasury $760 billion in lost revenue over the next five years. The hope that most of this can be offset by budget reductions without hurting Social Security recipients, farmers, veterans, and others with clout in Congress, while funding a 7% real increase in defense spending, year after year, was always just that—a hope. The idea that somehow economic growth will fill the gap between lost revenue and expenditures was always more than a little farfetched. And the notion that somehow monetary policy can take up the slack without interest rates rising—and staying—unacceptably high was always no more than a dream.

The numbers just do not add up. The spending cuts enacted by Congress are so much smaller than the Treasury's loss in revenue from the tax bill that the gap is bound to remain large. That is why the budget deficit, which was to have been near $40 billion in fiscal 1982, now turns out to be much larger—$60 billion to $80 billion, perhaps. And that is why there is now the widespread expectation that the deficits will not shrink and that the pressure on interest rates will remain high in the years thereafter.

In a very real sense, the President thus finds himself the victim of his own most dramatic successes on taxes and the budget. It is these programs as now enacted, together with his commitment to large and

growing defense expenditures, that have created the prospect of multiyear deficits and super-tight money—a formula that raises the threat of a super-recession as well.

To deal with this situation, President Reagan would be well advised to do two things Jimmy Carter never quite brought off: to adjust his program quickly to new conditions, and to move decisively and unmistakably, rather than "hanging tough" and retreating step by step.

FACING THE BITTER MEDICINE

Specifically, the President has to find credible ways to close the budget gap, and that gap is large—as much as $150 billion or more over the next three years. Worse for him, since congressional support for a second round of major cuts in social and other nondefense programs is now much in question, he must focus his attention on the two areas where he has taken his strongest stand—defense and taxes.

This is bitter medicine, and for the moment it looks as if the President is not yet ready to take it. The proposed reduction of $2 billion to $3 billion in the Pentagon budget for fiscal 1982, with total cuts of $10 billion to $12 billion for the three years through 1984, will not contribute much. At least twice as much in contemplated defense cutbacks will be required, and even then Mr. Reagan's problems will not nearly be solved.

But this, perhaps, is President Reagan's easier choice. It is doubtful in any case that the big stepup in defense spending can be efficiently absorbed quickly. Throwing money at defense will probably not work any better to build our military strength than throwing money at our social problems did to eradicate poverty. For a strong defense posture, better manpower may be more important than a great deal more hardware.

The fundamental problem the President faces is simply that his multiyear tax-cutting has created such massive gaps between the Treasury's income and outflow streams that any kind of defense and nondefense budget-cutting sufficient to close this gap is politically and practically wellnigh impossible. To solve this problem, the President thus has no choice but to take another look at the income, or tax, side of the equation. Somehow, by one means or another, he must find ways to raise more revenue in coming years.

A VAT COULD BE TRIED

Jimmy Carter's experience shows that the sooner President Reagan swallows his bitter pill, the better off he will be. He has a number of choices. One is to stretch out the tax cuts already written into law. Another is to move toward some new sources of revenue for the Treasury's coffers. A value-added tax, or some other type of consumption tax, merits serious study. Also, the President might look harder at the many loopholes in the Christmas-tree tax legislation he has signed and consider closing or narrowing the most egregious ones.

In summary, then, President Reagan must, first, act on defense spending and on taxes, and, second, do so decisively, clearly, and in one big move rather than one small step at a time. The question is whether he will be any more inclined to act decisively than his predecessor was. To effect a convincing change in direction soon will take courage. But either the promise of an easing of the Treasury's revenue losses from the massive tax cuts already enacted becomes apparent fairly quickly, or the monetary crunch will continue and the impact of excessively high interest rates will do increasing damage. In that situation, housing, autos, small business, and many other sectors in the economy will not be able to get back on their feet any time soon.

Underneath it all is the fundamental problem with Reaganomics. For beyond all the rhetoric surrounding supply-side economics, there has always been the unspoken probability that such a program, if it succeeded at all, can in the end do so only if the country is put through a severe recession—one that would have an uneven impact on those sectors and geographical areas most heavily affected by high interest rates. That is the issue the Chief Executive must face.

Ronald Reagan is the kind of President who could pull it off. He has managed to focus the attention of the American people on the nation's economic problems in a way Jimmy Carter was never able to do. And he has, until recently, managed to project the image of a winner in economic decision-making—a man who knows what to do and has the courage to do it. He has a chance to capitalize on this image. In another year or so it will be too late, for the impact of new policies and programs comes slowly.

The President has been lucky, as well as successful, in his economic leadership until recently, but the real test is at hand. If he learns from the Carter record, he can succeed. If he fails to do so, he may share this predecessor's fate.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Chirdon, one of his secretaries.

PROPOSED NEW BUDGET RESCISSIONS AND DEFERRALS—MESSAGE FROM THE PRESIDENT—PM86

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report, which was referred, pursuant to the order of January 30, 1975, jointly to the Committee on Appropriations, the Committee on the Budget, the Committee on Agriculture, Nutrition, and Forestry, the Committee on Banking, Housing, and Urban Affairs, the Committee on Commerce, Science, and Transportation, the Committee on Energy and Natural Resources, the Committee on Finance, the Committee on Environment and Public Works, the Committee on Veterans' Affairs, the Committee on Labor and Human Resources, the Committee on Governmental Affairs, the Committee on Small Business, and the Committee on the Judiciary:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 72 deferrals of fiscal year 1982 funds totaling $482.9 million. I am also reporting two new proposals to rescind $88.2 million in budget authority previously provided by the Congress.

Seventy-one of the deferrals totaling $391.6 million represent the second in a series of messages that I am transmitting deferring fiscal year 1982 funds made available by the Continuing Resolution, P.L. 97–51.

These actions are being taken in accord with the stated intent of the Congress to provide minimal and temporary funding for the duration of the Continuing Resolution which expires November 20, 1981. As indicated in my last special message of October 20, I plan to restrain spending to insure that the Congress has the opportunity to enact regular appropriations for the entire fiscal year at levels that are consistent with my revised budget request.

Deferrals under the Continuing Resolution are included in this special message for the Executive Office of the President and 20 departments and agencies.

I am also reporting in this message a deferral of $91.3 million for Veterans' Administration construction pending completion of a project review and two rescission proposals for programs in the Department of Defense that are consistent with amendments to the Defense budget sent to the Congress on October 15.

The details of each rescission proposal and deferral are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *October 23, 1981.*

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, were referred as indicated:

EC–2115. A communication from the Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, notice of certain transfers of funds within the Department of Defense; to the Committee on Appropriations.

EC–2116. A communication from the Acting Vice President of Government Affairs of Amtrak, transmitting, pursuant to law, a report on the revenues and total expenses attributed to each railroad for the month of July, 1981; to the Committee on Commerce, Science, and Transportation.

EC–2117. A communication from the Chairman of the Advisory Council on Historic Preservation, transmitting, pursuant to law, a report on the historic preservation effects of terminating the United States Trusteeship of the Islands of Micronesia, adopted by the Council at its August 25, 1981 meeting; to the Committee on Energy and Natural Resources.

EC–2118. A communication from the Administrator of the Energy Information Administration, Department of Energy, transmitting, pursuant to law, two reports on Petroleum Market Shares on Sales of Refined Petroleum Products and Retail Gasoline; to the Committee on Energy and Natural Resources.

EC–2119. A communication from the Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Reforming Interest Provisions In Federal Water Laws Could Save Millions"; to the Committee on Environment and Public Works.

EC–2120. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, the annual report on the Foreign Service Retirement and Disability System for fiscal year 1980; to the Committee on Governmental Affairs.

EC–2121. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a new Privacy Act system of records; to the Committee on Governmental Affairs.

EC–2122. A communication from the Chief Judge of the United States Tax Court, transmitting, pursuant to law, the actuarial reports required for the U.S. Tax Court Judges' Retirement and Survivor Annuity Plans for calendar year 1980; to the Committee on Governmental Affairs.

EC–2123. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a list of reports transmitted to the Congress by the General Accounting Office during September 1981; to the Committee on Governmental Affairs.

EC–2124. A communication from the Chief of Staff for Installations and Logistics, Department of the Navy, transmitting, pursuant to law, the annual report of the Retirement Plan for Civilian Employees of the United States Marine Corps Exchanges, Recreation Funds, Clubs, Messes, and the Marine Corps Exchange Service for calendar year 1980; to the Committee on Governmental Affairs.

EC–2125. A communication from the Deputy Assistant Secretary of the Interior (Indian Affairs), transmitting a draft of proposed legislation to provide for the use and disposition of the Miami Indians judgment funds in Dockets 124–B and 254 before the United States Court of Claims, and for other purposes; to the Select Committee on Indian Affairs.

EC–2126. A communication from the Chairman of the Board of Directors of the Future Farmers of America, transmitting, pursuant to law, a report of the audit of the accounts of the Future Farmers of America for the period ending August 31, 1981; to the Committee on the Judiciary.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–532. A petition from a citizen of Oakland, Oregon, favoring congressional cooperation with the Naval Recovery Program; to the Committee on Armed Services.

POM–533. A resolution adopted by the House of Representatives of the State of Michigan to the Committee on the Judiciary.

"HOUSE RESOLUTION No. 266

"Whereas, The Voting Rights Act of 1965 is widely recognized as one of the most effective tools to guarantee minority voter participation. In spite of this fact, there is widespread belief that upon its expiration in 1982 it may not be extended; and

"Whereas, This milestone in civil rights legislation has doubled the number of blacks in the South who are registered to vote, which, in turn, has made public officials more accountable to minority constituents. Moreover, Section 5 of the Voting Rights Act is particularly effective in fighting discrimination by requiring that state and local governments show that changes in voting or election procedures do not discriminate against minorities; and

"Whereas, Another important factor is the reapportionment and redistricting changes that will take place because of the 1980 census. The existence of the Voting Rights Act of 1965 would help prevent discriminatory reapportionment and gerrymandering of districts and not dilute the impact of minority voting; and

"Whereas, It is vital, therefore, that the bill currently before the Congress to extend the Voting Rights Act of 1965 be adopted. With such legislation in force, the hard won rights of minority citizens to equality before the law will continue unabated, as must be the case if we are to remain a truly democratic nation where each citizen is ensured his or her right to representation in every level of government; now, therefore, be it

"*Resolved by the House of Representatives,* That this legislative body urge the Congress of the United States to extend the Voting Rights Act of 1965; and be it further

"*Resolved,* That copies of this resolution be transmitted to the President of the United States, the Speaker of the United States House of Representatives, the President of the United States Senate, and the members of the Michigan Congressional Delegation."

POM–534. A resolution adopted by the City Council of Santee, Calif., favoring an extension of the Voting Rights Act of 1965; to the Committee on the Judiciary.

POM–535. A petition from a citizen of Gladstone, Oreg., relative to monopoly bargaining in the Federal service; to the Committee on Labor and Human Resources.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. COCHRAN, from the Committee on Appropriations:

Report to accompany the bill (H.R. 4119) making appropriations for Agriculture, Rural Development, and Related Agencies programs for the fiscal year ending September 30, 1982, and for other purposes (Rept. No. 97–248).

By Mr. PERCY, from the Committee on Foreign Relations:

Report to accompany the concurrent resolution (S. Con. Res. 37) disapproving the proposed sales to Saudi Arabia of E–#A airborne warning system (AWACS) aircraft, conformal fuel tanks for F–15 aircraft, AIM–9L Sidewinder missiles, and Boeing 707 aerial refueling aircraft (Rept. No. 97–249).

By Mr. DOMENICI, from the Committee on the Budget without amendment:

S. Res. 226. A resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1716.

By Mr. McCLURE, from the Committee on Energy and Natural Resources, without amendment:

H.R. 3975. An act to facilitate and encourage the production of oil from tar sand and other hydrocarbon deposits (Rept. 97–250).

EXECUTIVE REPORTS OF COMMITTEES

The following executive report of a committee was submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Clinton Dan McKinnon, of California, to be a member of the Civil Aeronautics Board for the remainder of the term expiring December 31, 1985.

(The above nomination was reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to request to appear and testify before any duly constituted committee of the Senate.)

JOINT REFERRAL OF S. 1626

Mr. McCLURE. Mr. President, I ask unanimous consent that a bill to amend the Department of Energy Organization Act to clarify the jurisdiction of the Federal Energy Regulatory Commission, to reform and improve the regulation of oil pipelines, and for other purposes, be referred jointly to the Committee on Commerce, Science, and Transportation and the Committee on Energy and Natural Resources.

The PRESIDING OFFICER. Without objection, it is so ordered.

JOINT REFERRAL OF S. 1676

Mr. McCLURE. Mr. President, I ask unanimous consent that S. 1676, a bill to enhance the detection of moter vehicle theft and to improve the prosecution of motor vehicle theft by requiring the Secretary of Transportation to issue standards relating to the identification of vehicle parts and components, by increasing criminal penalties applicable to trafficking in stolen vehicles and parts, by curtailing the exportation of stolen vehicles and self-propelled mobile equipment, and by establishing penalties applicable to the dismantling of vehicles for the purpose of trafficking in stolen parts, and for other purposes, be jointly referred to the Committee on the Judiciary and the Committee on Commerce, Science, and Transportation.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. STENNIS:

S. 1768. A bill to amend the Social Security Act to provide that the social security trust funds shall be invested in securities which provide a maximum return, consistent with safety; to the Committee on Finance.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. STENNIS:

S. 1768. A bill to amend the Social Security Act to provide that the social security trust funds shall be invested in securities which provide a maximum return, consistent with safety; to the Committee on Finance.

(The remarks of Mr. STENNIS on this legislation appear earlier in today's RECORD.)

By Mr. INOUYE:

S. 1770. A bill to direct the Secretary of the Department of Transportation to conduct an independent study to determine the adequacy of certain industry practices and Federal Aviation Administration rules and regulations, and for other purposes; to the Committee on Commerce, Science, and Transportation.

ADEQUACY OF CERTAIN INDUSTRY PRACTICES AND FEDERAL AVIATION ADMINISTRATION RULES AND REGULATIONS

● Mr. INOUYE. Mr. President, today I am introducing a bill that directs the Secretary of the Department of Transportation to conduct an independent study to determine the adequacy of industry practices and certain Federal

Aviation Administration rules and regulations.

The FAA is charged with, among its other obligations, to promote air travel, aviation safety and encourage development of aviation technology, all very heavy burdens.

As a result of several serious accidents in the last few years an increasing amount of attention is being focused on aviation safety, raising some doubt about whether the safest possible environment is being provided to our Nation's aviation public. In addition recent articles have questioned industry practices in an attempt to lower fuel consumption. Obviously some tradeoffs are necessary in today's high cost energy/fuel environment. However, any tradeoffs must be the result of rational decisionmaking, taking into consideration not only the cost of aviation fuel but any possible discomfort or adverse health and safety effects to passengers and crew resulting from such tradeoffs.

The bill I am introducing today attempts to focus on several issues that relate to the public's right to a safe and healthy environment while captivated within an aircraft. It is my understanding that several of these issues have been the subject of rulemaking, studies and research by the FAA, segments of the aviation industry and other interested groups. In addition I am advised that the House has held numerous hearings addressing a few of these issues.

Yet nothing exists, in the form of a comprehensive document that identifies the issues and concerns, and specifies the FAA's intentions to address and perhaps remedy any of these issues. This bill attempts to make use of past research, and bring all segments of the industry into a forum to discuss these issues. In this respect the bill requires that the study take into account all available previous studies, data, recommendations, current technology, and state of the art which are relevant to the issue identified by this bill.

Let me assure my colleagues that the purpose of this bill is to begin a discussion on aviation health and safety. I will of course remain open to reasonable suggestions.

Mr. President, I ask unanimous consent that the bill be printed in the RECORD followed by an article that appeared in the April 12, 1981, issue of the Buffalo News.

There being no objection, the bill and article were ordered to be printed in the RECORD, as follows:

S. 1770

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) the Secretary of the Department of Transportation shall, in the interest of health and safety, and in the interest of promoting and maintaining a superior U.S. aviation industry, direct the Administrator of the Federal Aviation Administration to conduct an independent study to determine whether industry practices and standards, Federal Aviation Administration rules, regulations and minimum standards are nondiscriminatory and at least in conformance and parity with non aviation standards, practices and regulations (including de facto circumstances) concerning the following, for all passengers and crew aboard civil aircraft. (Special and objective considerations to be given to both positive and negative aspects of the uniqueness of the aviation environment.)

(1) quantity of fresh air per occupant and overall quality of air on board.

(2) quantity and quality of humidification.

(3) air contamination limits.

(4) emergency breathing equipment, including toxic fume protective breathing equipment.

(5) measures, procedures and capabilities for extinguishing fires and the removal of smoke and toxic fumes within safe pressurization limits.

(6) (a) safe pressurization, considering the broad range of cardiopulmonary health of the traveling public; dissemination of information to the medical profession and the general public of current pressurization limits and practices to assure valid medical advice concerning the health effects of air travel.

(b) collection and dissemination by the aviation industry, the FAA, and/or any other private or governmental organization of a data base of medical statistics relating to air travel, in an effort to assess the adequacy of aircraft systems, design, regulations, standards and practices from a health and safety standpoint and for the purpose of issuing FAA administrative advisory circulars and airworthiness directive to correct any deficiencies disclosed.

(b) The Administrator of the Federal Aviation Administration shall complete the study required by subsection (a) and submit a report of the results thereof to Congress not later than 6 months after the date of enactment of this Act.

(c) In conducting the study required by subsection (a) 1 through 6b the Administrator shall utilize all available studies, recommendations, data, current technology, and state of the art which are relevant to such study.

(d) There are authorized to be appropriated $500,000 for the fiscal year commencing October 1, 1981 to carry out the study authorized by this Act.

TODAY'S SKIES NOT SO FRIENDLY

(By Philip J. Hilts)

If you thought the cabin air was a bit stale the last time you took a jet flight, it was.

If it was a coastal flight, you may have wondered, a little nervously, if the life rafts weren't missing. They were.

And if the descent toward the landing strip seemed a lot like a roller-coaster dive, that's because it was.

The nation's airlines are in the throes of a ferocious campaign to save ever-more-expensive jet fuel. One way to do that is to lighten the load—so everything that weighs anything has been studied with a cold eye. Every maneuver or flight plan has been reviewed.

On the big jets, ventilation has been cut by a third. This means that more than half the humidity you feel is actually the sweat, breath and other body moisture from fellow passengers. If you have ever wondered why pilots keep the cockpit door closed during flight, this is one important reason: pilots get 10 to 20 times more fresh air than passengers, and none of it is mixed with sweat or smoke from the passengers.

The amount of food served has been cut. The drinking fountains are not full anymore. Where there once were three seat-pocket magazines, there is now only one. Metal seats are being replaced by lighter plastic ones. Carpeting may soon be thinner and the floorboards are scheduled to be shaved.

Computers now calculate for pilots the most gas-saving fuel burn for each stage of maneuvers. One airline has even taken to pressing out the tiny nicks and dings in the skin of the aircraft, in an effort to reduce the friction of air passing over its surface.

The most recent rumor is that wine will come out of its heavy little bottles and be put into light little cans.

The fuel-saving solutions range from the humorous to the serious, but for the airlines the cutbacks have brought spectacular results. Airlines are using one-third less fuel to carry one passenger one mile than they did in 1973.

The two most controversial, as well as most profitable, changes are dispensing with life rafts and reducing cabin ventilation.

According to the FAA, 15 airlines have asked for and received permission to remove life rafts from coastal flights—planes that fly up to 162 miles from shore between cities. The life rafts weigh a thousand pounds, and removing them can save an airline $1.5 million dollars a year or more in fuel costs.

"We think this is a pretty shortsighted thing to do," said Rick Clarke, health and safety officer of the Air Lines Pilots Association. "The life rafts may be heavy, but there is a reason for them. We sympathize with the airlines' desires to save weight, but this doesn't look like the way to do it."

Airline and Federal Aviation Administration spokesmen said that modern jet aircraft can easily make it to shore on a single engine from as far as 200 miles out, but airlines and the FAA both acknowledge this does not take into account a situation in which the plane crashes into the sea, regardless of the number of engines working.

Several planes have gone down in coastal waters in recent years. In two cases—one in Los Angeles and one in San Francisco—life rafts were used to keep passengers afloat until rescuers reached them. In a third case, a National Airlines flight that had removed its life rafts days earlier crashed into the sea near Pensacola, Fla. Three died.

Fresh air in airplane cabins has been a subject of perennial complaint. Since the fuel crisis began, airlines have instructed their pilots on the bigger jets—such as the DC-10, 747, and L-1011—to shut down one of three ventilator packs. That could save each airline $2 million a year.

Airlines maintain that they have few complaints about cabin air, and so long as the cabin air is relatively safe and passengers are apparently comfortable, there is no reason not to conserve on "excess air" pumped into the cabin.

The flight attendants' associations, however, have reported far more complaints from their membership about the irritation and sickness caused by cabin air, and have negotiated with the airlines to assure that ventilation packs can all be turned on when flight attendants request it.

There are no specific federal regulations on how much fresh air passengers must be given. But there are specific FAA regulations for pilots, because two decades ago pilots who had experienced eye, nose and throat irritation demanded a minimum level of fresh air. The FAA says pilots must get 10 cubic feet per minute; airlines actually supply between 70 and 150 cubic feet per minute of fresh air to the crew.

Although airlines and jet manufacturers differ on the amount of fresh air passengers get, the average is probably between 6 and 10 cubic feet per minute. One airline has said it is attempting to reduce fresh air per passenger to 5 cubic feet per minute.

At 4 cubic feet per minute, passengers and flight attendants could begin to experience the first symptoms of suffocation, according to Boeing and Lockheed spokesmen. At least four cases of apparent "oxygen deficiency" among flight attendants have been reported to a flight attendant's union and the FAA. The cause of the incidents, however, is not clear.

About half the air in the passenger cabin, as well as the moisture in it, is simpy stale.

smoky cabin air recirculated and blown by fans back into the cabin. The reason for recirculating air, according to one jet manufacturer, is to make passengers feel more comfortable by raising the humidity—purely from their own body water. Otherwise, humidity can get uncomfortably low, especially on long flights.

"I find it just amazing," said one FAA worker, "that the way airlines cut down on weight is by taking off life rafts and cutting down fresh air. Think of the things they don't take off—the 250-pound liquor carts, for example. You can serve drinks without the carts. And most of the partitions in the cabin, like between first class and coach—those are purely decorative. They must weigh quite a lot, but they stay. And the thick, colored carpeting on the walls.

"Someone ought to take another look at the priorities operating here."●

ADDITIONAL COSPONSORS

S. 150

At the request of Mr. INOUYE, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 150, a bill to amend title 5 of the United States Code to provide payments under Government health plans for services of qualified mental health specialists.

S. 688

At the request of Mr. INOUYE, the Senator from Arizona (Mr. DECONCINI) was added as a cosponsor of S. 688, a bill to amend titles XVIII and XIX of the Social Security Act to provide that community mental health center services shall be covered under part B of medicare and shall be a required service under medicaid.

S. 1503

At the request of Mr. JOHNSTON, the Senator from Montana (Mr. BAUCUS) was added as a cosponsor of S. 1503, a bill to authorize the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage.

S. 1698

At the request of Mr. DENTON, the Senator from Nevada (Mr. LAXALT), and the Senator from California (Mr. HAYAKAWA) were added as cosponsors of S. 1698, a bill to amend the Immigration and Nationality Act to provide preferential treatment in the admission of certain children of U.S. Armed Forces personnel.

AMENDMENTS SUBMITTED FOR PRINTING

STANDBY PETROLEUM ALLOCATION ACT OF 1981

AMENDMENT NOS. 592 AND 593

(Ordered to be printed and to lie on the table.)

Mr. BRADLEY submitted two amendments intended to be proposed by him to the bill (S. 1503) to authorize the President to allocate supplies of crude oil and petroleum products during a severe petroleum shortage.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1982

AMENDMENT NOS. 594 THROUGH 616

(Ordered to be printed and to lie on the table.)

Mr. McCLURE submited 23 amendments intended to be proposed by him to the bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982.

(The text of the amendments and remarks of Mr. McCLURE appear elsewhere in today's RECORD.).

NOTICES OF HEARINGS

COMMITTEE ON BANKING, HOUSING, AND URBAN AFFAIRS

Mr. GARN. Mr. President, on Tuesday, November 3, the Committee on Banking, Housing, and Urban Affairs will conduct hearings on the proposed pipeline that would transport natural gas from the Soviet Union's Yamul gasfields to Western Europe. The project poses significant dangers for the NATO alliance and raises serious questions for U.S. foreign policy. The hearings will focus on what would be an appropriate and effective U.S. response to this danger, including the role for U.S. export controls.

Witnesses will include representatives from the relevant Government agencies, as well as experts on energy and security matters and Soviet affairs. Currently just one morning of hearings is planned, with the possibility of holding further hearings at a later date, should circumstances warrant it.

Mr. President, this is a very serious matter, one in which several of my colleagues and I have taken a great interest. The notion of diversifying energy supply by going from the Persian Gulf to the Soviet Union is like embracing Mu' ammar Qadhafi in order to reduce reliance on the ayatollah. I just do not feel that the Europeans realize the danger, at least not sufficiently. At the same time, any effort to prevent the project from going through, if that effort is to be successful, must come from a strong, high level, consistent, sustained, and coordinated policy by this Government that includes the offer of alternative sources of energy to the Europeans. The Western Europeans must have reliable sources of energy, and that means that they cannot become dependent upon their enemies to get it. The Banking Committee hearings should go a long way to further the progress in conducting such an effective U.S. policy.

COMMITTEE ON ENERGY AND NATURAL RESOURCES

Mr. McCLURE. Mr. President, I would like to announce for the information of the Senate and the public the scheduling of a public hearing before the Committee on Energy and Natural Resources to consider Senate Joint Resolution 111, consenting to an extension and renewal of the interstate compact to conserve oil and gas. The hearing will be held on Thursday, November 12, beginning at 10 a.m. in room 3110 of the Dirksen Senate Office Building.

Those wishing to testify or who wish to submit written statements for the hearing record should write to the Committee on Energy and Natural Resources, room 3104, Dirksen Senate Office Building, Washington, D.C. 20510.

For further information regarding this hearing you may wish to contact Mr. Gary Ellsworth of the committee staff at 224–7146.

ADDITIONAL STATEMENTS

FOREIGN ASSISTANCE ACT OF 1981

● Mr. WEICKER. Mr. President, I was necessarily absent from the Senate yesterday during consideration of S. 1196, the foreign assistance bill. Meetings with several groups of constituents in Connecticut prevented me from casting my vote on final passage and several amendments which were offered. I would like to announce for the record that had I been able to vote, I would have voted aye on final passage of the bill, because I believe on balance it represents an important step to meet the international obligations and pursue the foreign policy of the United States.

On the matter of assistance to Chile, I oppose the outright repeal of restriction on assistance to the Chilean Government and thus would have supported the motion to table the Helms unprinted amendment No. 502 and the Percy substitute, No. 503.

Senator HATFIELD's amendment No. 518 expresses a legitimate concern for the stability of that region and the human rights record of the Zia Government; consequently I would have voted to approve the $100,000,000 deletion.

Finally, I would have opposed Senator HELMS' amendment No. 509 dealing with Zimbabwe as it would be disruptive of our efforts to assist and establish good relations with that young nation.●

HARRIS POLL ON CLEAN AIR

● Mr. MITCHELL. Mr. President, the Clean Air Act is one of the landmark environmental statutes enacted during the last decade. The 1970 law marks the commitment of this country to the achievement of healthy air. Our national commitment was reaffirmed in 1977, when Congress enacted clean air amendments to fine tune the law.

The Senate Committee on Environment and Public Works will soon begin to consider amendments to the Clean Air Act. Before this process begins, I would like to call to the attention of my colleagues a recent Lou Harris poll.

This poll should be given serious attention as we debate clean air issues in this body. It indicates that an overwhelming majority, 80 percent, do not favor any relaxation in existing Federal regulation of air pollution. An equally significant aspect of the poll is the fact that not a single major segment of the public wants environmental laws relaxed, whether you look at large city residents, young people, women, groups categorized by income, professionals, white-collar workers, union members, Democrats, Republicans, those over 65, or those who voted for Ronald Reagan.

Mr. President, this is a powerful message. As Mr. Harris states, the results speak for themselves. He summarized the message of his poll results in the following way:

By any measure, they add up to a powerful message to Democrats and Republicans alike here in Congress: renew the Clean Air Act and don't do anything to it that would in any way make the air dirtier than it is now. While the public thinks that some regulation in other areas ought to be relaxed or even abolished, they will oppose vehe-

mently any measure that might have the effect of reversing some of the environmental gains that have been made in the last ten years.

The American people are willing to make sacrifices in many areas to stop the miseries and ravages of inflation and an economy that is out of joint. But they will not tolerate any reductions in environmental clean-up efforts—and will regard such cuts as threatening the very quality of life in this last quarter of the twentieth century.

I am not an expert on this legislation nor on the subject of environmental regulation, but I can tell you this: this message on the deep desire on the part of the American people to battle pollution is one of the most overwhelming and clearest we have ever recorded in our twenty-five years of surveying public opinion.

I ask that Mr. Harris' testimony be printed in the RECORD following my statement.

Mr. President, I urge all Senators to read the results of this poll. They can be a valuable guide to us in the coming months.

The testimony follows:

TESTIMONY OF LOUIS HARRIS

Mr. Chairman, it is a privilege to be here today. I wish to note that I am here not as a partisan for or against the Clean Air Act or specific amendments that have been or may be proposed to it. Instead, I appear here at your invitation to relate to you and the Committee the results of a poll our firm has just conducted on this issue. This survey was not conducted for any private or public interest, but instead is part of the Harris Survey, which appears in over 200 newspapers across the country. Indeed, portions of this survey appeared this morning in those newspapers.

Before I discuss our latest findings, however, I'd like to review briefly the history of American public opinion on environmental issues. As late as 1967, people were by no means very concerned about pollution or committed to cleaning up the environment. By 46 to 44 percent, the public opposed paying $15 more per year in federal taxes in order to finance air and water pollution control. Concern about the environment was then centered largely among the younger, more affluent, college-educated, and suburban sectors of the population. But public concern over air and water pollution took hold in earnest as the country entered the 1970s.

In 1971 Americans listed pollution control as a national problem second only to the state of the economy—ahead of the war in Vietnam, crime, and social unrest. Seventy-three percent reported significant levels of air pollution in their communities, and in a sharp turnaround from four years earlier, a 59–34 percent majority said they were willing to endure higher taxes of $15 per year to curb air and water pollution, even as public willingness to pay higher taxes for other federal programs was declining. Clearly, concern over pollution had become a national issue—no longer just a cause for a select few.

As the 1970s progressed, and the nation was beset simultaneously by a deep recession and serious shortages of energy, the public recognized that efforts to solve the energy crisis and reduce unemployment might conflict with attempts to clean up the environment. Yet, as we found in 1975, an overwhelming 3 to 1 majority opposed cutting back on anti-pollution standards and controls in order to obtain more jobs or more energy.

Instead, with typical American confidence in our ability to solve our problems in a pluralistic way, the public said that they thought we could continue efforts to clean up air and water pollution and at the same time find both more energy and a way to turn the economy around to ease unemployment. I should note here that an increasing number of Americans say they would favor going slow on the imposition of new environmental controls—but not the relaxation of existing standards—if they were convinced that this would help our energy problems.

So today, after a decade of the Clean Air Act and 9 years of the Clean Water Act, public concern for both aspects of environmental pollution remains high. As has almost always been the case, water pollution is considered a slightly more serious problem, in light of reports of toxic spills and the possible presence of carcinogens in drinking water. However, efforts to control air pollution also enjoy strong support.

Our latest results, which are attached to my testimony, show clearly just how committed the American people are in their resolve not to cut back or relax existing federal standards on air pollution. We gave people we interviewed across the country three overall choices on what should be done by this Congress about the Clean Air Act: should it be made stricter than it is now, should it be made less strict, or should it be kept the same as it is now?

The largest single group, a majority of 51 percent, want to keep the Act without change. But another 29 percent opt for making the act even stricter, while no more than 17 percent want it made less strict. This means that by 80 to 17 percent, a sizable majority of the public nationwide does not want to see any relaxation in existing federal regulation of air pollution.

Perhaps as impressive as this overall division is the fact that not a single major segment of the public wants the environmental laws made less strict. Let me go through a list of key groups. Most in favor of not relaxing the clean air regulations are big-city residents (by 83–14 percent), young people under 30 (90–10 percent), women (82–13 perecnt), those with incomes between $15,000 and $25,000 (85–13 percent), professionals (83–15 percent), white collar workers (82–16 percent), union members (82–16 percent), Democrats (84–13 percent), political moderates (83–16 percent), and liberals (82–15 percent).

Now let me tick off another list of key groups: residents of the South (by 79–17 percent), residents of the West (80–17 percent), rural residents (77–19 percent), those 65 and over (73–22 percent), those with incomes $35,000 and over (75–24 percent), those who voted for Ronald Reagan in 1980 (76–22 percent), Republicans (75–22 percent), and conservatives (76–21 percent). Mr. Chairman, let there be no doubt about it: when you obtain such lopsided majorities on any issue, it is evident that there is a broad and deep consensus across the land.

In addition, we tested public attitudes toward six specific possible amendments to the Clean Air Act that we understand are being or may be considered by the Congress. Here are those results:

By 66–29 percent, a majority is opposed to relaxing "pollution standards to allow power plants to burn higher sulfur content oil and coal."

By 57–37 percent, a clear majority is also opposed to the federal government postponing "current deadlines for electric companies meeting power plant pollution standards." These results make evident that those electric utilities which are seeking any kind of relaxation of existing pollution standards are bucking public opinion. There is somewhat less opposition, although still a sizable majority, to postponing the imposition of new standards not yet in place.

By 61–34 percent, another big majority rejects the notion of relaxing "national air quality standards."

By a similar 61–36 percent, a majority would also oppose relaxing "regulations that protect national park and wilderness areas from air pollution."

By 58–38 perecnt, a majority is opposed to relaxing "current auto pollution standards."

Finally, by a closer 54–42 percent, a majority would oppose postponing "current deadlines for auto companies meeting auto pollution standards." Let me say that this last result indicates some sympathy by the American people with the plight of the American automobile industry. They are well aware that competition, especially from the Japanese, has caused severe hardship in that industry. But, as much as they would like to help the auto industry, people do not want to see delays in the industry meeting current deadlines on air pollution standards. Such relief, a majority feel, will have to come elsewhere.

The last piece of evidence from our surveys I would like to introduce here deals with an issue that has been much debated in connection with the Clean Air Act: the matter of putting cost considerations on EPA clean air standards. Here is the question we asked:

"The Clean Air Act does not permit the consideration of costs when setting standards for the protection of human health. The Reagan Administration is considering asking Congress to require that pollution standards designed to protect human health be relaxed if the costs are too high. Do you favor or oppose relaxing pollution standards affecting human health, if the costs are too high?

By a resounding 65–32 percent, a substantial majority says they are opposed to any constraint on human health standards on cost grounds. It should be noted that Westerners are most strongly opposed (by 72–26 percent). Other groups strongly opposed are young people under 30 (by 72–27 percent), women (70–26 percent), those with incomes between $15,000 and $25,000 (70–28 percent), and white collar workers (69–31 percent).

But it should also be noted that over 60 percent of the residents of the Midwest, the South, and the East, as well as union members, independents, and political moderates all share this view. The closest divisions are among Republicans, who oppose cost constraints by 56–42 percent; conservatives, who feel the same by 56–41 percent; those who voted for President Reagan (by 56–41 percent); and those with incomes over $35,000 (by 55–41 percent). These are relatively close divisions, but the key fact is that majorities of every group oppose any effort to put cost constraints on environmental regulations that protect human health.

In many ways, Mr. Chairman, these results speak for themselves. By any measure, they add up to a powerful message to Democrats and Republicans alike here in Congress: renew the Clean Air Act and don't do anything to it that would in any way make the air dirtier than it is now. While the public thinks that some regulation in other areas ought to be relaxed or even abolished, they will oppose vehemently any measure that might have the effect of reversing some of the environmental gains that have been made in the last ten years.

The American people are willing to make sacrifices in many areas to stop the miseries and ravages of inflation and an economy that is out of joint. But they will not tolerate any reductions in environmental clean-up efforts—and will regard such cuts as threatening the very quality of life in this last quarter of the twentieth century. I am not an expert on this legislation nor on the subject of environmental regulation, but I can tell you this: this message on the deep de-

sire on the part of the American people to battle pollution is one of the most overwhelming and clearest we have ever recorded in our twenty-five years of surveying public opinion.

TABLES

Between September 19th and 24th, the Harris Survey asked a cross section of 1,249 adults nationwide by telephone:

"Congress will soon reconsider the Clean Air Act, which is now ten years old. Given the costs involved in cleaning up the environment, do you think Congress should make the Clean Air Act stricter than it is now, keep it about the same, or make it less strict?"

STRICTNESS OF CLEAN AIR ACT

[1] No response.

METHODOLOGY

This Harris Survey was conducted by telephone with a representative cross section of adults 18 and over at 1,249 different sampling points within the United States between September 19th and 24th. Figures for age, sex and race were weighted where necessary to bring them into line with their actual proportions in the population.

In a sample of this size, one can say with 95 percent certainty that the results are within plus or minus three percentage points of what they would be if the entire adult population had been polled.

This statement conforms to the principles of disclosure of the National Council on Public Polls.●

RUINOUS HIGH INTEREST RATES

● Mr. BOREN. Mr. President, recent news reports have suggested that the latest economic reports from the automobile industry will show a continuing decline in our Nation's economic health. Unfortunately, these reports are proving to be worse than we had anticipated.

I have been notified today that General Motors, early next month, will indefinitely suspend its second shift at its Oklahoma City plant. No time has been designated for when this shift might be restored. This suspension will affect approximately 2,500 people. This layoff is in the most modern of General Motors plants which has been producing its best selling models.

The layoff at the General Motors plant in Oklahoma City is just another indication of the urgent need to bring down interest rates to reasonable levels. While high interest rates alone are not the complete cause of problems in the auto industry, they are a significant part of the problem.

I met this morning along with a group of members of the Senate Finance Committee with Federal Reserve Board Chairman Paul Volcker and expressed my feelings to him that he, the President, and the Secretary of the Treasury should immediately go to work to develop a policy to bring down the rates. This situation demonstrates that no States or area of the country is immune from the effects of a failure to deal with high interest rates. I hope this layoff will be only temporary and will continue to do all that I can to improve the economic environment.

Mr. President, we are faced every day with increasing reports of recession and continued high interest rates. We have waited too long to take remedial action. Something must be done immediately to prevent irreparable harm to our economy. Coordinated action to bring monetary and fiscal policy into harmony is urgently needed. I will continue to address this issue on a daily basis because it is imperative that these ruinous high interest rates remain the focus of our attention in bringing our economy back under control.●

ESTABLISHMENT OF A PRESIDENTIAL COMMISSION FOR THE 200TH ANNIVERSARY OF THE CONSTITUTION

● Mr. SPECTER. Mr. President, on September 17, the 194 anniversary of the framing of the U.S. Constitution, I introduced S. 1631 to establish a Presidential Commission for the 200th Anniversary in 1987. A letter dated October 5, 1981, from the dean of University of Pittsburgh School of Law so well states what we are attempting here that I ask to have it printed in the RECORD.

The letter follows:

UNIVERSITY OF PITTSBURGH,
October 5, 1981.

Hon. ARLEN SPECTER,
U.S. Senate,
Washington, D.C.

DEAR SENATOR SPECTER: I have your letter of September 25, 1981 and the attached copy of S. 1631 which I read with great interest. I was delighted to learn of your sponsorship of this important piece of legislation. It evidences your understanding of the need for further education of all members of our society regarding the majesty of the Constitution of the United States. In my view, there is a need for a great deal of remedial education and a particular understanding of the American legal process from a constitutional perspective. For many years, it has been my view that one of the great educational deficiencies

of our society is the almost abysmal lack of understanding of the legal process by the overwhelming majority of those affected by that process. While there have been some interesting efforts to begin the education of Americans in legal process at various educational levels, those efforts have been relatively unsuccessful to the present time. Therefore, I am more than pleased to support S. 1631 with great enthusiasm at this most appropriate time. While I focus upon the educational opportunity this bill provides, I am also aware of the great influence it can have in providing all Americans with a heightened sense of their origins and a sense of cohesion in a better understanding of how our governmental process is designed to react more effectively to the legitimate felt needs and desires of the people. It will be highly beneficial if it simply provides some better understanding that the whole design of the constitutional process in this country is to provide those conditions which will maximize the opportunities for individual development.

I am more than pleased to lend my total support to your important bill. If I can be of further service, please feel free to call upon me.

Sincerely,

JOHN E. MURRAY,
Dean.●

WHO CREATES JOBS?

● Mr. WEICKER. Mr. President, I would like to bring to the attention of my colleagues a most important article in the fall issue of the Public Interest. Written by Prof. David L. Birch of MIT, the article is entitled "Who Creates Jobs?" Among the principal findings reported by Professor Birch are:

First. Over 80 percent of the net new jobs during the period 1969–76 were created in small business, that is, firms with 100 or fewer employees. And in the northeast, an incredible 177 percent of the new jobs were created by firms with 20 or fewer employees;

Second. Eighty percent of the new jobs are created by young firms;

Third. The small firms which are the job creators are volatile; they do not experience a steady growth pattern. Rather their growth is very dynamic and appears to oscillate constantly; and

Fourth. The major source of replacement jobs has shifted away from industries that provide goods. Industries which provide services are now the greatest creators of new jobs.

Mr. Birch points out that our economy is in a period of transition as—

We are moving from manufacturing to services, from hardware to "thoughtware", from large-scale capital intensive companies to smaller scale labor-intensive companies, and from a dependence on physical capital a dependence on human capital.

I believe this article has far-reaching implications for Government policies and for our economy. Clearly, our human capital policies and our economic development programs will need to take better account of these primary engines of job creation in our country—the young, small business, service-oriented sector. And, Mr. President, this will be even more vital for the older cities, particularly in the Northeast. I urge my colleagues to read and to consider this important article.

Mr. President, I ask that the article be printed in the RECORD.

The article follows:

WHO CREATES JOBS?

(By David L. Birch)

As a nation, we must create about 15 million new jobs in the 1980's to employ all of our expanding adult population. This is less than the 19 million we created in the 1970's to absorb "war babies" into the labor force, but it is still quite a large number. Assuming that present attitudes toward government extend at least a few years into the decade, the government sector as a whole will produce no more than one-quarter of the needed 15 million. The private sector will have to produce the rest. All of this will have to take place during a period in which the structure in the U.S. economy is undergoing very basic changes.

As a group of us at the M.I.T. Program on Neighborhood and Regional Change began to think about how the nation will meet this challenge, we came to appreciate how little we knew about the processes by which job creation takes place. Most students of the economy have tended to focus on the aggregate measures of economic change flowing out of the GNP accounts, and have not probed the activities of the individual companies that make it all happen. These analysts may guess about what kinds of corporate behavior are causing shift, but they never really know for sure.

On the other end of the spectrum, those who have studied the behavior of individual corporations rarely have added up the firms to see how they come together to create the whole. "Input-output analysis" is one of the major exceptions to this, focusing as it does on transactions between businesses in the economy. Welcome as this innovation has been, it has suffered (as have other attempts to aggregate parts to form economic wholes) from the enormous costs of collecting the necessary data. As a result, it tends to be out of date, and its results are expressed in terms of transactions between whole industries, not between firms.

Our inability to understand the gap between the "micro" economy and "macro" economy is now seriously hampering efforts to develop policies that will generate jobs for the people and the places that need them, without causing inflation at the same time. We know very little about who the major job creators are, where they are active, who controls those jobs, and who is most likely to respond to changes in economic policy. In the absence of such knowledge, national policy has been to stimulate the entire economy as though it acted as a single unit, using instruments like broad tax incentives, easier access to money, and public works programs of various sorts. This can be a very expensive and inflationary approach if, in fact, most of the recipients do not use the incentives to increase employment and productivity. What we need, and have lacked, is the ability to focus our incentives on those who will make good use of them without wasting taxpayers' monies on those who will not.

Frustrated by the inability to relate micro to macro, and thereby to discover how change takes place, our group at M.I.T. began casting about for a new data source that would permit us to analyze inexpensively a large sample of the entire corporate population, one establishment at a time. Our search uncovered the so-called DMI file created by the Dun and Bradstreet corporation. The file contains records for about four million establishments, about 80 percent of the total recognized establishments in the country. We devised a way to combine the data for each establishment for four different years (1969, 1972, 1974, 1976) to obtain a history of the development of each establishment during this period. In the process we added in new firms that were formed along the way, yielding a total of about 5.6 million establishments over the seven-year period. We also edited the records extensively to eliminate establishments for which the data seemed at all questionable. When we were done, we were able to trace what happened to the employment, sales industry, corporate affiliation, age, and location of each establishment over this time. By aggregating establishments, we could see who was contributing to job growth in different periods and places.

TABLE I.—PERCENTAGE OF JOB LOSSES AND GAINS BY GROWTH RATE FOR STATES [1]

State growth rate [2]	Fast	Moderate	Slow	Decline	U.S. average
1969–72:					
Gains	13.8	10.9	8.5	7.5	10.4
Losses	8.3	8.0	7.7	8.4	8.1
Net	5.5	2.9	.8	−.9	2.3
1972–74:					
Gains	12.4	10.1	9.0	.....	10.9
Losses	7.2	7.2	7.6	.....	7.2
Net	5.2	2.9	1.4	.....	3.7
1974–76:					
Gains	15.1	11.4	10.7	8.3	11.2
Losses	8.9	8.7	9.7	9.3	9.2
Net	6.2	2.7	1.0	−1.0	2.0

[1] Source: M.I.T. program on neighborhood and regional change.

[2] The 4 classes of employment change are: Fast (over 4 percent per year), moderate (2 to 4 percent per year), slow (0 to 2 percent per year), and decline (less than 0 percent per year). On the average this breakdown divides States into roughly 4 equal groups although the size of the groups in any particular year is sensitive to the business cycle.

JOB CREATION IS WHAT REALLY MATTERS

For any particular place, it turns out that there are six quite different ways that an establishment can affect an area's job base. On the plus side, jobs are added to the pool each year whenever a new firm starts up, an existing firm expands, or a firm located elsewhere moves in. Jobs are lost whenever an establishment closes its doors, lays off people, or moves out. We have come to call these six "job flows": births (a new firm starting), expansions, in-migrants, deaths (an existing firm closing its doors), contractions, and out-migrants. The extent to which an area's job pool expands or contracts in total over the year depends on the relative balance between these flows during the year.

We discovered a number of interesting things about the job flows. First, virtually none of the employment change in an area is due to firms moving, in the sense of hiring a moving van and relocating. Many firms move short distances each year, but virtually none move from one metropolitan or rural area to another. When a move does occur, it is widely publicized in the press, and it is easy (without evidence to the contrary) to begin to pin all of an area's economic woes on the fleeing firm. Any hard look at the numbers, however, will show that fleeing firms take only a small number of jobs with them, and that for every firm that flees there tends to be another firm with a similar number of jobs moving in. The net effect of firm "migration" is thus negligible relative to the job base (and the other job flows) for most places.

The second striking phenomenon observed in the analysis of employment change is the constancy of job losses. Every area in the United States seems to lose jobs at about the same rate, regardless of how rapidly the net job pool is expanding or contracting.

Table I sorts states into different groups by growth-rate and displays the gains and the losses for each group in each of the three periods studied. As can be seen, virtually all the differences in the net change are due to differences in the gain rates, the sum of the loss rates being remarkably similar across states. There is a variation in average loss rates over time with the business cycle in the expected directions, but all states seem to float up and down together on the loss side, varying between seven and nine percent.

The same phenomenon appears to hold across cities, and even within them. Table II summarizes the loss and gain rates for ten metropolitan areas for which the neighborhood location of each business has been located. The differences in loss rates are relatively small, and if anything the more rapidly growing areas also experience the highest losses. Houston and Charlotte show somewhat higher loss rates than Worcester and New Haven, for example. Again, it is the variation in the gain rates that is so large, the rapidly growing areas replacing lost jobs at two or three times the rate of the declining ones. The same general phenomenon is observed for the central cities and suburbs within these metropolitan areas.

TABLE II.—PERCENTAGE OF FIRMS GAINED AND LOST IN 10 METROPOLITAN AREAS, 1972–76 [1]

Area [2]	Percent gain	Percent loss	Percent net
Houston	62.7	35.7	27.0
Charlotte	48.0	40.4	7.5
Dayton	36.4	31.4	5.1
Rochester	33.7	29.3	4.5
Boston	37.4	33.7	3.8
Baltimore	36.5	32.9	3.5
Hartford	36.6	35.5	1.1
Worcester	24.6	25.1	—.5
New Haven	27.0	29.5	—2.6
Greenville	26.9	35.1	—8.4
U.S. average	37.0	33.7	4.1

[1] Source: M.I.T. program on neighborhood and regional change.
[2] Standard metropolitan statistical areas.

The average loss rate is also quite high. An eight percent loss every year means that half of an area's jobs and establishments must be replaced every five years for the area simply to break even. We seem to have developed an economic system in which experimentation and risk-taking are very common. As a consequence, we experience and tolerate very high failure rates. The more dynamic the local economy (e.g., Houston) the greater the risk-taking and the greater the proportion of firms that fail. It could easily be argued (without being facetious) that one of our greatest strengths as a nation is our capacity for failure—the grace and even enthusiasm with which we accept those who try and fail and come back to try again. To our counterparts in the industrial world, this churning in our system seems extraordinary. We take it for granted, and at times even try to stifle it under the misguided banner labeled "job retention." The reality is that our most successful areas are those with the highest rates of innovation and failure, not the lowest. Areas that are declining are not declining because their rates of loss are higher. They are declining because they are not competing effectively for new jobs.

THOSE SMALL, VOLATILE JOB REPLACERS

Since we turn over such a large proportion of our job base every year—in all industries and all areas—the overall character of our economy is affected quite quickly by the nature of the job replacers. It no longer takes generations to transform our economy—only a decade or two. We must thus focus our attention on the job replacers. Who are they? In what sectors of the economy are they found? How big are they? How old are they? Where are they located?

TABLE III.—PERCENTAGE OF JOBS CREATED BY SIZE OF FIRM AND REGION [1]

Number of employees in firm	Percent of jobs created				
	Northeast	North Central	South	West	U.S. average
0 to 20	177.1	67.2	53.5	59.5	66.0
21 to 50	6.5	12.0	11.2	11.6	11.2
51 to 100	−17.4	5.2	5.5	6.3	4.3
101 to 500	−33.3	3.1	9.4	9.3	5.2
501 plus	−32.9	12.4	20.4	13.3	13.3
Total	100.0	100.0	100.0	100.0	100.0

[1] Source: M.I.T. program on neighborhood and regional change.

For one thing, job replacers tend to be small. Of all the net new jobs created in our sample of 5.6 million businesses between 1969 and 1976, two-thirds were created by firms with twenty or fewer employees, and about 80 percent were created by firms with 100 or fewer employees (see Table III). Smaller businesses more than offset their higher failure rates with their capacity to start up and expand dramatically. Larger businesses, in contrast, appear rather stagnant. They may be expanding output with more capital equipment (although those who study productivity suggest that this has not been the case recently) or they may expand by opening operations abroad. Whatever they are doing, however, large firms are no longer the major providers of new jobs for Americans.

Another distinguishing characteristic of job replacers is their youth. About 80 percent of the replacement jobs are created by establishments four years old or younger (see Table IV). Not all small businesses are job creators. The job creators are the relatively few younger ones that start up and expand rapidly in their youth, outgrowing the "small" designation in the process.

Job creators are also quite volatile. The road to future growth is a tortuous one indeed. We had thought that a firm grows and develops much like a human being: It starts small, grows smoothly and rapidly during a "growth phase," matures and stabilizes for some period, and eventually becomes outdated and falls off. Our research now suggests quite a different process. Dynamic, job creating establishments appear to oscillate, or pulsate, constantly. Periods of expansion are the best predictors of future decline, and declining periods are the foundation upon which future business growth is based.

Stable firms, those that have somehow isolated themselves from the ups and downs in the world around them, are the most likely to fail in the end. A sample of 1.4 million establishments that existed throughout the 1969–76 period shows that establishments that grew sharply in the past are the most likely to decline in the future, that recently declining establishments are the ones most likely to grow in the future, and that stable firms are far and away the most likely to go under (Table V). These oscillations from one year to the next are much greater than the average growth or decline that one would expect from a "life-cycle" model of corporate change. Those firms that insulate themselves from fluctuation appear to have cut off the very vitality that keeps their counterparts going. Just as failure appears essential to our system, so does instability.

Recent job replacers overwhelmingly tend to be providers of services—broadly defined to include all those private activities outside of the so-called "goods-producing" sector (manufacturing, agriculture, mining, and construction). During the period we studied, manufacturing firms in our sample actually lost jobs on balance, this small loss being offset by substantial gains elsewhere. The older, more northern, and more urban the area, the more this was true. Manufacturing picked up slightly nationwide during the latter part of the decade, but by the time the 1970–1980 U.S. figures were in, manufacturers as a group had created only 5 percent of the net new jobs in the 1970's and the goods producers as a whole accounted for only 11 percent. The other 89 percent were in services of one kind or another. Just as we moved in the 1820's and 1830's from being a basically agricultural society to being an industrial one, so now are we rapidly abandoning our heavy industrial base in favor of jobs that demand greater use of our minds and less use of our muscles and dexterity.[1]

TABLE IV.—PERCENTAGE OF REPLACEMENT JOBS CREATED BETWEEN 1974 AND 1976 BY AGE OF ESTABLISHMENT AND REGION [1]

	Percent of replacement jobs created			
	Northeast	North Central	South	West
Age of business:				
0 to 4	75.5	80.8	80.4	80.9
5 to 8	10.4	8.4	9.9	8.8
9 to 12	7.5	6.0	5.1	5.5
13 plus	6.6	4.8	4.6	4.8
Total	100.0	100.0	100.0	100.0

[1] Source: M.I.T. program on neighborhood and Regional change.

TABLE V.—PERFORMANCE OF ESTABLISHMENTS BASED ON THEIR HISTORY OF GROWTH [1]

[In percent]

	Percent in 1974–76 with—		
	Rapid growth	Rapid loss	Death
1969–72 history:			
Rapid growth [2]	11.1	16.5	4.3
Small change	9.4	7.6	24.6
Rapid loss [2]	21.9	8.0	12.6

[1] Source: M.I.T. program on neighborhood and regional change.
[2] Greater than 50 percent change.

These basic shifts in the nature of job replacement are not unique to the U.S., although we tend to be further advanced along this path than other nations. Nor are the findings unique to our data set or approach. Others, here and abroad, using different ways of measuring the behavior of individual firms, are finding much the same thing.

The transformation is thus a fundamental and far reaching one. We are moving from manufacturing to services, from hardware to "thoughtware," from large-scale capital-intensive companies to smaller-scale labor-intensive companies, and from a dependence on phyical capital to a dependence on human capital. These shifts have been facilitated by the increasingly international nature of our economy. We no longer have to make what we consume. Instead, we increasingly create and market products that we let others assemble for us. As a result, our exports and imports have risen from 7 percent of GNP in 1950 to 15 percent in 1979, and our private assets abroad have increased from $19 billion to $377 billion over roughly the same interval.

INTERVENE ON IMPROVE THE CLIMATE?

Those who would try to influence our economic system during this sometimes difficult period of transition are faced with some very thorny problems. At the heart of the matter is the age-old problem of choosing between a direct interventionist policy or an indirect improve-the-climate policy.

[1] There are bright spots within the sluggish manufacturing sector including very small manufacturers and high-technology, high "thought-content" firms. The bright spots are not bright enough, however, to significantly offset the general malaise elsewhere.

Those advocating a direct policy would have us provide assistance to individual companies or industries through government actions of some sort—loans, loan guarantees, contracts, grants, import restrictions, etc. Going the climate-improvement route involves changing the general tax and regulating environments in ways that entrepreneurial business people find attractive, thus letting the market determine who flourishes and who does not.

A direct policy is, and always has been, a "natural" for governments. It gives them a feeling of accomplishment—a series of deals (and jobs created) that they can point to with pride. Thus, it is not surprising to find that we have a broad array of such programs spanning several administrative branches of government, from the federal to the state and local levels.

In view of our findings on job creation and shifts in the economy generally, it appears that a direct intervention will become increasingly difficult (and frustrating) to administer. How, for instance, is an official at any level of government going to decide whom to aid? In the past, the most natural choice has been the large, stable, well-known companies because they could easily be identified (their well-financed lobbyists made sure of that) and because their risk of failing in the short-term was minimal.

But these are the companies that are the least likely to create jobs. And assisting them has a long history of not working. The Dutch and British, who have gone much farther down this road than we, have had many failures and very few successes. Our own experience, while far less extensive, is not too encouraging either. Propping up large-scale, noncompetitive private bureaucracies seems to subsidize incompetence rather than cure it.

If these same interventionists choose to redirect their efforts toward the smaller end of the scale, their problems are no less severe. How will they pick the one out of 100 or 300 small firms that will become a major job creator? How will they absorb the enormously high transactions cost associated with making thousands (or hundreds of thousands) of small-scale interventions? How will they endure the embarrassment and threat of scandal associated with a project failure rate of 30, 40, or 50 percent? These problems are not unique to government agencies. They explain in great measure why banks, insurance companies, pension funds, and university endowments are equally hesitant to become involved in small-business affairs, and why some very high percentage (in the range of 80 to 90 percent) of all startup and expansion capital for smaller businesses comes from immediate, personal sources: personal savings, friends, and relatives.

Furthermore, smaller businesses apparently do not want direct assistance. Not a single recommendation coming out of the recent White House Conference on Small Business asks that government programs or regulations be increased. The practically universal cry of owners of small businesses is that governments establish a more favorable climate and let entrepreneurs run their businesses as only they know how.

This cry, and others like it, have led many in Washington to consider seriously the value of a predominantly "climate" policy. Its purpose would be to create an environment in which innovative job-creating firms flourish. Since smaller businesses appear to be playing an increasingly important role in the economy, special attention is being paid to their concept of a good economic environment. Following their recommendations to the White House Commission on Small Business, the list of improvements would include (1) lower personal taxes on capital gains, (2) lower estate taxes (so companies may be kept within a family), (3) a slower rise to the full corporate tax rate (to compensate for the unintended progression into higher brackets caused by inflation, (4) fewer and simpler regulations, (5) simpler depreciation rules, and (6) equal opportunity for smaller business in government procurements.

We should not infer from the recent interest in climate policies that they are universally embraced by governors and mayors. For one thing, there would be a relatively small role for these elected and appointed officials to play in the management of our economy. There are also definite problems associated with depending entirely on smaller businesses to create jobs. They have little capacity for example, for conceiving, developing, and marketing the kinds of products and services that can only be provided on a large scale—jet aircraft, large-scale integrated circuits, space shuttles, communications satellites, telephone service, etc. Smaller businesses seem to function much better as subcontractors to larger companies in these situations, relying on the larger company for the design and international marketing aspects of the job.

THE REINDUSTRIALIST ILLUSION

The choice between direct intervention and climate policies will ultimately depend on what we wish to accomplish. An increased emphasis on business climate will more than likely accelerate the trend toward the dominance of smaller service-sector firms as the sources of new jobs in our economy, an increasing dependence on foreign countries for manufactured goods, and an increasing dependence on investments in human capital rather than physical capital, with all the attendant declines in measured productivity that would entail.

There are some who find that natural trend threatening. Pointing frequently to the Japanese and their increasing dominance of what used to be many of our markets, they advocate that we "reindustrialize"—that is, go back to investing more in plants that will make things more efficiently so we can meet foreign competition in markets we are now losing. Since our private sector companies do not seem to be doing this on their own, the argument goes, some form of intervention is called for.

There are several problems associated with this attempt to roll back the clock. First, it is not clear what "universal solvent" we dip our noncompetitive industries into so that they suddenly become creative again, invest in new technologies, and work harder. Protective tariffs and import restrictions will certainly not accomplish it. Forced savings by households and businesses to finance needed physical capital (a common practice in Japan) is certainly not part of our culture.

Secondly, it is not clear that we should devote a tremendous effort to find a universal solvent. In our almost compulsive fascination with the Japanese and the effectiveness with which they have competed in certain markets (automobiles, electronics, watches, etc.) we lose sight of our competence in producing the "thoughtware" upon which so much of the Japanese hardware is based. It is not an accident that of the 176 Nobel science prizes awarded since 1950, the United States has received 93, the European community another 68, and Japan only two. We dominate the thoughtware field just as others are coming to dominate hardware production. And the emphasis in many fields is shifting from hardware to thoughtware. It was not uncommon five years ago for 90 percent of the cost of a computer installation to be in hardware, and only 10 percent in thoughware (software, as the computer industry calls it). Five or ten years from now, it will not be unusual for those percentages to be reversed—80 or 90 percent software and only 10 or 20 percent hardware. For many of the same reasons, Robotics Age (one of the journals of the blossoming robot industry) recently changed its name to Robotics Age: The Journal of Intelligent Machines, saying: ". . . the character of the industrial robot market is rapidly moving towards increased intelligence in the controller. As this happens, the nature of the problems, both in design and application, is quickly changing from hardware to software."

What it comes down to, then, is this: Do we want to try to beat the Japanese (and others like them) at their game or play our own game instead? The evidence we have collected suggests that: (1) the odds of our beating them at their game are slim, and (2) that we are doing quite well at our own game if we can recognize it for what it is. We have spawned an extraordinary number of idea factories—in universities, businesses, and government—that generate a high percentage of the world's original ideas and that now provide employment for a greater percentage of our work force than ever before in history. In the absence of a major international conflict, this division of labor between ourselves and those who choose to make things is not necessarily bad and could well, given present trends, turn out very much in our favor.

We pay a price during a transformation of this sort. The relatively few workers who still make things in factories[2] must adjust to different kinds of employment. Our enormous mobility gives us an advantage over other nations whose people are less mobile. But we are still left with older, skilled craftsmen for whom moving and retraining does not come easily.

Also, in the unfortunate circumstances that we enter another world war, our dependence upon others for manufactured goods could turn out to be a major liability. It already is. Every time imports rise as a percent of our GNP, our dependence increases. Furthermore, to the extent that our dependence is concentrated in selected areas (transportation equipment, electronics, computers, steel, petroleum) the effect could be even more crippling. We have experienced it recently in oil; the Russians are now feeling it in food.

National security is a major, compelling argument for stemming the present tide. It is a strong argument, and is not easily dealt with. Patriotism alone will not make our automobile plants or our steel plants or our computer plants more competitive. Nor are trade barriers and protection likely to lead to the superior technology we would need to succeed in the very conflict we are hedging against. In short, we still seem to lack the "solvent" to transform our noncompetitive industries in peacetime even if we decided, as a national policy, that it was important to do so.

Thus develops a more interdependent collection of nations in which we play a specialized role. Luckily ours is one of the more interesting and promising parts in the play. And we seem, without strong supporting policies, to be developing a mix of larger and aggressive smaller businesses to play our role well. Perhaps we should spend less time

[2] About 13 percent of the workforce is still engaged in actual manufacturing operations, as distinguished from those who manage or sell or account for the goods made by the others in firms labeled "manufacturing."

worrying about what the Japanese do better, and worry instead about how to do better what we do best.●

DEATH OF WILLIAM NORWOOD

● Mr. INOUYE. Mr. President, I have been privileged to serve as a Member of this body since 1962. I suppose each of us can trace his presence in Congress to a person or persons who exhibited dedication and faith in the early days of our careers, when such confidence was lacking among others—perhaps even ourselves. Just such a person in my career was William Norwood, to whom I owe a deep debt of gratitude. His passing a few days ago is mourned by his many friends and admirers in Hawaii and the Pacific.

William Norwood served with honor and distinction throughout his public career, as a newspaper reporter, close aide to Gov. John A. Burns, and High Commissioner of the Trust Territory of the Pacific Islands. He contributed generously of his time and efforts to the welfare of his fellow citizens, in a variety of community organizations.

There have not been many words published about the work of William Norwood, because he preferred to be out of the public limelight. But his achievements rate a place in history as among the most important in Hawaii and the Pacific.

More than that, my beloved friend will forever hold a special place in my heart, for his role in my journey to Washington. I only pray that I may demonstrate a bit of his courage and resolve, in my public service career.

Mr. President, I ask that the following articles be printed in the RECORD.

The articles follow:

[From the Honolulu Advertiser, Sept. 24, 1981]

WILLIAM NORWOOD DEAD—ACTIVE IN POLITICS FOR 30 YEARS

William R. Norwood, who played an active role in Hawaii's politics for three decades, died Tuesday night in St. Francis Hospital's hospice center. He was 72.

Norwood's death is a loss to many, for he combined intelligence with compassion in his work that covered a range of professions, including newspaper reporter, public relations executive, political campaigner, government administrator, high commissioner of the Trust Territory of the Pacific Islands and businessman.

He was born in Seattle, where he received a B.A. in journalism from the University of Washington in 1932. Two years later, he came to Kauai to visit a friend and soon got a job as reporter for the Honolulu Star-Bulletin.

He covered the police beat, labor and politics, and helped form the local unit of the American Newspaper Guild, serving as its first president in 1937.

As a labor reporter, Norwood covered the interisland shipping strike in the 1930s and friends remember that he would go offport to ships, while working as a reporter, and collect money from crewmen for their striking associates on shore. Norwood recalled later, "It was not the action of an objective reporter, but at the time, it was the only humane thing to do."

In 1941, he started public relations work with Castle & Cooke, becoming the department's director in 1949.

During World War II, he also worked as a censor for the U.S. Army, overseeing the Star-Bulletin and two Japanese-language newspapers (Hawaii Hochi and Nippu Jiji) and at night broadcast news for the Matson Navigation Co. At this time, he met John A. Burns, then head of the Honolulu Police Department vice squad.

Their friendship continued after the war, when Norwood got involved with the formation of the Democratic Party in Hawaii. In the 1950s, Norwood planned Burns' campaigns for delegate to the U.S. Congress and the state governorship and Daniel Inouye's successful bid for the U.S. Senate.

When Burns was finally elected governor in 1962, Norwood became his state administrative director, or "right-hand man." He worked out of Iolani Palace until 1966, when he was named high commissioner of the Trust Territory of the Pacific Islands—a position he held until 1969, resigning when Richard Nixon became president.

He then became senior vice president of the Pacific division of Honolulu's Black Construction Co. on Guam, later retiring with his wife to his Mokuleia beach house on Oahu's North Shore.

During the 1950s and early '60s, he also served as a member of the city Planning Commission and as chairman of the Territorial Labor and Industrial Relations Appeal Board. He was a director of Friends of the East-West Center, the Hawaii Historical Society and the Better Business Bureau and chairman of the board for central branch, YMCA, and most recently was on the board of the Hawaii Community Development Authority.

Norwood's service as high commissioner of the Trust Territory was praised by the Oahu Micronesian Student Club, which called him an "American with a Micronesian heart." Stewart Udall, then secretary of the interior, said Norwood was "outstanding" as commissioner.

"Norwood without a doubt did more for the Micronesians than all the military brass and past high commissioners did since we assumed the U.N. trusteeship in 1947," Wayne A. Butterbaugh, advertising executive, wrote to The Advertiser in 1969.

"From the moment he stepped in the door (as commissioner), Norwood . . . tried to substitute Hawaiian informality for pompousness and efficiency for paper shuffling," wrote Bob Krauss, Advertiser columnist.

When Norwood was selected as commissioner, Ed Sheehan, an Advertiser columnist, wrote, "When you start talking about Bill, you discover that everyone who knows him likes and respects him very much, from pineapple pickers to Pacific Clubbers."

Perhaps the best words about Norwood are his own, when he spoke to Sheehan about his political experience.

"You can't be afraid of change, or taking chances. Years back I used to resent the fact that so many newcomers to Hawaii would arrive and sniff the political air to find out where it was safest to be. Even now, too many people in both business and government suffer from a Security Complex. There's a reluctance to move—a fear that it will be lost or taken away."

Mr. Norwood is survived by his wife, Katharine F.; son, William F. of Kailua-Kona; daughter, Mrs. Robert (Elizabeth) Hemings; sister, Mrs. Arthur (Virginia) Barnett of Washington state; and six grandchildren.

Services are pending. Arrangements by Williams Mortuary.

The family asks that flowers be omitted. Contributions may be made to the local chapter of the American Cancer Society.

[Editorial from the Honolulu Advertiser, Sept. 24, 1981]

BILL NORWOOD

William R. Norwood, who died Tuesday at age 72, was an important yet notably gentle figure in Hawaii journalism, public relations, and in public service here and in the Trust Territory.

He was a man who combined quiet accomplishment, a compassionate liberalism and integrity to unusual degree in a career that spanned four decades of often-dramatic history in the islands.

In the 1930s, Seattle-born Bill Norwood was best known as labor reporter for the Honolulu Star-Bulletin. It was a time when labor was struggling to gain a foothold here in battles with the then-dominant Big Five.

Although he helped form the first newspaper guild unit here, Norwood was respected by both sides.

In fact, in 1941 he switched to public relations work for one of those leading firms, Castle & Cooke. There he was a notable exception, a Democrat at a time when the Big Five was almost synonymous with Republican domination of elective offices.

In wartime years, Norwood became a close friend and political associate of Police Captain John A. Burns, who emerged as the central figure in the 1950s Democratic revolution and Hawaii's Delegate to Congress at the time of Statehood.

When Burns became Governor in 1962, Norwood went to Iolani Palace as his administrative director, again working behind the scenes in what was a period of major change.

President Johnson named Norwood High Commissioner of the Trust Territory in 1966, thereby strengthening Hawaii's ties with those islands.

Bill Norwood brought his own brand of aloha and empathy to that difficult job, and over the next three years he became perhaps the most popular American with the Micronesians to serve in the commissioner's position.

Over the years before and since, Bill Norwood served Hawaii in a variety of other ways, from positions on several planning bodies to work with such organizations as the YMCA.

In the process of his long career, then, he was quiet, unassuming and effective, moderate yet liberal when liberalism was needed to make Hawaii and Micronesia better places for people to live.●

THE ST. LOUIS-BUILT F/A–18 HORNET

(By request of Mr. BAKER the following statement was ordered to be printed in the RECORD:)

● Mr. DANFORTH. Mr. President, I was very pleased to see that for the second time in 18 months, the St. Louis-built F/A–18 Hornet has emerged victorious in international competition.

The Australian Government's recent decision to modernize its fighting forces with 75 Hornets speaks highly not only of the aircraft but also of the thousands of people in the St. Louis metropolitan area who build it.

I ask that an article appearing in the October 21, 1981, issue of the Wall Street Journal and an editorial in the October 22, 1981, issue of the St. Louis Globe-Democrat be printed in the RECORD.

The material follows:

[From the Wall Street Journal, Oct. 21, 1981]

AUSTRALIAN PURCHASE OF MCDONNELL JETS SOLIDIFIES THE F18 PROGRAM, ANALYSTS SAY

(By David P. Garino)

For the second time in 18 months, McDonnell Douglas Corp.'s F/A18 Hornet has outmaneuvered General Dynamics Corp.'s F16 Falcon fighter plane in international competition.

The Australian government picked the Hornet over the Falcon, agreeing to buy 75 planes at a price tag, in August 1981 dollars, equivalent to $2.79 billion.

Last April, the Canadian government also chose the F18 over the F16, ordering 138 fighters.

General Electric Co. will supply 175 engines, including spares, for Australian's twin-jet fighters. It placed the value of its contract at $285 million. Other subcontractors are Hughes Aircraft Co., which will make the radar system, and Northrop Corp.

In announcing the decision, Australian Defense Minister D. J. Killen cited the versatility and advanced technology of the F18, which replaces an aging fleet of French Mirage fighters.

Following the pattern of recent fighter awards, McDonnell Douglas and its subcontractors will provide some work for Australian industry. Mr. Killen said, "the added value of the offset work is to be 30% of the imported cost of the program and there will be compensation provisions if the U.S. contractors fail to honor their commitments."

The victory's import goes far beyond the dollars-and-cents of the Australian order, analysts agreed. Alan Benasuli, a vice president at Drexel Burnham Lambert, Inc., observed that the order "obviously helps the company, but it should solidify the F18 program itself."

The F18 has come under heavy fire from several congressional quarters for increased costs and performance problems. Last week, for instance, Sen. Mark Hatfield (R., Ore.) proposed that the program be canceled. The Navy has indicated it wants to buy 1,377 McDonnell Douglas F18s.

Wolfgang Demisch, an analyst at Morgan Stanley & Co., said, "the good news for the company is that two outsiders have decided that the F18 is more cost effective for their needs, warts and all."

Mr. Killen, the Australian defense minister, said "the aerodynamic problems evidenced in the F/A18 have been satisfactorily resolved." He added that "modifications . . . aren't expected to be costly."

Commented Donald Spindel, an analyst at A. G. Edwards & Sons, Inc., "with both Canada and Australia dependent on the F18, it'd be very difficult, if not impossible, for Congress to scrap the program." Mr. Benasuli predicted, "the F18 is here to stay."

Analysts also observed that the win was a bigger must for McDonnell Douglas than for General Dynamics. Both aerospace concerns are headquartered in St. Louis. Mr. Demisch observed, "while I'm sure there isn't any champagne being poured in GD's executive suite, I don't think anyone is slashing his wrists." The analyst added that the F16 has won orders from several foreign countries.

A General Dynamics spokesman issued a brief statement: "We are disappointed. It is apparent the Australian Air Force believes the F18 better meets its unique requirements. In any event we hope the Australian F18 program is successful."

Not surprisingly, a McDonnell Douglas spokesman said, "we are, of course, pleased. . . ." He reported that the order would result in 1,100 jobs at the St. Louis plant. McDonnell Douglas employs more than 30,000 at its corporate headquarters.

The Australian planes, which will be delivered between 1984 and 1990, "won't have a near-term impact on earnings," Mr. Demisch emphasized.

While the order is "a nice piece of change," the company said that the St. Louis plant, which makes military aircraft, "makes money," while the Long Beach, Calif., facility, which generally manufactures commercial planes, continues to be a drain on earnings, he said.

A proposed cutback in the defense budget threatens to intensify Long Beach's problems. The Reagan administration is eliminating funding for eight KC10s, the military adaptation of the McDonnell Douglas commercial jet, the DC10.

Even the St. Louis plant hasn't been spared the ax in the proposed fiscal 1982 budget. The Defense Department wants to trim the number of McDonnell Douglas F15s to 30 from 42.

Yesterday McDonnell Douglas shares rose $1.625 a share to $30.25, on the New York Stock Exchange composite tape. General Electric was $55.125, unchanged, and Northrop shares declined 12½ cents, to $45.25 a share.

[From the St. Louis Globe-Democrat, Oct. 22, 1981]

HORNETS FLYING HIGH DOWN UNDER

Do the Australians know something that certain Americans don't? It would appear that way in view of Australia's decision to buy 75 F–18 Hornet fighter-bombers to modernize its air force. Although the Hornets are flying high down under, their reception hasn't been altogether favorable at home. The McDonnell Douglas aircraft has received, on some occasions, unwarranted criticism instead of the unstinting praise it so clearly deserves.

The Hornets, scheduled to be delivered over a 10-year period, beginning in late 1984, will replace the Australian Air Force's aging French-made Mirage fighters. The F–18s were chosen ever the General Dynamics F–16 Fighting Falcon, the only other aircraft under consideration by the Australian Defense Department.

The purchase marks the F–18's second straight foreign-sales victory in flyoffs against the F–16. Last year, Canada ordered 137 Hornets for delivery between 1982 and 1989. Both governments said the F–18 was better suited to their needs than its closest competitor.

These solid votes of confidence should shoot down arguments by House and Senate liberals who have questioned the worth of the F–18 and its place in the American defense arsenal. The Hornet's place is undeniable.

The F–18 is truly the plane of the future and there's no time like the present to acknowledge that. In the words of Missouri Republican Sen. John C. Danforth, "The Hornet happens to be the only plane in the world with a fully integrated, all-weather air-to-air and air-to-ground system."

Danforth predicts that a proposal to kill the F–18 program will fizzle because it's based on false premises. The U.S. Navy and the Marine Corps have expressed intentions to buy 1,377 Hornets.

The senator appears to be on solid ground. The Hornet has passed its tests with flying colors and continues to impress those who work with it—on the ground and in the air. The arguments against the F–18 pale in comparison to those for it.

St. Louisans have good reason to be proud of McDonnell Douglas Corp. for the excellent quality of aircraft that it has produced and continues to produce, and for the role this plays in helping to upgrade America's national defense. It is important that every effort be made to keep the high-flying Hornet flying high.●

INTERNATIONAL YEAR OF DISABLED PERSONS

● Mr. WEICKER. Mr. President, although these have been a challenging, even a trying, first 10 months of this session for those of us on the Subcommittee on the Handicapped, I consider myself most fortunate to have become its chairman during this, the International Year of Disabled Persons (IYDP) at a time when Congress, the Nation, and the world community at large are being called upon to become more aware of the needs, aspirations, and abilities of the estimated 500 million disabled people throughout the globe today.

During this year of budget slashing, when so many programs for disabled Americans were scheduled to be drastically cut back or completely eliminated, the U.N.'s declaration and observance of 1981 as the Year of the Disabled helped serve to remind many of us in the Senate of the vital role the disabled have to play in our society, and to further strengthen our resolve to work to preserve those programs and services which are, in turn, so vital to their development.

Margaret Mead once observed that one of the best ways to judge a society is to see how it cares for its disabled members. While this was certainly true up to very recently, I think that Dr. Mead would have agreed with me that, in the 1980's and beyond, the correct criteria to judge a society by in this regard is not in the way that it cares for individuals with disabilities, but in the way it assists such individuals to become independent and productive members of that society.

This, then, is the significance of International Year of Disabled Persons. IYDP should not be viewed merely as a 12-month observance period. Rather, it should be more properly viewed as the opening of a new era in terms of the way we perceive disabled people. And, I am pleased to be able to report that this is the exact tack which the U.S. Council for the International Year of Disabled Persons has taken. By adopting as its basic modus operandi the theme "Meeting the challenges through partnerships" the U.S. Council is insuring that the work which is initiated this year will continue on well into the future. The problems faced by America's estimated 36 million disabled citizens are particularly complex ones and so, too, are their eventual solutions. If they are to be adequately addressed at all, then, they must be dealt with in the type of comprehensive approach which the U.S. Council has initiated here.

I am especially pleased and heartened by the Council's work with the private

sector in the country. Business and industry need to be made full fledged partners in the effort to assist disabled Americans into the mainstream of our society. As President Reagan observed last February in his proclamation declaring 1981 as the International Year of Disabled Persons, the "disabled represent one of our most underutilized national resources." They will likely continue to remain so until the business community recognizes, in the words of a recent IBM public service advertisement, that the disabled worker is "as capable as other workers, as reliable, as ambitious, and just as likely to succeed."

Considerable progress has already been made in this regard. Corporations such as IBM have taken the initiative and are finding innovative and cost effective ways of eliminating architectural, transportation and employment barriers, which have for far too long stood in the way of disabled Americans, keeping them from taking their rightful place in our Nation's work force. Such firms are finding out for themselves just how true the IBM P.S.A. rings; and I am wholly confident that once other firms learn of the many benefits that come from employing physically and mentally disabled workers that they too, will be recruiting more and more such workers as time goes on.

The private sector cannot be expected to do the whole job itself, however. The problems of the disabled are just too complex to expect one sector of our society to solve alone. As the resolution of the distinguished Senator from Kansas recognizes, the Federal Government also has a special role to play in promoting the integration of the disabled into the mainstream. Just as it is wrong to assume that any one sector of society can solve all of the problems facing the disabled, it is wrong to assume that any one branch of the Federal Government has all of the answers to these problems.

In adopting this resolution directing the President to implement the goals and objectives of the International Year of the Disabled Person, we should not allow ourselves to believe for a single second that our responsibility to strive toward those same goals and objectives has in any way been reduced. In declaring 1981 as the International Year of the Disabled Person, the United Nations set forth the following goals and objectives to be achieved throughout the world:

UNITED STATES MISSION

The mission is to promote the full participation in the life of our society of America's citizens with physical or mental disabilities. Building on the progress of the past decade, we will work together with private and governmental organizations to strengthen public understanding of the still unmet needs and potential contribution of these 35 million people. We will foster the partnership of Americans from all walks of life in furthering the following long-term national goals of and for citizens with disabilities.

Expanded Educational Opportunity;

Improved Access to Housing, Buildings and Transportation;

Greater Opportunity for Employment;

Greater Participation in Recreational, Social and Cultural Activities;

Expanded and Strengthened Rehabilitation Programs and Facilities;

Purposeful Application of Biomedical Research Aimed at Conquering Major Disabling Conditions;

Reduction in the Incidence of Disability Through Accident and Disease Prevention;

Increased Application of Technology to Ameliorate the Effects of Disability; and

Expanded International Exchange of Information and Experience to Benefit All Disabled Persons.

(Adopted by the U.S. Council for IYDP and the United States Government's Federal Interagency Committee for IYDP.)

Congress, as that body which establishes national policy, has a role to play to insure that each of these nine goals and objectives are achieved both here in the United States and, to the maximum extent feasible, in the world community at large. The Congress, in fact, has a very special role in expanding educational opportunities, increasing access and strengthening rehabilitation programs and services.

Congress has after all been the one which has taken the initiative in each of these areas and passed such landmark legislation as the Education for All Handicapped Children Act, the Rehabilitation, Comprehensive Services and Developmental Disabilities Act of 1978, and the Architectural Barriers Act of 1968. In adopting Senator DOLE's resolution, it is imperative that we each take this opportunity to recommit ourselves to the goal of enabling the estimated 36 million disabled Americans to enter the mainstream and live happy, productive lives, for as the President observed in his February proclamation:

All of us stand to gain when those who are disabled share in America's opportunities.●

CONCLUSION OF MORNING BUSINESS

The ACTING PRESIDENT pro tempore. The time for morning business having expired, morning business is closed.

STANDBY PETROLEUM ALLOCATION ACT OF 1981

Mr. McCLURE. Mr. President, what is the pending business?

The ACTING PRESIDENT pro tempore. Under the previous order, the Senate will now resume consideration of S. 1503, which the clerk will report.

The bill clerk read as follows:

A bill (S. 1503) to authorize the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage.

Mr. McCLURE. I yield to the Senator from Washington.

Mr. JACKSON. Mr. President, I am strongly in support of S. 1503, the Standby Petroleum Allocation Act of 1981. Senator MCCLURE, the chairman of the Committee on Energy and Natural Resources, is to be congratulated for his leadership in the shaping of this bill. It is a good bill, one that has broad, bipartisan support in the committee. It should receive the overwhelming support of the Senate.

It is absolutely essential that the President have the authority to act in the public interest during a severe disruption in petroleum markets. Such disruptions are virtually certain to occur during the 1980's. This was the conclusion of the Geopolitics of Oil study prepared for the Committee on Energy and Natural Resources when I was its chairman. On the eve of the expiration of the Emergency Petroleum Allocation Act the General Accounting Office published a two-volume report which reaches the same conclusion. The recent tragic events in Egypt only underline the insecurity which plagues the regions of the world where so much of our imported oil is produced.

The economic impact of severe oil supply disruptions creates major international problems which should be addressed through coordinated efforts of all energy-consuming nations. This kind of coordination cannot be achieved if the Government of the world's largest oil importer, the United States, is unable to manage its own petroleum use during a disruption.

The United States must be prepared to implement a national response to disruptions in world oil markets. Only the Federal Government can organize such a response. To leave this job to the major oil companies, to the States or to that great abstraction known as the market would be nothing less than a total negation of the role of government. This is precisely the signal we would send to our own citizens, to other oil-consuming nations and to OPEC if we fail to provide the U.S. Government with the authority necessary to implement an effective and aggressive response to oil supply disruptions.

The bill before the Senate today provides the President with the authority he would need to fashion such a response. The potential reach of this authority is every bit as broad as the law we are replacing, the Emergency Petroleum Allocation Act of 1973. However, the structure is quite different:

Where the EPAA mandated the imposition of a comprehensive regulatory scheme, S. 1503 would authorize the President, in his discretion, to deal with petroleum shortages in a sequential manner, tailoring the Federal response to the severity of the disruption.

Where the EPAA required the establishment of a regulatory scheme that could only be removed with congressional acquiesence, S. 1503 provides for automatic termination of the effectiveness of any regulatory scheme after 90 days.

Where EPAA contained significant detail with respect to the pricing of petroleum, S. 1503 authorizes the President to include provisions addressing pricing in his allocation program only to the extent the President finds that such provisions are necessary to achieve the objectives of the program. The committee fully expects that any price limita-

tions established would provide firms engaged in the sale of petroleum with fair margins.

Mr. President, S. 1503 reflects our experience with petroleum supply disruptions and the regulation of the petroleum industry since 1973. It provides an appropriately flexible authority that the President genuinely needs. If he does not now welcome or appreciate this authority, I can guarantee that he will be glad he has it when the next upheaval in world oil markets occurs. I urge the Senate to adopt S. 1503 so that the gap in the President's authority to deal with these matters which has existed since the EPAA expired can be closed.

Mr. McCLURE addressed the Chair.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from Idaho.

Mr. McCLURE. Mr. President, S. 1503, the Standby Petroleum Allocation Act of 1981, would grant the President limited and temporary authority to allocate domestic supplies of crude oil, residual fuel oil, and refined petroleum products under certain specified circumstances in order to minimize the adverse impacts of a petroleum supply shortage on the American people and the domestic economy.

Given the current instability in the Middle East, it is imperative that we empower the President with sufficient authority to deal with any energy emergency that may confront him in the future. If we do not act, we would send the wrong signal to our allies as well as our adversaries.

We must give the President basic, general authority to deal with this problem if the crisis comes. Events are too uncertain in this unstable world for us to devise a precise statutory scheme, in advance of a crisis, which would deal with all the equities and inequities that would accompany a shortage. Therefore, it is essential that we now give the President the broad authority that will be necessary for him to deal with that unknown energy supply scenario that will undoubtedly occur in the future if another oil supply cutoff should occur.

Addressing the question of whether the United States is prepared to deal with oil import disruptions, the General Accounting Office recently concluded in its report dated September 29, 1981, that "with the exception of the recent buildup of the Strategic Petroleum Reserve, the United States is no better prepared to deal with significant disruptions in oil imports than it was during the 1973 oil embargo." The GAO added that "oil import disruptions—such as the 1973 oil embargo and the 1979 Iranian shortfall—pose a significant threat to national security, and the lack of effective contingency planning and program development to date is serious and requires immediate attention." (Rept. EMD–81–117.)

With the expiration of the Emergency Petroleum Allocation Act (EPAA) on September 30, 1981, the Federal Government no longer has basic authority to deal with severe domestic shortages of crude oil, residual fuel oil, and refined petroleum products. Furthermore, the adequacy of the President's authority to implement a standby emergency petroleum allocation and pricing program in the event of a severe petroleum supply shortage has been called into question.

In my judgment, that remaining authority is inadequate to the task. My conclusion is consistent with the results of several legal analyses that were submitted to the Committee on Energy and Natural Resources during its consideration of S. 1503. Those analyses included reviews of the relevant provisions in the various Federal laws, other than the EPAA, that grant to the President limited authority to allocate petroleum supplies under certain defined circumstances.

Among the statutes reviewed were the Energy Policy and Conservation Act of 1975 (EPCA), the Defense Production Act (DPA), the International Emergency Economic Powers Act (IEEPA), the Emergency Energy Conservation Act of 1979 (EECA), the National Emergencies Act, and the Trade Expansion Act of 1962, as amended (TEA). None of these Federal statutes provides the President with sufficiently broad authority to implement an oil allocation program on a national or regional basis after the EPAA expires.

A legal memorandum prepared by the Department of Energy and reviewed by the Department of Justice (which appears in the committee's report on S. 1503) concludes that section 251 of the Energy Policy and Conservation Act (EPCA) authorizes the President to allocate crude oil among domestic oil companies if he deems such action necessary to enable the United States to meet its international allocation obligations under the Agreement on an International Energy Program (IEP). However, the Department of Energy found that such authority does not encompass comprehensive petroleum price and allocation controls of the type initiated under the Emergency Petroleum Allocation Act (EPAA).

In July of this year, W. Kenneth Davis, Deputy Secretary of the Department of Energy, testified before the Committee on Energy and Natural Resources on behalf of the administration. He stated that the administration opposed enactment of new emergency petroleum allocation legislation. Nevertheless, he also acknowledged that after the EPAA expired, the President would not have any comprehensive petroleum price and allocation authority similar to that provided by S. 1503.

Mr. President, the President's ability to act under existing law is sufficiently ambiguous to constrain his possible actions and render them inadequate to the task. The choice is between the current situation, which consists of ambiguous and possibly inadequate existing authorities, and the clear, definitive congressional delegation of authority provided by S. 1503, which consists of specific standby authority to deal with petroleum supply interruptions.

Central to the committee's decision to support S. 1503 was our determination that it is better for us to legislate now, at a time when we are not involved in a crisis and can act somewhat dispassionately, than to wait and find ourselves legislating in the midst of a crisis, as was the case when the EPAA was enacted.

If a serious shortage should occur, it is a virtual certainty that the Congress and the executive branch will be besieged with demands for relief. In such a crisis atmosphere it would be far more difficult for the Congress to make sound decisions. A much more preferable approach would be for the Congress to enact S. 1503, which provides the necessary standby authority to deal with periods of inadequate oil supplies. S. 1503 would provide a clear, predictable, and unambiguous standby authority in terms of allocation and necessarily related margin or nondiscriminatory pricing.

Simply stated, in the event of a serious disruption in available imported energy supplies, primary reliance should be on market mechanisms, but this must be backed up by broad, clear Presidential authority to intervene in the market on either a regional or national basis when the marketplace mechanism cannot function adequately or allocates essential supplies too slowly.

This position is supported by testimony before the Committee on Energy and Natural Resources from major oil companies, independent refiners, independent marketers, labor unions, consumers, and energy analysts. But more importantly, the consensus was that first, the EPAA should be replaced with broad standby authority that would enable the President to tailor any price and allocation controls to deal with the specific shortage when it occurs; and second, such authority should be accompanied by an automatic sunset provision designed to limit market intervention to the period during which the crisis is in effect. These two conditions are satisfied by S. 1503. Primarily for these reasons, Mr. President, enactment of S. 1503 is supported by the following organizations:

ORGANIZATIONS THAT HAVE INDICATED THEIR SUPPORT FOR S. 1503

Mr. President, with the expiration of the Emergency Petroleum Allocation Act, we cannot responsibly be dependent on anything less than full preparation.

That preparation must be based upon five principles that are reflected in S. 1503. First, maximum reliance should be placed on marketplace mechanisms to handle petroleum supply emergencies. Use of the authority in S. 1503 is limited to a severe petroleum supply shortage, which is defined as a national or regional shortage of significant scope and duration as a result of an interruption of imported petroleum that is not reasonably manageable by reliance on free market pricing and allocation. Should Federal action become necessary to supplement the market mechanisms, S. 1503 would insure that the administration is fully prepared to take the necessary actions.

Second, a major disruption in imported petroleum supplies is a national problem that demands a coordinated national response. If the Federal Government were to fail to provide that coordination, State and local governments would soon feel compelled to address any shortage themselves. This possibility already exists.

The States have reacted to the possibility of an energy emergency with a wide range of responses: 39 States have granted some form of specific authority to the Governor, ranging from a reference to energy within the definition of "disaster" by 10 States to specific energy emergency powers by 19 States. Moreover, about 20 State legislatures are currently examining proposals to extend, amend or broaden the powers of their Governors in the event of an "energy emergency." These combined State activities will vest in the Governors substantial power to intervene in the marketplace during an energy crisis.

When the EPAA was in force, State programs in conflict with the Federal program were preempted. However, with the expiration of EPAA, the individual State laws can now be utilized during an energy emergency without regard for regional or national interests. This uncoordinated hodgepodge of often conflicting State and local laws, if activated in response to a national oil supply shortage, could significantly disrupt commerce and exacerbate the adverse effects of the shortage. This is not just a remote possibility. It is a virtual certainty if a serious shortage should occur.

Thus, S. 1503 provides for preemption of any State or local program regarding allocation or pricing of petroleum which is in conflict with the standby Federal regulation or any order issued under S. 1503. However, if the Federal allocation program is activated, it must provide for a State set-aside program in each State to which the Federal program applies.

Moreover, the President would be authorized to delegate to any State any of his authority to implement the Federal program.

The third major principle reflected in S. 1503 is that in order to maintain public confidence, there must be a clear Federal commitment supported by the necessary legal authority and administrative capability to take decisive Federal action if a severe oil supply interruption requires action beyond responsible reliance on the marketplace.

If U.S. oil imports were seriously disrupted and no Federal allocation program were available for implementation, the public's lack of confidence in the marketplace might well be displayed by the hoarding of supplies. For example, during previous disruptions, large numbers of motorists routinely topped off their tanks, and many corporations installed and filled new storage capacity. Since such actions aggravate supply shortages and produce accelerated price increases, they are extremely detrimental and should be discouraged to the maximum possible extent during a period of severe shortage.

Fourth, if a very severe disruption should occur, the marketplace may not respond quickly enough in maintaining adequate supplies for certain critical needs. In particular circumstances, Government intervention may be essential as the only means for preventing or limiting severe economic hardship or damage.

For example, if such a severe shortage occurred during the peak of planting or harvesting, in the absence of S. 1503, agricultural operations might simply have to be reduced or deferred until adequate supplies again become available. A severe shortage thus could cause a reduction in—or outright termination of—essential farming operations.

Both this concern and concern for the needs of other potential priority users are reflected in S. 1503, which would require administration of the standby regulation, if implemented, to reflect the needs of specified users depending on the nature of the shortage. The bill would permit the President to tailor the Federal response to the scope, impact, and duration of the shortage.

Finally, S. 1503 would insure that the International Energy Agency is continued as the principal international mechanism to deal with oil supply emergencies, as well as other critical energy issues. S. 1503 would assure that the United States have in place a sound and effective domestic program for allocating petroleum supplies to meet our obligations under the international energy program.

Mr. President, as a final point, I emphasize that S. 1503 reflects a compromise. The importance of the bill is derived from the absolute necessity for some type of compromise on the issue of how best to deal with an oil shortage. The compromise can be described in this way.

A number of Senators have concluded that the history of Federal intervention in the petroleum marketplace since 1973 strongly suggests that such intervention should never be permitted to recur. Other Senators, including this Senator, have concluded that if a severe petroleum supply shortage should occur, the free market would not function adequately in allocating supplies in certain circumstances, and the Congress eventually would be compelled to authorize Government intervention.

S. 1503 represents an attempt to reconcile these totally divergent assessments of the proper Government role. Accordingly, the bill would place primary reliance on the free market as the allocation mechanism during a shortage; however, the bill would also authorize Federal intervention, but only to the extent necessary and only for a limited period of time.

Another example of the balancing process in S. 1503 involved the Federal oil sharing—buy-sell—program. If Federal intervention occurred, such a program would be optional, but if it were implemented, it would be required to meet specified criteria.

In short, S. 1503 would establish a middle ground between no Federal intervention in the marketplace and a comprehensive Federal allocation program. The compelling need for such a reconciliation is also the measure of the need for the legislation.

Mr. President, I ask unanimous consent that a summary of S. 1503, the Standby Petroleum Allocation Act of 1981, appear at this point in my remarks.

There being no objection, the summary was ordered to be printed in the RECORD, as follows:

S. 1503, THE STANDBY PETROLEUM ALLOCATION ACT OF 1981

The purpose of S. 1503, as reported by the Committee on Energy and Natural Resources, is to grant the President limited and temporary authority to allocate supplies of crude oil, residual fuel oil and refined petroleum products under certain specified circumstances. Such authority would be exercised for the purpose of minimizing the adverse impacts of a petroleum supply shortage on the American people and the domestic economy. The major provisions of S. 1503 are:

(1) Within 90 days of enactment, the President could be required to promulgate a general standby regulation for the mandatory allocation of crude oil, residual fuel oil, and any refined petroleum product. The regulation may include limitations on the price of allocated supplies only if the President finds that such limitations are necessary to achieve the objectives of the allocation program. The limitations may include provisions restricting discriminatory pricing. The standby regulation also would include an optional standby program for limited sales of crude oil among domestic refiners. If the President chooses to implement a crude oil sharing program, the program must be designed in accordance with the provisions of S. 1503.

(2) The President would be authorized to implement the standby regulation only if he finds that (a) a "severe petroleum supply shortage" exists or is imminent or (b) action is required to meet obligations under the International Energy Program.

In the event of a "severe petroleum shortage" the President must determine (a) that a national or regional shortage of significant scope and duration exists or is likely to occur as a result of an interruption of imported petroleum and (b) that the shortage is not reasonably manageable by reliance on free market pricing and allocation, or under other authorities available to the President. The regulation could be implemented for up to 90 days after the President transmits to the Congress an "energy action", and neither House of the Congress has disapproved, or both Houses have approved, the message within 15 calendar days of continuous session. The President's message to the Congress would be accompanied by an analysis of the circumstances which require him to take action, a description of the actions he intends to take, and any additional amendments to the standby regulation necessary to meet the immediate emergency. One extension for up to 60 days would be authorized without resubmission to the Congress.

If the President finds that implementation of the standby regulation is required to meet obligations of the United States under the International Energy Program, he could initiate a domestic allocation program without prior Congressional approval.

(3) It is intended that implementation of the standby regulation would, depending on the scope, duration, and extent of the impact of the shortage, be tailored to the specific statewide, regional, or national shortage. In other words the President may choose to implement only certain selected provisions of the standby regulation, or the full regulation. Administration of the standby regulation must, to the maximum extent practicable, provide for certain objectives drawn from section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973. Should implementation of the standby regulation provide for the allocation of residual fuel oil or any refined petroleum product, the Federal program also must provide for a State set-aside program for that product in any state in which the Federal program is activated.

(4) Provision is made for preemption of any State or local program regarding allocation or pricing of petroleum which is in conflict with the standby Federal regulation or any order issued under S. 1503. However, the President would be authorized to delegate to any State any of his authority to implement the Federal program.

(5) The authorities of S. 1503 would expire on January 1, 1985.

Mr. McCLURE. Mr. President, the argument has been made by several Senators that S. 1503, as reported by the committee, comes too close to mandating a complex Federal program such as the one imposed by the EPAA. Certain industry groups have concurred in that assessment, and they point out that S. 1503 incorporates verbatim the list of objectives contained in section 4(b)(1) of the EPAA, and that S. 1503 also contains a crude-oil-sharing, or a "buy-sell" program.

Mr. President, the contention that S. 1503 is virtually a "clone of EPAA" is totally erroneous, however. That becomes evident from a careful comparison of the actual language of the reported bill with the provisions of the EPAA. Furthermore, S. 1503 reflects certain fundamental concepts that are totally different from those that produced the EPAA.

During the hearings on standby oil controls that were held earlier this year, the committee was told by most of the witnesses that the EPAA should not be extended beyond its expiration date of September 30, 1981. The committee members agreed, and I can assure my colleagues that S. 1503 is not a mere extension of the EPAA as alleged.

Let us first examine what S. 1503 would actually do, and compare that to what occurred under the EPAA. The most significant feature of S. 1503 is illustrated by its title, the "Standby Petroleum Allocation Act of 1981." The bill would create a standby program, one that would not be activated unless a severe emergency occurred. Prior to such an event, there would be no Federal intervention in the marketplace. There would be no allocation, no price controls, nor any effect on the market whatsoever.

The EPAA, on the other hand, required the President within 15 days of enactment to establish mandatory allocation and pricing rules. In essence, under the EPAA a massive and complex Federal program was implemented, and it remained with us for 7 years, during periods when we had shortages, and when we did not.

Under S. 1503, the standby Federal program would not be activated unless an actual shortage existed or was imminent, and unless the shortage was severe. If the shortage could be managed by reliance on the free market, then the Federal program would not be implemented. In short, S. 1503 is based on a concept of Federal intervention only as a last resort. The bill proposes what could be called a high trigger for Federal action. The EPAA had no trigger at all.

S. 1503 envisions a program of limited Federal allocation controls. Mandatory allocation of crude oil or petroleum products would occur only to the extent necessary. The standby regulation would reflect that policy. If the program were implemented, any subsequent regulations and orders would also reflect that policy. Thus, under S. 1503 partial controls could be implemented initially. In contrast, EPAA initially adopted the broad, comprehensive program that was already in existence for another purpose.

During the committee's consideration of S. 1503, a number of proposals and amendments were discussed and considered which would have identified new public and private interests, or sectors of industrial and economic activity, to the set of purposes and objectives of the standby allocation regulation. After careful consideration of these proposals, the committee instead adopted language taken from section 4(b)(1) of the Emergency Petroleum Allocation Act, as amended.

The committee's inclusion of certain EPAA language in S. 1503 must be considered in the context of the type of regulatory program proposed by S. 1503. The allocation objectives contained in section (4)(a)(2) of S. 1503 are just that—they are objectives. They would be implemented only to the maximum extent practicable. Although the objectives are the same as those that were contained in the EPAA, they would not necessarily be implemented in the same way.

Rather, the language represents a workable set of objectives which the President should seek to satisfy insofar as available supplies of petroleum will permit, recognizing that many of the objectives are inherently contradictory. The President would have the flexibility to determine the most practical approach, after considering the particular circumstances surrounding the shortage, and recognizing his responsibility to minimize Federal intervention in the marketplace.

In adopting this language from EPAA, the committee did not intend to imply or indicate that the new standby regulation under S. 1503 be patterned after the regulatory program that evolved under EPAA. Quite the contrary. The fact that the administration opposed extending EPAA, and that the committee did not consider extending the act, speaks for itself. Further, the conditions today and the conditions under which EPAA was adopted in 1973 are vastly different.

An important difference between the EPAA and S. 1503 is the shift of the burden of proof required for changes in the scope of their regulatory coverage. When the EPAA was enacted, it automatically covered crude oil, residual fuel oil, and almost every refined petroleum product. Decontrol of certain products could be accomplished only by demonstrating to the Congress that such decontrol was appropriate. The concept reflected by S. 1503 is exactly the opposite. Controls under S. 1503 can be imposed only by demonstrating to Congress that such an action is necessary. The burden of proof would be on the proponent of Federal intervention in the market.

Another important difference between S. 1503 and the EPAA is the so-called sunset provision of S. 1503. Under that provision, the Federal allocation program could be operated only for 90 days, unless the President found that the program should be extended for an addi-

tional 60 days. At the end of the 150-day period, the program would terminate, unless the Congress approved a new finding by the President that the shortage continued to require Federal action. There was no comparable sunset provision in the EPAA.

As a final example of the major differences between the EPAA and the proposal before us, I point out that S. 1503 provides that price limitations may be imposed only if they are found by the President to be necessary for effective implementation of the allocation program. In other words, as a condition for imposing price controls, there would have to be a showing of a necessary linkage between the allocation mechanism and price controls. This contrasts sharply with the EPAA, which, in effect, ratified an existing price control system that had already been imposed under phase IV of the economic stabilization program. That price control system was not designed to correspond to a program for allocating crude oil and petroleum products; rather, it was designed to control inflation. Thus, the price control program under EPAA was not designed to work in tandem with the program for allocating petroleum. The pricing system was not conceptually linked to the allocation system. That fundamental flaw in the EPAA would not recur if S. 1503 were enacted into law.

Mr. President, the fundamental need for S. 1503, the Standby Petroleum Allocation Act of 1981, is derived from the fact that the United States has experienced several petroleum supply disruptions during the past decade and runs the substantial risk of future disruptions in international energy supplies.

BUDGET IMPACT OF S. 1503

Mr. President, the Committee on Energy and Natural Resources does not anticipate any significant budgetary impact from the enactment of S. 1503, the Standby Petroleum Allocation Act of 1981. I understand that this position is concurred in by the Budget Committee.

Therefore a budget waiver is not required.

S. 1503 would require the promulgation within 90 days of enactment of a general standby regulation. The regulation would be prepared by the Office of the Assistant Secretary for Environmental Protection, Safety, and Emergency Preparedness; and it is the committee's judgment that the related analyses and planning activities could be funded within available appropriations for fiscal year 1982.

In the event that the President invokes the authority of S. 1503 and implements part or all of the standby regulation, there could be a modest budgetary impact at that time. Most, if not all, of the Federal activities to support a limited allocation program would be conducted by existing civil service personnel on temporary assignment to supplement the Department of Energy emergency preparedness staff.

Mr. McCLURE. Mr. President, I also ask unanimous consent to have printed in the RECORD letters of support from the organizations I mentioned earlier.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

AG ENERGY USERS CONFERENCE

OCTOBER 16, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, Dirksen Senate Office Building, Washington, D.C.

DEAR CHAIRMAN MCCLURE: This letter is in support of S. 1503, the Standby Petroleum Allocation Act of 1981. The signatories represent virtually every sector of our nations's food system, including producers, processors, manufacturers, food brokers and distributors of food and fiber. As Americans realize, the health and economic prosperity of our country can, in large measure, be attributed to our strong food and fiber industry.

It must be pointed out that the U.S. food system is unlike other industries. The interrelated chain of events that begin with farm inputs and end at the table of the American consumer is dictated by nature's biological clock. The food system is one that is crucially time-sensitive, the point being that a disruption of any of the vital inputs, such as petroleum products, can and does threaten the entire process.

Adequate and timely supplies of petroleum products are essential to this system. Recent history has shown that crude oil disruptions have had a detrimental effect on the petroleum product supplies to the various sectors of the food chain.

We believe it is the proper role of the Federal Government to manage severe energy disruptions through the implementation of standby emergency regulations. We feel that S. 1503 will provide the President with the flexibility and discretionary authority he needs to offset the detrimental effects of severe petroleum shortages on the American public.

Further, we support the inclusion of responsible and proven priority classifications under S. 1503. The retention of the maintenance of agricultural operations as a statutory objective in any petroleum product allocation plan is certainly in our Nation's vital interest. To this end we urge that recognition be given to the need to include distribution and transportation of farm inputs and food to points of final purchase prior to consumption under the agricultural priority regulatory definition.

Thank you for your consideration.

AMERICAN BAKERS ASSOCIATION,
Washington, D.C., October 16, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Senate Energy and Natural Resources Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR MCCLURE: The American Bakers Association has distributed copies of the attached letter to all Members of the United States Senate in the hope that they will join with you in support of S. 1503.

As the attached letter states, we believe that the passage of S. 1503 is essential for the continued prosperity of our industry and the entire American economy.

We commend you and Members of your Committee for drafting and reporting this important legislation, and hope that it is favorably acted upon by the full Senate.

If we can be of any further help to you in this regard, please let us know.

Sincerely,

ROBERT J. WAGER,
President.

AMERICAN BAKERS ASSOCIATION,
Washington, D.C., October 19, 1981.

DEAR SENATOR: This week the Senate will consider S. 1503, a bill providing the President with discretionary powers to respond to a severe petroleum disruption, which was introduced by Senator McClure and overwhelmingly approved by the Senate Energy and Natural Resources Committee. As the tragic events in Egypt have underscored, we live in an uncertain world in which we can never afford to assume that an uninterrupted supply of imported oil will continue.

While the members of the American Bakers Association are appreciative of the Administration and Congressional efforts to reduce the burdens of regulation on business, we also recognize that some regulatory programs have served both the business community and general public well and deserve your continued support. In our view, one such exemplary program has been the emergency petroleum allocation authority. While critics have justifiably attacked some provisions of the recently-expired act, we believe that some of the concepts contained in EPAA deserve keeping. The McClure bill successfully sorts out these good provisions. The result is a fresh approach that provides for the continuation of some Presidential emergency authority without tying the President's hands or burdening the business community with regulation. S. 1503 deserves your strong support.

The American Bakers Association would like to believe that the "free market" can equitably distribute petroleum products to the marketplace. The fact of the matter is, however, that even without Federal intervention, it is unlikely that the marketplace will be permitted to operate freely during an energy emergency. As a recent American Petroleum Institute study illustrated, forty-nine states have their own emergency plans in some form of development of which twenty-one contain fuel distribution schemes. The states will undoubtedly exercise this authority in the absence of a Federal response to an emergency situation. The President's own Cabinet Council on Natural Resources and Environment has warned of this possibility in a memo to the President in which they suggest that without Federal authority, "states would be free to pass control laws of their own."

The Administration's response to these arguments has been that the President has other available authorities to deal with such developments. Yet in this same Cabinet memo, the Justice Department concluded that the President does not presently have

the ability within existing law to duplicate the comprehensive authorities available to the President when the Emergency Petroleum Allocation Act was still in effect.

This situation concerns our members, who as operators of the fourth largest trucking fleet in the nation and as producers and distributors of 80 percent of the commercially-baked bread and other baked foods, require a continued predictable and sufficient supply of fuel in order to survive. A sudden and severe energy shortage can only bring economic devastation to the baking industry and with it a critical national food shortage. Furthermore, the same consequences could occur in the absence of a Federal response if uncoordinated state programs are permitted to be implemented in response to a national or regional shortage of energy and interstate commerce is severely disrupted.

For these reasons, we urge your support of S. 1503, as amended. First, the bill neither unduly ties the President's hands nor does it encourage his intervention—the triggering mechanism is high enough to discourage its unnecessary use, yet within reach if it is required. Second, the bill does not restrict the President's use of other authorities but does clarify the authorities that are available for his use in an emergency. Third, the bill comes to grips with the state/Federal problem by clearly preempting state action that might conflict with a possible Federal response. Finally, the bill, by including broad guidelines for the distribution of available supplies of energy by category, takes the monkey off the President's back of having to decide the difficult priority issue in the midst of a national crisis.

We hope that the President will never have to exercise these emergency authorities. However, we will rest easier knowing that the country is capable of responding to a severe emergency shortage should it develop. The passage of S. 1503 will provide that needed guarantee.

Sincerely,

ROBERT J. WAGER,
President.

NATIONAL COUNCIL OF
FARMER COOPERATIVES,
Washington, D.C., October 15, 1981.

Hon. JAMES A. MCCLURE,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR MCCLURE: The National Council of Farmer Cooperatives strongly supports S. 1503, the "Standby Petroleum Allocation Act of 1981." We understood that the full Senate is expected to consider this bill the week of October 19.

This legislation is critical to the welfare and security of our national economy, as we are now without a responsible and effective emergency energy preparedness policy to respond to future crude oil supply disruptions. Agriculture, rural America, and the Nation as a whole can ill afford this vulnerability.

The tragic assassination of Egyptian President Sadat serves as a grim reminder that it is only a matter of time before world instabilities lead to another disruption. Now is the time to make careful decisions on this critical matter—not in the middle of our next fuel crisis.

The U.S. petroleum industry should be allowed to operate unfettered by government controls during normal market periods. However, another crude oil disruption could result in severe regional shortages and result in oil prices doubling again—absent appropriate action—with the OPEC cartel making these economic injuries permanent. This single event can destroy all progress in our tough economic recovery battle.

In reporting out S. 1503, you and your colleagues on the Senate Energy Committee have developed a balanced approach to disruption management which will provide the President with the necessary options to respond effectively. S. 1503 embraces many of the concepts contained in the Durenberger/Andrews bill (S. 1476), an approach which the National Council has been endorsing.

The National Council is actively contacting members of the Senate, encouraging them to support and vote for S. 1503, and thereby issuing a strong mandate for responsible emergency energy preparedness policies. We applaud you for your strong leadership, and stand ready to work with you in every way possible.

Sincerely,

KENNETH D. NADEN,
President.

AMERICAN PETROLEUM
REFINERS ASSOCIATION,
Washington, D.C., October 16, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Energy and Natural Resources Committee, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: On behalf of the members of the American Petroleum Refiners Association let me express their gratitude for your continued support of emergency preparedness legislation.

S. 1503 is the result of a bipartisan commitment to help insure fair and equitable distribution of petroleum products to all the nation's citizens in the event of a crude oil supply disruption. Your efforts and S. 1503 are fully supported by the members of this Association.

As you may know, APRA is the largest trade association representing exclusively small and independent refining companies. These companies are located in more than twenty states and have worked diligently for almost three years in an effort to educate the Congress to the need of an alternative should a crude supply disruption eliminate any free market within the refining industry.

We look forward to continuing to work with you as this measure progresses through the Senate.

Sincerely,

RAY F. BRAGG, Jr.,
Executive Director.

COMMITTEE FOR EQUITABLE
ACCESS TO CRUDE OIL,
Washington, D.C., October 6, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As an organization which supports your bill, S. 1503, to authorize the President to allocate supplies of crude oil and petroleum products during a severe petroleum supply shortage, we wish to express our deep appreciation for your efforts in this regard.

We strongly commend you for holding the recent hearings. You did a masterful job of chairing the mark-up sessions on this proposal, allowing all views to be heard equitably. Also, your staff on the Committee has been most gracious.

With kind regards, I remain

Sincerely yours,

ROBERT G. REED, III,
Chairman.

EMPIRE STATE PETROLEUM
ASSOCIATION, INC.,
New York, N.Y., October 19, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR MCCLURE: The Empire State Petroleum Association, on behalf of the independent gasoline and home heating oil marketers of New York State, hereby expresses its strong support for S. 1503, the Standby Petroleum Allocation Act now being considered by the full Senate. Standby authority is critical to protect the consumers served by independent marketers as well as to preserve competition if a supply disruption occurs. New York consumers rely on the independent sector for most of their petroleum product needs; obviously these consumers cannot rely solely on the market for adequate supplies in time of crisis.

S. 1503 is far superior to the Emergency Petroleum Allocation Act (EPAA) which it replaces. No regulations will be implemented unless the President and Congress agree on the need; any control program will expire automatically in 90 days; and no state or local regulatory activity will be lawful that conflicts with the federal standby scheme. It is critical that federal law preempt individual states from enacting regulatory programs, which will increase prices, create supply disruptions, and prevent the marketplace from functioning effectively in time of ample supply.

Thank you for your consideration of ESPA's views on this critical legislation.

Sincerely,

ROBERT D. LYNCH,
Executive Vice President.

INDEPENDENT FUEL TERMINAL
OPERATORS ASSOCIATION,
Washington, D.C., October 19, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Dirksen Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: The Independent Fuel Terminal Operators Association ("IFTOA") is writing to express its strong support for S. 1503, the "Standby Petroleum Allocation Act of 1981." As stated in our testimony before your Committee on July 30, 1981, we believe that in all but the most severe supply disruption, the market can correct most distribution and pricing problems. During a severe shortage, price and allocation controls may be necessary as last resort measures; such controls can preserve a competitive petroleum industry and ensure service to all consumers, particularly those served by the independents in urban and rural areas.

In late 1973 and early 1974, the Emergency Petroleum Allocation Act ("EPAA") assured survival of the petroleum distribution system and ensured equitable distribution of products at equitable prices throughout the nation. During the emergency, the EPAA worked. We recognize that the Committee has received much testimony criticizing the EPAA; however, Congress should recognize that the distortions and inefficiencies caused by that statute resulted from the maintenance of regulations long after the emergency had passed. S. 1503 is far superior to the EPAA. Perhaps most important, it has an automatic sunset provision; thus, regulations would be imposed only during an emergency and then only for the duration of the crisis.

Your Committee has recognized that (1) during periods of ample supply the free market alone should determine the allocation and pricing of petroleum products, and (2) during a crisis the Federal Government should implement a single, uniform system of controls. To ensure that individual states do not adopt their own allocation and pricing programs which would result in inefficiency, confusion and artificial shortages, Congress should adopt a strong preemption provision. That provision should explicitly state that upon promulgation of the standby regulations, State and local laws governing allocation and pricing of products are superseded.

With the addition of this one amendment, the Independent Fuel Terminal Operators Association strongly supports passage of S. 1503. Our Association believes that it is essential legislation which will ensure that

the United States will be prepared to deal effectively with any future energy emergency.

Respectfully submitted.

LEONARD P. STEUART II,
President.

INDEPENDENT GASOLINE MARKETERS COUNCIL,
Washington, D.C., October 19, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: The Independent Gasoline Marketers Council, a trade association of nonbranded independent retailers of motor gasoline, supports you in your efforts to persuade the Senate of the merits of S. 1503, the Standby Petroleum Allocation Act of 1981.

We were especially impressed with your leadership as Chairman of the Senate Energy Committee in achieving a committee consensus. You successfully avoided the efforts of some to make the bill excessively burdensome and at the same time you were flexible enough to permit the inclusion of protective language that independent marketers can feel comfortable with.

There is no question that in a severe petroleum shortage, Congress would legislate petroleum regulations. We believe that legislation passed during an emergency would not be as good as S. 1503, the bill the Energy Committee has reported.

If there is anything we can do to support your efforts on the floor, please do not hesitate to write.

Sincerely,

JACK A. BLUM,
General Counsel.

INDEPENDENT REFINERS ASSOCIATION OF AMERICA,
Washington, D.C., October 16, 1981.

Hon. JAMES A. MCCLURE,
U.S. Senate, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR MCCLURE: On behalf of the Independent Refiners Association of America, I urge you to support S. 1503, Senator McClure's standby petroleum allocation bill. Th bill was approved by the Senate Energy Committee by a vote of 13–4 and is currently scheduled for consideration on the Senate floor on Monday, October 19. We think the Committee has done an outstanding job in shaping a bill that meets our national needs for a standby program to deal with severe petroleum supply disruptions, and we urge your support for this effort.

Our support for S. 1503 is based on several factors. First, and most important, this country can simply not afford to be without a standby emergency program to deal with future petroleum supply disruptions. Failure to develop such a standby program would not be responsible national policy. The recent tragic events in the Mideast have underscored just how fragile is the stability of the region that supplies by far the greatest share of our peroleum imports. Our analysis of existing legislative authority suggest that, at the very least, any attempt to respond to an emergency by using what is now on the books would be tied up in the courts, which is the last thing we would need at such a time.

Second, S. 1503 prescribes an approach that is carefully limited both in terms of how standby authorities can be invoked and in terms of how long the program could remain in place. The President is required to oversee the development of a standby regulation. That regulation may be implemented by the President only in case of a severe supply disruption. Even when implemented, it can only remain in place for 90 days and is subject to disapproval by either House of Congress, and it can only be extended once, for a maximum of 60 days, by the Administration. Any attempt to keep the program in force for a longer period of time would require that the President resubmit the program to Congress, a procedure which we believe ensures that no standby allocation would remain on the books past the time when it is needed. And the entire bill expires in 1985.

Third, Senator McClure and the Senate Energy Committee are wisely relying on the President's informed discretion in terms of deciding when the standby allocation program should be utilized. Many people have talked about a more mechanized triggering procedure, but we strongly believe that it is not the most feasible approach in the present circumstances.

In view of these considerations and in view of the substantial risk that we will face a crude oil supply disruption at some point over the next decade, we strongly urge you to vote in favor of S. 1503.

Very truly yours,

JACK C. PESTER,
President, Pester Refining Co.,
President, IRAA.

NATIONAL FOOD PROCESSORS ASSOCIATION,
Washington, D.C. October 16, 1981.

Hon. JAMES A. MCCLURE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCLURE: The National Food Processors Association (NFPA) filed a statement for the record of the hearings held by the Committee on Energy and Natural Resources in favor of legislation giving the President new authority to allocate petroleum products. Although the NFPA shares President Reagan's preference for a free market, it is our contention that when supplies are disrupted by outside sources a "free market" no longer exists, and the normal supply and demand mechanisms will not suffice. The President should plan in advance and should have authority to act when necessary to assure distribution of fuels to argicultural end users and other priority end users.

We urge you to vote for S. 1503 as reported. This would create new standby authority for the President to allocate petroluem products during a severe supply disruption. Of all the industry activities in the United States, none are more vulnerable to energy supply disruption than are the growing, harvesting, and processing of perishable foods. For this reason, there should be a high priority on energy for agricultural end users.

Sincerely,

RICHARD W. MURPHY,
Vice President.

NATIONAL OIL JOBBERS COUNCIL,
Washington, D.C., October 15, 1981.

Hon. JAMES MCCLURE,
Chairman, Senate Energy and Natural Resources Committee, Dirksen Senate Office Building, Washington, D.C.

DEAR MR. CHAIRMAN: The National Oil Jobbers Council would like to commend you and the members of your Committee for your leadership in insuring that this nation will be adequately prepared to react to any future petroleum supply disruptions. NOJC feels that without legislation such as S. 1503, the 22,000 small business independent marketers of petroleum products and the millions of consumers they serve would face unnecessary hardship during a severe emergency.

This legislation fills a critical void in the President's powers to act in a severe crisis and gives this nation time to prepare programs that can help us avoid the problems created by past regulations that were hurriedly formulated and unnecessarily perpetuated.

Sincerely,

PHILLIP R. CHISHOLM,
Executive Vice President.

NEW ENGLAND FUEL INSTITUTE,
Watertown, Mass., October 19, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Senate Committee on Energy and Natural Resources, Dirksen Senate Office Building, Washington, D.C.

DEAR SENATOR MCCLURE: The New England Fuel Institute ("NEFI"), an association of 1,264 independent retail and wholesale home heating oil distributors throughout the six New England states, wishes to express its strong support for adoption of the "Standby Petroleum Allocation Act of 1981," S. 1503. As active competitors in the petroleum market, we believe that the market is the best allocator of product in all but the most extreme circumstances. However, as we explained in our testimony before the Committee of May 19 and our statement of August 10, NEFI recognizes the importance of price and allocation controls on refined petroleum products in the event of a severe supply disruption.

In the winter of 1973–74, the Emergency Petroleum Allocation Act ("EPAA") prevented home owners in New England from suffering severe hardship due to the cold. That Act ensured equitable allocation of home heating oil at equitable prices to our region. Without that legislation, major integrated oil companies would have retained whatever available supply existed within their own distribution systems, primarily outside of New England. The EPAA preserved a viable independent marketing segment. The difficulties occurred when those controls were kept in force long after the crisis had passed. Commendably, S. 1503 avoids this problem by providing an automatic termination of regulations no more than 90 days after their implementation.

NEFI also urges the enactment of a strong preemption provision. The distribution of crude oil and petroleum products involves interstate commerce; that system cannot be subject to piecemeal state-by-state allocation and pricing regulation. It is clear that it is the intention of Congress to permit the market to govern petroleum price and allocation matters at all times except during an emergency. However, if Congress does not explicitly state that intent, it may in effect encourage States to adopt legislation which it not only does not endorse but which it wishes specifically to avoid. Therefore, NEFI supports a preemption provision which states that the Federal program, regardless of whether it is implemented, supersedes all State and local price and allocation programs. Such a provision is essential to achieving the objectives of the Federal legislation.

With this amendment, S. 1503 will ensure that our nation is prepared to deal with any future energy supply emeregncy in an equitable and efficient manner.

Respectfully submitted,

CHARLES H. BURKHARDT,
President.

COLLIER, SHANNON, RILL & SCOTT,
Washington, D.C., October 15, 1981.

Sen. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources,
Dirksen Senate Office Building,
Washington, D.C.

DEAR MR CHAIRMAN: On behalf of our client, the Society of Independent Gasoline Marketers of America (SIGMA), we wish to express the association's appreciation for your and the Committee's efforts with respect to S. 1503. As you are aware, SIGMA believes that it is essential that the President of the United States be provided with clear, unambiguous authority to respond to any potential severe petroleum supply disruption. SIGMA views S. 1503 as an appropriate grant of such authority. Therefore, SIGMA strongly supports the Senate's passage of S. 1503.

Sincerely,

R. TIMOTHY COLUMBUS,
Counsel.

UNITED FRESH FRUIT AND VEGETABLE ASSOCIATION,
Alexandria, Va., October 16, 1981.

Hon. JAMES A. MCCLURE,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MCCLURE: On behalf of the United Fresh Fruit and Vegetable Association, I wish to commend you for your work on the "Standby Petroleum Allocation Act of 1981," which recognizes the priority energy needs of the agricultural industry. United fully supports the passage of this bill (S. 1503) and urges the Senate to consider the legislation in the near future.

Briefly, United is the national trade association for the fresh fruit and vegetable industry. Its membership numbers over 2,700 companies located throughout the country. They are engaged in all facets of the fresh produce industry and include growers, shippers, receivers, wholesalers, retailers, truck and produce brokers, as well as motor, rail, air and water carriers. Collectively, the members of United handle more than eighty per cent of the fresh fruit and vegetables which are commercially marketed in the United States, a thirty-five billion dollar a year industry.

United does not believe that the economic forces of the market place, without this standby petroleum allocation legislation which you introduced, are sufficient to allocate equitable and efficiently limited fuel supplies during an energy emergency. If an oil crisis should occur without a standby allocation plan ensuring energy supplies for food production and transportation, it would seriously threaten the welfare of the agricultural community and the nation's consumers who depend upon American agriculture.

American agricultural production consumes just three per cent of the nation's energy resources, and agricultural transportation uses only one percent of the national supply. Although this large industry requires relatively small amounts of fuel and energy, these supplies must be available to agricultural users without disruption. Due to the highly perishable nature of fresh fruits and vegetables, even a few days delay can result in costly crop losses or severe deterioration of crop quality. Consequently, a disruption of oil supplies without a standby allocation plan for agriculture would impair the ability of the members of United to produce, harvest and transport their commodities to market.

Accordingly, United appreciates your work on S. 1503 and will urge the members of the Senate to pass it forthwith.

Sincerely,

BERNARD J. IMMING,
President.

Mr. McCLURE. Mr. President, I thank the members of the committee, those who have agreed with this action, in particular. I also thank those who have disagreed with this action for their constructive comments and their willingness to participate in the process, even though they disagreed with the outcome. I am sure that this cooperation will continue on the floor.

I also wish to particularly commend the ranking minority member, the former chairman of the committee, Senator JACKSON, for his continued support and participation throughout this markup. I also thank Senator JOHNSTON and Senator FORD and others on the other side of the aisle who have been faithful in their attendance at the hearings and at the markup. No member of the committee has been more prompt in coming to or more willing to stay at the committee's proceedings than has the Senator from Kentucky. A close second would be the Senator from Louisiana. I appreciate that because it makes the work of the chairman much easier.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, I shall be rather brief. I wish to say, first, that I share the bias of the Senator from Idaho against regulation, and this bill is not intended to be EPAA, junior. Rather it is intended to be a very carefully crafted, greatly restricted, discretionary power with the President to be used by him in an emergency and then for only a limited period of time.

We hope it will never have to be used, but we must look at the situation in the Middle East and consider the instability there. We must consider the fact that wars and rumors of wars are transpiring even today, the fact that just days ago one of our very best friends in the Arab world. President Sadat, was assassinated, and the fact that the King of Saudi Arabia was assassinated a short period of time before that. Also, we must consider the fact that Iran and Iraq continue to be in war, the Yemenese continue to make menacing sounds and gestures at Saudi Arabia, the Lebanese situation continues to boil and threatens again to erupt into what seems to be an almost constant state of war, and the Libyans and the Sudanese continue to have raids and fight across the border. In sum, Mr. President, the Middle East is an unstable area that supplies the world with most of its imported oil.

And a cutoff of supplies from the Middle East is not only possible or conceivable but it is thinkable, and it is in that spirit that this bill intends to have a framework built on which emergency action can be taken.

Without this framework, without all of these issues having been thought through and the framework built, then the emergency would be indeed much worse as the country frittered away its time trying to build this structure in the midst of that emergency.

Second, I wish to say that the bill is defective in my judgment in that it does not deal with the question of gasoline rationing. Gasoline rationing is a step removed from the kind of emergency that would trigger this bill and the provisions of this bill.

Gasoline rationing, in my view, should be invoked only in a really severe emergency or in terms of percentages, a cutoff of something like 20 percent of our supplies. But if we ever reach that point, Mr. President, it would be perfectly clear that the free market acting alone could not solve the problem because what we would have would be prices of gasoline that some have estimated to be as high as $6 or $8 a gallon. That kind of free market price simply would be unacceptable to the American people. To allow marketers of gasoline, whether they be the corner filling station or the biggest international oil company in the world, to raise prices 200 or 300 percent in the midst of such a crisis and have that provide the "free market mechanism" by which a scarce and precious resource is rationed among the people of this country would be totally unacceptable.

And that is the situation we would face. We have no standby rationing plan. I quite agree that the rationing plan that we perfected beginning with President Ford's administration and then culminating in President Carter's administration was a flawed plan. Indeed, it is impossible to have a rationing plan that is not flawed because there is no equitable way or no reasonable way to measure and calculate the needs and equities pertaining to millions of different Americans and millions of different situations economic, social, moral, et cetera. There is no way to do that adequately, completely, and fairly.

So any program that attempts to do it is, therefore, necessarily flawed. But we should have some standby plan that the President can invoke in the midst of an emergency and as we often said in these matters if the oil companies cannot trust Ronald Reagan whom can they trust? Ronald Reagan as President of the United States should have some kind of standby authority for gasoline rationing which I hope he would never have to use. I would hope that the most liberal Democrat would not even be tempted to use it. But it should be there, and this bill is flawed in that it does not deal with that question.

Other than that, the bill is a good one. The crude sharing provisions I think are reasonable. They have been fought for as standby authority by a number of us over a long period of time. The reason we want crude sharing is that the independent refining sector is vital to competition. It is vital to the supply of many regions of our country. And without some kind of protection in the event of a crude oil cutoff, a crude oil shortage, we would be likely to lose our entire independent refining sector, which comprises about 25 percent of refinery capacity in this country.

The crude oil sharing provisions, Mr. President, lest anyone be confused, is not a return to the old days of the small refiner bias. No one, certainly not I, wants to return to what was a bravely conceived but poorly executed plan that gave the small refiners what I think the Washington Post called a bubble bath of subsidy which they neither deserved nor which happened to be economically efficient. The subsidy was too much. It even created small topping plants or distillation plants that really added nothing to the refinery capacity needed by this country.

We are not authorizing that with the crude oil sharing program. We are requiring that the President come up with a set of rules which he can invoke in the midst of such an emergency. He can invoke crude oil sharing before, after, independently of or part of a price and allocation proposal.

So in my view the most sensible thing would be that the President would in the midst of an emergency first invoke crude oil sharing before he goes into price and allocation because crude oil sharing would be a less burdensome, a less dislocating thing for petroleum markets than price and allocation would be. That would be a judgment which the President would be free to make under this bill.

Finally, let me say just a word about

Federal preemption of State and local laws. We will deal with preemptions here in an amendment to be offered next week. I understand it is next Thursday that we will resume consideration of this bill. I have a proposed preemption provision which I have circulated.

There are various other versions of a preemption amendment which are also being circulated. The distinguished chairman of the committee and I, and indeed the whole committee, dealt with this matter in the markup. The record of the markup reflects an intention of the committee to offer a preemption amendment on behalf of the committee which in effect would provide that Federal law in this area, pricing and allocation, would preempt any State laws except to the extent that the President chose either through a rulemaking or some other procedure to exempt from preemption either generic or generalized types of State laws or indeed perhaps even to exempt State laws by name if they fit the category.

We have not succeeded at this point in reducing that concept mentioned at the markup to an agreeable set of words, but I hope and trust that we will be able to do so.

Price and allocation control are something we all want to avoid, but one thing is clear, at least to this Senator, and that is if it is invoked it ought to be done on a uniform basis with the national good in mind. That is clear, I think, to all of us who have dealt in this area over the period of years since the first oil shock that oil is not only an interstate matter of concern, it is an international matter, and no State should be permitted to set up regulations on pricing and allocation that would get for that State some kind of advantage over its neighbor or would set up a system which might be inconsistent with the national good and the national interest as far as oil and oil pricing and allocation are concerned.

If it is a sufficiently strong problem that a State should want to invoke a program, then that same kind of circumstance should cause the President to invoke the program on the national level, and I hope and trust we can work that out.

Mr. President, the Standby Petroleum Allocation Act of 1981 is a bill I consider to be one of the most important pieces of substantive legislation we will debate in this Congress.

This has been a year of tax and budget cuts. Congressional preoccupation with the economy has been and will continue to be needed and appropriate, given the dismaying statistics we see everyday on the rates of unemployment, of inflation and of interest on borrowed money.

Much of the difficulty in which we now find ourselves can be traced to the sudden petroleum price increases of the 1970's. The law which defined our petroleum policy during that period, the Emergency Petroleum Allocation Act of 1973, expired on October 1, 1981. It is therefore also appropriate that the Senate at this time consider legislation establishing a new petroleum policy for the 1980's. That new policy is embodied in S. 1503.

It is, first of all, a bipartisan policy. Sponsored originally by the chairman of the Committee on Energy and Natural Resources, Senator McCLURE, this bill has become under his leadership a bill which reflects the consensus of the views of both Republicans and Democrats on the committee. Senator McCLURE is to be congratulated for his work in building this consensus.

Second, this bill is a free-market bill. Its bias is clear. The free market is the primary mechanism to be used to address shortages of petroleum. Allocation may only be used in truly extraordinary circumstances, and then only subject to rigorous limitations established in the bill.

Thus, any allocation rule may only be implemented after detailed findings are presented to Congress by the President and only after Congress has been given an opportunity to veto such implementation.

Moreover, any allocation rule imposed will automatically self-destruct unless the President again demonstrates that circumstances are still so precarious as to justify continuation of the effectiveness of the rule.

It is the committee's intent that a heavy burden be placed on the President in making the findings referred to in these provisions of S. 1503. Clear and compelling justification for the actions the President would take under this authority are required.

Finally, this is a responsible bill. Experts on the forces affecting the world oil market are virtually unanimous on the subject of the inherent instability of that market. The 1980's are expected to include turbulent, and potentially disastrous periods for oil-consuming economies. The President must have adequate discretionary authority to manage domestic petroleum supplies in the event that the severe disruption we hope will never happen does in fact occur. The President and Congress should arrive at an agreement on the nature of that authority now, before such a disruption occurs.

Mr. President. I ask unanimous consent that a summary of a study underlining the need for this kind of authority by one of the world's foremost petroleum consultants, Walter J. Levy, be printed in the RECORD at the conclusion of my remarks.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1)

Mr. JOHNSTON. I urge the Senate to act in an expeditious manner to provide the President the clear legislative authority he needs to exercise effective leadership during a petroleum supply crisis. S. 1503 represents a basic approach to this problem. S. 1503 provides for a free market supplemented by allocation where necessary. This approach is perhaps the most familiar and easily managed methodology we have to deal with petroleum shortages. For this reason, if for no other, such authority should be unambiguously available to the President.

S. 1503 also includes specific authority for an optional program which may offer special help to the President in smoothing out disruptions in petroleum supplies with a minimum of regulatory instrusion. Section 5 of the bill provides for a program of crude oil sharing among refiners which could be implemented by the President to reduce disparities in crude oil availability during a severe supply disruption.

I believe the approach offered by section 5 of S. 1503 contains a number of advantages. First, such a program can be implemented in a manner which involves regulatory interaction with refiners only, and perhaps with only a few of them—the most disadvantaged and the most fortunate relative to the average. At the same time it should be possible to avoid complex and burdensome controls on domestic producers of crude oil and on distributors and marketers of refined petroleum products.

Second, such a program can alleviate the kind of panic-buying which drove world crude oil prices from $15 per barrel to over $40 per barrel during the shortfall resulting from the Iranian revolution. If refiners know that everyone will be treated fairly with respect to crude oil access during a severe supply disruption, the impact of that disruption on crude oil prices should be mitigated.

Finally, such a program should provide the kind of certainty necessary to permit a broad range of refinery upgrading investments. With the knowledge that refiners will be able to get some crude oil during a disruption—to be sure, not as much as they might want—financing for refinery retrofit should become available at far more reasonable rates. Refinery upgrading offers real promise for the reduction of overall U.S. crude oil requirements as well as requirements for expensive, foreign, light, sweet crude oils.

The more flexible our domestic refining capacity is in converting readily available crude oils and unwanted residual fuel into transportation and home heating fuel, the more domestic priority users of petroleum will be insulated from any sudden reduction in the availability of the most-sought-after foreign refinery feedstocks.

The free market supplemented by allocation, crude oil sharing and the use of refined product set-asides are authorities contained in S. 1503. Other approaches to the problem have been suggested. These include detailed rules for the use of strategic petroleum reserve oil and reliance on the recycling of incremental Federal tax revenues, resulting from high domestic oil prices, as ways to mitigate the effects of a severe petroleum supply disruption. These options merit the study and consideration of Congress. In my opinion more study is necessary before either option is ready for enactment.

The Energy Policy and Conservation Act (EPCA) governs the use of oil stored in the strategic petroleum reserve, and S. 1503 would not change that. The committee intends that the allocation of crude oil from the SPR be governed by the applicable provisions of EPCA, not by S. 1503. With nearly 250 million barrels

in the SPR by January 1, 1982, Congress may soon decide to review the matter of SPR drawdown. The committee decided not to attempt such review in the context of S. 1503.

I have a special interest in the matter of windfall petroleum revenue recycling as a method of addressing severe petroleum supply interruptions. I have a bill, S. 824, before the Finance Committee which contains a version of this approach. I introduced S. 824 to stimulate substantive discussion of the recycling option. I think the concept has great promise. In any event, it is the preferable approach if the alternative is coupon rationing of petroleum.

The Committee on Energy and Natural Resources was urged to adopt another version of revenue recycling as the sole response permitted to the President during a severe petroleum supply disruption. I understand that a similar amendment will be offered during floor debate on S. 1503. I will oppose this amendment, and I urge my colleagues to do the same.

Revenue recycling may turn out to be the preferred approach to the management of petroleum supply disruptions, but we have not yet had the benefit of the kind of detailed analysis which might tell us that conclusively. Such analysis simply must be available before we consider adopting recycling as a discretionary policy. Certainly we do not know nearly enough about how revenue recycling would work to make it our only policy.

I hope that we will be able to make clear that a negative Senate vote on revenue recycling does not preclude future approval of the concept, when and if the appropriate detail and justification can be provided to the committees of jurisdiction.

Mr. President, the bill before us is a worthy product of the Committee on Energy and Natural Resources and deserves the support of the Senate. I urge my colleagues to act favorably on the bill so its enactment by Congress can be accomplished as soon as possible.

EXHIBIT I

CRUDE PRICE DECONTROL—WHAT IT WILL MEAN FOR COMPETITIVE CAPABILITIES IN THE U.S. REFINING INDUSTRY

SUMMARY

1. The time and circumstances under which domestic crude oil is scheduled to be decontrolled are critical to the potential impact of decontrol on competitive capabilities in the U.S. refining industry. For the foreseeable future, U.S. refineries will be dependent upon substantial volumes of foreign crude to meet their total feedstock requirements. Furthermore, U.S. refineries will be importing crude in a world oil environment characterized by tight supply/demand balances, a range of uncertain events that could disrupt supplies at any time, and prices that are volatile and subject to wide disparities.

2. The Report begins with a look at the likely circumstances under which foreign crude oil will be available to the U.S. refining industry in the 1980's. We then consider how markets for domestic crude oil may look after decontrol. The final part of the Report deals with the implications for government policy of problems of competitive access of U.S. refiners to crude oil supplies in periods of shortage.

FOREIGN OIL AVAILABILITY

Requirements vs. potential supply

3. The general outlook for the decade of the 1980's and beyond is for world-wide oil balances to be tight at best. Demand for oil will increase very slowly by historical standards, reflecting a very marked slowdown in growth of total energy requirements and major contributions to energy supplies from sources other than oil. Nonetheless, the demand for oil will still increase substantially in absolute terms (close to +10 million barrels per day between 1980 and 1990) and the non-Communist world will be consuming on average about 20 billion barrels of oil annually over the decade.

4. Even with a substantial increase in non-OPEC oil production, demand for OPEC oil output could average close to 30 million barrels daily in the 1980's. This level of demand for OPEC oil looks to press up against the ability and willingness of OPEC nations to produce over the years ahead.

5. The decade of the 1980's and beyond should see a rising long-term trend in the real price of crude oil, reflecting generally tight oil balances, a dwindling resource base, and higher replacement costs. However, the upward trend in foreign crude oil prices is not likely to be smooth.

6. With little in the way of available surplus productive capacity to turn to, it will not take much in the way of lost production somewhere around the world to disrupt international oil supplies in the 1980's. Cutbacks in oil availability could result from a wide range of possible developments—e.g., withholding of supplies by one or more exporting countries for political reasons, physical mishaps, and military conflicts such as the past Arab-Israeli wars and the current war between Iran and Iraq. With little slack and many potential shocks, it is reasonable to anticipate a greater frequency of disruptions to world oil supplies in the future than in the past.

Furthermore, the disruptions that occur are likely to have a far greater impact than those of only a few years ago—e.g., contrast the minimal effect on oil supplies and prices of the Arab oil embargo arising out of the Israeli-Arab war of 1967, when substantial surplus productive capacity was available, and the devastating impact of the embargo/production cutbacks that followed the Arab-Israeli war in 1973, when there was relatively little in the way of unutilized capacity that could be drawn upon.

The impact of supply disruptions

7. When various random events trigger temporary cutoffs in the flow of oil, companies and countries who are left short of supplies—or even fear they will be left short—will inevitably seek out whatever oil is still made available in order to shore up their positions. The urgency to make up supplies can be expected to lead to hectic price competition in "spot markets"—i.e., anytime and anywhere uncommitted oil can be acquired by bidding up the price of such supplies.

8. However, with supplies being tight and shortages feared, companies with continuing access to foreign crude—e.g., through producing positions or supply contracts—are unlikely to make much in the way of supply available to others. In these circumstances, all companies have a strong interest in holding very closely whatever supplies they may have available. Higher-than-market price offers by crude-short companies may elicit little if any additional supply. Hence, dramatic runups in price offers in the effort to get potential sellers to let go of barrels. Even then, the volumes actually transferred tend to be relatively limited compared with the quantum increases in crude oil prices.

9. Withal, sharp increases in spot prices will be followed in course by upward adjustment in contract and OPEC official prices, although not necessarily to the levels reached in spot markets.

10. In this kind of environment, disparities among prices at which various crude oils are moving are likely to be fairly wide. By way of illustration, in mid-1979 when buyers were still scrambling for crude in the wake of Iranian cutbacks, official government selling prices were in a considerable range—e.g., Saudi Arabia at $18 per barrel, Kuwait at $19.50, and the OPEC African producers at $23.50. Term resales of OPEC crudes were reported at official prices plus 35–50 cent premia in the Arabian Gulf and up to $2 for African crudes. Spot prices were approximately $32 for Arabian Gulf and $36 for African crudes. By end-1979, Saudi Arabia had increased its official price by a steep $6 per barrel to $24, but didn't even come close to narrowing the gap on other escalating OPEC official and contract prices.

11. Companies will inevitably have differing crude costs even absent emergency supply conditions, reflecting relative resource positions and the commercial options they have chosen. The effect of shortages is to sharply widen the divergencies. However, the most critical aspect of price behavior during disruptions is that if there are no governmental policies in place assuring equitable access—among countries and among companies—competitive bidding for scarce supplies will lead to repeated price explosions. These can have dire consequences for the world's economies, for comity among oil-importing nations, and not-so-incidentally for incentives for essential investments to adopt U.S. refining capabilities to the country's changing product requirements (of which more later).

Temporary surpluses

12. The 1980's are likely to witness periods of temporary surpluses from time to time. These could emerge, for example, when production is restored after a supply disruption and/or demand is reduced substantially by sharp price increases and depressed economic activity. During temporary surpluses, there is the potential for price weakness and a narrowing of price differentials among crudes. However, there are several major factors that serve to vitiate downward price pressures and the narrowing of price disparities when crude balances become easier.

13. Most important, OPEC provides support to prices through the ability and willingness of its resource-rich members, notably Saudi Arabia, to live with substantial shut-in capacity when surpluses emerge. This underpinning serves to limit competitive selling pressures among OPEC nations and prevent a general downward price spiral.

14. Actions of oil-importing countries and companies also tend to help OPEC along in supporting prices in times of temporary surplus. After a shortage and in anticipation of the next one, there tends to be a compulsion to build up inventories as supplies become more plentiful. This adds to the total demand for oil and keeps balances tighter than they would be otherwise. Furthermore, offtaking companies often continue to accept high asking prices from producing countries even when oil balances ease up. To refuse high prices in the short term could prejudice long-term offtake rights which would be of precious value later on when balances tighten once again.

15. It is possible that discounts off OPEC official prices could emerge during temporary periods of surplus, despite the support provided directly by key OPEC members and indirectly by the actions of oil importers. However, these discounts are likely to be modest as compared with premia during shortage periods. Price behavior thus is likely to be asymmetrical during periods of shortage and surplus.

Implications of uncertain supplies and exploding crude prices

16. The world would be able to adapt to a reasonably continuous upward trend in real oil prices that reflected the increasing scarcity of oil resources and rising cost of replacement. It is the explosive price increases during periods of shortage—coupled with rigidities on the downside when temporary surpluses emerge—that lead to serious

economic difficulties for countries and commercial difficulties for companies.

17. Explosive increases in oil prices have a serious negative effect on international financial flows—adding to already high trade deficits of most oil-importing countries and adding still further to the huge financial surpluses of a few exporting countries—and world economic activity. Bidding among oil-importing countries for limited volumes of scarce supplies—which can only benefit one at the expense of another—is bound to undermine efforts for international economic cooperation. Companies whose only recourse in the event of supply disruption is frenetic bidding in what may be a futile effort to obtain needed crude supplies clearly do not have a sound basis for making future investments in refining operations.

18. These problems can only be dealt with by concerted policy efforts on the part of the governments of oil-importing countries. What is essential is that during periods of shortage, scant oil supplies are shared equitably among countries and there are assurances that companies also will share on some reasonable basis in whatever supplies are available (to which we return).

U.S. crude oil markets after decontrol

19. U.S. crude oil price controls are currently scheduled to be phased out by October, 1981. Decontrol sooner is being mentioned as a possibility under the incoming Reagan Administration. Whenever controls are lifted, prices for domestic crude oils will be oriented in general to the delivered costs of foreign crude.

20. In 1979, when limited volumes of domestic crude were free of controls and world oil supplies were scarce, prices for decontrolled domestic crudes tended to move up to—and at times even above—the delivered cost of foreign crude purchased at spot prices. In effect, a spot market developed in the United States—comparable to the so-called "Rotterdam" market abroad—for the volumes of domestic crude that were free of controls and could be obtained by bidding on price. Price premia paid for domestic crude over and above spot foreign crude presumably reflected the value attached by purchasers to the added supply security of domestic crude oil.

21. However, when all domestic crude is decontrolled, it is unlikely that some 8 million barrels daily of domestic crude will sell at prices tied inexorably to a very narrow foreign spot market. Prices posted by U.S. refiners for domestic crude after full decontrol are likely to reflect a combination of commercial, institutional, and political considerations. Such factors as the invoiced price of foreign supplies, assessments as to what level of prices may be necessary to acquire or hold supplies in competition with other refiners, and tax considerations (e.g., the incidence of excess profits tax on higher price realizations for an integrated producer) could enter into pricing decisions of individual refiners. All of these factors are likely to militate against very close or very quick adjustment in domestic postings to short-term changes in foreign spot markets.

22. In an environment of tight oil balances and supply uncertainties, substantial volumes of domestic—as also of foreign crudes—are likely to be tightly held. Refiners with access to their own domestic crude production and/or some form of control over purchased crude via gathering and other pipeline connections will have a strong interest in keeping such crude within their integrated systems.

23. As with the foreign oil market, the ability of crude-short refiners to dislodge domestic crude from others via price offers is likely to be relatively limited in times of severe supply stringency. To the extent necessary, refiners threatened with loss of domestic crude to which they have access via pipeline connections would tend to raise their own postings to the level at least necessary in order to assure their continuity of supply. Whatever domestic crude might be acquired through competitive bidding in such circumstances would almost inevitably be not only at the high end of the spread of prices that refiners pay, but would probably exceed that in net cost by virtue of collateral arrangements entered upon in order to complete the transaction.

Access to crude and Government policy

24. The future foreign and domestic crude oil environments described above suggest serious problems for various U.S. refiners in obtaining crude oil supplies in periods of shortage. It is very difficult to predict in advance which refiners are likely to feel the immediate or major brunt of shortfalls. In general, independent refiners are likely to be relatively exposed, owing to their more tenuous crude oil resource positions. Integrated refiners may have better security of supply when interruptions occur through their preferred access to large volumes of foreign oil as operators or under contract arrangements and to domestic oil either owned or controlled.

However, major oil companies can also be very hard hit, especially because of their dependence on vulnerable foreign sources. Witness the experience of British Petroleum, which within a relatively short period of time lost its 40-percent interest in Iran, had contract purchase volumes sharply cut back in Kuwait, and was thrown out of producing positions in both Libya and Nigeria for political reasons that the respective host governments presumed to invoke whilst tight world oil balances made their actions less risky than would have been the case in an earlier period. U.S. majors may not be politically impervious.

25. Absent a cushion of spare productive capacity, refiners who suffer cutoffs in traditional oil supplies find themselves with limited let alone commercially unattractive options for making up the deficiency. It is unlikely that alternative offtake arrangements can be negotiated when supplies are generally short. The only real alternative then is competitive bidding in spot markets, foreign and/or domestic. And as discussed, the consequences tend to be disruptive, not only from the standpoint of the companies affected but also of the countries exposed to the shortfall.

26. From the standpoint of the individual refiner, if he is successful in obtaining spot supplies, it would only be at very high prices. But even at very high prices, an individual refiner is unlikely to obtain the volume of crude supplies in the spot market that he needs to sustain operations—not when a crisis significantly cuts into aggregate crude oil availability on world markets.

27. Competitive bidding for spot supplies in shortage situations is also an unsatisfactory alternative from the standpoint of oil-importing countries, individually and as a group. Since total volumes available are limited, what one refiner or country acquires by bidding is at the expense of another. Further, as experience has only too convincingly shown, the resulting explosive price increases can lead to serious economic problems of world-wide dimensions—as following the 1973–74 and 1979–80 episodes.

28. There is a parallel, then, between the concern of U.S. refiners for crude access during supply emergencies and the concern of the U.S. Government on an international level for both equitable access among nations and fending off economically disruptive price runups. The United States has joined with most other industrial nations, under the auspices of the International Energy Agency, in developing a plan for oil sharing among its members in emergencies. A key objective is to keep countries from competing among themselves for limited supplies by providing each country with reasonably assured access to whatever limited supplies are available.

29. U.S. policy toward its oil-refining companies could be as essential during supply crises as U.S. policy with its oil-importing-country allies. It is in the U.S. interest to see that neither countries nor companies are left unprovided for when an emergency arises. Having the mechanisms in place that assure equitable access during periods of shortage would clearly help also to preclude the disastrous price explosions of recent years and that otherwise would have to be anticipated with perhaps increasing frequency over the years ahead.

30. The United States has an obvious national interest in a viable domestic refining industry. The industry will have to provide adequate overall capacity to meet future demand. More important, the U.S. refining industry will have to adapt over the years ahead to a changing pattern of product requirements, more stringent product specifications (e.g., lower-sulphur content), and shifting mixes of available crude oils (particularly, heavier and higher in sulphur). This adaptation will inevitably require continuing investment in high-cost, complex processing facilities.

31. When it comes to a supply crunch, it may be reasonably assumed that some form of ad hoc allocation of available crude would be invoked, particularly if circumstances get bad enough. However, this is hardly the same kind of assurance of supplies as would be provided by a program-in-place that spells out in advance how refiners would share available oil in the event of emergencies.

32. To ensure incentive for continuing essential investment by the U.S. refining industry—particularly with the lapse of extant authority as from October 1981 decontrol—legislative and administrative foundations would have to be reestablished to provide refiners with reasonable confidence of equitable access to crude in supply emergencies and at prices that are not disastrously out of line with competitive crude costs. The latter is not meant to imply that crude costs among refiners should be equalized on a continuing basis, or even in shortage situations. However, incentive to investment in new facilities requires some assurance that refiners will not be exposed subsequently to such extremely out-of-line crude prices that the continuity of viable operations would be seriously threatened.

33. In sum, during periods of supply crisis, a program for equitable access to crude oils by U.S. refiners would serve the national interest by paralleling international efforts to share available supplies among oil-importing countries and to fend off explosive price increases associated with the crisis or even in anticipation.

Mr. JOHNSTON. Does the fact that the objectives listed in section 4(a)(2) of S. 1503 are identical to those in the Emergency Petroleum Allocation Act of 1973 (EPAA) mean that the administration must implement the same regulatory programs as those which were developed under the EPAA?

Mr. McCLURE. No. The Committee on Energy and Natural Resources did not intend to reincarnate EPAA through S. 1503. If the committee had wished to reenact the EPAA along with all of the regulatory programs that implemented it, the committee could have simply extended the EPAA.

However, the committee consciously chose a different route. After careful consideration, the committee concluded that it is essential to the national inter-

est to provide the President with broad allocation authority in the event of a severe petroleum supply shortage. However, in order to prevent S. 1503 from expanding into another EPAA, the committee adopted certain safeguards.

For example, the authority in S. 1503 is discretionary, not mandatory as was the EPAA. Unlike EPAA, the authority under S. 1503 cannot be implemented without a finding by the President, which is subject to congressional review, that a severe petroleum supply shortage exists or that it is required by the international energy program.

Furthermore, in sharp contrast to the EPAA, price controls can be imposed under S. 1503 only after the President makes a specific finding that they are necessary. Moreover, S. 1503, unlike the EPAA, contains a strict sunset provision.

In the report which accompanied S. 1503, the committee explained as follows its decision to incorporate into S. 1503 the section 4(b)(1) objectives of the EPAA:

> The Committee's decision to incorporate the objectives of section 4(b)(1) of the Emergency Petroleum Allocation Act of 1973, as amended, into S. 1503 was based on the consensus formed in the course of the mark-up sessions that the interests reflected in that provision have historically been and continue to be of national concern and should therefore be preserved.

It is not surprising that S. 1503 reflects some of the same concerns as did the EPAA since S. 1503 and the EPAA address the same general subject matter. However, section 4(a)(2) must be interpreted in the context of the purpose of S. 1503 and the bill as a whole. It would be a mistake to interpret that particular provision in a manner which counteracts all of the committee's efforts to avoid duplicating the EPAA.

A basic motivation for S. 1503 was the committee's recognition that the nature and scope of a petroleum supply crisis is inherently unpredictable and, therefore, the President's ability to tailor his response to particular circumstances should not be circumscribed.

Given the broad flexibility granted to the President under S. 1503, it is the committee's expectation that the President would take the most limited measures necessary to address a particular crisis. As we noted in the committee report:

> For example, the President could decide to implement only a crude oil sharing program or only a production allocation program. The President could implement a given program only in a certain State or region and the program could affect only one product.

If the President decided to implement only a crude oil sharing program, for example, during a severe petroleum supply shortage, it is obvious that the implementation of such a program would not meet all of the objectives of section 4(a)(2). Thus, the basic philosophy of S. 1503 of broad flexibility and minimum Government intervention in the market is inconsistent with interpreting section 4(a)(2) to mandate the adoption of any particular regulatory program, much less the comprehensive regulatory scheme developed under the EPAA.

Mr. JOHNSTON. Mr. President, I yield the floor.

The PRESIDING OFFICER. The Senator from Kentucky.

Mr. FORD. Mr. President, I speak today on behalf of S. 1503, the Standby Petroleum Allocation Act of 1981. I support this legislation and commend it to my colleagues as well-reasoned, prudent and necessary action to provide the Government of the United States with the clear, unambiguous authority required to protect the Nation from the consequences of a severe petroleum supply disruption.

We continue to be too dependent upon foreign oil. Recent tragic events renew our concerns regarding the stability of our sources for such oil. Yet, we have not prepared adequately for a supply emergency. The Comptroller General recognized this fact in his report of September 29, 1981, entitled "The United States Remains Unprepared for Oil Import Disruptions." In that report, GAO specifically recommended that Congress "replace the expiring EPAA authorities with a standby system to help assure oil availability during disruptions. Whatever system is chosen * * * should be fully developed, tested, and maintained in readiness for future disruptions."

GAO was not alone in recognizing the need for clear authorities such as those which would be provided by S. 1503. Even the Department of Justice has recommended that such clear authorities be enacted. Thus, I believe that the need for this legislation has been established. If we fail to respond to that need, we must all bear the responsibility for the injuries which will be inflicted on the agricultural community and other essential industries, as well as homeowners and small businesses, when, as a result of a supply disruption, they are unable to obtain the fuels essential to their functioning.

As Governor of Kentucky, and as a Member of this body, I have witnessed the effects of a severe petroleum supply disruption. From those experiences, I have concluded that certainty regarding the powers of the Government to act in such a crisis is essential. With the expiration of the Emergency Petroleum Allocation Act of 1973, no such certainty exists. The vacuum created by the expiration of EPAA raises serious questions regarding the ability of the President to respond to a petroleum supply emergency and to avoid the economic dislocations and severe hardships which such an event could generate.

Under the leadership of our chairman, we on the Energy Committee have produced legislation which fills that vacuum and, while providing the President with the authorities he requires, will avoid the difficulties encountered in previous programs. By requiring the President to prepare a standby program of regulations prior to the advent of a crisis, S. 1503 assures that the confusion associated with the implementation of a program is minimized.

Moreover, it assures that any such regulation will have been constructed in a rational context rather than in the context of market chaos. By restricting the President's pricing authority to that necessary for the effective operation of an allocation program, S. 1503 will avoid the impediments to market adjustment which existed in prior programs. Finally, by expressly limiting the duration of any such program's implementation, S. 1503 assures that a necessary and appropriate response to a severe petroleum supply disruption will not spawn another great bureaucracy which takes on a life of its own.

In summary, S. 1503 is a well-reasoned and prudent exercise in emergency preparedness. While providing essential authority to the President, it requires no more than that he be prepared to respond to a serious supply disruption. It does not tell the President when to use his authority, it only assures that if emergency action is required, then the necessary authority to act exists and that such emergency action cannot be impeded to the detriment of the Nation's interest.

I urge my colleagues to join me in supporting this essential piece of legislation.

I thank the distinguished Senator from New Jersey for allowing me to present my views.

The PRESIDING OFFICER. The Senator from New Jersey.

Mr. BRADLEY. Mr. President, I send two amendments to the desk and ask that they be printed and held at the desk.

The PRESIDING OFFICER. The amendments will be printed.

Mr. BRADLEY. Mr. President, preparation for the next oil emergency is a serious issue. Disruption in our supply of oil has grave implications for our economy, our standard of living, our military capabilities, our foreign policy, indeed our very survival. It is a serious issue and, frankly, Mr. President, the U.S. Senate is not treating it seriously.

The bill we have before us today is not the result of deep and careful thinking about how to deal with supply disruptions. It is merely an extension of the authorities that were used in the past and that have been proven to be failures. That is right. We have before us a bill that will extend the very authorities that have twice in this country caused gasoline lines. Have we all forgotten that? Have we forgotten the turmoil, the physical violence, the political panic, the economic costs of gasoline lines?

S. 1503 is guaranteed to cause gasoline lines once again. Since 1971 we have seen the problems caused by price controls and allocations, and yet what does the Senate Energy Committee bill bring to you to deal with the next disruption? Price controls and allocations.

Mr. President, is this the best we can do? Do we have to repeat the mistakes of the past? Did not the Energy Committee examine alternatives? Again, Mr. President, not very well.

I suggested an alternative in the committee that would have relied on market forces supplemented by financial protection for essential public services and the poor. Has this alternative been treated seriously by the U.S. Senate? No. One of my colleagues on the Energy Committee thought it was a good idea, but he said there were jurisdictional problems.

The guts of my alternative would have the President use an emergency tax cut and an emergency block grant to deal with the higher free market price of oil. Has the Finance Committee scheduled even 1 hour of hearings on this issue? No, it is too busy, too busy scheduling hearings on tax breaks for independent refiners.

That is why, Mr. President, I think the U.S. Senate is not treating this crucial issue of emergency preparedness seriously. We are about to consider and vote on a bill that would reauthorize the mistakes of the past without even holding hearings in the relevant committee on the principal alternative. This is unworthy of the U.S. Senate.

Some people have indeed thought about this issue carefully. Granted, those special interests which receive priority treatment under the earlier regulations now strongly advocate price controls so they can again get their allocations. However, no credible study that I am aware of has concluded that price controls helped the country as a whole. To the contrary, study after study has concluded that price controls make matters worse.

Let me read to you from the conclusions of just a few of the serious studies that have treated this subject. First, the GAO report dated September 29, 1981:

Price controls are a counterproductive strategy and GAO recommends that they not be used. Gasoline rationing also should be avoided because it is clumsy and would need a price control program to work.

That is the GAO study, dead set against price control authority.

Second. An MIT study by Robert Hall and Robert Pindycle:

The most important component of energy policy, particularly for the United States and Canada, is a commitment to the permanent elimination of price controls on energy markets.

Third. A Harvard analysis by Stephen Erfle, John Pound, and Joseph Kalt:

It is vital to the proper functioning of the U.S. economy over the next turbulent decade that any formal EPAA replacement which comes out of the new Congress shed the delusions about market functions that were at the core of EPAA. Congress should recognize the economics of oil market crises and, if it sees fit, should make a major effort during 1981 to design programs based upon tax and transfer systems that will directly address the equity issues of rising oil prices. Programs must be designed that are based on the reality of the distributional issues raised by oil crises, not upon the misperceptions of the public, the media and the policy-makers. To do otherwise, to repeat the mistakes of EPAA, will only serve to create future market difficulties in the U.S. when such difficulties demonstrably need not exist. Such misdirected regulation holds the promise of ultimately harming those whom its past champions have intended to help.

Fourth. From a forthcoming book by Jim Plummer of the Electric Power Research Institute:

Price controls and allocations, done in the name of fairness, add enormously to the social costs of oil supply disruptions. They also create many other forms of unfairness—e.g., gas lines.

Fifth. The U.S. Department of Energy in a July 1981 study of emergency preparedness:

The Administration is convinced that the welfare and interests of the American people will be best served if the government follows a policy of making sure that the nation has adequate insurance in advance to ameliorate the effects of major oil supply disruptions and, in the event of a disruption, of allowing the market to do the job it does best—allocating scarce resources efficiently and effectively among competing demands. For this reason the Administration is opposed to enactment of any petroleum allocation or price control authority, including extension of the Emergency Petroleum Allocation Act.

Sixth. The Heritage Foundation:

Among the most important (lessons of the past) is the realization that in virtually all cases, the market mechanism provides the most efficient means of allocating supplies, and should therefore be relied upon during periods of curtailed imports.

Seventh. Prof. Henry Rowen of Stanford, now with the CIA:

It is especially important in an emergency for Washington officials not to be burdened with administrative controls . . . This argues strongly for a decentralized system which relies on the price system.

I could go on, Mr. President. But the point is that disinterested studies by analysts and scholars conclude that price controls are counterproductive. Most of those who now support price controls represent not the interests of the American consumer but the interests of those special interests that have received preferential treatment in the legislation.

If we approve this Energy Committee bill next Thursday, we will have failed in our responsibilities. We will be telling the President to control prices and allocate oil in the next oil emergency. Yes, we will all feel good—we will go home and tell our constituents and our special interests—especially small refineries—that we took care of them. We will tell them that we protected them from higher prices, we insured that priority activities will get the oil they need at low prices. And our constituents will be very grateful.

But come the next supply disruption, pity the man who occupies the White House. The American people will have been told by their Senators that the President has the power to hold down prices and allocate oil. They will have, as a result of that assurance, made few preparations for the emergency, because they know the President is going to take care of them: their Senators said so. Then picture the gasolines lines, the misallocations, the phone calls from irate constituents that will happen, just like they happened last time the Government tried to control prices and allocate oil.

President Reagan is no fool. He is an astute President and an astute politician. He has said himself that he does not want this authority. In a letter to Congressman BUD BROWN on September 14 of this year, President Reagan wrote:

As the expiration date of the Emergency Petroleum Allocation Act approaches, I want you to know that I fully share your opposition to any extension of allocation and price control authority.

S. 1503 tries to give the President the allocation and price control authority he says he does not want. Administration witnesses told the Energy Committee the same thing. No wonder the President does not want it; in the letter to Congressman BROWN, President Reagan goes on to say:

Experience under the existing law has taught us that rather than ensuring equity, allocation and price controls have turned minor shortages into major gas lines twice in the past seven years.

The President does not want the impossible task of trying to regulate the oil market in a major disruption. And it is an impossible task.

In an editorial last week entitled "Senate Self-Embarrassment," the Wall Street Journal found it incredible that the Senate Energy Committee would want to repeat the energy policy mistakes of the 1970's. The editors could not believe that U.S. Senators had forgotten the dismal days of gasoline lines caused by the price controls. The Journal says:

We read that the Senate Energy Committee . . . has been wasting its time approving a bill thrusting powers on the President he doesn't want. The bill would give the President authority to allocate fuel supplies and impose price controls during a "severe" oil shortage.

It is incredible after the experiences of the 1970s that there can still be people in the Senate, many of them Republicans yet, who want to repeat the energy policy mistakes made back then. It is equally unbelievable that none of these lawmakers remembers those dismal days when motorists sat in long lines, fussing and fuming, waiting to buy fuel.

Those lines were caused by the policies the committee wants to preserve as standbys. Just to go through the lesson once more, we will recall what happened back then: Price ceilings made it impossible for prices to do their supply-demand balancing job; they discouraged domestic oil production and encouraged consumption, making a temporary world market imbalance progressively worse; supply allocations aggravated the problem by freezing oil product distribution patterns at a fixed time in the past, thus providing surpluses to areas of declining demand and shortages to areas of rising demand.

Mr. President, I ask unanimous consent that the remainder of that editorial be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

In short, the authority the Senate committee wants to preserve is a recipe for making any bad situation much worse. Under the leadership of Senator James McClure, Idaho Republican, this got through the committee by a vote of 14–2. (Actually, it was 13–4.) And the Senator, putting words in the President's mouth, insisted that the President would use the authority in any future energy "emergency."

We doubt it. Mr. Reagan is working hammer and tongs to get rid of this kind of regulatory nonsense. It would seem to us more useful for Republican Senators to help him with that job, rather than trying to perpetuate discredited ideas.

Mr. BRADLEY. Mr. President, we badly need a plan to deal with the next oil emergency. We cannot permit this

Nation to go unprepared into the coming decade of energy vulnerability.

Every Senator standing on the floor will talk about how vulnerable we are to oil supply disruption. But there is not adequate consideration of an alternative.

Disruptions in our oil supply are likely. Clearly, we see the signs of turmoil every day in the Middle East.

ORDER OF PROCEDURE

The PRESIDING OFFICER. Under the previous order, the hour of 12 noon having arrived, S. 1503 will be temporarily laid aside.

Mr. BRADLEY. I ask unanimous consent that I be given an additional 15 minutes, Mr. President.

Mr. McCLURE. Mr. President, I am prepared and will offer a unanimous-consent request. I wonder if the Senator from New Jersey might limit his remarks to some period a little less than 15 additional minutes.

Mr. BRADLEY. I would say to the chairman I would like to finish this statement. I do not know how long it will take, but I certainly think it will be less than 15 minutes, probably more like 10. I will do my best. But I feel as the sole Senator on the floor in opposition, I ought to be able to present my statement.

Mr. McCLURE. Mr. President, I understand the Senator's desire and I am trying to accommodate him. At the same time, I am trying to accommodate the unanimous-consent agreement of this Senate that we move to the next piece of legislation. There are a couple of other items of business to be conducted on this bill before moving to the other bill.

Mr. President, I ask unanimous consent that the time for the consideration of S. 1503 be extended not to exceed 20 minutes, and that the first 10 minutes of that time be allocated to the Senator from New Jersey.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BRADLEY. I thank the Chair. But I do not think I will need 10 minutes.

Mr. President, getting back to the issue, which is that we badly need a plan to deal with the next oil emergency, everyone who stands on the floor talks about what a crisis there is in the Mideast and what happens if we lose oil. Yet, we put in place a plan that commits us to making all the mistakes we made in the 1970's. The major point is, we must be prepared. The administration says it needs no new legislation.

I disagree with the distinguished chairman of the Energy Committee on the form of the new authorities. I agree with the Senator from Idaho that the Senate, the House, and the President ought to be on record so that the American people will know how the Federal Government intends to handle the inevitable supply disruptions.

The Energy Committee once again relies on the old EPAA price controls and allocations. The substitute which I will offer next Thursday will rely on the market to allocate oil, with financial protection for essential public services and low-income individuals.

The Senators from Idaho and Louisiana and the Senator from New Jersey agree that the administration's position of no bill is inadequate. We must do something, but we have to have the good sense to do the right thing and to learn from the mistakes of the past.

Mr. President, what plan should we pass? I hope the Senate will recognize the seriousness of this issue and will debate the issue fully. I have grave reservations about the ability of price controls and allocations to help in an oil emergency. History shows they have made things worse, not better.

I know that some of my colleagues will want to know why I believe that the market will work during a disruption and how increased Federal revenues can be quickly recycled to help protect the economy in general and individuals in particular.

Indeed, Mr. President, I wish the Finance Committee had held hearings on this important issue. But, nonetheless, I will try to answer my colleagues' questions using the many studies that have been performed.

At the appropriate time, as I said, I will offer an amendment in the nature of a substitute that would allow market forces to work. If the only argument against that approach is that no hearings have been held, I would hope that we can have the hearings and then come back to the Senate floor.

Before we decide to go to a vote on the Energy Committee bill, I hope someone will have provided the answers to the following three questions:

Why does anyone think that the price control and allocation program of S. 1503 will work any better than they have in the past?

The burden of proof must rest on the proponents of S. 1503. That question was not answered during the committee debate.

Second, since price controls cause gasoline lines, how do the sponsors of this bill intend for the President to deal with gasoline lines?

Again, the burden of proof is on those who advocate S. 1503.

Third, since price controls on domestic oil make it cheaper to import foreign oil, do we really want to subsidize our use of oil at the expense of our allies and trading partners?

In conclusion, Mr. President, this is a serious issue and we should treat it that way. The Senate has before it a bad bill, a bill that repeats past mistakes. The President does not want this bill and has said so publicly. Alternatives exist that have not been fully examined by the relevant committees because there has not been time to allocate a hearing to this approach that I have offered.

The debate on this issue should be full, in my view, and detailed.

As the chairman of the committee knows, I contemplated making sure that we were able to debate this issue fully by refraining from making a time agreement. But, indeed, we have reached a time agreement of sorts, and the vote will occur next Thursday, unless the 3 hours which have been allocated to my amendments have not been used up, at which point it could be postponed.

I hope we will find by next Thursday that some of my colleagues have looked at the debate today and have focused on the issue of whether we are going to repeat the mistakes of the past. After all, we are in a new beginning. The question is whether we are going to repeat the mistakes of the past or whether we are indeed going to strike out on a new beginning and say that we do think that the market allocates oil most efficiently, and that Government's proper role is to protect those who would be hardest hit by the higher prices of the market. The Government can protect those poor individuals, the middle-income individuals, through tax cuts and social security payments, and can assure Governors that their fishermen or farmers will be taken care of by block grants.

Mr. President, that is the issue. There is an alternative. I hope the Senate next week will face up to the fact that there is a choice.

UP AMENDMENT NO. 519

(Purpose: Committee technical amendment)

Mr. McCLURE. Mr President, I send to the desk a technical amendment on behalf of the committee and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. KASTEN). The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 519.

Mr. McCLURE. I ask unanimous consent that further reading be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 7, line 24, insert before the period, "or (2) to meet obligations of the United States under the international energy program" and, on line 23, insert "(1)" before "in".

On page 8, line 9, delete the semicolon and insert in lieu thereof a comma.

On page 9, line 10, delete "a" and insert in lieu thereof "the" and, on line 11, after "regulation" insert ", promulgated pursuant to this section,".

On page 10, line 12, delete "service" and insert in lieu thereof "services".

On page 11, line 4, insert a comma before "and" and, on line 11, strike "mineral" and insert in lieu thereof "minerals".

On page 12, line 1, delete "pursuant to subsection (a)" and insert ", or any regulation or order issued under this Act,".

On page 13, line 14, delete from "he" through line 17 and insert in lieu thereof "the President again complies with the requirements of subsection (a)(1).".

On page 15, line 15, insert "fuel" before "oil".

On page 16, line 9, insert "regulation or" before "order" and, on line 12, paragraph before "(A)" and, on line 20, paragraph before "(B)".

On page 17, line 17, strike "the" wherever it appears and insert in lieu thereof "any" and, on line 18, strike "any".

Mr. McCLURE. Mr. President, this is a technical amendment which has been agreed to on both sides. It merely modifies the first committee amendment of S. 1503, the Standby Petroleum Allocation Act.

Mr. JOHNSTON. Mr. President, the distinguished Senator is correct. We have no objections.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP 519) was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that the first committee amendment as amended by the technical amendment on behalf of the Committee on Energy and Natural Resources be treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 520

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 520.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 19, after line 24, add a new section as follows:

SEC. 14. Nothing in this Act shall be construed to require that any action taken under the authority of this Act, including allocation of, or the imposition of price controls on, crude oil, residual fuel oil or any refined petroleum product, be taken in a manner which would have been required under the Emergency Petroleum Allocation Act of 1973, as amended, had that Act not expired.

Mr. McCLURE. Mr. President, in my opening statement on S. 1503, I explained in detail the meaning of the authority granted to the President under section 4. Furthermore, in a colloquy with Senator JOHNSTON, I elaborated on the intended meaning of section 4(a)(2). While I do not believe there should be any confusion or misunderstanding regarding the meaning of section 4(a)(2), concern has been expressed that section 4(a)(2), read in conjunction with certain portions of the committee report, could conceivably be interpreted to require the President to implement the very same regulatory programs that had been implemented under the Emergency Petroleum Allocation Act of 1973 (EPAA).

Mr. President, as I discussed earlier as floor manager, it was not the intention of the Committee on Energy and Natural Resources to reincarnate the EPAA and its regulatory programs through S. 1503. I do not believe that the similarity between section 4(a)(2) of the bill and section 4(b)(1) of the EPAA would have that effect as a matter of law.

However, in order to avoid any uncertainty regarding interpretations to the contrary, I wish to offer a perfecting amendment to the bill. This amendment would negate any argument that section 4(a)(2) or any other section of the bill could be interpreted to compel the President to recreate the same regulatory programs that existed under the EPAA.

Mr. President, section 4(a)(2) requires merely that, in implementing the standby regulation, the President should, to the maximum extent practicable, provide for the specified considerations. Section 4(a)(2) does not require the President to design the standby regulation in a particular manner nor does it require the President to implement any particular regulatory program. Adoption of this amendment would insure that the language of the bill plainly reflects the committee's intent that the President have the flexibility to tailor any implementation of the standby regulation to the scope, duration, and nature of a shortage.

The amendment, in plain fact, is a legislative restatement of the committee's consensus intent as expressed by myself and my colleagues throughout the course of our business meetings on this bill. Consequently, the amendment only technically conforms the bill to that oft-stated and well-known committee intent. I have discussed this amendment with Senator JACKSON, Senator JOHNSTON, Senator FORD, and other Members, and I believe we all agree on the thrust of my remarks on the committee's intent. I urge the adoption of the amendment.

Mr. McCLURE. Mr. President, I yield to the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, this amendment is in line with the conversations and the statement of the distinguished chairman and myself earlier in speaking on this bill. It simply means we do not necessarily pick up all the baggage of EPAA by adopting this bill. It is very consistent with the intent of the minority and the majority. I have no objection.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 520) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate temporarily lay aside S. 1503, the pending measure, and resume consideration of that measure at 9:30 a.m., Thursday, October 29.

The PRESIDING OFFICER. Is there objection?

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object. Would the distinguished majority leader include in his request that my amendment, which has a limitation of 2 hours, be pending at that point? I should be willing to cut the time to 40 minutes equally divided. That makes sure that we get off to a running start that day.

Mr. BAKER. If ever I heard a good deal, that is a good deal.

Mr. President, I include in my request that at 9:30 a.m., when the Senate resumes the consideration of the standby petroleum allocation bill, the amendment of the distinguished minority leader be the pending amendment and that there be a time limitation on that of 40 minutes equally divided and controlled.

Mr. McCLURE. Reserving my right to object, and I shall not, it is my understanding that that amendment is the amendment that was identified in the previous unanimous-consent request.

Mr. ROBERT C. BYRD. Yes, it is, Mr. President.

The PRESIDING OFFICER. Is there objection to the unanimous-consent request of the majority leader? Without objection, it is so ordered.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1982

Mr. BAKER. Mr. President, I ask that the Senate proceed to consider the Interior appropriations bill, H.R. 4035.

The PRESIDING OFFICER. Without objection, it is so ordered.

The bill will be stated.

The bill clerk read as follows:

A bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending September 30, 1982, and for other purposes.

The Senate proceeded to consider the bill which had been reported from the Committee on Appropriations with amendments.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, a parliamentary inquiry. There is no time limit on this bill, is there?

The PRESIDING OFFICER. The Senator is correct. There is no time limit on this bill.

Mr. McCLURE. Mr. President, given the unique budget situation we have all dealt with this year, it should come as no surprise that the Interior and Related Agencies Subcommittee—as well as the full Appropriations Committee—faced extremely difficult decisions in marking up the fiscal 1982 appropriations bill. It took the cooperation of all committee members to help us comply not only with the letter but also the spirit of the Omnibus Budget Reconciliation Act of 1981, as well as the spending controls we are attempting to impose on the entire Federal budget.

As reported by the Appropriations Committee, the fiscal year 1982 Interior and related agencies appropriations bill has trimmed nearly $300 million off the Department of the Interior's fiscal 1981 budget. Excluding the strategic petroleum reserve, we have finally halted the overwhelming growth of the Department

of Energy while maintaining those programs which have been and should continue to be most beneficial to the people of this country. Overall, this bill is below the section 302 allocation in budget authority as established in the recently passed Omnibus Budget Reconciliation Act. Further, when outlays relating to the SPRO are adjusted in compliance with congressional direction in the reconciliation bill, the appropriations bill is $3.469 billion below the President's budget.

Despite the fact that we have made tremendous strides in achieving some fiscal restraint in this bill, and are technically in compliance with the budget, it would be wrong to suggest we are also without problems. In fact, we face the possibility of a Presidential veto.

As indicated by the Republican Policy Committee's legislative notice, the administration is opposed to this bill because it is $200 million above the President's request for budget authority and some $76 million over the President for outlays. These numbers include the off-budget appropriation for the strategic petroleum reserve which, although not technically included in the budget, nevertheless reflects Government spending and therefore affects the Federal deficit, the credit markets, and the economy generally.

In addition, this committee will, as always, be faced with a pay and fire-fighting supplemental next spring totaling about $500 million. While such an increase can barely be accommodated by the budget outlays allocated to the subcommittee, it will clearly push the subcommittee far in excess of its allocation of budget authority.

Since originally proposed to the subcommittee in June, this bill has sustained add-ons of nearly $300 million. Let me emphatically state that we are at our ceiling—there is simply no more room for add-ons without corresponding decreases. This is just the third of 13 annual appropriation bills which this body will be considering during the next few weeks. Mr. President, the true test of fiscal responsibility will come with the passage of these bills, and that test begins today. Each and every one of you can assist us by showing restraint so we can meet the fiscal goals we have set for ourselves. If not, everything we have done so far in this Congress will be for naught and we may as well abandon the congressional budget process. I think that would be a drastic mistake.

Mr. President, I ask unanimous consent to have printed in the RECORD a table comparing appropriations recommended in the bill with those of the preceding fiscal year and with the House allowances and budget estimates.

There being no objection, the table was ordered to be printed in the RECORD, as follows:

COMPARATIVE STATEMENT OF NEW BUDGET (OBLIGATIONAL) AUTHORITY FOR FISCAL YEAR 1981 AND BUDGET ESTIMATES AND AMOUNTS RECOMMENDED IN THE BILL FOR FISCAL YEAR 1982

[Amounts in dollars]

Mr. McCLURE. Mr. President, let me at this time also take the opportunity to suggest one other problem that this committee has faced:

We were prepared to report the bill and did so prior to the August recess. The schedule at that time did not permit us to come to the floor with the bill for floor consideration before the August recess.

It is now history with which everyone is familiar, but during the period following our recess in early August the economic assumptions have been questioned, the economic predictions have been discussed, and the concern for the future movement of budgetary balances has increased. The financial markets have not responded as quickly and readily as many had hoped. Interest rates remain abnormally high. The spread between the rate of inflation and the rate of prime interest rates has increased rather than diminished, and has led to what has become widely discussed as the second round of budget cutting that followed in September. We have had the requests for these cuts submitted to Congress and to the Appropriations Committee.

The full Appropriations Committee has requested that this subcommittee and this appropriations bill accommodate about $100 million in further budget outlay reductions.

We have tried to accommodate those requests and have been working for the last several weeks trying to get the data from the administration, both from the administrative agencies and from the Office of Management and Budget to sustain and support the cut requests.

Yesterday the Appropriations Committee met to deal with some further budget cuts that were entailed in matters still pending before that committee, but this bill had already been reported and was not pending before the committee. Further, we had not had an opportunity for a subcommittee meeting prior to that time and did not feel it appropriate or wise to attempt to take further cuts to the committee for the ratification by the Appropriations Committee so that they might be adopted on the floor as committee modifications.

This morning we had a meeting of the subcommittee and went through the list of recommendations which have been made by the staff and approved by myself which total approximately $165 million in budget authority and $116 million in budget outlay reductions.

There was sparse attendance at this subcommittee meeting, and I did not think it was appropriate to ask that those recommendations as presented to the subcommittee and acquiesced to by the subcommittee members should be brought to the floor as subcommittee recommendations. And there was, of course, no opportunity to run those recommendations from subcommittee through the full committee to be ready for consideration here today as Appropriations Committee recommendations.

It would be my hope, however, that either today or on Monday those recommendations thus cleared through the subcommittee in response to the full committee's request would be treated en bloc, included in the bill, and then treated as original text for the purpose of further amendment just as they would have been in the ordinary procedures followed by the subcommittee and the full committee in presenting a bill to the floor.

I am advised that not all Members have had the opportunity, of course, to see what that list is. Certainly, not every member of the Appropriations Committee has, let alone every Member of the full Senate. There may be an objection to that process. It will be my intention at the very least to include those proposals in the RECORD today even if they are not adopted, so that all Members of the Senate may have notice of what is pending before the Senate so that on Monday no one is taken by surprise as to what is suggested by the subcommittee in order to meet the new budgetary goals which have been established and adopted by the Appropriations Committee.

At the appropriate time, I will send those to the desk so that they may be printed, if indeed we have not by that time arrived at the point of a unanimous consent to accept these en bloc so that they may be treated in the nature of original text for the purpose of further amendment.

Mr. President, it is my hope that all Members and their staffs will analyze carefully this latest group of further budgetary reductions occasioned by the budgetary strictures that face all of us so that they may consider the wisdom or lack of wisdom in the suggestion, and also whether or not they think there are other alternatives. If they desire to substitute a different cut for something that has occurred here, please be prepared to do so.

But I wish to again reiterate what I said in my opening statement with re-

spect to the bill, that it is extremely tight. It is already against ceilings, ceilings that have been adopted by vote of the entire Congress and imposed upon us by the Appropriations Committee in dealing with the further budgetary cuts proposed in September. We have in some instances accepted administration requests, and in other instances we have rejected them. In many we have modified them. But at least all members of the committee should be aware that this is the process which we hope to be able to follow. These are the cuts we have identified as being the proper budgetary adjustments to make to meet the targets that have been established for us for this particular piece of legislation.

Mr. President, I would be happy to yield to the Senator from Louisiana for whatever statement he wishes to make at this time.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, the subcommittee dealt at some length with this bill, and I support H.R. 4035 as reported from the Senate Appropriations Committee.

I particularly want to mention my strong support for several recommendations the committee made. The first has to do with the land and water conservation fund which will provide money for both the States under the Bureau of Outdoor Recreation program, providing 50–50 matching fund money for the State, and also provide Federal park money which is so vital at a time when potential park areas are escalating in price more rapidly than inflation, and when Federal park visits were at an alltime high—as I recall there were 300 million park visits last year—and at a time when there remain large amounts of unpurchased property which have been designated as part of national parks. That amendment will do a great deal toward helping provide an answer to that problem.

Under the leadership of our distinguished subcommittee and committee chairmen, the senior Senator from Idaho and the senior Senator from Oregon, the committee made a number of very tough choices. Not only did we stay within the subcommittee's budget authority 302(a) allocation, but we are under our outlay allocation by over $700 million.

The programs funded under this bill are some of the most popular programs with some of the most persuasive and articulate supporters around. Nonetheless, the hard choices we had to make were made and I commend the subcommittee chairman for the vigorous leadership he exercised in the process.

I particularly want to mention my strong support for several recommendations the committee made.

First, I am especially pleased that the committee recommended some modest funding for Federal and State land acquisition programs under the LWCF, consistent with the authorized ceiling adopted for these programs in Public Law 97–35, the Omnibus Reconciliation Act of 1981. By a bipartisan vote, the committee wisely decided to provide a steady, albeit reduced, flow of money for these programs which will enable us to protect the most threatened tracts and exercise purchase options in which we have already made substantial Federal commitments.

Postponing these purchases would have increased future costs since land escalation rates average 15 percent per year. For example, delaying purchases along the Appalachian Trail this year would result in at least $1 million in additional costs for the same acreage next year. Moreover, if no funds were provided this year, some tracts would be lost altogether.

The committee amendment will also severely cut back, but not terminate, the State-local grant program which is one of the most successful examples of creative federalism we have around. Federal grant dollars are matched 1 to 1 by the States and act as "seed money" since State and local governments assume all O. & M. costs for areas acquired with these funds.

I am concerned, however, about the ominous signals I hear about potential impoundments, rescissions and deferrals, possibly including the land and water program and many others. In fiscal years 1980 and 1981, the land and water conservation fund was subject to lengthy midyear delays while the administration and the Congress debated rescission proposals. In both instances the Congress disagreed, in whole or part, with the administration's recommendations.

Thus, I hope that we can today agree that those funds ultimately appropriated by the Congress from the land and water conservation fund, for both State and Federal purposes, will be made available to the States and the Federal agencies within a reasonable period of time. I expect, for instance, that not more than 30 days will elapse between the time the bill is signed into law and the certification memorandum to the respective Governors apportioning State funds is approved.

Second, I believe the committee made a prudent decision in providing badly needed funds for needed repairs and rehabilitation projects in our national parks, many of which are needed to protect the health and safety of visitors. Park visits have increased sharply this summer—up almost 10 percent nationwide over last year—throughout all regions of the country. Wear and tear on these fragile resources has increased proportionately and these funds are critical to preventing serious further and in some cases permanent deterioration.

We also cut deeply into funding for historic preservation, Mr. President, but provided sufficient funds for federally required functions to be performed by the States. Within the small amount provided, which is about 50 percent less than the fiscal year 1980 appropriation, funds will be available to the States to continue to process nominations to the National Register and to certify properties as eligible for tax incentives, the cornerstone of this administration's preservation policy.

If we failed to provide this funding, these responsibilities, which we have delegated to the States, would likely fall by the wayside. I believe the committee's recommendation is responsible, Mr. President, and will prevent a severe and perhaps irreparable blow to this program and the tax basis on which current policy is relying.

I particularly want to compliment the chairman for the fine tuning he applied to the budget needs of the territories of the United States. The distinguished Senator and I have worked closely over the last 8½ years on the Energy Committee in developing a bipartisan and in my view fair policy toward these areas. I am especially pleased that funds were provided to repair the unsafe, seriously deteriorated hospital on Truk, the most populous area in the Trust Territory, and to begin A. & E. work for a new hospital in Palau, whose residents currently must use a 30-year-old facility which the Navy believes is a serious fire hazard. We have a special responsibility to these people dating from 1947 and certainly adequate health care facilities are key to exercising this duty fully.

The committee also made a number of judicious recommendations for many programs which have been instrumental in helping us to reduce our dependence—by almost 20 percent last year—on foreign oil, a dependence which resulted in payments of $60 billion to other countries in 1979. Included among these recommendations are continuation of the solvent refined coal (SRC) I demonstration facility with funds deferred from fiscal year 1981, continuing the residential conservation service programs, EPCA grants and ECPA grants.

In addition, sufficient funds were provided to the Department of Energy to weatherize approximately 125,000 of the estimated 14 million potentially eligible homes in fiscal year 1982. This program, which is targeted to the most needy, has been critical to our efforts to reduce energy consumption. Moreover, CBO recently calculated that with constant energy costs the payback period for these investments is less than 6 years.

I am pleased to note that within the tight parameters established by Public Law 97–35 the committee recommended sufficient funding to avoid serious and perhaps irreversible setbacks to the cultural programs sponsored by the National Foundation on the Arts and Humanities. These programs have enjoyed broad bipartisan support for the past 15 years and I believe the action we took continues this spirit of support for our Nation's cultural heritage and development.

If our economy were in better shape, Mr. President, and if our budget situation were in better control, I personally would prefer to fund many of these programs at higher levels. However, these are austere times and I believe the committee's action is responsive to this need while remaining responsible to the national needs these programs represent.

In sum, Mr. President, with bipartisan support and cooperation the committee has reported a responsible and responsive bill. Our outlay recommendations were over $700 million below the subcommittee's allocation in fiscal year 1982. We made some tough decisions, but I

believe that the Senate will find, after a close review, that this is a good bill and I urge the Senate to approve it.

Mr. President, since the committee has dealt with this issue, the chairman, as he just described, has come up with a detailed and rather extensive set of proposed cuts. We fully recognize that in the spirit of budget stringency and the need to attempt to get the size of the budget down, recognizing, of course, that we cannot balance this year due to the extraordinarily large size of the tax cut, but at least in order to chip away at the size of the increase in the deficit we have all got to do our part in our various budgets, to give blood, as it were, in the national good and, speaking for the minority, Mr. President, we are willing to do our part.

We, of course, cannot say at this point, having just been given this rather extensive set of cuts, how we will respond to those, as I am sure the distinguished chairman understands.

I would suggest that the materials be printed in the RECORD, as they will be, and we will very carefully go over those over the weekend. Other Senators will have an opportunity to take a look at those over the weekend, and I hope that in the strong spirit of bipartisanship, which this committee has always shown, that we can come up with a mutually agreed upon set of cuts and mutually agreed upon approach on this bill.

I will pledge to the distinguished chairman that I will do that and we will attempt to expedite that just as quickly as possible.

Mr. McCLURE. Mr. President, I thank the Senator from Louisiana for his statement and the cooperation that has indeed been evidenced throughout the difficult task of dealing with literally hundreds of items with which we have to deal in this particular appropriation. It is an exceedingly onerous task to go through them point by point, piece by piece, as we have to do, and it has been a joint effort, and I appreciate that.

Mr. President, in view of the statement which has been made on the record by the Senator from Louisiana with respect to these individual further reductions or adjustments in the budget, I will submit those for printing in the RECORD, and I send a block of amendments to the desk and ask that they be printed in the RECORD and held at the desk.

The PRESIDING OFFICER. Without objection, it is so ordered.

BUREAU OF LAND MANAGEMENT

Mr. McCLURE. Mr. President, I am submitting two amendments to the appropriation accounts for the Bureau of Land Management. The first would reduce the funds available for the management of lands and resources by $9.9 million to be derived from coal leasing (minus $5 million); oil and gas leasing (minus $400,000); planning and data management (minus $1.5 million); and general administration (minus $3 million).

We have been assured by BLM that these reductions can be accommodated without reducing outputs scheduled for fiscal year 1982 and beyond. Part of the savings will be achieved through more efficient operations and the remainder by reducing the amount of data collected by the Bureau prior to initiation of leasing activities.

The other amendment would reduce the acquisition, construction, and maintenance account by $475,000. This would bring personnel and related costs for the survey and design staff into line with the level of operations proposed for the construction program. As this reduction has been included in the House bill, adoption of this amendment will delete one item from the conference consideration.

The amendments follow:

AMENDMENT NO. 594

On page 2, line 18, delete "$12,845,000" and insert in lieu thereof "$12,370,000".

AMENDMENT NO. 595

On page 2, line 13, delete "$377,531,000" and insert in lieu thereof "$367,631,000".

OFFICE OF WATER POLICY

Mr. McCLURE. Mr. President, this amendment would reduce budget authority for the Office of Water Policy by $3,245,000 and budget outlays by approximately $748,000. The effect of this amendment is to provide no fiscal 1982 funding for specific research through the Office of Water Policy for water reuse, conservation, and the special project categories. These three accounts had been funded by earlier committee action at $1,953,000, $550,000, and $500,000, respectively, although no funding for these activities had been requested in the President's March budget.

Through application of the fiscal year 1981 deferral of $2,745,000 to the State water R. & D. institute program—providing that account with some $6,210,000—the Department of the Interior informs us that much of the work being conducted under the three zeroed accounts will be maintained. This is particularly true of work in the conservation and special project categories, the latter of which emphasizes work in the brackish water field.

The amendment follows:

AMENDMENT NO. 596

On page 8, line 21, delete "$10,118,000" and insert in lieu thereof "$6,873,000".

FISH AND WILDLIFE SERVICE

Mr. McCLURE. Mr. President, this amendment reduces funds available for the Fish and Wildlife Service by $2,700,000. It has four components:

Biological Services	−$400,000
Migratory Bird Research	−1,000,000
Mammals and Non-Migratory Bird Research	−300,000
Interpretation and Recreation	−1,000,000
	−2,700,000

These activities were selected from the administration's proposals, except that none of these reductions will result in field station or research station closures.

The biological services reduction is targeted at technical assistance activities relating to instream flow issues.

The two proposed research reductions will mean that lower priority research work will be deferred or canceled. The mammal and nonmigratory bird research program will still have a small increase over 1981 appropriations.

The recreation reduction proposed will mean that some refuge recreation and interpretive activities will be deferred into future years.

These are the only reductions proposed for the Fish and Wildlife Service.

The amendment follows:

AMENDMENT NO. 597

On page 9, line 13, delete "$221,628,000" and insert in lieu thereof "$219,328,000".

FISH AND WILDLIFE SERVICE

Mr. McCLURE. Mr. President, this amendment provides an additional $25,000 within funds otherwise available to the Fish and Wildlife Service to use for emergency and routine enforcement activities. This does not increase the total of the appropriation.

The Fish and Wildlife Service has been conducting several very successful undercover operations focusing on illegal trading in endangered species. This amendment will help insure that this work can be continued in fiscal year 1982.

The amendment follows:

AMENDMENT NO. 598

On page 11, line 13, linetype "$75,000" and insert "$100,000" immediately after.

NATIONAL PARK SERVICE

Mr. McCLURE. Mr. President, I am submitting two amendments affecting the National Park Service appropriation. The first would reduce funding for the operation of the national park system by $10.4 million, $400,000 of which is from general administration and the balance from park maintenance.

The general administration reduction is in line with the House allowance and is part of a servicewide reduction in travel.

The park maintenance reduction merely slows the rate of increase in this activity. The fiscal 1981 funding level was $188.7 million. Even with this $10 million reduction, the fiscal year 1982 level would be $230.9 million. This proposal will not adversely affect the health and safety components of the planned program, but rather will be taken from rehabilitation projects and increases requested for cyclic maintenance.

The second amendment would reduce the committee allowance for construction by $20,000,000, leaving an increase over the fiscal year 1981 level of $44,178,000. The revised funding level would permit projects directly related to health and safety to continue. The reduction is targeted at major rehabilitation and repair projects.

The amendments follow:

AMENDMENT NO. 599

On page 12, line 14, delete "$541,382,000" and insert in lieu thereof "$530,982,000".

AMENDMENT NO. 600

On page 14, line 7, delete "$108,721,000" and insert in lieu thereof "$88,721,000".

U.S. GEOLOGICAL SURVEY

Mr. McCLURE. Mr. President, this amendment will reduce budget authority for the U.S. Geological Survey by some $26,166,000 and outlays by some $2,336,048. This reduction in budget authority represents just a 5-percent trimming from the account as originally passed by

the full Appropriations Committee and, for the most part, will only delay activities at USGS rather than phase them out altogether. The ground water recharge program is the only account that will be zeroed, but the Department assures us that much of the information provided under this program will be provided by other USGS programs.

Specifically, this amendment provides for reductions in the following accounts: Data collection and analysis (—$1,000,000); regional aquifer system, analysis (—$2,300,000); improved instrumentation (—$1,000,000); ground water recharge (—$1,430,000); coal hydrology (—$1,951,000); oil shale hydrology (—$1,500,000); volcano hazards (—$5,000,000); coal resource evaluation (—$250,000); other energy—conservation of lands and resources (—$252,000); royalty management (—$5,000,000); Federal and Indian lands nonenergy minerals (—$296,000) environmental affairs (—$2,553,000); land resources data applications (—$1,733,000); general administration (—$470,000); and facilities (—$1,431,000).

The amendment follows:

AMENDMENT No. 601

On page 17, line 2, delete "$529,869,000" and insert in lieu thereof "$503,703,000".

EXPLORATION OF NATIONAL PETROLEUM RESERVE IN ALASKA

Mr. McCLURE. Mr. President, this amendment simply reduces budget authority for exploration of national petroleum reserve in Alaska by some $312,000 and outlays by $264,000. This reduction, however, will not reduce the ongoing Barrow area gas operation, as the Department intends to use unexpected carryover funds to make up the shortfall. As my colleagues may recall, the Congress recently made the decision to get the Government out of the drilling business on the petroleum reserve, thus reducing the budget for that activity from $175 million in fiscal year 1980 to just $2.6 million in fiscal year 1982.

The amendment follows:

AMENDMENT No. 602

On page 17, line 12, delete "$2,600,000" and insert in lieu thereof "$2,288,000".

OFFICE OF SURFACE MINING RECLAMATION AND ENFORCEMENT

Mr. McCLURE. Mr. President, this amendment reduces budget authority for the Office of Surface Mining by $3,580,000 and reduces outlays by some $1,127,000. Just as in the case of the abandoned mine reclamation fund reductions which will be proposed, this reduction is made possible because the major coal producing States will not receive primacy as early in fiscal year 1982 as was first projected. As a result, this amendment reduces State regulatory grants by $6,450,000 and State primacy programs by $230,000.

However, because the Federal Government will still be responsible for enforcement of the Surface Mining Act, this amendment also increases the inspection and enforcement account by $3,100,000.

The amendment follows:

AMENDMENT No. 603

On page 19, line 17, delete "$64,418,000" and insert in lieu thereof "$60,838,000".

ABANDONED MINE RECLAMATION FUND

Mr. McCLURE. Mr. President, this amendment will reduce budget authority for the abandoned mine reclamation fund by some $8,892,000, while reducing outlays by some $1,538,316. Very simply, this reduction is found in State reclamation program grants (—$8,400,000) and executive direction and administration (—$492,000), and reflects the fact that most of those States that were expected to receive primacy in early fiscal year 1982 will not receive primacy until much later in the fiscal year. Until primacy is gained, a State reclamation program cannot be adopted. The reduction of $8,400,000 still leaves some $61,600,000 in the program, which represents an increase of some $32,600,000 over fiscal year 1981.

The amendment follows:

AMENDMENT No. 604

On page 20, line 5, delete "$114,227,000" and insert in lieu thereof "$105,335,000".

BUREAU OF INDIAN AFFAIRS

Mr. McCLURE. Mr. President, this amendment would reduce budget authority for the Bureau of Indian Affairs by $16,230,000 from that approved by the committee. The corresponding outlay savings total $10,558,000. Five activities are covered by this amendment, two of which are administrative accounts. Program management for education would be reduced by $1,650,000 and the General Management and Facilities Administration would be reduced by $10 million. These two reductions are in line with the September budget revisions.

Further, the amendment would reduce the Johnson-O'Malley program by $2,900,000, or a 10-percent reduction from the January budget; $26.3 million, which is $6.4 million above the September level.

A slight reduction of $380,000 would be assessed to the postsecondary schools operated by the Bureau of Indian Affairs. This leaves $8.1 million, which is the same as the fiscal 1981 level.

Last, a reduction of $1.3 million would be applied to the school equalization formula. The BIA has consistently overestimated enrollment in Federal schools. In fiscal year 1981, the overestimate amounted to 3,800 students. A reduction of $8.1 million is contained in the committee reported bill. That reduction, however, did not consider the various weighting factors that the BIA applies to the formula which are based on the instructional level, residential programs and programs for the learning impaired. This additional reduction is the Bureau's estimate of the weighting factor applied to the existing committee reduction.

The amendment follows:

AMENDMENT No. 605

On page 21, line 8, delete "$830,972,581" and insert in lieu thereof "$814,742,581".

On page 21, line 9, linetype the numeral and insert after the numeral "$57,349,000".

OFFICE OF THE SECRETARY

Mr. McCLURE. Mr. President, this amendment would reduce the budget authority and outlays for the Office of the Secretary of the Department of the Interior by $797,000. There are two components to this reduction; $500,000 would be taken from the committee allocation for the grant to the State of Alaska which is being made to carry out the provisions of the Alaska National Interest Lands Conservation Act. With the adoption of this amendment, $1,000,000 would be left for the grant which the Department assures us will be sufficient as the agreement with the State will not be completed until sometime in December.

Second, I would reduce the amount for the minerals policy and research analysis office by $297,000. This revision was contained in the September budget revisions. A total of $671,000 would be left in this function. The justification indicates that the additional funds are not required as the Secretary will place greater reliance on the Bureau of Mines to supplement the work of this office.

The amendment follows:

AMENDMENT No. 606

On page 29, line 16, delete "$41,631,000" and insert in lieu thereof "$40,834,000".

FOREST SERVICE RESEARCH

Mr. McCLURE. Mr. President, this amendment reduces funds available for Forest Service research by $2,400,000. It has two components: Insect and disease research will be continued at the 1981 level (saving $1,000,000), as will trees and timber management research (savings $1,400,000). The amendment will not cut into the base program funding but will maintain 1981 levels.

The amendment follows:

AMENDMENT No. 607

On page 34, line 10, delete "$105,568,000" and insert in lieu thereof "$103,168,000".

FOREST SERVICE

Mr. McCLURE. Mr. President, these amendments proposed will reduce funds available to the Forest Service for State and private forestry activities by $600,000, thereby maintaining the assistance in management, planning, and technology implementation at the 1981 level. It will not reduce that activity below base levels.

An additional amendment reduces accordingly the funds that will remain available for obligation until September 30, 1983.

The amendments follow:

AMENDMENT No. 608

On page 34, line 15, delete "$64,535,000" and insert in lieu thereof "$63,935,000".

AMENDMENT No. 609

On page 34, line 16, delete $59,660,000" and insert in lieu thereof "$59,060,000".

FOREST SERVICE—NATIONAL FOREST SYSTEM

Mr. McCLURE. Mr. President, this amendment reduces funds available to the Forest Service to manage the National Forest System by $17,090,000. The amendment has four components: First, minerals management (—$1,500,000); second, lands management (—$1,000,000); third, fire protection (—$4,000,000); fourth, general administration (—$10,590,000).

None of these changes reduces the size of the base program, but instead trim back on some of the increases proposed.

AMENDMENT No. 610

On page 35, line 6, delete "$1,013,500,000" and insert in lieu thereof "$996,410,000".

FOREST SERVICE—FACILITY CONSTRUCTION

Mr. McCLURE. Mr. President, the amendments reduce funds available for Forest Service facility construction by $2,100,000. This will be achieved by deferring energy retrofit projects in existing research facilities (−$1,100,000) and by deferring lower priority recreation construction.

The amendments follow:

AMENDMENT No. 611

On page 35, line 6, delete '$509,743,000" and insert in lieu thereof "$507,643,000".

AMENDMENT No. 612

On page 35, line 14, delete "$22,793,000" and insert in lieu thereof "$20,693,000".

FOSSIL ENERGY RESEARCH AND DEVELOPMENT

Mr. McCLURE. Mr. President, this amendment reduces budget authority for the Department of Energy's fossil energy's fossil energy research and development by $23,000,000 while reducing outlays by some $27,845,000. This reduction is made in just three areas of the fossil energy R. & D. account, the first of which is a cut of $2,000,000 from technical support, surface coal gasification. Specifically, this reduction would decrease DOE's output of engineering analyses and studies of environmental concerns as they relate to surface coal gasification.

Second, is a $2,000,000 reduction from the enhanced oil recovery program, which is made possible because of increased industrial involvement on enhanced recovery activities.

Finally, this amendment will reduce $19,500,000 from the pressurized fluidized bed account, which is in turn offset by $10,500,000 in unobligated funds transferred from the atmospheric fluidized bed account. Specifically, the amendment concurs with the President's request to terminate U.S. participation in the cooperative International Energy Agency PFB test facility at Grimethorpe, England, thus saving $9,000,000. The transfer of unobligated funds comes from the CTIU project, which is not in need of the $10,500,000 balance until at least fiscal year 1983.

The amendment follows:

AMENDMENT No. 613

On page 40, line 21, delete "$431,990,000" and insert in lieu thereof "$408,490,000".

INDIAN HEALTH SERVICE

Mr. McCLURE. Mr. President, this amendment would reduce budget authority for the Indian Health Service by $16,164,000 and outlays by $14,043,000. Three activities are affected by this amendment. First, program management would be reduced by $1,164,000 which would maintain the fiscal year 1981 level of spending. Also, of the estimated $30 million that IHS will bill for third party payments, the first $5 million would be used to fund regular IHS programs. The House bill earmarked $15 million of the third party payments for this purpose, however IHS expressed concern that such a level might be beyond their means as collections are often far below billings.

The final change in the bill would be to reduce the committee allocation for the community health representatives by $10 million. This would achieve a savings of $8.1 million in outlays. The September budget revisions would have terminated this program; the level proposed through this amendment is $24.5 million which is a 33-percent reduction below the fiscal 1981 level.

While I realize that this reduction may be difficult for some to support, it should be pointed out that this is just one of many programs which has been allowed to grow unchecked for a number of years. The CHR program was initiated in 1969 at an annual level of $95,000. At a 12-percent annual inflation rate over the past 12 years, that original program would cost $370,000 for fiscal year 1982. Even with the further reduction envisioned by this amendment, $24.5 million would be left which means a real program growth since 1969 of over 6,500 percent.

The amendment follows:

AMENDMENT No. 614

On page 46, line 18, delete "$623,069,000" and insert in lieu thereof "$606,905,000".

On page 47, line 2, delete the linetype from the words "the first".

On page 47, line 2, after "$15,000,000" insert "$5,000,000".

On page 47, line 2, delete the words "not to exceed $30,000,000".

On page 47, lines 5, 6 and 7, delete the linetype.

SMITHSONIAN INSTITUTION

Mr. McCLURE. Mr. President, this amendment would delete the $340,000 which was added by the committee for the multiple mirror telescope at the Mount Hopkins Observatory. We understand that this item will be included in the Smithsonian's regular budget request for fiscal year 1983 and that the additional work can be delayed until that time.

The amendment follows:

AMENDMENT No. 615

On page 50, line 25, delete "$132,106,000" and insert in lieu thereof "$131,766,000".

SMITHSONIAN INSTITUTION

Mr. McCLURE. Mr. President, this amendment would delete the $500,000 which the committee has provided for design of the quatic habitat at the National Zoo. The Smithsonian informs us that construction has been delayed until fiscal year 1985, so the design funds will not be required until fiscal 1984.

The amendment follows:

AMENDMENT No. 616

On page 52, line 9, delete "$7,500,000" and insert in lieu thereof "$7,000,000".

Mr. McCLURE. Mr. President, there are also amendments adopted by the committee in the committee deliberation of the House-passed bill. I ask unanimous consent that the committee amendments be agreed to en bloc and that the bill as thus amended be regarded for the purpose of amendment as original text provided that no point of order shall be considered to have been waived by agreeing to this request.

The PRESIDING OFFICER. Is there objection? The Chair hears none, and it is so ordered.

The committee amendments agreed to en bloc are as follows:

On page 2, line 9, after "Management.", insert the following: "including administrative expenses associated with the management of funds provided under the heads "Oregon and California Grant Lands" and "Acquisition, Construction, and Maintenance".

On page 2, line 13, strike "$295,789,000", and insert "$377,531,000";

On page 2, line 17, strike "$12,720,000", and insert "$12,845,000";

On page 2, after line 18, insert the following:

PAYMENTS IN LIEU OF TAXES

"For expenses necessary to implement the Act of October 20, 1976 (31 U.S.C. 1601), $105,000,000, of which not to exceed $400,000 shall be available for administrative expenses: *Provided*, That this appropriation may be used to correct underpayments in the previous fiscal year to achieve equity among all qualified recipients."

On page 3, beginning on line 3, strike "administrative expenses and";

On page 3, line 5, strike "$1,137,000", and insert "$2,300,000";

On page 3, strike line 8, through and including line 16;

On page 7, line 23, after "filed", insert the following: ": *Provided further*, That, none of the funds provided in this Act to the Bureau of Land Management may be expended to determine suitability or nonsuitability for wilderness or for any wilderness study area designation as directed in 43 U.S.C. 1782 of the Federal Land Policy and Management Act of the lands withdrawn by the Executive Order numbered 3767 of December 19, 1922, to be used by the United States Department of Agriculture for a sheep experiment station.".

On page 8, strike line 7 through and including line 14, and insert the following:

OFFICE OF WATER POLICY

SALARIES AND EXPENSES

For expenses necessary in carrying out the provisions of the Water Research and Development Act of 1978 (Public Law 95-467), as amended, and for water policy and program development for programs conducted by the Department of the Interior, $10,118,000: *Provided*, That the unexpended balances in the account "Office of Water Research and Technology, Salaries and Expenses," shall be merged with this account.

On page 9, line 10, after "Refuge,", insert the following: "including administrative expenses associated with the management of funds provided under the head "Construction and Anadromous Fish" ".

On page 9, line 12, strike "$207,235,000", and insert "$221,628,000";

On page 61, after line 11, insert the following:

SEC. 310. Funds derived from the Land and Water Conservation Fund appropriated by this Act shall be made available only to the extent that they do not exceed the budget authority and outlay limitations as set forth pursuant to the adoption of the conference agreement on H.R. 3982, Ninety-seventh Congress.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I yield to the Senator from Mississippi.

Mr. COCHRAN. Mr. President, I thank the Senator for yielding.

Mr. President, H.R. 4035 will provide additional funding for a very important project in the Southeast. This bill appropriates $12,039,000 for the Natchez Trace Parkway in fiscal year 1982. These funds will insure the continued development of this historic parkway which was first authorized by Congress in 1934.

When completed the Natchez Trace Parkway will be a 449-mile scenic highway stretching from Nashville, Tenn., to Natchez, Miss. At the end of fiscal year 1982, only 71 miles will remain to be constructed. I am especially pleased, Mr. President, that the committee has recommended in its report that the construction of the parkway continue in fiscal year 1982 and thereafter in an orderly manner to completion. I appreciate the committee's support and the support of the administration for this worthwhile project.

There are many interested citizens who are anxiously awaiting the final completion of the parkway.

Mr. McCLURE. Mr. President, I yield to the Senator from Louisiana.

Mr. JOHNSTON. Mr. President, on September 25, 1981, a small tribe in Avoyelles Parish, La., received Federal recognition, the Tunica-Biloxi tribe. This group has serious and critical health care needs, needs which cannot be addressed this year absent congressional action making funds available for this purpose even though there are sufficient funds in the equity fund to initiate contract health care services for this tribe.

To assure that adequate authority exists for the Department to initiate such services within available funds, Mr. President, I have risen to enter into a colloquy with the distinguished chairman of the subcommittee, the senior Senator from Idaho, and seek his assurance that it is his intent for such authority to exist within the funds provided in this bill.

Federal recognition confirms to the Tunica-Biloxis those Federal services and benefits furnished to American Indian tribes by reason of the Federal trust relationship, and for other purposes. Health care is one of the Federal services furnished to American Indian tribes and can be provided in two ways: By direct care (through Indian Health Service and tribal delivery systems) and through contract health care (provided by private physicians and health facilities in areas where no IHS or tribal delivery system is available.

For the Tunica-Biloxis, I understand that no primary care system is accessible and that contract care is necessary to provide for the tribe's health needs. As I understand it, there are sufficient funds provided in the equity fund established in H.R. 4035 to help establish adequate health care for all eligible Indians, and funds are available to initiate contract care for the Tunica-Biloxis. Is this also the chairman's understanding?

Mr. McCLURE. Yes; it is my understanding that sufficient funds are available for this purpose and we certainly intend that sufficient funds should be available to the newly eligible Tunica-Biloxi Tribe in Louisiana once IHS has completed its assessment. If this assessment indicates that the tribe falls into level V, the lowest level, they would have first call on the equity fund which totals $14 million, an increase of $6 million over the current level.

Mr. JOHNSTON. I thank the Senator for this clarification that the health care responsibilities of our trust relationship with the Tunica-Biloxis can be fully met within the funds provided in H.R. 4035 and assurance that this is the Senate's intent in this bill.

Mr. LONG. I share my colleague's concern about the critical health care needs of the Tunica-Biloxi, a tribe in our State. Now that the Tunica-Biloxi have been recognized, I understand that these Indians are eligible for health care services, and I appreciate the able subcommittee chairman's clarification that funds will be made available to meet this tribe's health care needs.

UP AMENDMENT NO. 521

Mr. McCLURE. Mr. President, there are seven technical amendments which I send to the desk and ask unanimous consent that they be considered en bloc.

The PRESIDING OFFICER. Without objection, it is so ordered.

The clerk will report the amendment.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 521.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 10, line 17, change "$8,000,009" to "8,000,000".

On page 61, strike lines 12 through 17, inclusive.

On page 43, strike all of line 2 and insert the following in lieu thereof: "the Omnibus Budget Reconciliation Act of 1981 (Public Law 97-235),".

On page 2, line 13, insert close quotation marks after the word "Maintenance" and before the comma.

On page 18, lines 18 and 19, strike ". . . sections 301 and 302" and insert "Title III".

On page 48, line 25, insert a comma after the word "prescribe" and before the word "the".

On page 21, line 8, strike "$830,972,581" and insert in lieu thereof: "$820,023,581".

On page 21, line 9, linetype "$60,249,000" and insert "$57,311,000" immediately prior to the word "for".

Mr. McCLURE. Mr. President, these matters have all been cleared with both sides of the aisle. I ask unanimous consent that they be considered en bloc and agreed to en bloc.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

The amendment (UP No. 521) was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 522

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report.

The bill clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 522.

Mr. McCLURE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 33, line 22, strike the words "the continued"

On page 33, lines 23 and 24 strike the words "as presented to and approved by the Congress for fiscal year 1981"

Mr. McCLURE. Mr. President, the Department of the Interior had sought the authority to abolish the Office of Aircraft Services. A review of this program by the House and Senate Interior Appropriations Subcommittee, as well as the General Accounting Office, indicates that such a reorganization cannot be supported on the basis of cost-effectiveness or safety. The Appropriations Committee has not changed the language inserted by the House with regard to the continuance of the Office of Aircraft Services.

Upon closer examination, however, it appears this language may be too restrictive as it mandates the continuance of OAS as presented and justified to the Congress in fiscal year 1981.

The amendment I am proposing would continue the requirement for the operation of the Office of Aircraft Services but would provide some latitude to the Department in the transfer of personnel and their attendant responsibilities from the field to Washington.

Mr. President, it is my understanding that this amendment has been cleared with the other side of the aisle. If so, and if they so indicate, I would move its adoption.

The PRESIDING OFFICER. The Senator from Louisiana.

Mr. JOHNSTON. Mr. President, the distinguished floor manager has correctly stated the importance of this amendment and we have no objections.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 522) was agreed to.

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. KASTEN. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. ANDREWS). Without objection, it is so ordered.

AMENDMENT NO. 573

Mr. KASTEN. Mr. President, I have an amendment at the desk. I ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Wisconsin (Mr. KASTEN) proposes an amendment numbered 573.

On page 22, line 18, strike "$77,717,000" and insert in lieu thereof "$79,282,000".

Mr. KASTEN. Mr. President, this amendment would restore funding for the Menominee Courthouse complex to the $2.265 million level requested by the President and approved by the House.

Currently, there are no usable detention or court buildings on the Menominee Reservation and the facilities actually being used are in serious violation of building and safety codes. Inmates are being housed in the basement of the existing structure, and there are no separate juvenile and adult detention sections as required by law. The Bureau of Indian Affairs, in reviewing the Menominee situation, concluded that:

There are no options available * * * the structure is too expensive to renovate and additions would not alter the unsatisfactory existing space.

The Subcommittee on Interior and Related Agencies recommended $700,000 for the construction of the Menominee complex which will consist of a courtroom and jailhouse facility to replace the present inadequate, makeshift facilities. However, the subcommittee's recommendation to reduce the funding for the Menominee Courthouse complex was based upon inadequate information which resulted in an inappropriate comparison of the Menominee project with that of a proposed facility for the Rosebud Sioux Reservation. The Rosebud project is budgeted at $1.7 million and would house 70 prisoners; the Menominee project would accommodate 19 prisoners and cost $2.265 million.

However, the initial data submitted to the subcommittee failed to reveal essential differences between the Rosebud and Menominee projects; the Department of the Interior has since provided more accurate and complete information. A comparison by Mr. William Sunrise, BIA Architect and project manager for these projects, shows clearly the differences between the two facilities that account for the greater cost of the Menominee complex.

Most important is the fact that the Rosebud project is an expansion and modernization of an existing facility, with an almost completed courthouse being integrated into the complex. The Menominee Courthouse complex, on the other hand, requires the construction of a totally new facility. Furthermore, the Menominee project is more extensive and complex than was indicated in the data available to the subcommittee. The new information provided by the Department of the Interior on both projects justifies the greater appropriation for the Menominee facility.

Restoration of the $2.265 million requested by the administration is urgently needed for the construction of adequate law enforcement facilities on the Menominee Reservation. The new complex will provide needed space for more efficient operation of police and court activities; bring the detention facilities up to required standards; and insure separate facilities for juveniles as mandated by law. The new courthouse complex will greatly upgrade law enforcement activities and services for the Menominee Reservation and surrounding communities.

Mr. President, it is my understanding that this amendment has been cleared by both sides and I would hope it could be agreed to.

Mr. McCLURE. Mr. President, the Senator is correct. Some of the information that has been given to us by the BIA earlier was incomplete or inaccurate. We took that action in committee based upon that information.

We have since checked with them and asked them to check with the field and we find that the information that was given to us was incorrect. They agree that that is the case. We are in agreement with the amendment.

Mr. JOHNSTON. Mr. President, the amendment is agreeable to the minority.

Mr. KASTEN. Mr. President, I deeply appreciate the work and the cooperation of the subcommittee, both the majority and the minority, particularly our chairman, Senator McCLURE, in helping to solve a problem that is very important to the Menominee Indian Reservation and the surrounding area.

Mr. President, I move adoption of the amendment.

The PRESIDING OFFICER. Is there further debate? If not, the question is on agreeing to the amendment.

The amendment (No. 573) was agreed to.

Mr. KASTEN. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. ANDREWS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. KASTEN). Without objection, it is so ordered.

UP AMENDMENT NO. 523

(Purpose: To amend that section of the bill dealing with Indian Health Services, Department of Health and Human Services)

Mr. ANDREWS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from North Dakota (Mr. ANDREWS) proposes an unprinted amendment numbered 523.

Insert at page 47, line 16:

Provided further, That funding herein, and in any earlier Appropriations Act, for scholarship programs under section 103 of the Indian Health Care Improvement Act

and section 757 of the Public Health Service Act shall remain available until expended."

Mr. ANDREWS. Mr. President, this amendment is self-explanatory. There are moneys available for these very important programs in the field of Indian affairs. It is necessary that this money be listed as available until expended in order to continue these services to the Indian people of our Nation.

I understand this has been cleared by both the majority and minority sides of the committee and that they find the amendment in order.

Mr. McCLURE. Mr. President, we have reviewed this language and we have no objection.

Mr. JOHNSTON. The amendment is agreeable, Mr. President.

The PRESIDING OFFICER. If there is no further debate, the question is on agreeing to the amendment.

The amendment (UP No. 523) was agreed to.

Mr. ANDREWS. I move to reconsider the vote by which the amendment was agreed to.

Mr. McCLURE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RUDMAN. Mr. President, I would like, if I may, to draw to the attention of the chairman the language of the committee under the cooperative resource protection subdivision of the Forest Service budget, specifically regarding forest pest management. The language to which I refer reads:

The Forest Service has recently estimated that as much as $7,000,000 may be needed in fiscal year 1982 for the Federal share of insect suppression projects related to the gypsy moth, although needs are extremely hard to estimate a year in advance. About $2,300,000 has been programmed for gypsy moth suppression activities in fiscal year 1981. The Committee is confident that the Forest Service can provide the necessary funding for insect infestation control activities out of the funds appropriated in fiscal year 1982, plus insect and disease carryover funds from fiscal year 1981. Insect and disease carryover funds from 1979 to 1980 were $9,100,000 and $4,400,000 was carried over from fiscal year 1980 to 1981. The Committee would anticipate some carryover of funds into fiscal year 1982 that could be used for insect infestation control activities. The Committee would also expect the Forest Service to shift funds from the technical assistance and survey line item to the insect suppression line item, or through other reprogramming or supplemental appropriations actions, if necessay, to meet insect infestation needs in fiscal year 1982.

I applaud the wisdom of the committee and its chairman for including this language in the committee report, as we in New Hampshire alone have suffered the defoliation of several thousand acres of prime forestland this year, primarily due to infestation by gypsy moths. However, there is growing concern in our region over another destructive insect pest, the saddled prominent, which is estimated to have defoliated 189,000 acres in New Hampshire last year, and affected 37,000 acres in Vermont during the same period. The insect attacks the trees late in the year and is particularly destructive to maple trees, which may die if unable to form new buds before the first frost. Is it the intention of the chairman that the language regarding gypsy moth suppression to which I have previously referred shall also apply to control and suppression of the saddled prominent, as is necessary by the determination of the Forest Service?

Mr. McCLURE. The Senator is correct. At the time we considered the bill, the information relating to the saddled prominent had not yet been received. Had the committee had that information, this would have been included in the report itself.

Mr. RUDMAN. Will the chairman further agree to give every consideration to increasing funding for insect suppression by the Forest Service in a supplemental appropriation if this becomes necessary to control the problem?

Mr. McCLURE. Mr. President. I shall be happy to give such a proposal every consideration at the time the committee commences deliberations on a supplemental appropriations bill for fiscal year 1982.

Mr. RUDMAN. I thank the chairman.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. RUDMAN). The clerk will call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDERS FOR MONDAY, OCTOBER 26, 1981

ORDER FOR RECOGNITION OF SENATOR LEAHY AND SENATOR ROBERT C. BYRD

Mr. McCLURE. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order on Monday, October 26, the following Senators be recognized for not to exceed 15 minutes each, on special orders: Senator LEAHY and Senator ROBERT C. BYRD.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. McCLURE. Mr. President, I ask unanimous consent that following the two special orders on Monday, there be a period for the transaction of routine morning business, not to extend beyond 11 a.m., with statements therein limited to 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR CONSIDERATION OF H.R. 4035, THE INTERIOR APPROPRIATIONS BILL

Mr. McCLURE. Mr. President, I ask unanimous consent that at 11 a.m. on Monday, the Senate resume consideration of H.R. 4035, the Department of the Interior and related agencies appropriations bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECORD TO REMAIN OPEN UNTIL 4 P.M. TODAY

Mr. McCLURE. Mr. President, I ask unanimous consent that the RECORD remain open today until 4 p.m. for the introduction of bills, resolutions, and statements and for the filing of reports.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE ON MONDAY

Mr. ROBERT C. BYRD. Mr. President, will the distinguished acting Republican leader state, for the benefit of our colleagues, what the outlook for rollcall votes will be on Monday?

Mr. McCLURE. I thank the distinguished minority leader for the question.

Mr. President, I believe it is important for the Members to know that we will be back on the Interior appropriations bill at 11 a.m. and that votes could ensue in sequence after that. So they should be prepared for that. There are a number of colloquies that can be entered into, and there will be discussion of the bill. We will be asking Members to come to the floor with amendments, if they have amendments.

I reiterate what I have just said: Those who have general comments with respect to the appropriations bill, which will be pending at 11 o'clock on Monday, under the unanimous-consent agreement, should be prepared to debate and make the record as they see fit. Those who have amendments should be prepared to come to the floor and offer those amendments. I hope that those who seek to make legislative history by way of colloquy or remarks will attempt to do that earlier in the day, so that we can accommodate their desire without inconveniencing other Members who have amendments to offer.

It is our intention to complete the bill on Monday, if possible, and we will work toward that end.

Mr. ROBERT C. BYRD. Mr. President, will the Senator yield?

Mr. McCLURE. I yield.

Mr. ROBERT C. BYRD. Mr. President, I do not ask the distinguished acting Republican leader to respond or comment, but I express the hope at this time that there will be no rollcall votes before, say, 3 p.m., so as to accommodate our Members who might be coming from distances. That has become a kind of normal practice around here; and I say that realizing, of course, that nothing is in concrete and that if there must be votes, there will be votes. I simply want to express that for the RECORD.

Mr. McCLURE. I thank the Senator.

RECESS UNTIL 10 A.M. ON MONDAY, OCTOBER 26, 1981

Mr. McCLURE. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 10 a.m. on Monday.

The motion was agreed to; and at 1:27 p.m., the Senate recessed until Monday, October 26, 1981, at 10 a.m.

HOUSE OF REPRESENTATIVES—*Monday, October 26, 1981*

The House met at 12 o'clock noon.

The Chaplain, Rev. James David Ford, D.D., offered the following prayer:

O God, Creator of our world, Author of righteousness and Giver of every good gift, bless all those who turn to You in prayer. Give to those oppressed or anxious, freedom from fear and the fullness of Your divine love. Give to the needy who are hungry or forgotten the faith to continue aware that they are surrounded by others who support and care. Give to all of us the willingness to use our abilities in service to others, that we may be faithful stewards of Your grace through daily acts of faith, hope and love. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

FOR A RESPONSIBLE ARMS POLICY

(Mr. McHUGH asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. McHUGH. Mr. Speaker, this weekend hundreds of thousands of Europeans demonstrated peacefully to express their concern about the nuclear arms race and about the threat that race poses to peace and survival in this world. At the same time, citizens in our country are gathering petitions which call for a freeze in nuclear arms production.

It is wrong to dismiss these efforts as "misguided," the term Secretary Weinberger used to describe the European demonstrations. They are not misguided. Indeed, they reflect the aspirations of rational people for a sane arms policy, a policy which offers some promise of achieving real security. They reflect a growing recognition that the headlong rush of the nuclear powers to produce and deploy more arms offers no such promise.

Mr. Speaker, it is time for governments to heed these reasonable and responsible voices. It is time to engage in meaningful negotiations which can lead to a balanced and verifiable arms limitation agreement. Since America is still looked to for leadership in the Western world, we have a special responsibility to take the initiative. We must do so not because we endorse the Soviet system or admire the Soviet Government, but because we share with the Russian people and all mankind a common interest in preserving our civilization, and a common interest as well in diverting our resources to more constructive goals.

WORDS WILL NOT STOP QADHAFI

(Mr. KOGOVSEK asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. KOGOVSEK. Mr. Speaker, a recent vote in the other body indicates that a majority of Senators feel words, not action, are enough to stop Qadhafi of Libya. An amendment offered by my Colorado colleague, Senator GARY HART, proposed that the United States stop purchasing oil from Libya. Libya—the nation whose leader took joy in the assassination of one of the world leaders of peace, Anwar Sadat. The nation which, lead by Qadhafi, is a prime example of terrorism. And yet the Senate comfortably defeated Senator HART's amendment. In effect, the proposal asked the United States to stop underwriting Qadhafi's terrorism and thus stop this Libyan leader, who some in this country have pointed to as the one international figure who could start World War III. If the argument against the Hart amendment was that we cannot afford to lose the Libyan oil, then my argument is we can better afford to put the billions of dollars we are spending in Libya to work at home on domestic energy resources. But instead of doing so, the Senate has said we will continue to pump billions of dollars into the terrorist-led Libya and cut to the bone energy programs at home.

THE VREDELING PROPOSAL

(Mr. SCHULZE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SCHULZE. Mr. Speaker, over the past several days, I have described certain policies of Canada which might give rise to relief under section 301 of the Trade Act. But it is not only Canada which proposes to adopt such radical, burdensome, and wholly unnecessary programs.

Mr. Speaker, it is of great concern to this country that the European Community now plans to hand over the management of businesses—including American businesses—to trade unions, many of them leftist or Communist dominated.

The so-called Vredeling proposal, now under active consideration in the European Parliament, would do exactly that. It would require U.S. companies to negotiate with European trade union representatives before making any major corporate decisions. It is so broadly drafted that its requirements could be taken to cover decisions entirely remote from any arguably European concern.

LEGISLATION TO ESTABLISH EXPENSE DEDUCTIONS AT $5,000

(Mr. CRAIG asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. CRAIG. Mr. Speaker, as we all recall with bittersweet familiarity, this House recently removed any limitation upon our expense deductions claimed for tax purposes. This action was wrong.

The $3,000 limit upon expense deductions has been the rule since 1954. However, in times of fiscal constraint, can we justify a virtually unlimited deduction?

Each day I receive letters saying, "if the people of this country are asked to absorb budget reductions, we demand these reductions occur at the top as well as at the bottom." And now, I have to answer, "I'm sorry, it can't be done, the House has just voted itself a large increase in compensation benefits."

This answer is not good enough. If an example can be set, we should set it here in the House.

I have introduced H.R. 4676 which will establish expense deductions at $5,000. If the 1954 statute is no longer feasible—this $2,000 increase should serve our needs. If some Members believe they deserve this unlimited option—let us get it on the record, with a recorded vote, so that I may vote against it, again, and level with the people of Idaho.

Please join me in cosponsoring H.R. 4676.

CHUTZPAH OF THE YEAR AWARD

(Mr. RITTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. RITTER. Mr. Speaker, with the Chair's forbearance, I would like to

start a "Chutzpah of the Year Award."

Question. Who could compete favorably with the designer of the *Titanic*, today proposing another "world's first unsinkable ship" for the "Chutzpah of the Year Award?"

Answer. Former Vice President Walter Mondale, when he stated yesterday on "Meet the Press" that current interest rates with the prime at 18 percent are the result of President Reagan's program.

Fact. When the economic wizardry of Carter-Mondale and their unhinging of the American economy ended in December 1980, the prime interest rate was at 21.5 percent. And for those who have not studied arithmetic at Princeton, That is 3½ percentage points higher than the present rate. Only the good Lord and perhaps the tooth fairy know whether more of the Federal budget hemorrhage that was the hallmark of Carter-Mondale, would have given us rates today of 25 percent or 30 percent.

Perhaps a "Chutzpah of the Year Award" is not enough. Perhaps we need a new award, the "Fool All of the American People All of the Time Award." Again, the winner would be that co-catalyst of economic decline, Walter Mondale.

The American people, however, are not so stupid as it seems Mr. Mondale believes. And, they will see through his external utterances to the internal bankruptcy of his alternatives.

COMMUNICATION FROM THE CLERK OF THE HOUSE

The SPEAKER laid before the House the following communication from the Clerk of the House of Representatives:

WASHINGTON, D.C.,
October 26, 1981.

Hon. THOMAS P. O'NEILL, Jr.,
The Speaker, House of Representatives, Washington, D.C.

DEAR MR. SPEAKER: Pursuant to the permission granted in the Rules of the House of Representatives, I have the honor to transmit a sealed envelope from The White House, received in the Clerk's Office at 12:40 p.m. on Friday, October 23, 1981, and said to contain the third special message for fiscal year 1982 from the President under the Impoundment Control Act of 1974.

With kind regards, I am,

Sincerely,

EDMUND L. HENSHAW, Jr.,
Clerk, House of Representatives.

DEFERRALS OF FISCAL YEAR 1982 FUNDS AND PROPOSALS TO RESCIND—MESSAGE FROM THE PRESIDENT OF THE UNITED STATES (H. DOC. NO. 97-103)

The SPEAKER laid before the House the following message from the President of the United States, which was read and, together with the accompanying papers, referred to the Committee on Appropriations and ordered to be printed:

To the Congress of the United States:

In accordance with the Impoundment Control Act of 1974, I herewith report 72 deferrals of fiscal year 1982 funds totaling $482.9 million. I am also reporting two new proposals to rescind $88.2 million in budget authority previously provided by the Congress.

Seventy-one of the deferrals totaling $391.6 million represent the second in a series of messages that I am transmitting deferring fiscal year 1982 funds made available by the Continuing Resolution, P.L. 97-51.

These actions are being taken in accord with the stated intent of the Congress to provide minimal and temporary funding for the duration of the Continuing Resolution which expires November 20, 1981. As indicated in my last special message of October 20, I plan to restrain spending to insure that the Congress has the opportunity to enact regular appropriations for the entire fiscal year at levels that are consistent with my revised budget request.

Deferrals under the Continuing Resolution are included in this special message for the Executive Office of the President and 20 departments and agencies.

I am also reporting in this message a deferral of $91.3 million for Veterans Administration construction pending completion of a project review and two rescission proposals for programs in the Department of Defense that are consistent with amendments to the Defense budget sent to the Congress on October 15.

The details of each rescission proposal and deferral are contained in the attached reports.

RONALD REAGAN.

THE WHITE HOUSE, *October 23, 1981.*

ANNOUNCEMENT BY THE SPEAKER

The SPEAKER. Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote of the yeas and nays are ordered, or on which the vote is objected to under clause 4 of rule XV.

Such rollcall votes, if postponed, will be taken on Tuesday, October 27, 1981.

GENERAL LEAVE

Mr. DANIELSON. Mr. Speaker, I am about to call up four bills under the suspension of the rules procedures and I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on these four bills.

The SPEAKER. Is there objection to the request of the gentleman from California?

There was no objection.

ITALIAN AMERICAN WAR VETERANS OF THE UNITED STATES

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4734) to recognize the organization known as the Italian American War Veterans of the United States.

The Clerk read as follows:

H.R. 4734

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. Italian American War Veterans of the United States, organized and incorporated under the Nonprofit Corporation Acts of the States of California, Connecticut, Florida, Massachusetts, New Jersey, New York, Ohio, Pennsylvania, and Rhode Island, is hereby recognized as such and is granted a charter.

POWERS

SEC. 2. Italian American War Veterans of the United States (hereinafter referred to as the "corporation") shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation and shall include the giving of patriotic allegiance to the United States of America, fidelity to its Constitution and laws, and support to the security of civil liberty and permanence of free institutions; the stimulation of patriotism in the minds of all Americans by encouraging the study of the history of the United States; to assure the preservation and defense of the United States of America from all enemies without any reservation whatsoever; the preservation of the memories and records of patriotic service performed by men and women who served in the Armed Forces of the United States by gathering, collating, editing, publishing, and exhibiting the memorabilia, data, records, military awards, decorations, citations of those who served in the Armed Forces of the United States, and the promotion of peace, prosperity, and good will between the peoples of the United States of America and the Republic of Italy. The corporation shall function as a veterans' and patriotic organization as authorized by the laws of the State or States where it is incorporated.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the States in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Any American citizen shall be eligible for membership in the corporation who was honorably discharged from the Armed Forces of the United States of America, and eligibility for membership in the corporation and the rights and privileges of members shall, except as provided in this Act, be

as provided in the bylaws of the corporation.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The board of directors of the corporation and the responsibilities thereof shall be as provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The officers of the corporation, and the election of such officers shall be as is provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States wherein it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation shall inure to any member, officer, or director of the corporation or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right to vote. All books and records of such corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OR FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under the Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(54) Italian American War Veterans of the United States.".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as is the report of the audit required by section 11 of this Act. The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 13. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF STATE

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

TAX EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code. If the corporation fails to maintain such status, the charter granted hereby shall expire.

SEC. 16. If the corporation shall fail to comply with any of the restrictions or provisions of this Act, the charter granted hereby shall expire.

The SPEAKER pro tempore (Mr. KOGOVSEK). Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. MCCLORY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill, H.R. 4734, would recognize and grant a charter to the organization known as the Italian American War Veterans of the United States.

The Italian American War Veterans of the United States is a nonprofit organization for honorably discharged veterans of World War I, World War II, the Korean conflicts and the Vietnam war and for recipients of congressional medals for other U.S. expeditions or campaigns. Though any veteran may join, most members are of Italian descent. The association was founded in Hartford, Conn., on February 20, 1932, and was incorporated in Connecticut that year. Since then it has been incorporated in New York, New Jersey, California, Pennsylvania, Massachusetts, Ohio, Rhode Island, Florida, and Illinois.

The Italian American War Veterans of the United States is primarily a patriotic, nonprofit organization devoted to the preservation and enhancement of the honor, integrity, and defense of the United States. The organization also promotes the welfare and interests of veterans and their dependents at the community level and is involved in projects for historical education, fundraising for special relief, and various scholarships.

The Italian American War Veterans of the United States is a national organization of service to the Nation. Last year, its more than 8,000 members—including auxiliaries—contributed an estimated 5,400 hours of assistance to patients in Veterans' Administration hospitals in a nationally organized Veterans' Administration volunteer service program. The association maintains tax-exempt status as a veterans' organization.

Testimony and documentation demonstrates that the Italian American War Veterans of the United States maintains a State charter, operates in a nondiscriminatory manner, operates only as a charitable and patriotic association, maintains tax-exempt status, and is national in scope.

The purpose of this bill is merely to recognize an existing State-chartered organization. It does not grant or expand any corporate rights or relieve any corporate responsibilities established by State charter. Moreover, this bill specifically requires compliance with State laws governing the election of corporate officers and the responsibilities of the board of directors for the corporation. It also specifically requires compliance with State laws governing service of process.

The bill prohibits certain corporate acts and establishes certain requirements for the corporation. The bill prohibits the loan or transfer of corporate assets to officers, members, or other persons—except for expenses—lobbying or other political activity by the corporation or the issuance of stock or the payment of dividends. The bill further prohibits the corporation from claiming congressional approval or Federal Government authority for any of its activities. The bill requires the corporation to keep certain records, to perform an annual audit and to report to Congress annually. Should the corporation engage in any prohibited activity or fail to perform any of the requirements established by this bill, or if the corporation fails to maintain its tax-exempt status, the Federal charter granted by this bill will expire automatically as a matter of law.

The committee favorably recommends H.R. 4734 to the House for its consideration.

Mr. Speaker, I yield 5 minutes to the distinguished gentleman from Illinois (Mr. ANNUNZIO).

Mr. ANNUNZIO. Mr. Speaker, I rise in wholehearted support of H.R. 4734 which would grant a Federal charter to the Italian American War Veterans of the United States.

I take this opportunity to commend the distinguished chairman of the Judiciary Committee, Hon. PETER RODINO, for the patience and support and great efforts that he made in bringing this legislation to the floor of the House.

I also want to express my gratitude and appreciation to the distinguished chairman of the Subcommittee on Administrative Law and Governmental

Relations, GEORGE DANIELSON, who held hearings and who worked so long and hard in order to bring this legislation to the floor. My special thanks to Congressman ROBERT MCCLORY, the ranking minority member for his outstanding contribution.

Each and every member of the Judiciary Committee has the heartfelt thanks of the Italian American War Veterans who waited for so many years for this legislation to come to the floor of the House of Representatives for consideration.

Passage of this legislation has been delayed too long, especially in view of the fact that the Italian American War Veterans of the United States, Inc., meets the standards for granting Federal charters established by the House and Senate Judiciary Committees.

I also wish to point out that in addition to overwhelming committee approval of this bill, 43 Members of the House, including many committee members, have joined me in sponsoring this worthy legislation. They include: Mr. RODINO, Mr. DANIELSON, Mr. MOORHEAD, Mr. KINDNESS, Mr. MCCLORY, Mr. GLICKMAN, Mr. EVANS of Georgia, Mr. CONTE, Mr. HYDE, Mrs. ROUKEMA, Mr. ADDABBO, Mr. BIAGGI, Mr. CHAPPIE, Mr. DENARDIS, Mr. DOWNEY, Mr. FASCELL, Mr. FAZIO, Ms. FERRARO, Mr. FLORIO, Mr. FOGLIETTA, Mr. GUARINI, Mr. LAFALCE, Mr. LAGOMARSINO, Mr. MAZZOLI, Mr. MICA, Mr. MILLER of California, Mr. MINISH, Mr. MOAKLEY, Mr. MOLINARI, Mr. PANETTA, Mr. RINALDO, Mr. RUSSO, Mr. SANTINI, Mr. VENTO, Mr. ZEFERETTI, Mr. OBERSTAR, Mr. MITCHELL of New York, Mr. SOLOMON, Mr. WORTLEY, Mr. SMITH of Pennsylvania, Mrs. HECKLER, Mr. MARKS, and Mr. DAUB.

I also thank Senator JOHN H. CHAFEE of Rhode Island, who testified in support of this bill in House subcommittee hearings. The Senator took the lead in the Senate during the 96th Congress in introducing legislation to grant the Italian American War Veterans a Federal charter and he was successful in securing Senate passage of the bill. Unfortunately, the 96th Congress adjourned before the House of Representatives had the opportunity to act on the bill, and Senator CHAFEE has introduced the bill once again in the Senate.

Mr. Speaker, the Italian American War Veterans of the United States, Inc., meets the Federal charter requirement of operating under a State charter, having been chartered in 11 States with over 8,000 members nationwide.

Also, it meets the requirement of organization and operation in the public interest without discrimination on the basis of race, color, religion, or national origin. Although the majority membership of this outstanding organization is comprised of Americans of Italian descent, membership is not restricted and a review of the membership rolls reveals scores of individuals of various ethnic and religious backgrounds.

The Italian American War Veterans organized in 1932 and achieved tax-exempt status in 1947. Thus, it meets the requirement for operation as a charitable organization. In addition, for almost 50 years it has conducted activities national in scope and responsible to a national need.

I have been privileged to have been an honorary member of the Italian American War Veterans of the United States for more than 10 years, and I can tell you firsthand, as I have personally participated in many of their charitable endeavors in my own State of Illinois, that this organization has a long and proud tradition of service to our Nation's hospitalized and disabled veterans, and to the widows, orphans, and families of veterans who have given their lives for our Nation's freedom.

The members of this organization have also compiled a splendid record of achievement in civic work in their home communities, and in strengthening the greatness of our Nation by strongly resisting threats to our precious freedoms.

Volunteer work in VA hospitals has become the major mission of the Italian American War Veterans, and long experience has proven that personal visits, compassionate, human warmth and understanding, are just as essential to successful recovery as use of scientific methods of treatment.

I know of no organization which has been more worthy of congressional recognition than the Italian American War Veterans of the United States, Inc. The unselfish dedication with which the members of this fine organization have joined together to help their fellow veterans is without parallel. The year 1982 will mark the 50th anniversary of this outstanding organization, and during this span of time, the IAWV has received recognition for its exemplary service through the accolades of those who have benefited from its work as well as through the passage of commendatory resolutions in various State legislatures in our country.

I want to point out to my colleagues that Italian Americans have fought heroically in all of America's wars for freedom beginning with the American Revolution and continuing to the present time. It is interesting to note that during World War I, Italian Americans comprised an astounding 12 percent of the U.S. Army, far more than their small percentage of the American population at that time, and during World War II, some 500,000 Italian Americans fought in the Armed Forces of our Nation.

The heroism demonstrated by Italo-Americans is reflected in the names of the Congressional Medal of Honor winners. Although the Medal of Honor roster is not long, there are more than 50 Italo-Americans listed who have merited this medal—the highest military award for bravery that can be given by the United States of America to any individual serving in the Armed Forces. I know many of you will recall John Basilone's name, the marine sergeant who fought as a "one-man army" on Guadalcanal, and more recently, Anthony Casamento, who was awarded this medal last year.

Mr. Speaker, I have been the sponsor of Federal charter legislation for the Italian American War Veterans during my entire period of service in Congress, and I was heartened by the decision in the 96th Congress to lift the suspension on the granting of charters.

Lack of a charter, and of its official sanction, has hindered the work of the Italian American War Veterans of the United States in meeting the needs of our veterans and their survivors.

Passage of H.R. 4734 would give long overdue recognition to the major contributions being made by the IAWV to the well-being of our Nation and to the promotion of better understanding between the United States and Italy, which is such a vital part of our NATO alliance and the defense of our freedom.

Encouragement of charitable organizations such as the IAWV is also vital to the continued well-being of all of our country's citizens, especially in a time of limited public financing, and would strengthen America's tradition of volunteer action which has been so beneficial in assisting our country's handicapped and elderly citizens.

A Federal charter would help the IAWV to expand their volunteer services and these services would be provided without charge to the American taxpayers. It is imperative in this time of fiscal austerity that we in the Congress do everything possible to encourage organizations like the IAWV to meet the needs of our veterans through private resources.

Mr. Speaker, as the Italian American War Veterans of the United States approaches its 50th anniversary, I urge my colleagues to fully support H.R. 4734, both to recognize the outstanding work of these fine veterans who have sacrificed so much for our country and to promote the goals of this compassionate, hardworking, and patriotic organization.

Mr. DANIELSON. Mr. Speaker, I reserve the balance of my time.

□ 1215

Mr. MCCLORY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I am very proud to support this legislation I think it is only natural that I, as the principal sponsor of the Monday holiday bill, which established Columbus Day as a national legal holiday, should be here supporting this legislation, which will grant a Federal charter to the Italian American War Veterans.

I want to say, Mr. Speaker, that I am very proud to have cooperated with my distinguished colleague, the gentleman from Illinois (Mr. ANNUNZIO) in helping to promote this legislation. This organization is well deserving of a Federal charter. They have a record of fine service to the community and to veterans. They have a wonderful record which I think merits this kind of recognition on the part of the Congress. We should grant them a Federal charter.

I was very impressed by the testimony which we heard and by the delineation of the services which they have performed for the widowed, the handicapped, and many deserving others in our society.

I want to commend the chairman of the subcommittee, the gentleman from California (Mr. DANIELSON); the chairman of the committee, my colleague, the gentleman from New Jersey (Mr. RODINO), and the distinguished ranking member of the subcommittee, the gentleman from California (Mr. MOORHEAD).

For almost a half century the Italian American War Veterans have served our country. In both peace and war they have given generously of their time, their cultural heritage, and their talents in betterment of the United States. They have perpetuated in peace what they have fought for on the battlefields. Volunteer work in the hospitals, youth programs, community service, help for the widowed, and aid to the handicapped are but a few of the services rendered. True patriotism rests not so much in words as in these deeds, and the only true reward is the personal satisfaction that they have helped their fellow man. Contributions such as these deserve special recognition.

In closing I would note that Federal charters are bestowed sparingly. If we gave them out too freely, the honor, the prestige, and the national service associated with the charter would quickly fade.

Under the standards of eligibility adopted by our committee for a Federal charter, the Italian American War Veterans met every qualification, and impressed me and other members of the committee that this great veterans' organization merits the national recognition which a Federal charter provides. I urge my colleagues to support this measure.

Mr. Speaker, I yield to the gentleman from California (Mr. MOORHEAD).

Mr. MOORHEAD. Mr. Speaker, I rise in support of this legislation. We have had testimony in our subcommittee strongly supporting the legislation. I think the Italian American War Veterans deserve to have a charter and I am happy to support it fully.

Senator JOHN CHAFEE and Congressman FRANK ANNUNZIO were the primary witnesses at our subcommittee hearing, which would grant a Federal charter to Italian American War Veterans.

Their testimony demonstrated the selfless commitment of this veterans organization. Thousands upon thousands of volunteer hours in veterans hospitals alone evidences this tremendous commitment. In addition, they are involved in projects for historical education, scholarships, and fundraising for special relief.

When social services are cutback it is the volunteer effort that steps in to fill the gap.

The Congress has set down high standards for national charter eligibility. Our committee has reviewed the application with great care, finding that the Italian American War Veterans are most deserving of this honor.

I urge by colleagues to support H.R. 4734.

Mr. MOORHEAD. Mr. Speaker, I have no further requests for time. I yield back the balance of my time.

Mr. DANIELSON. Mr. Speaker, before I yield back my time, I want to comment that the gentleman from Illinois (Mr. MCCLORY) had a leading role in the passage of this bill, being the only member of our subcommittee who speaks Italian. The gentleman from Illinois (Mr. MCCLORY) speaks Italian like a native of Illinois.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I appreciate the gentleman yielding to me.

Mr. Speaker, I rise in support of H.R. 4734 to grant a Federal charter to the organization known as the Italian American War Veterans of the United States. This nonprofit organization of approximately 8,000 members was founded on February 20, 1932, for honorably discharged veterans of World War I, World War II, the Korean conflict, and the Vietnam war. Though any veteran may join, most members are of Italian descent.

This organization has demonstrated an active and abiding interest in the welfare of veterans and their dependents at the community level and is involved in projects for historical education, fund raising for special relief and various scholarships. Last year, its members rendered an estimated 5,400 hours of assistance to patients in VA hospitals in a nationally organized Veterans' Administration volunteer service program.

Mr. Speaker, I applaud the efforts and intentions of this patriotic organization, and I urge the House to support this bill as an expression of continuing support and interest for all veterans of our wars. I want to commend the very distinguished gentleman from Illinois (Mr. ANNUNZIO) for introducing this bill and for his efforts to bring the bill to the House. The gentleman works closely with the Committee on Veterans' Affairs in support of legislation to enhance the lives of all veterans. Italian American War Veterans are fortunate to have a man so dedicated to work with them in their efforts to seek a Federal charter from the Congress. He is a great American.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from New York.

Mr. ADDABBO. Mr. Speaker, it is with a great sense of patriotic duty, along with my deep concern for veterans everwhere, that I rise today to urge my distinguished colleagues in the House of Representatives to vote in favor of H.R. 4734, a bill to grant a Federal charter to one of the most public spirited organizations in the Nation, Italian American War Veterans of the United States, Inc.

Before I continue however, I would like to take this opportunity to commend my dear friends Mr. ANNUNZIO and Mr. RODINO who, along with so many others in this body, have worked diligently to bring this matter before us today, and I am confident that their efforts have not been in vain.

For almost 50 years Italian American Veterans, Inc. has done outstanding work on behalf of honorably discharged veterans, their wives, widows, and dependents. One of the reasons why both the House and Senate Judiciary committees found it eligible to vote in favor of granting the Federal charter is because its membership has always remained open to all honorably discharged veterans, regardless of sex, race, religion or national origin who bravely served their country the world over.

In its nearly half-century of national existence IAWV has touched the lives of countless Americans whether it has been through financial assistance in hospitals and homes of veterans, or by decorating the graves of men who lost their lives in battle. Its members, all of whom are dedicated to helping others less fortunate, have been involved in patriotic observances, the awarding of scholarships, and among other interests, working hand-in-hand with other organizations concerned with the needs of the veteran. It is an organization which has reached out across the

globe, as shown when devastating earthquakes ravaged Italy.

Mr. Speaker, much has been said, and rather correctly, that the granting of a Federal charter to IAWV would enable its members to expand their activities by giving it instant credibility in the eyes of many organizations on the State and local level interested in helping the veteran. This charter is vital if it is to continue to meet the ever changing needs of veterans. But equally important, the charter would be a psychological shot in the arm to all veterans in this country, veterans who need to know they have not been forgotten and will always be appreciated.

The IAWV has proven itself to be worthy of a Federal charter. It has met all the stringent requirements of both Judiciary Committees, and I again urge my colleagues to support the measure when the vote is taken.

● Mr. RODINO. Mr. Speaker, it is a pleasure to offer my support for this legislation to grant a Federal charter to the Italian American War Veterans of the United States. Passage of this measure, of which I am a cosponsor, by the House and Senate will be a fitting culmination of long and hard efforts by many in and out of the Congress to bestow this recognition on a worthy organization.

A Federal charter is not granted lightly. They are awarded on a very selective basis and only to organizations that clearly deserve such a privilege. The IAWV has clearly established itself as such an association. It more than meets the standards that govern the conferring of a charter. Its activities are national in scope and responsive to a national need. Its members give unsparingly of their time and resources to help not only veterans and their families but all Americans. Membership is open to all, regardless of race, color, creed, or national origin.

The IAWV has a membership of 8,000 in its posts and auxiliaries in hundreds of communities throughout the land. In serving their communities, these units promote a variety of civic and educational activities, conduct fund drives for charitable causes, sponsor scholarships, and engage in many other types of volunteer work. For instance, the Veterans' Administration reports the IAWV and its auxiliaries donate more than 5,400 hours annually to patients in the veterans' medical program alone.

The IAWV is now 50 years old. There could be no better way to honor this dedicated group on the occasion of its golden anniversary, than to award it a Federal charter.

This legislation received broad support in the Committee on the Judiciary. I heartily urge this body to approve a charter for the IAWV—as it has in the past for other qualified veterans groups—and for the other three fine organizations that also are seeking this honor: the U.S. Submarine Veterans of World War II, the American Council of Learned Societies, and the organization known as the Former Members of Congress.●

● Mr. MOFFETT. Mr. Speaker, I rise in support of H.R. 4734, which would grant a Federal charter to the organization known as the Italian American War Veterans of the United States.

The Italian American War Veterans of the United States is a nonprofit organization for honorably discharged veterans of World War I, World War II, the Korean conflict, the Vietnam war, and for recipients of congressional medals for other U.S. expeditions or campaigns. Though any veteran may join, most members are of Italian descent. The association was founded in Hartford, Conn., on February 20, 1932, and was incorporated in Connecticut that year. Since then it has been incorporated in New York, New Jersey, California, Pennsylvania, Massachusetts, Ohio, Rhode Island, Florida, and Illinois.

Testimony and documentation presented to a House Judiciary Subcommittee demonstrates that the Italian American War Veterans of the United States maintains a State charter, operates in a nondiscriminatory manner, operates only as a charitable and patriotic association, maintains tax exempt status, and is national in scope. It is not often that the Congress grants Federal charters, but because of the exemplary qualifications of this organization, I believe H.R. 4734 is a suitable and appropriate honor for the Italian American War Veterans of the United States.

I am glad to vote in favor of this bill.●

● Mr. PEASE. Mr. Speaker, I want to join my colleagues in supporting the motion to suspend the rules and pass H.R. 4734, to grant a charter to and recognize the Italian American War Veterans of the United States. While granting a Federal charter such as this is largely a symbolic measure, I think it is very important that we take steps to recognize the important contributions that the IAWV has made and continues to make today.

While organizations such as the IAWV serve an important purpose in allowing fraternal camaraderie, the IAWV, like similar federally chartered organizations, has been particularly valuable because of the time its members have given to others—specifically to other veterans who are patients in VA hospitals. It is easy for organizations to elect officers and hold conventions; it takes much more selflessness and community compassion to give time and money to persons less fortunate than oneself.

Mr. Speaker, I urge my colleagues to support this long-sought charter recognition. We have the opportunity to reward and encourage an organization whose members have devoted their lives and spirit to our country. We should act so the Italian American War Veterans might have the incentive to continue that devotion these many years after the wars they have fought in.●

● Ms. FERRARO. Mr. Speaker, I want to express my support for H.R. 4734, a bill to grant a Federal charter to the organization known as the Italian American War Veterans. As a cosponsor of this worthwhile legislation, I was extremely pleased by the action of the House in passing the bill on Monday, October 26.

The Italian American War Veterans of the United States is a nonprofit organization for honorably discharged veterans of World War I, World War II, the Korean conflict, and the Vietnam war, and for recipients of congressional medals for other U.S. expeditions or campaigns. Though any veteran may join, most members are of Italian descent.

The organization was founded in Hartford, Conn. in 1932 and was first incorporated in Connecticut that year. Since then it has been incorporated in nine additional States, including New York.

As an Italian American myself, I am extremely proud of the contributions the members of the Italian American War Veterans of the United States have made to our country both in war overseas and in peace at home. Especially, during World War II, many of these men fought bravely in the land of their fathers to help gain the Allied victory in Europe. Here in the United States, the association promotes patriotic values and provides important community services.

Last year, the 8,000 members contributed an estimated 5,400 hours of assistance to patients in Veterans' Administration hospitals, in addition to being involved in projects for historical education, fundraising for special relief and various scholarship programs, including an annual essay contest on patriotism. The association recently made a contribution from its treasury to the Italian Government for the benefit of the victims of last year's earthquake.

Mr. Speaker, let me again state my support for H.R. 4734, the bill granting a Federal charter to this admirable organization, and I wish them continued success in their good works.●

● Mr. BIAGGI. Mr. Speaker, as a cosponsor of H.R. 4734, I wish to lend my full support to the passage of this legislation which will grant a Federal charter to the Italian American War Veterans.

The Italian American War Veterans of the United States is a nonprofit organization for honorably discharged veterans of World War I, II, as well as

the Korean and Vietnam wars. In addition, it is an organization made up of Congressional Medal of Honor winners. It is open to any veteran although its membership is primarily of Italian descent.

The organization was founded some 49 years ago in Hartford, Conn., where it is incorporated—as it is in another nine States. It consists of some 8,000 members who have provided thousands of hours of service to the less fortunate of this Nation.

As an Italian American, I am proud we have reached this point today. The Italian American war veterans deserve the recognition and prestige which a Federal charter provides. Our support of this legislation will be a reflection of our appreciation for all that Italian American war veterans have made to our Nation.

I urge swift and affirmative action by the House today on this bill and I also implore the Senate to join in this action.●

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill, H.R. 4734.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

FORMER MEMBERS OF CONGRESS

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4755) to recognize the organization known as Former Members of Congress.

The Clerk read as follows:

H.R. 4755

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CHARTER

SECTION 1. Former Members of Congress, organized and incorporated under the Nonprofit Corporation Act of the District of Columbia, is hereby recognized as such and is granted a charter.

POWERS

SEC. 2. Former Members of Congress (hereinafter referred to as the "corporation") shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation and shall include the promotion of the cause of good government at the national level by improving the public understanding of the United States Congress as an institution and strengthening its support by the public. The corporation shall function as an educational, patriotic, civic, historical, and research organization as authorized by the laws of the State or States wherein it is incorporated.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the States in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Eligibility for membership in the corporation and the rights and privileges of members shall be as provided in the bylaws of the corporation.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The board of directors of the corporation and the responsibilities thereof shall be as provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The officers of the corporation, and the election of such officers shall be as is provided in the articles of incorporation of the corporation and in conformity with the laws of the States or States wherein it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation shall inure to any member, officer, or director of the corporation or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right of vote. All books and records of such corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(53) Former Members of Congress.".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as is the report of the audit required by section 11 of this Act. The report shall not be printed as public document.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 13. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

TAX-EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code. If the corporation fails to maintain such status, the charter granted hereby shall expire.

TERMINATION

SEC. 16. If the corporation shall fail to comply with any of the restrictions or provisions of this Act the charter granted hereby shall expire.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the purpose of the bill is to recognize and grant a Federal charter to the organization known as the Former Members of Congress.

The Former Members of Congress was founded in 1970 with 10 members and was incorporated as a nonprofit corporation in the District of Columbia on June 18, 1970. The organization now has 580 members representing both the House of Representatives and the Senate. All former Members of the U.S. Congress are eligible to join regardless of race, sex, creed, or color. Of former Members, only candidates for, or Members of, Congress are excluded from membership.

This organization has members all across America. Its stated purpose is to "promote the cause of good Government at the national level by strengthening and improving the U.S. Congress as an institution." Toward this end, members of the association have organized parliamentary seminars involving legislators from other countries,

engaged in an oral history project to preserve the history of the modern Congress, and have lectured at many colleges throughout the Nation on the workings of Congress.

Testimony before the subcommittee in the 96th Congress and on June 11, 1981 indicates that the Former Members of Congress is a national nonprofit, educational, civic, historical, and research corporation. It does not engage in partisan politics and has tax exempt status.

The purpose of this legislation is merely to recognize an existing State-chartered organization. It does not grant or expand any corporate rights or relieve any corporate responsibilities established by State charter. Moreover, this bill specifically requires compliance with State laws governing the election of corporate officers and the responsibilities of the board of directors for the corporation. It also specifically requires compliance with State laws governing service of process.

In order to assure responsible and appropriate conduct on the part of the corporation, the bill prohibits certain corporate acts and establishes certain requirements for the corporation. The bill prohibits the the loan or transfer of corporate assets of officers, members, or other persons (except for expenses), lobbying or other political activity by the corporation or the issuance of stock or the payment of dividends. The bill further prohibits the corporation from claiming congressional approval or Federal Government authority for any of its activities. The bill requires the corporation to keep certain records, to perform an annual audit and to report to Congress annually. Should the corporation engage in any prohibited activity or fail to perform any of the requirements established by this bill, or if the corporation fails to maintain its tax exempt status, the Federal charter granted by this bill will expire automatically as a matter of law.

The committee favorably recommends H.R. 4755 to the House for its consideration.

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, as the name suggests, this organization membership is limited to former Representatives and Senators of the U.S. Congress. It started about 11 years ago through the effort of Brooks Hays and Walter Judd. Their membership has grown to 580. I am sure their membership will grow even more at the end of this Congress.

But the critical item that merits a national charter springs from their educational, patriotic, civic, and historical endeavors. One outstanding example of accomplishment is their campus fellowship program. Under this program former members have visited colleges and universities in every State of the Union. They do not go there just to make a speech, but stay for several days to develop a rapport with faculty and students through seminars.

In closing, I would like to say that one of the stated goals of the "Former Members" is to enhance the prestige of Congress through service. That alone would be enough to support a Federal charter.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I thank the gentleman for yielding.

My experience has been that organization of Former Members of Congress has made major contributions to dramatize the importance of the Congress as a legislative body, and to provide the prestige to this body, which it deserves and which it needs. They provide valuable extracurricular service on the college campuses and in many other ways to bring to the American people messages which they would not otherwise receive about the Congress of the United States and its lawmaking capability. Similarly, their contacts with members of the legislative bodies and parliaments of other countries increase the prestige of this body.

For these reasons, I am very pleased myself to join in support of this legislation. On particular, I want to commend Mr. Jed Johnson, a former Member of this body and my former colleague on the Judiciary Committee, who sat beside me during many years of his service here. I would also like to commend a distinguished former Member from New York, Henry Smith.

As required by the rules of the Judiciary Committee, the Former Members of Congress have served an apprenticeship or more than 10 years. They are a not-for-profit, exempt organization oriented toward national service. A Federal charter will give Former Members of Congress recognition as a valuable educational resource.

Perhaps the most important activity run by this organization is its campus fellowship program. It is designed so that college students—the leaders of tomorrow—can better understand how Congress works. There is a long waiting list of colleges asking for Former Member visits. Their campus trips are not token speechmaking trips. Former Members stay for a week or more and associate with the students on a day-to-day basis.

The oral history program is another important activity. Former Members are interviewed professionally so that the benefit of their wisdom, experience and understanding will not be lost to future generations.

Historically, the Former Members is patterned after the Former Members of Parliament. In addition, they have been active internationally, sharing their knowledge, friendship and good will with former legislators of Mexico, Canada, Germany, Great Britain, and Italy.

Finally, the Former Members of Congress, by their charter, are absolutely prohibited from taking a stand or influencing any current legislation. They lose their charter if they do. Their service is away from Washington, not in Washington. I support this bill and I urge my colleagues to vote for it.

Mr. DANIELSON. Mr. Speaker, in closing, I did hear with some sorrow the comments of the gentleman from California (Mr. MOORHEAD) that after the next election the size of the Former Members will be increased. I hope the gentleman will not be too gloomy, because I am sure there will be some Members of the minority party who are returned.

Mr. MOORHEAD. Mr. Speaker, I thank the gentleman.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill, H.R. 4755.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

UNITED STATES SUBMARINE VETERANS OF WORLD WAR II

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4766) to recognize the organization known as United States Submarine Veterans of World War II.

The Clerk read as follows:

H.R. 4766

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CHARTER

SECTION 1. The United States Submarine Veterans of World War II, incorporated under the Non-profit Corporation Act of the State of New Jersey, and the State of Colorado, is hereby recognized as such and is granted a charter.

POWERS

SEC. 2. United States Submarine Veterans of World War II (hereinafter referred to as the "corporation" shall have only those powers granted to it through its bylaws and articles of incorporation filed in the State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation and shall include patriotism and loyalty to the United States of America; the perpetuation and establish-

ment of memorials to the memory of those shipmates who served aboard United States submarines and gave their lives in submarine warfare during World War II; promotion of the spirit and unity that existed among the United States Navy submarine crewmen during World War II; fostering general public awareness of life aboard submarines during World War II, through securing, restoring, and displaying the submarines that were in service at that time; sponsoring annual college scholarships; and performance of such acts of charity as provided for by the constitution and bylaws.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the States in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Eligibility for membership in the corporation and the rights and privileges of members shall, except as provided in this Act, be as provided in the constitution and bylaws of the corporation.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The board of directors of the corporation and the responsibilities thereof shall be as provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The officers of the corporation, and the election of such officers shall be as is provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States wherein it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation shall inure to any member, officer, or director of the corporation or be distributed to any such person during the life of this charter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right to vote. All books and records of such corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(55) United States Submarine Veterans of World War II.".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as in the report of the audit required by section 11 of this Act. The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 13. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

TAX EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code. If the corporation fails to maintain such status, the charter granted hereby shall expire.

TERMINATION

SEC. 16. If the corporation shall fail to comply with any of the restrictions or provisions of this Act, the charter granted hereby shall expire.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr. Speaker, I yield myself such time as I may consume.

Mr. DANIELSON. Mr. Speaker, the bill, H.R. 4766, would recognize and grant a Federal charter to the organization known as the United States Submarine Veterans of World War II.

The United States Submarine Veterans of World War II was founded in August 1955 as a patriotic association of veterans of the submarine service during the Second World War. It has operated under a charter granted by the State of New Jersey since 1956. According to the organization's historian, approximately 20,000 men served in submarines during World War II, and approximately 15,000 submarine veterans survive today. The Submarine Veterans of World War II is nationally organized and has chapters in every State. There are currently 5,000 active and associate members of the organization with additional integrated organizations for wives, sons, and daughters.

The subcommittee heard testimony on H.R. 894 at a hearing on June 11, 1981. Testimony and supporting documents furnished to the subcommittee revealed that the organization is primarily a patriotic association dedicated to memoralizing submarines and submarines lost in World War II. The organization also performs other valuable functions for veterans in general, and submarine veterans in particular. The association awards 52 scholarships annually in honor of the 52 submarines lost in World War II. Many State chapters provide monthly recreational activities for patients at Veterans' Administration hospitals and contribute in various ways to the relief of disabled submarine veterans and their families. For example, a Chicago chapter participates in the annual Purple Heart cruise to raise money for veterans relief. In addition, volunteers from the organization assist veterans with Veterans' Administration disability claims on a regular basis.

In keeping with the subcommittee's standards for chartered organizations, testimony and documentation demonstrates that the Submarine Veterans of World War II maintains a State charter, operates in a nondiscriminatory manner, operates only as a charitable and patriotic association, maintains tax exempt status, and is national in scope.

The purpose of this bill is merely to recognize an existing State-chartered organization. It does not grant or expand any corporate rights or relieve any corporate responsibilities established by State charter. Moreover, this bill specifically requires compliance with State laws governing the election of corporate officers and the responsibilities of the board of directors for the corporation. It also specifically requires compliance with State laws governing service of process.

In order to assure responsible and appropriate conduct on the part of the corporation, the bill prohibits certain corporate acts and establishes certain requirements for the corporation. The bill prohibits the loan or transfer of corporate assets to officers, members, or other persons—except for expenses—lobbying or other political activity by the corporation or the issuance of stock or the payment of dividends. The bill further prohibits the corporation from claiming congressional approval or Federal Government authority for any of its activities. The bill requires the corporation

to keep certain records, to perform an annual audit and to report to Congress annually. Should the corporation engage in any prohibited activity or fail to perform any of the requirements established by this bill, or if the corporation fails to maintain its tax-exempt status, the Federal charter granted by this bill will expire automatically as a matter of law.

The committee favorably recommends H.R. 4766 to the House for its consideration.

Mr. ADDABBO. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I would be pleased to yield to the gentleman from New York.

Mr. ADDABBO. Mr. Speaker, I commend the chairman for bringing forth this legislation. I agree with the gentleman that the submariners are some of our most dedicated people. I have been out in some of those submarines. You get claustrophobia just walking through them. That is a volunteer service and anyone who volunteers for that service has to be commended.

This charter, really, comes late, but I am happy that Congress has finally recognized the great dedicated service of the men of the submarines.

Mr. RHODES. Mr. Chairman, will the gentleman yield?

Mr. DANIELSON. I am honored to yield to the gentleman from Arizona.

Mr. RHODES. Mr. Speaker, I thank my good friend from California. I especially commend him, as chairman of this committee, for bringing this bill to the floor of the House.

I agree thoroughly with my good friend, the gentleman from New York (Mr. ADDABBO) as to the merits of the organization. I have known about this organization for a long time, and although as the title indicates, it deals with maritime matters, strangely enough there are an awful lot of them who live in the desert State of Arizona and are good friends and constituents. They have wanted this Federal charter for a long time.

The organization is extremely worthy as to its purposes, its background, and the individuals involved.

If I may, Mr. Speaker, at this point in the RECORD I include the names of the charter members of the United States Submarine Veterans of World War II:

CHARTER MEMBERS: THE UNITED STATES SUBMARINE VETERANS OF WORLD WAR II

Wilbur L. Meyer, Indianapolis, Indiana; Henry T. Vande Kerkhoff, Elmhurst, Illinois; Edmond Kay, Garden Gove, California, James A. Woodall, Galveston, Texas; Reverend John F. Marshall, O.F.M., Allegany, New York; John Kreis, San Diego, California; Harry D. Freeburn, Boerne, Texas; Ernst T. Rosing, La Grange Park, Illinois; Fred A. Judd, Baltimore, Maryland; Arthur F. Rawson, Bethesda, Maryland; E. J. Newbould, Alexandria, Virginia; Richard C. Cooper, Phoenix, Arizona; Charles A. Hennessey, Sacramento, California; Donald L. Smith, Middletown, Ohio; J, Daniel Lopp, New Albany, Indiana; Edward H. Bland, Cincinnati, Ohio; James H. Piper, Clifton Springs, New York; Rex W. Chenoweth, Brighton, Michigan; Cornelius R. Bartholemew, Miles City, Montana; James L. Kornegay, Centerville, Alabama; J. Allen Mactier, Omaha, Nebraska.

Reverend Jerome Kircher, O.F.M., Carrville, Louisiana; Grover S. McLeod, Birmingham, Alabama; Harold A. Ballenger, Los Angeles, California; Frank W. Giehart, Cincinnati, Ohio; William O. Herring, Medford, Oregon; James A. Brillowski, San Diego, California; Donald E. Chauvin, Birmingham, Alabama; Joseph M. Ferrell, Sun City, Arizona; George H. McMinn, Marion, Arkansas.

Raymond A. Tiraschi, San Francisco, California; Edwin Klaver, Denver, Colorado; Clarence A. May, Midway, Texas; William F. Hughes, Honolulu, Hawaii; LaVerne A. Nordenberg, Rockford, Illinois; Charles F. Crothers, Greenfield, Indiana; David B. Wright, Des Moines, Iowa; Harry E. Howell, Louisville, Kentucky; Ovila J. LaPlante, Waterville, Maine; John K. Mayer, Eufaula, Alabama.

Warren Stien, Ionia, Michigan; Ernest E. Van Deventer, Saint Paul, Minnesota; Harvey G. Joeckle, Overland, Missouri; Joseph E. Federle, Omaha, Nebraska; William D. Beal, Junior, Jackson, New Hampshire; Herbert J. Georgius, Junior, Paramus, New Jersey; Gordon E. Lucht, Hobbs, New Mexico; William P. Bosch, Massapequa, New York; Charlie E. White, Pennsacola, Florida.

Vern R. Atha, Portland, Oregon; Arthur B. Clarke, Perkiomenville, Pennsylvania; Wayne I. Miller, Houston, Texas; Lewis H. Barkdoll, Mount Vernon, Washington; Stephen N. Petreshock, Manitowoc, Wisconsin; Charlie R. Ray, Birmingham, Alabama; and John O. Bolin, Omaha, Nebraska.

Mr. Speaker, I wholeheartedly support H.R. 4766, which would grant a Federal charter to a gallant group of men who served our country during World War II in the submarine service. Of the 20,000 men who made up that service, approximately 15,000 survive. In August of 1955, 5,000 of these survivors founded an organization to be known as the United States Submarine Veterans of World War II. In the 26 years that have passed, this patriotic organization has dedicated itself to memorializing the submariners and the 52 submarines they served on that were lost during the war. And so it is in honor of these companions that the members of this fine organization have gone on to award scholarships, to provide recreational activities at many of our State Veterans' Administration hospitals, and to offer assistance to disabled submarine veterans and their families. In addition to having chapters in each of the 50 States, the Submarine Veterans of World War II have also organized auxiliaries for wives, sons, and daughters.

The purpose of this legislation is to give recognition that I believe is long past due to a worthy organization. It does not grant any special privileges, and in fact requires certain responsibilities for the purpose of maintaining such a Federal charter. As I am sure you are aware, no additional cost to the Government will be incurred by the enactment of this legislation.

Mr. Speaker, I believe the time has come to recognize the United States Submarine Veterans of World War II, and urge my colleagues to support this legislation.

Thank you.

Mr. DANIELSON. Mr. Speaker, I thank the gentleman from Arizona for his comments.

I might point out, I can understand why there are so many submarine veterans and other Navy veterans in the desert of Arizona. I, too, was in the Navy. I was a sailor. I remember one time in a typhoon when we were rolling in every direction at the same time, somebody came up with that old Navy saw about, "When I get out of this man's Navy, I am going to put an anchor over my shoulder and I am going to walk straight inland until somebody asks me, 'What is that you are carrying?' And then I am going to settle down."

I reserve the balance of my time.

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 4766.

The record of our submarine forces in World War II speaks for itself. Their efforts were indispensable to victory in the Atlantic and Pacific theaters of the war. These victories were not without great sacrifice—25 percent of our undersea forces perished.

But a Federal charter is not only contingent on past glories, we also look to present accomplishment, and in this respect they have also distinguished themselves. They give out 52 financial scholarships a year to deserving youths. They also have been active in VA hospitals by providing monthly recreational programs as well as other events to make the life of a disabled veteran a little happier.

In closing I would like to note that we have a tendency to forget veterans, and we must let the public know that we have not forgotten, that we do care. What incentive is there to join the Armed Forces if one knows that after personal sacrificies the Government forgets.

I think that this bill demonstrates our continuing commitment to veterans. I urge my colleagues to vote for H.R. 4766.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I would be happy to yield to the distinguished gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I want to commend the gentleman and the distinguished chairman of the subcommittee for favorably considering and recommending this legislation.

As a Representative in this body for a great Naval Training Center, the

Great Lakes Naval Training Center at Great Lakes, Ill., where a great deal of the advanced training is provided in electronics and other advanced technologies relating to submarine warfare, I am particularly interested in seeing that these submarine veterans of World War II are given appropriate recognition and the appropriate vehicle of a Federal charter for carrying on the extremely important work which they do. This bill gives deserving national recognition to representatives of World War II submarine veterans. During that era, the submarine forces never failed us in our days of great peril. A national charter is commensurate with their service and their sacrifice.

At present, they operate wholly as a charitable, educational, and patriotic organization, as evidenced by their record since 1955. The national camaraderie of submariners, sharing the risks and conditions of service, has service as a springboard to community service. Their spirit has been kept alive in a time of peace. They have erected memorials to their shipmates who gave their lives. They have established a scholarship program for deserving youths as well as provided recreation for disabled veterans. They are entirely nonprofit and nonpartisan and conduct no politically oriented activities. Submarine veterans membership extends to every State in the Union.

A Federal charter is the least that we can give them. I urge swift passage of this bill.

Mr. MONTGOMERY. Mr. Speaker, will the gentleman yield?

Mr. DANIELSON. I yield to the gentleman from Mississippi.

Mr. MONTGOMERY. Mr. Speaker, I want to commend the distinguished gentleman from California, an outstanding member of the Judiciary Committee, and one of the ranking members of the Committee on Veterans' Affairs, for his leadership in bringing this bill, as well as the bill to grant a charter to the Italian American War Veterans of the United States, to the House. The gentleman from California is known for his strong support of veterans who served their country during World War II, as well as all other wars.

This bill would grant a Federal charter to the organization known as the United States Submarine Veterans of World War II. As stated in the report on the bill, the organization was founded in 1955 as a patriotic association of veterans of the submarine service during the Second World War. It is nationally organized and has 5,000 active and associate members.

Mr. Speaker, I support the granting of a Federal charter to this patriotic organization. The passage of this bill will demonstrate our continuing commitment to those who served our country in time in war. In this case, we honor those gallant submariners who lost their lives in World War II.

I am pleased to also note from the report that the organization awards 52 scholarships annually in honor of the 52 submarines lost in the war, and that many State chapters provide monthly recreational activities for patients at Veterans' Administration hospitals.

Finally, Mr. Speaker, in order to assure responsible and appropriate conduct on the part of the organization, the reported bill prohibits certain corporate acts and establishes certain requirements for the corporation. The bill requires the corporation to keep certain records, to perform an annual audit and to report to Congress annually. These are proper safeguards for the granting of such charters.

I am pleased to support the bill, and urge that it be adopted.

● Mr. PICKLE. Mr. Speaker, today we have acted in concert to honor the submarine veterans of World War II, who glorified themselves in service to our country. H.R. 4766 recognizes an existing State-chartered organization of submarine veterans. This group has chapters in every State in the Union.

Of special significance is the Texas chapter and its courageous and persistent finance officer, my friend Douglass Nichols. Mr. Nichols had a great deal to do with the passage of this act, and has perhaps written everyone in the country who had some interest in giving the submarine veterans a Federal charter. His statements as to why such a bill is needed best reflects what is in all of our hearts, especially those of us who fought a war for these United States. Mr. Nichols notes that his interest—

Stems from something I did when I was 18 years old. I am now 56 years old, and look back with great satisfaction that all of us on the boats actually defended the ramparts of this country. Our Veterans organization pays tribute to those men and boats that did not return.

Special recognition of the submarine veterans is due not only because of past service, but also in appreciation of the continued support and assistance to other veterans and their families. The submarine veterans organizations give 52 scholarships annually, in honor of the 52 submarines lost in World War II. Many chapters are actively involved with patient rehabilitation efforts at Veterans' Administration hospitals around the country. Now numbering 5,000 out of the original 20,000 who served on submarines during World War II, the members of this organization continue to contribute in various ways to provide relief to the families of disabled submarine veterans. What better gesture of brotherhood to fallen comrades?

The U.S. submarine fleet reached its peak in June of 1945, totaling 237 boats. When final casualty figures were in, not only 52 boats, but 3,505 personnel were included. I shared the anxieties of my friend Mr. Nichols, as this bill made its way through the legislative process, that—

Our U.S. Submarine Veterans of World War II be granted its federal charter while the majority of us that sailed on those boats are still alive.

I thank the distinguished gentleman from California (Mr. DANIELSON) for advancing this bill of such great national interest, and extend most sincere congratulations to our submarine veterans—our "War Fish"—for a job well done.●

● Mr. CLINGER. Mr. Speaker, I rise in support of H.R. 4766, to provide a national charter for the United States Submarine Veterans of World War II. I am honored to be able to speak in behalf of the Submarine Veterans of World War II. It is with reverence and gratitude to all veterans that I join in cosponsoring a bill to establish an organization that acknowledges the memory of those who served our Nation at sea and who in many instances gave their lives in submarine warfare during World War II.

The values and goals of this organization, as provided in its articles of incorporation, embody the very qualities that have made heroes of the men whom we are honoring—loyalty and patriotism to the United States of America.

It is to be hoped that this selective group of outstanding Americans will continue to promote, through their organization, the spirit and unity that existed amongst its members throughout the Second World War. I am confident that this will serve the public, as its members have done, through promoting charity and good will and unity amongst fellow Americans.●

●Mr. OBERSTAR. Mr. Speaker, today, with passage of the U.S. Submarine Veterans of World War II Charter, the House will honor the heroism of the 20,000 men who served their country aboard submarines during World War II.

This bill grants a long-awaited Federal charter to the submarine veterans of World War II and gives national recognition to their organization as a nonprofit corporation.

The submarine veterans have dedicated themnselves to serve as an organization of veterans in the pursuit of partriotic endeavors, to promote public awareness of the contributions of submarine crewmen during World War II, to stimulate a spirit of unity among the surviving veterans and to honor and perpetuate the memory of the deceased submariners.

Passage of this legislation is particular satsifying to me because during the past three Congresses I have joined with my good firend and coleague, the

gentleman from Arizona (Mr. RHODES), in sponsoring H.R. 52, the charter legislation on which H.R. 4766 is based. The gentleman from Arizona and I have spent considerable time advocating the merits of this legislation, not only with the chairman of this subcommittee, the gentleman from California (Mr. DANIELSON), and the ranking member, the gentleman from California (Mr. MOOREHEAD), but also with other colleagues, to persuade them that submarine veterans deserve at least the same consideration Congress has extended through its chartering authority to other veterans organizations.

It has been very satisfying to note that 99 of our colleagues have joined us in cosponsorship of this bill and the unanimous action of the Subcommittee on Administrative Law and Government Relations indicates the very high regard in which submarine veterans are held by Members of Congress and the very generous commitment of the veterans themselves to the formal recognition of their organization.

Mr. Speaker, the number "52" has special significance: I chose that bill number because it represents the 52 U.S. submarines sunk during World War II and the 3,000 crewmen whose lives were lost aboard those ships.

Although each of the uniformed services rightfully boasts a special characteristic and a unique contribution to our national defense effort, there is something very special, something quite extraordinary about those men who go under the sea in ships.

Submariners seem to be marked with an indelible bond of unity, of commitment to each other, and to their county. They have maintained that bond in peacetime through regular meetings of their organization.

Today, the House takes the first step toward the goal submariners have worked for years to achieve: National recognition through the granting of a congressional charter to the U.S. Submarine Veterans of World War II.

All submariners deserve credit for their efforts and dedication to their country and their organization, but I would like to mention a few who merit special consideration for their persistence, their patience, for their perseverance in petitioning Congress for the charter status which the House will approve today: Mr. Bernard Hautala of Minnesota, Mr. E. J. "Jack" Newbould of Virginia, and Mr. Art Rawson of Maryland. I appreciate their efforts, their constructive suggestions for improving the bill, and their unflagging encouragement to press forward with this bill. Their efforts have been rewarded.●

Mr. MOORHEAD. Mr. Speaker, I yield back the balance of my time.

Mr. DANIELSON. Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill, H.R. 4766.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

□ 1230

Mr. DANIELSON. Mr. Speaker, I ask unanimous consent that the Committee on the Judiciary be discharged from the further consideration of the Senate bill (S. 195) to incorporate the United States Submarine Veterans of World War II, and ask for its immediate consideration.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 195

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That Wilbur L. Meyer, Indianapolis, Indiana; Henry T. Vande Kerkhoff, Elmhurst, Illinois; Edmond Kay, Garden Grove, California; James A. Woodall, Galveston, Texas; Reverend John F. Marshall, O.F.M., Allegany, New York; John Kreis, San Diego, California; Ernst T. Rosing, La Grange Park, Illinois; Fred A. Judd, Baltimore, Maryland; Arthur F. Rawson, Bethesda, Maryland; E. J. Newbould, Alexandria, Virginia; Richard C. Cooper, Phoenix, Arizona; Charles A. Hennessey, Sacramento, California; Donald L. Smith, Middletown, Ohio; J. Daniel Lopp, New Albany, Indiana; Edward H. Bland, Cincinnati, Ohio; Rex W. Chenoweth, Brighton, Michigan; Cornelius R. Bartholemew, Miles City, Montana; James L. Kornegay, Centerville, Alabama; J. Allen Mactier, Omaha, Nebraska.

Reverend Jerome Kircher, O.F.M., Carville, Louisiana; Grover S. McLeod, Birmingham, Alabama; Harold A. Ballenger, Los Angeles, California; Frank W. Giehart, Cincinnati, Ohio; William O. Herring, Medford, Oregon; James A. Brillowski, San Diego, California; Donald E. Chauvin, Birmingham, Alabama; Joseph M. Ferrell, Sun City, Arizona; George H. McMinn, Marion, Arkansas.

Raymond A. Tiraschi, San Francisco, California; Edwin Klaver, Denver, Colorado; Clarence A. May, Midway, Texas; William F. Hughes, Camp Nelson, California; LaVerne A. Nordenberg, Rockford, Illinois; Charles F. Crothers, Greenfield, Indiana; David B. Wright, Hardy, Arkansas; Harry E. Howell, Louisville, Kentucky; Ovila J. LaPlante, Waterville, Maine; John K. Mayer, Eufaula, Alabama.

Warren Stien, Ionia, Michigan; Ernest E. Van Deventer, Saint Paul, Minnesota; Harvey G. Joeckle, Overland, Missouri; Joseph E. Federle, Omaha, Nebraska; William D. Beal, Junior, Jackson, New Hampshire; Herbert J. Georgius, Junior, Paramus, New Jersey; Gordon E. Lucht, Hobbs, New Mexico; William P. Bosch, Massapequa, New York.

Vern R. Atha, Portland, Oregon; Wayne I. Miller, Houston, Texas; Lewis H. Barkdoll, Mount Vernon, Washington; Stephen N. Petreshock, Manitowoc, Wisconsin; Charlie R. Ray, Birmingham, Alabama; John O. Bolin, Omaha, Nebraska, and any other person who, on the date of enactment of this Act, is a member in good standing of the United States Submarine Veterans of World War II, a corporation organized and existing under the laws of the State of New Jersey, and their successors, are created, in the District of Columbia, a body corporate by the name of United States Submarine Veterans of World War II (hereinafter in this Act referred to as the "corporation") and by such name shall be known and have perpetual succession of the powers, limitations and restrictions contained in this Act.

COMPLETION OF ORGANIZATION

SEC. 2. A majority of the persons named in the first section of this Act may complete the organization of the corporation by the selection of officers and employees, the adoption, amendment, and revision of a constitution and bylaws not inconsistent with the provisions of this charter, and the doing of such other acts as many be necessary for such purpose.

PURPOSES OF THE CORPORATION

SEC. 3. the objects and purposes of the corporation shall be—

(a) to perpetuate and establish memorials to the memory of those shipmates who served aboard United States submarines and gave their lives in submarine warfare during World War II,

(b) to further promote and keep alive the spirit and unity that existed among the United States Navy submarine crewmen during World War II,

(c) to promote sociability, general welfare, and good fellowship among its members,

(d) to pledge loyalty and patriotism to the United States Government,

(e) to sponsor and award annual college scholarships,

(f) to make the general public aware of life aboard submarines during World War II, by obtaining, restoring, and displaying the submarines that were in service at that time,

(g) to perform such acts of charity as provided for by the constitution and bylaws, and

(h) to promote and support the membership in "Wives of United States Submarine Veterans of World War II" and "The Sons and Daughters of United States Submarine Veterans of World War II".

POWERS OF THE CORPORATION

SEC. 4. Subject to all applicable laws of the United States, and of any State in which the corporation operates, the corporation shall have the power—

(a) to sue, be sued, complain, or defend in any court of competent jurisdiction;

(b) to adopt, alter, and use a corporate seal for the sole and exclusive use of the corporation;

(c) to choose such officers, managers, and agents as may be necessary to carry out the purposes of the corporation;

(d) to charge and collect membership dues;

(e) to adopt, amend, apply, and alter a constitution and bylaws not inconsistent with the laws of the United States of America or of any State in which the corporation is to operate, for the management of its property and the regulation of its affairs;

(f) to contract and be contracted with as may be necessary to carry out the purposes of the corporation;

(g) to take and hold by lease, gift, purchase, grant, devise, bequest, or otherwise any property, real, personal, or mixed, necessary or convenient for attaining the objects of the corporation, subject, however, to applicable provisions of law of any State (1) governing the amount or kind of real and personal property which may be held by, or (2) otherwise limiting or controlling the ownership of real and personal property which may be held by, or (3) otherwise limiting or controlling the ownership of real and personal property by, a corporation operating in such State;

(h) to transfer, lease, or convey real or personal property;

(i) to borrow money for the purposes of the corporation and to issue bonds or other evidences of indebtedness therefor and to secure the same by mortgage or pledge subject to applicable Federal or State laws; and

(j) to do any and all acts necessary and proper to carry out the purposes of the corporation.

PRINCIPAL OFFICE; TERRITORIAL SCOPE OF ACTIVITIES; RESIDENT AGENT

SEC. 5. (a) The prinicpal office of the corporation shall be located in the District of Columbia, or in such other place as may be determined by the board of directors in accordance with the bylaws of the corporation, but the activities of the corporation shall not be confined to that place and may be conducted throughout the United States and in all other locations as may be necessary to carry out the purposes of the corporation.

(b) The corporation shall have in the District of Columbia at all times a designated agent authorized to accept service of process for the corporation, and notice to or service upon such agent or mailed to the business address of such agent shall be deemed as service or notice upon the corporation.

MEMBERSHIP RIGHTS

SEC. 6. (a) Membership shall be restricted to those members of the United States submarine crews and the United States submarine relief crews who were on active duty between December 1, 1941, and December 31, 1946.

In addition to the general membership, there shall be special classes of honorary membership, qualification or eligibility for which, and rights and obligations of which, shall be as provided from time to time by the bylaws of the corporation.

(c) All persons who are members of any class of the United States Submarine Veterans of World War II, an association, on the date of enactment of this Act shall retain their membership in such class as members of the corporation.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 7. (a) Upon the enactment of this Act, the membership of the initial board of directors of the corporation shall consist of the present officers of the United States Submarine Veterans of World War II, including the immediate past president of said organization, or such of them as may then be living and are qualified officers of that association, to wit: James L. O'Conner, Baltimore, Maryland; Joseph McGrievy, La Mesa, California; Elroy F. Wilke, Denver, Colorado; Henry T. Vande Kerkhoff, Elmhurst, Illinois; Andrew M. Gasper, North Huntingdon, Pennsylvania.

(b) Thereafter the board of directors of the corporation shall consist of such number (not less than five) as shall be selected in such manner (including the filling of vacancies), and shall serve for such terms as may be prescribed in the constitution and bylaws of the corporation.

(c) The board of directors shall be the governing board of the corporation and shall during the intervals between corporation meetings be responsible for the general policies and program of the corporation. The board of directors shall be responsible for all finances of the corporation.

OFFICERS

SEC. 8. (a) The corporation shall have such officers as may be provided for in the bylaws.

(b) The officers shall have such powers consistent with this charter, as may be determined by the bylaws.

(c) The officers of the corporation shall be elected in such manner and have such terms and duties as may be prescribed in the bylaws of the corporation.

DISTRIBUTION OF INCOME OR ASSETS TO MEMBERS; LOANS

SEC. 9. (a) No part of the income or assets of the corporation shall inure to any member, officer, or director as such, or be distributed to any of them during the life of the corporation, or upon its dissolution or final liquidation, nor shall any member or private individual be liable for the obligations of the corporation. Nothing in this section, however, shall be construed to prevent—

(1) the payment of bona fide expenses of officers of the corporation in amounts approved by the board of directors; or

(2) the support of scholarships to descendants of submarine veterans or other scholarships and works of charity as may be deemed appropriate by the directors and controlled by the constitution and bylaws of the corporation.

(b) The corporation shall not make loans to its officers, directors, or employees. Any officer or director who votes for or assents to the making of a loan to any officer, director, or employee of the corporation and any officer who participates in the making of such loan shall be jointly and severally liable to the corporation for the amount of such loan until the payment thereof.

NONPOLITICAL NATURE OF CORPORATION

SEC. 10. The corporation, and its officers and directors as such, shall not contribute to or otherwise support or assist any political party or candidate for elective public office.

LIABILITY FOR ACTS OF OFFICERS AND AGENTS

SEC. 11. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

PROHIBITION AGAINST ISSUANCE OF STOCK OR PAYMENT OF DIVIDENDS

SEC. 12. The corporation shall have no power to issue any shares of stock or declare or pay dividends.

BOOKS AND RECORDS; INSPECTION

SEC. 13. The corporation shall keep correct and complete books and records of account. It shall also keep minutes of the proceedings of its membership and of the board of directors. It shall also keep at its principal office a record giving the names and addresses of its members, directors, and officers. All books and records of the corporation may be inspected by any member or his agent or attorney for any proper purpose at any reasonable time.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 14. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (78 Stat. 635; 36 U.S.C. 1101 et seq.) is amended by adding at the end thereof:

"(50) United States Submarine Veterans of World War II."

USE OF ASSETS UPON DISSOLUTION OR LIQUIDATION

SEC. 15. Upon final dissolution or liquidation of the corporation, and after discharge or satisfaction of any outstanding obligation or liability the remaining assets of the corporation may be distributed in accordance with the determination of the board of directors of the corporation and in compliance with this Act, the constitution, the bylaws of the corporation, and all other applicable Federal and State laws.

TRANSFER OF ASSETS

SEC. 16. The corporation may acquire the assets of the United States Submarine Veterans of World War II, a corporation, organized under the laws of the State of New Jersey, upon discharging or satisfactorily providing for the payment and discharge of all the liabilities of such corporation and upon complying with any applicable Federal or State law.

EXCLUSIVE RIGHT TO NAME, CORPORATE SALES, EMBLEMS, AND BADGES

SEC. 17. The corporation and its duly authorized State groups and other local subdivisions shall have the sole and exclusive right to have and use in carrying out its purposes the name "United States Submarine Veterans of World War II", and to have and use such seals, emblems, and badges as the corporation may lawfully adopt.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 18. The right of the Congress to alter, amend, or repeal this Act is expressly reserved.

MOTION OFFERED BY MR. DANIELSON

Mr. DANIELSON. Mr. Speaker, I offer a motion.

The Clerk read as follows:

Mr. DANIELSON moves to strike out all after the enacting clause of the Senate bill, S. 195, and insert in lieu thereof the provisions of H.R. 4766, as passed.

The motion was agreed to.

The Senate bill was ordered to be read a third time, was read the third time, and passed.

The title was amended so as to read: "A bill to recognize the organization known as the United States Submarine Veterans of World War II."

A motion to reconsider was laid on the table.

A similar House bill (H.R. 4766) was laid on the table.

AMERICAN COUNCIL OF LEARNED SOCIETIES

Mr. DANIELSON. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 4769) to recognize the organization known as the American Council of Learned Societies.

The Clerk read as follows:

H.R. 4769

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

CHARTER

SECTION 1. The American Council of Learned Societies, organized and incorporated under the Nonprofit Corporation Act of the District of Columbia, is hereby recognized as such and is granted a charter.

POWERS

SEC. 2. American Council of Learned Societies (hereinafter referred to as the "corporation") shall have only those powers granted to it through its bylaws and articles of incorporation filed in State or States in which it is incorporated and subject to the laws of such State or States.

OBJECTS AND PURPOSES OF CORPORATION

SEC. 3. The objects and purposes of the corporation are those provided in its articles of incorporation and shall include the advancement of the humanistic studies in all fields of learning and the maintenance and strengthening of relations among the national societies devoted to such studies, and the corporation shall function as authorized by the laws of the State or States where it is incorporated.

SERVICE OF PROCESS

SEC. 4. With respect to service of process, the corporation shall comply with the laws of the States in which it is incorporated and those States in which it carries on its activities in furtherance of its corporate purposes.

MEMBERSHIP

SEC. 5. Eligibility for membership in the corporation and the rights and privileges of members shall, except as provided in this Act, be as provided in the constitution and bylaws of the corporation.

BOARD OF DIRECTORS; COMPOSITION; RESPONSIBILITIES

SEC. 6. The board of directors of the corporation and the responsibilities thereof shall be as provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States in which it is incorporated.

OFFICERS OF CORPORATION

SEC. 7. The officers of the corporation, and the election of such officers shall be as is provided in the articles of incorporation of the corporation and in conformity with the laws of the State or States wherein it is incorporated.

RESTRICTIONS

SEC. 8. (a) No part of the income or assets of the corporation shall inure to any member, officer, or director of the corporation or be distributed to any such person during the life of this chapter. Nothing in this subsection shall be construed to prevent the payment of reasonable compensation to the officers of the corporation or reimbursement for actual necessary expenses in amounts approved by the board of directors.

(b) The corporation shall not make any loan to any officer, director, or employee of the corporation.

(c) The corporation and any officer and director of the corporation, acting as such officer or director, shall not contribute to, support or otherwise participate in any political activity or in any manner attempt to influence legislation.

(d) The corporation shall have no power to issue any shares of stock nor to declare or pay any dividends.

(e) The corporation shall not claim congressional approval or Federal Government authority for any of its activities.

LIABILITY

SEC. 9. The corporation shall be liable for the acts of its officers and agents when acting within the scope of their authority.

BOOKS AND RECORDS; INSPECTION

SEC. 10. The corporation shall keep correct and complete books and records of account and shall keep minutes of any proceeding of the corporation involving any of its members, the board of directors, or any committee having authority under the board of directors. The corporation shall keep at its principal office a record of the names and addresses of all members having the right to vote. All books and records of such corporation may be inspected by any member having the right to vote, or by any agent or attorney of such member, for any proper purpose, at any reasonable time. Nothing in this section shall be construed to contravene any applicable State law.

AUDIT OF FINANCIAL TRANSACTIONS

SEC. 11. The first section of the Act entitled "An Act to provide for audit of accounts of private corporations established under Federal law", approved August 30, 1964 (36 U.S.C. 1101), is amended by adding at the end thereof the following:

"(56) American Council of Learned Societies.".

ANNUAL REPORT

SEC. 12. The corporation shall report annually to the Congress concerning the activities of the corporation during the preceding fiscal year. Such annual report shall be submitted at the same time as in the report of the audit required by section 11 of this Act. The report shall not be printed as a public document.

RESERVATION OF RIGHT TO AMEND OR REPEAL CHARTER

SEC. 13. The right to alter, amend, or repeal this Act is expressly reserved to the Congress.

DEFINITION OF "STATE"

SEC. 14. For purposes of this Act, the term "State" includes the District of Columbia, the Commonwealth of Puerto Rico, and the territories and possessions of the United States.

TAX EXEMPT STATUS

SEC. 15. The corporation shall maintain its status as an organization exempt from taxation as provided in the Internal Revenue Code. If the corporation fails to maintain such status, the charter granted hereby shall expire.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from California (Mr. DANIELSON) will be recognized for 20 minutes, and the gentleman from California (Mr. MOORHEAD) will be recognized for 20 minutes.

The Chair recognizes the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. Mr Speaker, I yield myself such time as I may consume.

Mr. Speaker, the bill H.R. 4769 would recognize and grant a Federal charter to the organization known as the American Council of Learned Societies.

The American Council of Learned Societies (ACLS), founded in 1919, was incorporated in the District of Columbia in 1924, and has its headquarters in New York, N.Y.

The ACLS was established originally in response to the need of the United States for a spokesman within the International Union of Academies, and it has represented the Nation in that body for 60 years. The ACLS is a federation of professional and honorary associations with a constituency of 43 learned societies having an aggregate membership of approximately 250,000 scholars. A list of constituent societies is reprinted in the committee report. The stated purpose of this organization is the advancement of humanistic studies in all fields of learning, and the maintenance and strengthening of relations among all national societies devoted to such studies.

The council and its activities are supported by income from endowment, dues of constituent societies, subscriptions of universities, colleges, research libraries, and corporations that are associates of the ACLS, grants from philanthropic foundations, Government grants and contracts, and private gifts. Its activities include the provision of fellowships and grants for studies of the humanities, programs for the improvement of American studies abroad, special projects for the improvement of American research into and promotion of area studies, the administration of international exchange programs, the promotion of international communication among scholars of the humanities, and cooperation with agencies of the U.S. Government on projects involving the humanities.

The subcommittee has held hearings on this proposal in the 96th Congress and most recently on June 11, 1981. Testimony and documentation indicate that the American Council of Learned Societies maintains a State charter, operates in a nondiscriminatory manner, and operates nationally and internationally only as a nonprofit corporation toward the improvement of our American society.

While the international role of the ACLS in the area of the humanities is unique, there is ample precedent for extending a Federal charter to this organization. Congress granted a charter to the National Academy of Sciences of March 3, 1863, see, 36 U.S.C. 251 (1976). Like the ACLS, the National Academy of Sciences is a federation of organizations dedicated to a particular field of study. Like the ACLS, the national academy is a private organization which represents the United States in international negotiations in its field. It is especially appropriate in the light of this precedent that Congress recognize the ACLS for its many

years of service to the United States by granting it a Federal charter.

In response to inquiry from the committee, the chairman of the National Endowment for the Humanities, Mr. Joseph Duffey, has indicated the support of that agency for this bill in a letter to the chairman of the committee. A copy of the letter is reprinted in the committee report.

The purpose of this bill is to recognize an existing State-chartered organization. It does not grant or expand any corporate rights or relieve any corporate responsibilities established by State charter. Moreover, this bill specifically requires compliance with State laws governing the election of corporate officers and the responsibilities of the board of directors for the corporation. It also specifically requires compliance with State laws governing service of process.

The bill prohibits certain corporate acts and establishes certain requirements for the corporation. The bill prohibits the loan or transfer of corporate assets to officers, members, or other person, except for expenses, lobbying or other political activity by the corporation or the issuance of stock or the payment of dividends. The bill further prohibits the corporation from claiming congressional approval or Federal Government authority for any of its activities. The bill requires the corporation to keep certain records, to perform an annual audit, and to report to Congress annually. Should the corporation engage in any prohibited activity or fail to perform any of the requirements established by this bill, or if the corporation fails to maintain its tax-exempt, status, the Federal charter granted by this bill will expire automatically as a matter of law.

The committee favorably recommends H.R. 4679 to the House for its consideration.

Mr. Speaker, I reserve the balance of my time.

Mr. MOORHEAD. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, today the American Council of Learned Societies (ACLS) numbers 250,000 scholar members and has been in existence for more than 60 years. ACLS is to the humanities what the National Academy of Sciences is to sciences.

ACLS has the support and has received grants from the Ford Foundation, the Carnegie Corp., the Mellon Foundation, the Rockefeller Foundation, the National Endowment for the Humanities, and the State Department.

The principle endeavor of ACLS has been advancement of learning in the humanities through scholarship. They stimulate research by fellowships, grants in aid of research, and the publishing of that research in such broadly ranging fields as economics, languages, and music.

As a matter of fact, ACLS has pioneered modern language training for our troops during World War II. They also contributed in area cultural studies for the Armed Forces in the far-flung theaters of that war.

Since 1919 the American Council of Learned Societies has contributed to the betterment of American civilization both here and abroad. they deserve a Federal charter.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. MOORHEAD. I yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, I thank the gentleman for yielding. I want to commend the committee for reporting this legislation.

Mr. Speaker, in a material society scholarship tends to go unrewarded. It is unfortunate because scholars are the true custodians of civilization. Society that measures itself solely in terms of technological progress loses its creativity and its culture.

The Congress should not pass up this opportunity to give national recognition to the chief spokesmen for the humanities—the American Council of Learned Societies. It is a federation of 43 national scholarly associations such as the Association of American Law Schools, the American Economic Association, the American Musicological Association, and the American Philosophical Society which Benjamin Franklin was instrumental in forming.

But the contribution of the American Council of Learned Societies has not been wholly academic or cultural. During World War II it was the ACLS that took the initiative in modernizing methods of language training for the U.S. Army desperately needed by our troops. ACLS also helped the Armed Forces in area cultural studies. Today the ACLS establishes libraries on American culture in foreign countries.

The record of accomplishment goes on and on. I strongly support a Federal charter as the least we can do for the American Council of Learned Societies.

Mr. MOORHEAD. Mr. Speaker, I yield back the balance of my time.

Mr. DANIELSON. Mr. Speaker, I just want to thank the gentlemen on that side of the aisle for their help in this field. I think it is very worthwhile.

Mr. Speaker, I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from California (Mr. DANIELSON) that the House suspend the rules and pass the bill, H.R. 4769.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill was passed.

A motion to reconsider was laid on the table.

CONTRACT SERVICES FOR DRUG DEPENDENT FEDERAL OFFENDERS ACT AMENDMENT OF 1981

Mr. HUGHES. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3963) to amend the Contract Services for Drug Dependent Federal Offenders Act of 1978 to extend the periods for which funds are authorized to be appropriated, as amended.

The Clerk read as follows:

H.R. 3963

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Contract Services for Drug Dependent Federal Offenders Act Amendment of 1981".

SEC. 2. Section 4(a) of the Contract Services for Drug Dependent Federal Offenders Act of 1978 (18 U.S.C. 4255 note) is amended—

(1) by striking out "1981; and" and inserting in lieu thereof "1981;", and

(2) by inserting before the period at the end thereof the following: "; $4,500,000 for the fiscal year ending September 30, 1983; $5,500,000 for the fiscal year ending September 30, 1984; and $6,500,000 for the fiscal year ending September 30, 1985".

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from New Jersey (Mr. HUGHES) will be recognized for 20 minutes, and the gentleman from Illinois (Mr. McCLORY) will be recognized for 20 minutes.

The Chair recognizes the gentleman from New Jersey (Mr. HUGHES).

Mr. HUGHES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, H.R. 3963 is legislation to amend the contract services for drug-dependent Federal Offenders Act of 1978 and to extend the periods for which funds are authorized to be appropriated.

H.R. 3963 has been reported by the Committee on the Judiciary to reauthorize for a period of 3 years, the provision of drug-abuse treatment, and drug-abuse monitoring, for drug-abusing Federal offenders.

This reauthorization bill makes no changes in the program as it now exists. The bill, as reported, reauthorizes the program for $4.5 million for fiscal year 1983, $5.5 million for fiscal year 1984, and $6.5 million for fiscal year 1985.

This program is administered by the probation division of the administrative office of the U.S. courts. It provides first, for a mechanism to examine all convicted Federal offenders who are released on parole, or sentenced to probation, to determine if they are drug users. Then it provides for the drug-abuse treatment that is appropriate for their problem. Finally, it provides that all persons in treatment are monitored to guarantee that they stay off drugs during the drug

treatment. If someone goes back to using drugs, the court is notified and the person is either charged as a parole or probation violator and returned to prison, or the judge or parole commission mighty modify the terms and conditions of the release and treatment.

About one-third of the cost of the program is for the urinalysis monitoring. Each person in the program, which usually lasts a year, is tested about 54 times during the year they are in treatment.

The other two-thirds of the program pays for the counseling that is the essence of the drug treatment.

Currently, there are about 4,300 persons under the supervision of the division of probation who are being treated for drug abuse.

This program has a very positive effect in reducing crime. Dr. John Ball of Temple University Medical School testified before the Crime Subcommittee about the tremendous amount of crime committed by drug addicts. Most significant was his conclusion that the addict, when treated, commits 84 percent fewer crimes.

The urinalysis program was enthusiastically endorsed by Dr. Robert DuPont, former head of the National Institute on Drug Abuse. Dr. Eric Wish, an expert in the area of drug abuse and crime at Inslaw, also testified that the urinalysis testing program and drug treatment are very important in combating crime.

Drug treatment should be seen as a method of deterring crime. The addict who is no longer dependent on drugs is much less likely to prey on society. This is one program of the Federal Government that is directly reducing the amount of crime committed.

The proposed authorization is based on an estimate, by the Administrative Office of the U.S. Courts, of the impact of the projected, revised prosecutorial policies of the Department of Justice. The new administration is focusing on violent crime and the offenses that are more frequently committed by drug-dependent offenders. The Administrative Office estimates that they will be treating 5,300 persons in 1983, 5,600 in 1984, and 6,100 in 1985.

This is a modest and noncontroversial program. It has a direct, positive impact on one of the major causes of crime in the streets, that of drug abuse. I urge my colleagues to vote for this bill to continue this valuable anticrime program.

Mr. Speaker, I reserve the balance of my time.

Mr. McCLORY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want first of all to commend the gentleman from New Jersey (Mr. HUGHES) for his leadership in the area of anticrime legislation. As the chairman of the Subcommittee on Crime, I know that he has expended a great deal of time and effort, together with my colleague from Michigan (Mr. SAWYER) and the other members of that subcommittee, in providing the necessary mechanisms at the Federal level to help combat the growing threat of crime in America.

Street crime is something that plagues nearly everyone in this Nation. In particular, our senior citizens are becoming increasingly the victims of those who commit crime in the streets. Many of these crimes are being committed by persons who suffer from drug addiction and need funds in order to sustain their habits.

Unfortunately, we have not dealt with the drug problem adequately to either reduce drug traffic or drug addiction, which seem to be mounting. It is therefore extremely important that we consider this legislation favorably in order to address the problem of drug-dependent offenders in our society. If we can handle this problem, it seems to me, we may prevent a great many of the offenses that are going to be committed against law-abiding members of our society.

I commend the subcommittee for bringing this legislation to the floor. I want likewise to commend the President of the United States, who announced recently that he would target drug-related crime in order to meet this extremely serious challenge of crime in America.

Mr. Speaker, as ranking minority member of the full Judiciary Committee, I am pleased to join the gentleman from New Jersey in urging this body to approve H.R. 3963, a bill to provide contract services for drug-dependent offenders.

As the President recently pointed out in his speech before the International Association of Chiefs of Police convention, drugs greatly exacerbate the crime problem in this country. This is particularly true with respect to crimes against property, which are committed in order for the addict to finance his habit. Recent studies clearly demonstrate that addicts who are unsupervised and untreated commit far more crimes. Thus, it is clearly in the interests of the taxpayers to provide the screening and counseling services authorized under this bill.

The Administrative Office has compiled a record of frugal administration of this program, and I believe that they should be permitted to continue their services under the provisions of this bill. Specifically, it would provide modest amounts for 3 fiscal years to permit us to continue our oversight responsibility and reevaluate the program again at the end of that period.

Mr. Speaker, I commend the members of the subcommittee for bringing this bill before us in its present form and I urge the overwhelming support of the measure by this body.

Mr. Speaker, I would be happy to yield to my distinguished colleague, the ranking minority member on the Subcommittee on Crime, whom I commended a few minutes ago, the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. Mr. Speaker, I thank the gentleman for yielding, and I join in urging support of this bill.

Since 1978, the Administrative Office of the U.S. Courts has done, in my judgment, a very effective job. They have been cost conscious in contracting out this authority. There is no question that we really need this sort of followup with respect to drug-addicted people.

□ 1245

Studies brought to the attention of our subcommittee have shown that people who suffer from drug addiction when they are out on parole, probation, bail, or otherwise commit about six times the number of crimes committed by nonaddicted persons. With monitoring by the use of urinalysis and other checks, we are going to be able to either control the tendency of those who might otherwise tend to engage in the use of drugs or to spot those who are using drugs. In such a case, we can restrict their liberty and ability to commit this great multiplicity of crimes which are shown by the studies.

So, Mr. Speaker, I join with the chairman of our subcommittee, the gentleman from New Jersey (Mr. HUGHES), in urging support of this legislation.

Mr. HUGHES. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, first I just want to thank my colleague, the gentleman from Illinois (Mr. McCLORY), for his very kind remarks. My relationship with the gentleman from Illinois goes back to when I first came to the Congress in 1974.

It was my pleasure to work at that time with the gentleman as he served on the Subcommittee on Crime, and even though I left that subcommittee after my first term, I have returned and I am delighted to be back on the subcommittee.

I also want to say to my colleague that we have developed a very good bipartisan relationship in the Subcommittee on Crime, and we are lucky to have a member with the credentials of the gentleman from Michigan, Mr. HAL SAWYER, on the committee.

I also want to thank the ranking minority member of the full committee, the gentleman from Illinois (Mr. McCLORY), for his splendid cooperation in trying to develop and fashion an anticrime bill that is doable and that will be effective. I look forward to working with him in that effort.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. HUGHES. I am happy to yield to the gentleman from Illinois.

Mr. McCLORY. Mr. Speaker, on a very closely related subject, I note in the recent task force report with regard to its recommendations to meet the challenge of crime that the Governor of Illinois, Governor Thompson, and the former Attorney General of the United States, Griffin Bell, who are the cochairmen of this task force, are going to be invited, together with the current Attorney General, Attorney General Smith, to appear before the gentleman's Subcommittee on Crime and testify with regard to the recommendations of the task force, and it is my understanding that hearing will take place on November 4.

Mr. HUGHES. Mr. Speaker, the gentleman is correct, that hearing will be held on November 4, and we do expect to have both Griffin Bell and Governor Thompson, as well as the Attorney General, testify on that subject.

Mr. McCLORY. Mr. Speaker, if the gentleman will yield further, I want to commend the gentleman on setting that subject for hearing, and I hope that there will be appropriate attention given to the service of the subcommittee in directing attention to these task force recommendations, which I think are extremely constructive as setting forth national policy and delineating an appropriate national or Federal role with regard to the overall subject of crime.

We do know that crime is basically a problem that we have to deal with at the State and local levels, but at the same time it seems to me—and I know that the gentleman agrees with me—that there must be Federal direction, there must be Federal guidance, there must be Federal support, and there must be Federal cooperation with the local and State law enforcement agencies. This legislation that we are considering today is consistent with that principle, and I know that the hearing that the subcommittee is going to have on November 4 will provide a broad format or a broad pattern of how the Federal Government can involve itself more actively and more constructively in trying to meet the challenges of crime in America.

Mr. Speaker, I want to commend the gentleman for setting that subject for hearing.

Mr. HUGHES. Mr. Speaker, I thank my colleague, the gentleman from Illinois (Mr. McCLORY), for that statement and for his words of encouragement. I think that there is no more important subject to the American people than the question of crime in America. Crime is a national problem that requires national leadership.

The people of our Nation are willing to spend more money, not less, in combating crime, and the Federal Government has an important role to play in working with State and local and county law enforcement agencies in trying to combat crime. Of course, this legislation fits right in with that particular overall crime package because H.R. 3963 is indeed an anticrime bill.

Mr. Speaker, anything we can do to identify those who are committing crime and to try to encourage them to move into programs that will reduce crime has to be an important initiative.

Mr. McCLORY. Mr. Speaker, I have no further requests for time, and I yield myself the balance of my time.

(By unanimous consent, Mr. McCLORY was allowed to speak out of order.)

CONGRATULATIONS TO MADELYN REISS ON BIRTH OF A DAUGHTER

Mr. McCLORY. Mr. Speaker, I have noticed here in the House Chamber today that several of the Congressional Record clerks are wearing white boutonnieres. I understand that that is in recognition of the fact that one of our distinguished employees of the House, Madelyn Reiss, a Congressional Record clerk, gave birth on Saturday to a baby girl, Teresa Jane.

I just wanted to call attention to the fact that that is the happy reason for the boutonnieres. I know we all extend our very best wishes for good health and congratulations to Madelyn, and I am sure that all the Members would wish me to extend those sentiments to her.

The SPEAKER pro tempore. The Chair thanks the gentleman from Illinois (Mr. McCLORY) for those remarks, and the gentleman's remarks on behalf of Madelyn Reiss will be included in the RECORD.

Mr. HUGHES. Mr. Speaker, if the gentleman will yield, I just want to add that I also noticed all the flowers this morning, and I learned that Madelyn Reiss has in fact delivered a baby girl. I thought at first an employee at the front desk got married, which would have been a singular event also.

I, too, would like to join in offering my sincerest congratulations to Madelyn Reiss.

● Mr. RODINO. Mr. Speaker, I support H.R. 3963, the Contract Services for Drug Dependent Federal Offenders Act Amendment of 1981. This bill reauthorizes for 3 years a small program that has powerful effects. That program has one primary purpose: To break the drug addiction and crime connection. The evidence is clear that heroin addicts commit thousands, indeed, tens of thousands, of crimes. Of course on the streets of Newark, and every large city, the police have been aware of the drug addiction and crime connection for many years.

What we have learned is that drug abuse can be treated. Persons who are addicted to heroin can be cured of the habit. A recent study has shown that a heroin addict after treatment on the average commits 84 percent less crime. That is a tremendously important improvement.

This program has the strong support of judges. They are able to have much better control of persons sentenced to probation and parole through the urinalysis screening. The bill has been recommended by the Judicial Conference of the United States.

I urge my colleagues to vote for this bill to continue a relatively inexpensive program that helps fight crime in our Nation's cities.●

Mr. McCLORY. Mr. Speaker, I yield back the balance of my time.

Mr. HUGHES. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from New Jersey (Mr. HUGHES) that the House suspend the rules and pass the bill, H.R. 3963, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended, and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. HUGHES. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks, and to include extraneous material on the bill just passed.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from New Jersey?

There was no objection.

THE REGULATORY CONTROL ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Mississippi (Mr. LOTT) is recognized for 15 minutes.

● Mr. LOTT. Mr. Speaker, today I am introducing a revised version of the Regulatory Control Act of 1981 which I first introduced as H.R. 3740 on June 1, 1981. This legislation was offered then, and is reoffered now, as a good faith effort to find some middle ground between the popular Levitas legislative veto bill for Federal regulations and the administration's opposition to such legislation on constitutional grounds.

As my colleagues are aware, the Levitas bill, H.R. 1776, would permit one or both Houses to disapprove proposed or existing Federal regulations. The administration has testified that it would accept nothing less than a joint resolution of disapproval, requiring Presidential signature, for execu-

tive agency regulations, but could accept a concurrent resolution of disapproval for regulations of selected independent regulatory agencies. The House Judiciary subcommittee, on the other hand, has reported a regulatory reform bill which includes a provision for disapproval of all major regulations by joint resolution only.

Mr. Speaker, H.R. 3740, as originally introduced, provides for disapproval of independent agency regulations by concurrent resolution, and the same disapproval approach would apply to those executive agency regulations which a committee finds to be contrary to law or congressional intent. Executive agency regulations which a committee finds objectionable for other reasons would be subject to enactment of a joint resolution of disapproval, as would any existing regulation which either House forces an agency to reconsider and repromulgate.

H.R. 3740 would also permit executive agencies to appeal a disapproval action taken by concurrent resolution to the courts, and permit the court to allow the rule to take effect anyway on a finding that it is consistent with the statute, and that the agency has no alternative means of implementing or enforcing the statute.

These central features of H.R. 3740 are retained in the revised bill which I am introducing today. However, I have made several procedural changes in the original bill. First, I have eliminated section 2 of H.R. 3740 which would have made certain changes in section 553 of the Administrative Procedure Act. Second, I have extended coverage of the legislative veto provisions to nearly all regulations of general applicability, as opposed to just "major" and "significant" regulations as defined in H.R. 3740. Third, I have extended the initial congressional review period for regulations from 30 days to 60 days. If either House adopts a disapproval resolution within that period, the review period would be extended to 90 days from the date of submission of the regulation. A rule could take effect sooner if either House rejects a resolution of disapproval or if a committee fails to undertake a review of a rule within 30 days after its submission.

Fourth, and perhaps most important, I have added what I call a front-end discharge procedure for disapproval resolutions in the first House to act. Under my original bill, no special discharge procedure was provided if a committee did not report a disapproval resolution within a specified period, as the Levitas bill would provide. However, a discharge motion would be in order in the second House to act, if a committee has not reported the resolution within 15 days after its referral from the first House, and if that motion is supported by one-fifth of the membership of the House involved.

Under my new discharge proposal, if one-fifth of the Members of the House involved sponsor or cosponsor an appropriate disapproval resolution within 25 days after submission of the regulation, a committee would be required to announce and undertake a review of the rule, and report a disapproval resolution with its recomendations not later than 45 days after submission of the rule. If it does not report within 45 days, the committee would automatically be discharged of the first such resolution referred to it. This special discharge procedure, however, would not apply to concurrent resolutions for executive agency regulations, since such resolutions must be accompanied by a committee finding that the rule is contrary to law or congressional intent. In the second House to act, discharge would be automatic 15 days after referral of the resolution if a committee has not reported.

It seems to me this discharge mechanism is best designed to both permit a committee time to review and report on a regulation about which there is substantial interest, while at the same time insuring that a disapproval resolution cannot be bottled up in a committee when there is substantial objection to it. But the important thing, it seems to me, is that the House involved have the benefit of a committee report on any regulation proposed to be disapproved so that we can act in an informed manner.

A committee could also obviously undertake a review of a rule on its own initiative, but, if it formally announces such a review to the Speaker and in the CONGRESSIONAL RECORD within 28 days after submission of the rule, it would again be required to report a resolution of disapproval, and it would be automatically discharged of such a resolution if it did not report within 45 days after submission of the rule.

Finally, I have eliminated the provision of H.R. 3740 which would have tied agency review of major existing rules every 10 years with the ability of either House to adopt a resolution for reconsideration of any other existing rule—both of which would have forced an agency to repromulgate the existing rule and thus subject it to possible disapproval by joint resolution. Under my revised bill, the joint resolution disapproval mechanism would only apply to those existing rules which Congress forces an agency to repromulgate. Any existing rule which an agency decides to modify or repeal on its own initiative would be treated as a new rule under the disapproval mechanisms which apply to new rules.

Mr. Speaker, I think this revised bill does meet the administration halfway while doing the same with respect to the Levitas bill. I expect this issue will come to the House in the form of an amendment to whatever regulatory reform bill is finally reported from the House Judiciary Committee. It is important that this be viewed as one component in an overall regulatory reform strategy, and not as a panacea for our regulatory problems. But I do think it is important that Congress reclaim its prerogatives over the legislative powers we have delegated to agencies through the rulemaking process. As elected representatives of the people, we should be held ultimately accountable for the laws we pass, including the regulations issued to carry them out.

At this point in the RECORD, Mr. Speaker, I include a brief summary of my revised Regulatory Control Act.

H.R. 4838—BRIEF SUMMARY OF REVISED REGULATORY CONTROL ACT BY HON. TRENT LOTT

(1) *Coverage.*—The congressional review procedures would apply to all proposed and existing rules of general applicability (with exceptions specified);

(2) *Submission and referral.*—Proposed final rules would be submitted to Congress on the same day as publication in the Federal Register, and would be referred to one committee in each House having jurisdiction over the statute or agency under which the rule is promulgated.

(3) *Time limits.*—No rule could become effective for 60-days of continuous session of Congress after submitted, and the review period would be extended to 90-days if either House adopts an appropriate resolution of disapproval within the 60-days period. A rule could become effective sooner if no committee announces its intention to review the rule within 30-days after its submission, or if either House rejects an appropriate resolution of disapproval.

(4) *Forms of disapproval.*—An appropriate resolution of disapproval would be: (a) a concurrent resolution for any proposed Executive agency rule which a committee determines is contrary to law or congressional intent; (b) a joint resolution for any Executive agency rule which a committee determines should be disapproved for any other reason; (c) a concurrent resolution for any proposed independent regulatory agency rule which a committee determines should be disapproved; and (d) a joint resolution for any existing rule which is repromulgated pursuant to the adoption by either House of a resolution for reconsideration. A rule could not become effective if an appropriate resolution is adopted by both Houses, or enacted, as the case may be, within the specified time period.

(5) *Special discharge procedures.*—If one-fifth of the membership of the House involved sponsors or cosponsors an appropriate resolution with respect to a proposed rule within 25-days after its submission, a committee would be required to review the rule and report the resolution within 45-days after the rule's submission (except this special discharge procedure would not apply to concurrent resolutions disapproving Executive agency rules). Discharge would be automatic if a committee has not reported after 45-days. In the second House to act, discharge would be automatic if a committee has not reported the resolution adopted by the first House within 15-days after its referral.

If a committee determines to review a rule on its own initiative, and so announces to the Speaker and in the Congressional Record within 28-days after submission of the rule, it would be required to report an appropriate resolution within 45-days after the rule's submission, and would be discharged if it does not.

(6) *Floor consideration.*—Once an appropriate resolution is reported or discharged, it would be highly privileged, subject to two-hours of debate divided between proponents and opponents, and not subject to amendment or a motion to recommit.

(7) *Reconsideration of existing rules.*—Either House may adopt a simple resolution for reconsideration of any existing rule in effect for at least two years if such resolution is properly reported from committee. With respect to any rule for which a resolution for reconsideration has been adopted, an agency would be required to review the rule and either renew, modify or repeal it. Any such action would be subject to the congressional review process of the Act and possible disapproval by enactment of a joint resolution.

(8) *Court appeal.*—All proposed Executive (as opposed to independent) agency rules which are disapproved by adoption of a concurrent resolution can be put into effect if an agency appeals the action in the Federal District Court for the District of Columbia and the court finds the rule is consistent with the statute and the agency has no alternative means of implementing or enforcing the statute.

(9) *Miscellaneous.*—

An agency may not promulgate a new rule substantially the same as a rule which has been disapproved, but may incorporate the relevant portions of the rulemaking record for the disapproved rule into that for the new rule;

Disapproval of a rule shall not relieve agencies from responsibility to adopt a rule, but time limits would begin again from date of disapproval;

Congressional inaction or rejection of a disapproval resolution shall not be deemed approval for judicial review purposes;

Invalidation of any portion of the Act shall not invalidate the remainder of the Act;

The new rulemaking review procedures shall supersede existing ones;

The Act shall take effect at the beginning of the 98th Congress and expire at the end of the 100th Congress;

Any rulemaking review procedures shall resume their effectiveness if the provisions of this Act cease to be effective.●

HOW THE REAGAN PROGRAM SHIFTS INCOME DISTRIBUTION TOWARD THE RICH

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Wisconsin (Mr. REUSS) is recognized for 10 minutes.

● Mr. REUSS. Mr. Speaker, here follows my article in the current September-October issue of Challenge:

INEQUALITY, HERE WE COME

(By Representative HENRY S. REUSS)

We all seem to be mesmerized by the big macroeconomic spectacular now on stage. Yet there is an issue at stake vastly more important than current budget or tax or monetary differences. That issue is the American ideal of equality, as old as Thomas Jefferson and the Declaration of Independence.

The goal of equality is something we Americans have been groping for these two hundred years, with most of our progress in the last fifty. Greater political equality came as we removed property qualifications for voting in the first half of the nineteenth century, and as more recently we enacted voting rights laws, extended the vote to women and eighteen-year-olds, and adopted the principle of one-person-one-vote in our legislative apportionments.

Social equality was enhanced with the diminution of discrimination on the grounds of race and sex in employment, public accommodation, education, housing. Our society, for all its faults, is vastly more tolerant today than it was fifty years ago.

But it is economic equality—not absolute equality of income and wealth, but the avoidance of extremes—that is most endangered today.

1929–67: FOUR OUT OF FIVE IMPROVE THEIR SHARE

The Great Depression fifty years ago was a turning point in American economic life. Since then there has been a steady upward surge in the gross national product—a larger pie to slice. And, just as important, from 1929 to 1967, income distribution grew more equitable (Table 1). Income shares of the lower four-fifths of American households went up during that period: the first two-fifths from 12.5 percent of total income to 14.2 percent; the third from 13.9 percent to 17.5 percent; the fourth from 19.3 percent to 24.8 percent. The top one-fifth declined, from 54.4 percent to 43.4 percent.

TABLE 1.—INCOME DISTRIBUTION BY HOUSEHOLDS, 1929–78

[Percent distribution of aggregate income]

Year	Lowest 5th	Second 5th	Third 5th	Fourth 5th	Highest 5th
1929	12.5		13.8	19.3	54.4
1935–36	4.1	9.2	14.1	20.9	51.7
1941	4.1	9.5	15.3	22.3	48.8
1947	5.0	11.0	16.0	22.0	46.0
1947	3.5	10.6	16.8	23.6	45.5
1952	3.5	10.9	17.3	24.1	44.3
1957	3.4	10.9	18.0	24.7	42.9
1962	3.4	10.4	17.5	24.8	43.9
1967	3.6	10.6	17.5	24.8	43.4
1972	3.7	10.0	16.9	24.7	44.8
1977	3.8	9.7	16.5	24.9	45.2
1978	3.8	9.7	16.4	24.8	45.2

Note.—1929–47 data, based on "Historical Statistics of the U.S.," part 1, Series G319–G324, p. 301, not easily comparable with 1947–78 data, (based on "Current Population Report" Bureau of Census, series P–60, No. 123, June 1980, table 13, p. 62) due to different methodology.

Today, the income brackets of these five groups are:

Lowest: $0—7,000;
Second: $7,000—13,500;
Third: $13,500—21,500;
Fourth: $21,500—32,000;
Fifth: over $32,000.

Why did the size of the pie, and the shares of the bottom 80 percent, both improve so markedly between 1929 and 1967? Certainly the expansionist policies of John Maynard Keynes, the progressive income tax, and low interest rates had something to do with it. In addition, an enlarged middle class provided the savings and investment needed for growth more effectively than a "bloated plutocracy" would have done.

As a result of steady growth and improved distribution, the United States managed to hold together during depression and war. Progress toward economic equality went hand in hand with progress toward political and social equality.

SINCE 1967: BACK TOWARD INEQUALITY

Then, along about 1967, something happened. That something was the Vietnam War, and the guns-plus-butter economic policy which led to the dozen years of stagflation—unacceptable unemployment and inflation—that have been with us ever since. Though the economy continued to grow, the distribution of income went into reverse from its egalitarian trend of almost forty years, and headed back toward greater inequality.

From 1967 to 1978, the most recent year for which we have statistics, the share in the national income earned by the poorest 20 percent of American households remained about even—3.6 percent to 3.8 percent. This static share is improved slightly by non-cash transfer payments (such as food stamps and Medicaid) which are not counted by the Census Bureau in its income distribution statistics.

But the second and third fifths found the going really tough, and their income shares declined from 28.1 percent to 26.1 percent. The fourth one-fifth stayed even at 24.8 percent. And the top fifth, recouping some of its earlier losses, rose from 43.4 percent to 45.2 percent. If the Census Bureau had included such upper-bracket sources of income as capital gains and executive "perks," the top 20 percent's share would have been even larger.

A shift of 2 percentage points from the lower middle class to the top brackets isn't peanuts. In a $3 trillion economy, it amounts to scores of billions of dollars a year. For example, if the second and middle fifths had received their historic peak income shares in 1978, their average household income would have been around $1,300 more.

What caused this shift during the 1970s? For one thing, wages of below-$20,000 workers lagged behind inflation. And the institutions were rigged against the lower middle class. They benefited neither from the transfer payments of the poor nor the tax loopholes of the rich. Because by and large they were not able to take advantage of itemized income tax deductions, they did not share such privileges of the affluent as the deduction for interest payments on the mortgage or for contributions to charity. Interest on savings accounts or U.S. Savings Bonds was fixed by law at a miserable 5 percent, while large savers got the market rate.

While Census statistics end in 1978, the relative position of the second and third fifths has probably become even worse in the last three years. Since 1978, consumer prices have increased by over 26 percent, average weekly earnings by only 15 percent. For the affluent, "unearned income" provided a much better buffer. Dividend income increased by 26.2 percent between 1978 and 1980, interest income by 48 percent. These two items, nearly 14 percent of personal income, are significantly more concentrated in the upper income brackets than is wage income. Executive compensation in profit-making corporations increased by 17.5 percent in 1978, 16.8 percent in 1979, and 17.3 percent in 1980. To this must be added increased "perks" in the form of entertainment allowances, club dues, company cars, legal and financial counseling, stock options, insurance, and so on.

TODAY AND TOMORROW

Our backsliding since 1967 is particularly unwelcome when you compare income distribution in the United States with income distribution in the other industrialized de-

mocracies. A study made by the Organization for Economic Cooperation and Development (OECD) in 1976 found that, both before and after taxes, the United States had the second greatest degree of inequality of the seven leading industrialized democracies (Table 2). By and large, the United States was exceeded in its inequality only by France. West Germany, Canada, Sweden, the United Kingdom, and Japan were all more nearly equal than we. More, the United States had the dubious distinction of having its poorest 20 percent with a lower share of total before-tax income than any other country, including France.

Incidently, it will be noted that France is endeavoring to get out of its cellar position in the international league, as evidenced by the recent election of the more egalitarian Mitterrand government.

It is we, the United States, who are now heading for the cellar position in the league.

We shall shortly be shaken by the volcanic disturbances in income distribution which the Reagan Economic Recovery Program seems destined to bring about. Every aspect of that program—its cuts in social spending, its increases in military spending, its hail-to-the-rich tax policy, its high-interest-rate monetary policy—will have the effect of further transferring income shares from the bottom three-fifths of Americans to the wealthiest 10 percent.

TABLE 2.—INCOME DISTRIBUTION IN 7 MAJOR COUNTRIES

Country	Year	Ranking by degree of overall inequality of income distribution				Income shares			
		Before taxes		After taxes		Top 20 percent		Bottom 20 percent	
		Measure I [1]	Measure II [1]	Measure I [1]	Measure I [1]	Before taxes	After taxes	Before taxes	After taxes
France	1970	1	3	1	1	47.0	46.9	4.3	4.3
United States	1972	2	1	3	2	44.8	42.9	3.8	4.5
West Germany	1973	3	4	2	4	46.8	46.1	5.9	6.5
Canada	1969	4	2	4	3	43.3	41.0	4.3	5.0
Sweden	1972	5	6	7	5	40.5	37.0	6.0	6.6
United Kingdom	1973	6	5	5	5	40.3	38.7	5.4	6.3
Japan	1969	7	7	6	7	42.5	41.0	7.6	7.9

[1] The measures are summary statistics indicating the extent to which the distributions of income differ from a state of complete equality: Measure I is the Gini coefficient; measure II is the variance of logarithms.
Source: Malcolm Sawyer, Income Distribution in OECD Countries, July 1976, OECD, Paris. Compiled from tables 3, 4, 5, 6, pp. 14, 16, 17

Reaganomics works this way not just in practice. That's its purpose. In the words of its chief theologian, George Gilder: "Forget the idea of overcoming inequality by redistribution. . . . A successful economy depends on the proliferation of the rich. . . . It will be said that their earnings are 'unearned' and 'undeserved'. But in fact . . . they are the heroes of economic life, and those who begrudge them their rewards demonstrate a failure to understand their role and their promise."

Here's how the four pillars of Reaganomics will worsen income distribution:

1. *Social spending cuts.* Sharply cut under the Reagan budget are all the traditional programs for the poor, the lowest one-fifth of income receivers—Medicaid, food stamps, school lunches, housing, energy assistance, legal services, pneumonia immunization, neighborhood programs, compensatory education, day care, public service jobs.

"I made strenuous efforts to comb through the budget to find rich oxen to gore, but I didn't find many," Budget Director David Stockman told the Joint Economic Committee in February. He did, however, find a number of "middle-class oxen" to gore. Among slashes of particular interest to middle-income groups are passenger rail service, mass transit, energy conservation, student loans, economic aid, public television and radio, the arts and humanities, unemployment compensation, clean air, and clean water.

2. *Military spending increases.* The Reagan program includes the fastest increase in military spending in our peacetime history. This will worsen the position of modest-income groups in three ways—in its effects on regions, on the composition of employment, and by increasing inflation.

Regionally, military activity is concentrated in a few areas, particularly the South and West. Residents of other regions will be disadvantaged. Defense industries tend to be capital-intensive, and to employ relatively larger proportions of high-skilled white-collar workers. Thus a larger share of expenditures goes to upper-income groups in the case of the military than for other kinds of government spending.

Finally, military spending is particularly inflationary. For one thing, it has its greatest impact on just those areas of the economy where skilled manpower and materials are scarcest. For another, military spending, unlike the production of civilian goods, creates no purchasable commodity to satisfy the money demand of the workers and entrepreneurs who make the military goods.

3. *Tax policy.* Tax policy resulting from the Reagan program will work against the lower 60 percent of families in at least three ways.

First, the August, 1981 tax cut, a variant of Kemp-Roth festooned with new preferences for the already affluent, is of great help to the rich, in George Gilder's phrase the "heroes of economic life." Under Kemp-Roth, a family with income of $150,000 in 1980 will find that its marginal rate drops from 64 to 49 percent by 1984 The cut in the top rate on unearned income from 70 to 50 percent will also help, as among other things it brings the maximum tax rate on capital gains down to 20 percent. That's a lower rate than a family earning $15,000 a year pays on wages.

But for moderate-income taxpayers, no appreciable tax cut is in sight. The administration proposes no change in the levels of the standard deduction, personal exemptions, and earned income credit. The effect of inflation-induced bracket creep and the scheduled increases in social security payroll taxes will largely cancel out the benefits of Kemp-Roth rate reduction.

For example, families with taxable incomes of $15,000–$35,000 in 1980 will face about the same marginal tax rates in 1984, after three years of Kemp-Roth, as they do now. Let us use the administration's projections for inflation: the effects of that inflation will be to push these families into higher tax brackets, which will just be offset by the proposed cuts in rates. At the same time, however, the Social Security tax rate will have jumped from 6.13 to 6.7 percent between 1980 and 1984, while the taxable wage base, now $29,700, will have risen at about the same pace as these families' earnings.

The rich, on the other hand, don't have to worry about bracket creep. The top brackets are wide, and above taxable incomes of $45,000 (joint returns), there is simply no higher bracket to creep into. Earnings at these levels are also well above the Social Security wage base.

A second tax effect of Reaganomics involves the shift of former federal social programs to state and local governments. Such shifting of the burden from the progressive federal income tax to regressive state and local property and sales taxes will worsen the position of lower- and middle-income families.

Finally, the administration has set its face against reducing any of the $175 billion of tax expenditures now in the federal tax code, and was willing to create a few new loopholes to get its tax bill through the Congress. Most of the benefits of these loopholes and preferences go to high-income taxpayers. Perpetuating the loopholes thus ensures that income distribution will continue to deteriorate in the years ahead.

4. *Monetary policy.* Super-tight money, the fourth pillar of the Reagan economic program, fosters income inequality as surely as the spending and tax proposals. By slowing growth, tight money and high interest rates bring unemployment, and this falls with particular severity on low- and moderate-income families.

High interest rates transfer income even more directly. Poor people lack creditworthiness, but middle-income people borrow heavily for home mortgages, consumer goods, health, and education. Because it does not pay for most moderate-income taxpayers to itemize their deductions, they lack the ability of high-bracket borrowers to make the Treasury pick up half of their interest burden.

Just as the middle-income groups do most of the borrowing, so upper-income groups, having it to lend, do most of the lending. The higher the interest rate, therefore, the greater the transfer from middle-income groups to the upper-income groups. And if there is one thing the money markets are projecting with awful clarity, it is that high interest rates are going to be a permanent distinctive feature of Reaganomics.

AMERICANS WON'T LIKE IT

So there is the past, the present, and the future, (except to the extent that we do something about it) of income distribution. In the golden age of FDR and Harry Truman, of IKE and JFK, we moved forward in the direction of greater equality.

But since 1967, we've been moving backward. As Reaganomics has its way, we shall shortly be moving backward faster.

Americans, when they find out what is happening, won't like it. From an economic standpoint, Reaganomics will shift income away from the average citizen and toward those at the top so massively as to choke off the demand necessary to buy from the market what our economy can produce. The result is bound to be increased unemployment.

Growth by itself—the advertised goal of Reaganomics—doesn't necessarily make for a good distribution of income. But more nearly equal distribution can help to strengthen growth, as the sparkling performance of Japan demonstrates.

From a social standpoint, when whole classes feel themselves endangered, bloodshed and revolution have been the outcome, as in France in the 1790s and Germany in the 1930s.

Were the American people last November really voting to abandon the dream of making America a more egalitarian society? Perhaps we need a new referendum. ●

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

(The following Members (at the request of Mr. MCCLORY) to revise and extend their remarks and include extraneous material:)

Mr. LOTT, for 15 minutes, today.

Mrs. HECKLER, for 10 minutes, today.

(The following Members (at the request of Mr. HUGHES) to revise and extend their remarks and include extraneous material:)

Mr. REUSS, for 10 minutes, today.

Mr. GONZALEZ, for 15 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

(The following Members (at the request of Mr. MCCLORY) and to include extraneous matter:)

Mr. LEBOUTILLIER.

Mr. DANNEMEYER.

Mr. MICHEL in two instances.

Mr. RUDD in two instances.

Mr. PRITCHARD in two instances.

Mr. WOLF.

(The following Members (at the request of Mr. HUGHES) and to include extraneous matter:)

Mr. MOFFETT.

Mr. GAYDOS.

Mr. KOGOVSEK.

Mr. FLORIO.

Mr. BEDELL.

Mr. ANDERSON in 10 instances.

Mr. GONZALEZ in 10 instances.

Mr. FUQUA.

Mr. BROWN of California in 10 instances.

Mr. ANNUNZIO in six instances.

Mr. JONES of Tennessee in 10 instances.

Mr. BONER of Tennessee in five instances.

Mr. SOLARZ.

Mr. DE LUGO.

Mr. HUGHES.

BILL AND RESOLUTION PRESENTED TO THE PRESIDENT

Mr. HAWKINS, from the Committee on House Administration, reported that that committee did on October 22, 1981, present to the President, for his approval, a bill and a joint resolution of the House of the following title:

H.R. 3499. An act to amend title 38, United States Code, to extend the period for Vietnam-era veterans to request counseling under the veterans' readjustment counseling program, to provide medical care eligibility for veterans exposed to herbicides or defoliants (including agent orange), or to nuclear radiation, to establish a minimum total number of operating beds in Veterans' Administration hospital and nursing home facilities, to extend for certain Vietnam-era veterans the period of time in which GI bill educational assistance benefits may be used for the pursuit of certain training, to provide a small business loan program for Vietnam-era and disabled veterans, and to extend the authority for veterans readjustment appointments in the civil service; and for other purposes.

H.J. Res. 268. Joint resolution to designate October 23, 1981, as "Hungarian Freedom Fighters Day."

ADJOURNMENT

Mr. HUGHES. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 12 o'clock and 55 minutes p.m.) the House adjourned until tomorrow, Tuesday, October 27, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

2391. A letter from the Deputy Secretary of Defense, transmitting notice that he has exercised his authority to increase the authorized number of civilian personnel for the Defense Department for fiscal year 1981, pursuant to section 501(d) of Public Law 96-342; to the Committee on Armed Services.

2392. A letter from the Deputy Assistant Secretary of Defense (Facilities, Environment, and Economic Adjustment), transmitting notice of the location, nature, and estimated cost of two construction projects proposed to be undertaken by the Army National Guard, pursuant to 10 U.S.C. 2233a(1); to the Committee on Armed Services.

2393. A letter from the Assistant Secretary of the Army (Installations, Logistics and Financial Management), transmitting notice of the proposed conversion to contractor performance of the custodial services activity at Madigan Army Medical Center, Tacoma, Wash., pursuant to section 502(b) of Public Law 96-342; to the Committee on Armed Services.

2394. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Air Force's proposed sale of certain defense equipment and services to Pakistan (Transmittal No. 81-108), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2395. A letter from the Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment and services to Sudan (Transmittal No. 81-110), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

2396. A letter from the Director, Federal Emergency Management Agency, transmitting a report that the agency made no property acquisitions of emergency supplies and equipment during the quarter ended September 30, 1981, pursuant to section 201(h) of the Federal Civil Defense Act of 1950; to the Committee on Armed Services.

2397. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-94, "To conform, on a temporary basis, District of Columbia laws and regulations to certain federal laws and regulations governing the Aid to Families with Dependent Children program," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2398. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-95, "To order the closing of a public alley abutting lots 55, 840, and 841 in Square 516, bounded by 4th Street, NW., K Street, NW., 5th Street, NW., and I Street, NW. (S.O. 81-107) (Ward 2)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2399. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-96, "To amend the ceiling on life insurance on the lives of members of credit unions," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2400. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-97, "To designate the name of the recreational area in lot 810, in Square 2547, which is located at the intersection of Adams Mill Road, NW., and Ontario Place, NW., as Community Park West (Ward 1)," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2401. A letter from the Chairman, Council of the District of Columbia, transmitting D.C. Act 4-98, "To create a criminal offense for certain activities done for the purpose of encouraging prostitution or encouraging the sale of controlled substances in a public place," pursuant to section 602(c) of Public Law 93-198; to the Committee on the District of Columbia.

2402. A letter from the Acting Director, Federal Mediation and Conciliation Service, transmitting the 33d annual report of the Service, covering fiscal year 1980, pursuant to section 202(c) of the act of June 27, 1947; to the Committee on Education and Labor.

2403. A letter from the Administrator, Energy Information Administration, Department of Energy, transmitting reports on changes in market shares of refined petroleum products and retail gasoline covering the month of July 1981, pursuant to section 4(c)(2)(A) of the Emergency Petroleum Al-

location Act of 1973; to the Committee on Energy and Commerce.

2404. A letter from the Secretary, Interstate Commerce Commission, transmitting notice of the commission's inability to render a final decision in Docket No. 38676, "Changes in Routing Provisions—Conrail—July 1981," within the initially specified 5-month period, pursuant to 49 U.S.C. 10707(b)(1); to the Committee on Energy and Commerce.

2405. A letter from the Administrator, Agency for International Development, transmitting the annual report on military expenditures by recipients of U.S. economic assistance, pursuant to section 620(s) of the Foreign Assistance Act of 1961, as amended; to the Committee on Foreign Affairs.

2406. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense equipment to Japan (Transmittal No. 81-107), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2407. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to Pakistan (Transmittal No. 81-108), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2408. A letter from the Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment and services to Sudan (Transmittal No. 81-110), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

2409. A letter from the Assistant Secretary of State for Congressional Relations, transmitting the Annual Report of the Foreign Service Retirement and Disability System, covering the year ended September 30, 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2410. A letter from the Deputy Chief of Staff for Installations and Logistics, Department of the Navy, transmitting the Annual Report of the Retirement Plan for Civilian Employees of the U.S. Marine Corps Exchanges, Recreation Funds, Clubs, Messes, and the Marine Corps Exchange Service, covering calendar year 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2411. A letter from the Chairman, Retirement Trust, Navy Resale and Services Support Office, transmitting the Annual Report of the Trust, covering calendar year 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2412. A letter from the Chief, Insurance and Debt Management, Executive Secretariat, Air Force Welfare Board, transmitting the Annual Report of the Air Force Nonappropriated Fund Retirement Plan for Civilian Employees, covering the year ended December 31, 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2413. A letter from the Chief Judge, U.S. Tax Court, transmitting the Annual Report of the U.S. Tax Court Judges' Retirement and Survivor Annuity Plans, covering the year ending December 31, 1980, pursuant to section 121(a)(2) of the Budget and Accounting Procedures Act of 1950, as amended; to the Committee on Government Operations.

2414. A letter from the Deputy Assistant Secretary of the Interior for Indian Affairs, transmitting a proposed plan for the use and distribution of the judgment funds awarded in Docket No. 22-G before the U.S. Court of Claims to the Mescalero Apache Tribe of the Mescalero Reservation, pursuant to sections 2(a) and 4 of Public Law 93-134; to the Committee on Interior and Insular Affairs.

2415. A letter from the National Adjutant, Disabled American Veterans, transmitting the proceedings of their 1981 national convention and an independent audit report as of December 31, 1980, pursuant to section 9(a) of the act of June 17, 1932, and section 3 of Public Law 88-504; to the Committee on Veterans' Affairs and ordered to be printed.

2416. A letter from the Secretary of Energy, transmitting a report that the administration does not consider it advisable to develop a plan for energy self-sufficiency initiatives, required by section 406(d) of Public Law 96-294; jointly, to the Committees on Energy and Commerce and Science and Technology.

2417. A letter from the Acting Comptroller General of the United States, transmitting a report on medicaid's quality control system (HRD-82-6, October 23, 1981); jointly, to the Committees on Government Operations and Energy and Commerce.

2418. A letter from the Comptroller General of the United States, transmitting a report on repayment requirements for water resources projects (CED-82-3, October 22, 1981); jointly, to the Committees on Government Operations, Interior and Insular Affairs, and Public Works and Transportation.

2419. A letter from the Chairman, U.S. Nuclear Regulatory Commission, transmitting a report covering the second quarter of calendar year 1981 on abnormal occurrences at licensed nuclear facilities, pursuant to section 208 of Public Law 93-438; jointly, to the Committees on Interior and Insular Affairs and Energy and Commerce.

REPORTS OF COMMITTEES ON PUBLIC BILLS AND RESOLUTIONS

Under clause 2 of rule XIII, reports of committees were delivered to the Clerk for printing and reference to the proper calendar, as follows:

Mr. HUGHES: Committee on the Judiciary. H.R. 4481. A bill to amend the Omnibus Crime Control and Safe Streets Act of 1968, and for other purposes; with an amendment (Rept. No. 97-293). Referred to the Committee of the Whole House on the State of the Union.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. LEATH of Texas:

H.R. 4837. A bill to rescind the requirement that the superintendent of a cemetery under the jurisdiction of the Secretary of the Army be a disabled veteran; to the Committee on Veterans' Affairs.

By Mr. LOTT:

H.R. 4838. A bill to amend title 5, United States Code, relating to rulemaking proceedings, and to provide for congressional review of agency rulemaking; jointly, to the Committees on the Judiciary and Rules.

By Mr. VANDER JAGT:

H.J. Res. 348. Joint resolution to provide for the awarding of a special gold medal to Her Majesty Queen Beatrix in recognition of the 1982 Bicentennial anniversary of diplomatic and trade relations between the Netherlands and the United States; to the Committee on Banking, Finance and Urban Affairs.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 3091: Mr. LOWERY of California.

H.R. 4146: Mr. SMITH of Pennsylvania, Mr. WEAVER, Ms. MIKULSKI, Mr. WIRTH, Mr. JEFFORDS, Mr. FAZIO, and Mr. BEDELL.

H.R. 4481: Mr. GUARINI, Mr. VENTO, Mr. BOLAND, Mr. PRITCHARD, Mr. MATSUI, Mr. AUCOIN, Mr. DANIELSON, Mr. ZEFERETTI, Mr. DYSON, Mr. PATTERSON, Mr. FORSYTHE, Mr. MADIGAN, Mr. DUNCAN, Mr. MICA, Mr. MOTTL, Mr. LONG of Maryland, Mr. HEFNER, Mr. DWYER, Mr. DICKS, Mr. FAUNTROY, and Mr. RANGEL.

H.R. 4775: Mr. DIXON, Mr. MITCHELL of Maryland, Mr. SUNIA, Mr. WORTLEY, and Mr. YATES.

PETITIONS, ETC.

Under clause 1 of rule XXII,

248. The SPEAKER presented a petition of Jerry M. Ault, Wabash, Ind., relative to interest rates and the Federal deficit; which was referred to the Committee on Banking, Finance and Urban Affairs.

SENATE—*Monday, October 26, 1981*

(Legislative day of Wednesday, October 14, 1981)

The Senate met at 10 a.m., on the expiration of the recess, and was called to order by the Honorable MACK MATTINGLY, a Senator from the State of Georgia.

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., D.D., offered the following prayer:

Let us pray.

O Praise the Lord, all ye nations;
Praise Him, all ye people.
For His mercy is great toward us;
And the truth of the Lord endureth forever.
Praise ye, the Lord.—Psalms 117.

It is a good thing to give thanks unto the Lord, and to sing praises unto Thy name, O Most High;
To declare Thy loving kindness in the morning, and Thy faithfulness every night.—Psalms 92: 1, 2.

We thank Thee, Lord for the refreshing of the weekend, for the privilege of worship, for the opportunity to be with our families, for rest, recreation, and renewal.

We thank Thee for health and strength to do the work to which we have been called and we pray we may do it according to Thy will and for Thy glory. In Jesus' name. Amen.

APPOINTMENT OF ACTING PRESIDENT PRO TEMPORE

The PRESIDING OFFICER. The clerk will please read a communication to the Senate from the President pro tempore (Mr. THURMOND).

The legislative clerk read the following letter:

U.S. SENATE,
PRESIDENT PRO TEMPORE,
Washington, D.C., October 26, 1981.

To the Senate:

Under the provisions of rule I, section 3, of the Standing Rules of the Senate, I hereby appoint the Honorable MACK MATTINGLY, a Senator from the State of Georgia, to perform the duties of the Chair.

STROM THURMOND,
President pro tempore.

Mr. MATTINGLY thereupon assumed the chair as Acting President pro tempore.

RECOGNITION OF THE MAJORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings be approved to date.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, this morning, after the expiration of the time allocated to the two leaders under the standing order, there are special orders for the recognition of the distinguished Senator from Vermont (Mr. LEAHY) and the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD) for not to exceed 15 minutes each.

After that time, there will be a period for the transaction of routine morning business to extend not past 11 a.m.

I inquire of the Chair: Is there a limitation on the time individual Senators may speak?

The ACTING PRESIDENT pro tempore. There is a 5-minute limitation.

Mr. BAKER. I thank the Chair.

At 11 a.m., as previously ordered, the Senate will resume consideration of H.R. 4035, the Interior appropriations bill.

There are a number of amendments to that bill, and I urge Senators to come to the Chamber and offer their amendments as soon as possible.

The Senate will not be in late today. However, I must point out that we are now in the midst of the appropriations sequence and all Members are put on notice that as of the beginning of next week the regular recess or adjournment hour of 6 p.m., except on Thursday, will no longer be possible to observe. It is essential that we complete the appropriations process as soon as possible and get these bills to conference.

Therefore, the question of whether we have late sessions on nights other than Thursday next week will depend largely on whether or not we can move with some expedition and efficiency on the bills from the Appropriations Committee as they reach the calendar and are available for Senate consideration.

THE LONELY HOUSE

Mr. BAKER. Mr. President, another week comes before the Senate, and I thought that before the onslaught of appropriation bills and other issues that will make the next 5 days more than hectic, we pause in the throes of Emily Dickinson, and her gifted work:

THE LONELY HOUSE

I know some lonely houses off the road
A robber'd like the look of,—
Wooden barred,
And windows hanging low,
Inviting to
A portico,

Where two could creep:
One hand the tools,
The other peep
To make sure all's asleep.
Old-fashioned eyes,
Not easy to surprise!

How orderly the kitchen'd look by night,
With just a clock,—
But they could gag the tick,
And mice won't bark;
And so the walls don't tell,
None will.

A pair of spectacles ajar just stir—
An almanac's aware.
Was it the mat winked,
Or a nervous star?
The moon slides down the stair
To see who's there.

There's plunder,—where?
Tankard, or spoon,
Earring, or stone,
A watch, some ancient brooch
To match the grandmamma,
Staid sleeping there.

Day rattles, too,
Stealth's slow;
The sun has got as far
As the third sycamore.
Screams chanticleer,

'Who's there?'

And echoes, trains away,
Sneer—'where?'
While the old couple, just astir,
Think that the sunrise left the door ajar!

Mr. President, I have no further need for my time under the standing order. I am prepared to yield it to any Senator or to the distinguished acting minority leader.

Mr. LEAHY. I thank the majority leader.

RECOGNITION OF THE ACTING MINORITY LEADER

The ACTING PRESIDENT pro tempore. Under the previous order, the acting minority leader is recognized.

Mr. LEAHY. Mr. President, I ask if it might be possible to take the time of 15 minutes reserved for the minority leader under the standing order, plus mine, and I certainly appreciate the time of the distinguished majority leader, although I do not expect to have to use all of that, and naturally I will be happy to yield back any of it to the distinguished majority leader.

Mr. BAKER. Mr. President, if the Senator thinks that 25 minutes will accommodate his purposes, I shall reserve mine for the time being.

I now ask unanimous consent that I may reserve the time remaining to me under the standing order and I ask unanimous consent that the time allocated to the minority leader may be aggregated with the time provided for the Senator from Vermont on special orders so that he may have a total of 25 minutes for his presentation.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. CRANSTON. Mr. President, may I ask that I may have about 6 minutes to speak following the statement by the Senator from Vermont?

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

Mr. BAKER. Yes.

Mr. President, I yield 6 minutes of my remaining time to the distinguished assistant minority leader.

Mr. CRANSTON. I thank the majority leader very much.

Mr. LEAHY. Mr. President, I understand from Senator ROBERT C. BYRD that he has no objection if I were to use his special order time if need be.

Mr. BAKER. Mr. President, I ask unanimous consent that the control of the time allocated to the distinguished Senator from West Virginia (Mr. ROBERT C. BYRD) on special order be assigned to the control of the Senator from Vermont (Mr. LEAHY).

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I yield the floor.

Mr. LEAHY. I thank the distinguished majority leader.

RECOGNITION OF SENATOR LEAHY

The ACTING PRESIDENT pro tempore. The Senator from Vermont is recognized.

Mr. LEAHY. Mr. President, I understand that the Senator from Wisconsin wishes a minute or two.

Mr. PROXMIRE. Two minutes will be fine.

Mr. LEAHY. Fine. I am willing to yield that back.

Mr. BAKER. Mr. President, if the Senator will yield, I yield 2 minutes to the distinguished Senator from Wisconsin out of the time remaining to me under the standing order.

Mr. PROXMIRE. I thank the distinguished majority leader.

TREATIES CAN NEVER OVERRIDE THE CONSTITUTION

Mr. PROXMIRE. Mr. President, one of the cornerstones of the fear campaign generated by the Liberty Lobby against the Genocide Convention, and repeated in their so-called White Paper, is the proposition that treaties automatically override the Constitution.

As evidence, they cite the "supremacy clause" of the Constitution and a statement by John Foster Dulles, whom they identify as Secretary of State under President Eisenhower. They then conclude that although the treaty is not self-implementing and requires future legislation to implement its provisions, that the courts "would be obliged to sanction."

Mr. President, the Liberty Lobby could not be more wrong. First, they are misreading the supremacy clause of the Constitution. Second, they cite John Foster Dulles' interpretation as authoritative, which it is not. He is not a constitutional expert, his opinions do not have the force of law and, if you bother to read the footnotes, he was not even Secretary of State when he made that remark.

Finally, the courts are not obliged to sanction any legislation, which, in any way, is inconsistent with the Constitution.

Mr. President, the Liberty Lobby well knows that the Supreme Court resolved years ago that any treaty can never override the Constitution or constitutional guarantees in any way.

Mr. President, the Liberty Lobby does quote the "supremacy clause" of the Constitution accurately. Article VI, section 2 states:

> This Constitution, and the Laws of the United States which shall be made in Pursuance thereof, and all Treaties made, or which shall be made, under the Authority of the United States, shall be the supreme Law of the Land, and the Judges in every State shall be bound thereby, any Thing in the Constitution or Laws of any State to the Contrary notwithstanding.

There are several points that deserve to be made here:

First, this clause has been recognized by constitutional law experts as assuring the supremacy of treaties to State law and State constitutions, not the Federal Constitution. The language is clear: Treaties are superior to "any Thing in the Constitution or Laws of any State."

Second, as noted constitutional expert, Louis Henkin, points out in his book, "Foreign Affairs and the Constitution":

> The status of a treaty as law of the land derives from and depends on its status as a valid, living treaty of the United States. It is not law of the land for either the President or the courts to enforce if it is not made in accordance with constitutional requirements, or is beyond the power of the President and Senate to make, or violates constitutional prohibitions.

His point is well taken: A treaty cannot be valid unless it is made pursuant to constitutional limitations and it cannot override the Constitution.

Third, the Supreme Court has repeatedly held that treaties cannot override the Constitution in any way. Unfortunately, the Liberty Lobby could not cite any Supreme Court cases that support their position. Why? Because there are none.

The Supreme Court has been clear and consistent: No treaty can ever override the Constitution.

Let me cite just two notable cases.

In Geofroy against Riggs in 1890, Mr. Justice Field wrote:

> The treaty power, as expressed in the Constitution, is in terms unlimited except by those restraints which are found in that instrument against the action of the government or of its departments, and those arising from the nature of the government and of that of the States. It would not be contended that it extends so far as to authorize what the Constitution forbids, or a change in the character of the government or in that of one of the States.

Let me repeat the key line:

> It would not be contended that it extends so far as to authorize what the Constitution forbids or a change in the character of government.

The most recent case was decided by the Court in 1957 in the case Reid against Covert. Mr. Justice Black, speaking for the Warren Court, laid the issue to rest conclusively:

> No agreement with a foreign nation can confer power on the Congress, or any other branch of government, which is free from the restraints of the Constitution.
>
> The prohibitions of the Constitution were designed to apply to all branches of the National Government and they cannot be nullified by the Executive or the Executive and the Senate combined.

That opinion also further substantiates my reading, and that of most constitutional experts, of the meaning of the "supremacy clause" of the Constitution.

The opinion states:

> It would be manifestly contrary to the objectives of those who created the Constitution, as well as those who were responsible for the Bill of Rights—let alone alien to our entire constitutional history and tradition—to construe Article VI (the Supremacy Clause) as permitting the United States to exercise power under an international agreement without observing constitutional prohibitions.

Later in that opinion, Mr. Justice Black noted:

> This Court has repeatedly taken the position that an Act of Congress, which must comply with the Constitution, is on a full parity with a treaty, and that when a statute which is subsequent in time is inconsistent with a treaty, the statute to the extent of conflict renders the treaty null. It would be completely anomalous to say that a treaty need not comply with the Constitution when such an agreement can be overridden by a statute that must conform to that instrument.

Mr. President, what Mr. Justice Black just said is very important and summarizes my case perfectly:

First, the courts have consistently held that treaties must be consistent with the Constitution and cannot in any way change our form of government.

Second, treaties and laws enacted by the Congress are given equal weight before the courts but equal weight below the Constitution, a fact the Liberty Lobby conveniently omits.

And, finally, that when there is ever a conflict between a treaty and a law enacted by the Congress at a later time the treaty is declared null and an act of Congress prevails.

Mr. President, it is time to end the myth that treaties can ever supersede the Constitution. They cannot and it is time to set the record straight that the Genocide Convention can never override any freedoms in our Constitution. In fact, it is completely consistent with them.

I thank the distinguished majority leader and yield the floor.

THE PROPOSED SALE OF AWACS AND OTHER MILITARY EQUIPMENT TO SAUDI ARABIA

Mr. LEAHY. Mr. President, on Wednesday, the Senate will vote on the sale of AWACS and other military equipment to Saudi Arabia. The vote, when it occurs, will be very close. It was always assumed that this issue would be decided in the U.S. Senate, and no real attempt was made to present the argument regarding the sale in the House of Representatives.

Because it will be so close, and because each of the 100 Members of this body could cast the deciding vote, it is particularly important that we each of us exhaustively explore all the issues before reaching our decision.

Arguments have been made that this should be a partisan issue. I reject suggestions from both Republicans and Democrats to that effect. It is an issue of significant foreign policy ramifications and far-reaching consequences for our country. Its resolution greatly transcends the partisan considerations of national political parties.

Therefore, I determined, very early, that I would not in any way consider my decision as a party or partisan issue. It is regrettable that some, in both parties, have tried to make it a partisan issue. Good foreign policy can only be nonpartisan and must transcend both political parties.

Several groups, outside the U.S. Government, have tried to lobby me either for or against this sale. It quickly became apparent that none of these groups and individuals possessed any information to offer not already available to any Senator making the effort to review all Government sources. In many instances these groups represented only their own ideological or commercial interest. They did not speak in the best interest of the United States, and therefore their recommendations bear no weight in my decision.

During the past few weeks, I have traveled many times to Vermont and listened to literally hundreds of Vermonters about this issue. Their concerns, advice, questions, and sincere expressions—both for and against the sale—are appreciated and have had a significant bearing on my decision.

My colleagues in the Senate have been particularly helpful, and I wish to extend my appreciation and gratitude to a number of my distinguished colleagues who rendered valued assistance to me. The assistance offered by Senators, including the distinguished majority leader Senator BAKER, Senator CRANSTON, Senator CHAFEE, Senator LEVIN, Senator GLENN, and others, testifies to the reassuring fact that even in this debate, characterized in this country by some passion and much impatience, it is possible to pursue the discussion in terms which state the issues, identify the central questions, and preserve productive dialog.

I hope, also, that whichever way this issue turns out the administration will realize that they serve neither their interest nor the country's interest by being partisan in foreign policy. An initial bipartisan effort in designing this sale would have assured its acceptance by the Senate. The administration launched the debate on terms which suggested to many that a Republican consensus to support the President would substitute nicely for a bipartisan effort.

Certainly the AWACS issue should have been framed in the beginning as a shared responsibility, regardless of party affiliation. The administration belatedly realized this when some of their strongest opposition came from Republican Senators. It is to be hoped that they do not make the mistake of failing to realize that many Senators—of both parties—who will oppose them on this vote stand ready to help develop a consensus and extend their support on future issues, especially if asked in the planning stages.

Despite the challenges posed in the attempt to match the subtleties of the foreign policy process with our political system, the United States usually is guided in the long run by policies which are at once visionary and pragmatic, durable and flexible, and acceptable to the vast majority of the American people.

We are now embarked upon another far-reaching effort to define our priorities and objectives in the Middle East.

The debate on AWACS has survived all these distractions. The arguments for and against the sale are numerous, and among them some strike me as more central to the AWACS question than others. In shaping my decision, I concluded that three arguments advanced with vigor and even vehemence are not relevant. The first, which has featured in numerous letters, speeches, and personal visits, is that AWACS posed a serious threat to the existence of Israel. I cannot accept this argument, and to base a decision on this premise tends to deflect attention from other more important considerations. It also ignores the fact that Saudi Arabia today is using American AWACS and has used them—under American command—since last year.

Nor is it proper to conclude that the proposal stands as an assault on longstanding American ties to Israel. For more than 30 years the United States has demonstrated a special and protective affection for Israel, from President Harry Truman's ready recognition of the fledgling Israeli State in 1949, to massive U.S. military and economic assistance in every year since then, and to timely and extensive special assistance in time of war.

Israel is the only democracy in the Middle East, and the shared American-Israeli commitment to human liberty and democracy is proof positive of these enduring ties.

Last, it is wrong to suggest that President Reagan or his administration is any less committed to the security of Israel than Presidents Truman, Eisenhower, Kennedy, Johnson, Nixon, Ford, or Carter. I am personally convinced of President Reagan's total sincerity and continued commitment to Israel as I was of both of the other Presidents who have held office since I have been in the Senate.

Israel should not consider it to be a reflection on their own ability and achievements when I say that they can exist in a hostile environment because of the continued support of the United States. At the same time, it should be a matter of comfort to the State of Israel to know that the United States will never abandon that commitment and support.

In the same way, arguments have been advanced to the effect that we have no choice but to sell AWACS to Saudi Arabia. Because Saudi Arabia commands so great a role in the production and exportation of oil, the perception persists that failure to supply AWACS will soon result in a fundamental reorientation of Saudi Arabia toward radical Arab regimes and even the Soviet Union if the United States denies the Saudi request.

Saudi Arabia's own best interests, which desire to combine enormous progress in material prosperity for its people with a deep and abiding commitment to a conservative interpretation of Islam, would be undermined by such a shift. I do not foresee any nation, much less one as secure in its identity as Saudi Arabia, endangering or betraying its traditions to spite the United States.

Nor do I see a decision on AWACS adverse to Saudi Arabia as an invitation to a radical change in oil market conditions. A more disciplined American energy situation and the growing diversity of American oil imports, combined with an acute Saudi conception of its paramount economic interests, make this unlikely.

This leaves five factors upon which, in my estimation, the merits of the AWACS sale should be judged:

First, the Saudi Arabian track record in promoting a durable and equitable Middle Eastern peace settlement;

Second, the possibility that sophisticated reconnaissance facilities incorporated into the AWACS package might fall into enemy hands;

Third, the arguments advanced to justify the administration's assessment of the AWACS sale as fundamental to American foreign policy in the region;

Fourth, the potential inherent in the AWACS sale for the escalation of the arms race in so volatile a region; and

Fifth, the long-term strategic military advantage to the United States in the sale.

On none of these issues has the debate supplied compelling answers for or against the sale. Even as I make my own decision, I would wish that the great debate had shaped itself into a more intelligent, more dispassionate, and perhaps better focused treatment of these issues.

Saudi Arabia has openly branded Israel its principal enemy and has placed considerable financial resources at the disposal of the Palestine Liberation Organization. It has shunned the Camp David process, and has labored to isolate Egypt. It has resisted the deployment of American military forces in and near the Persian Gulf and has played a central role in the escalation of the market price of oil during the last decade. In every case, the opposite course of action would have reinforced a closer relationship with the United States.

On the other side of the ledger, Saudi Arabia has spurned even normal diplomatic relations with the Soviet Union and has supported anti-Marxist movements in the Yemens, in North Africa, and elsewhere. It has supplied discreet and effective assistance in reconciling the PLO to a Lebanon ceasefire, put modest restraints on even higher oil prices, and has quietly encouraged informal ties between Egypt and the rest of the Arab world. It has reinforced conservative Islam as a bulwark against leftist movements inside Saudi Arabia and without.

The record is complex but not necessarily contradictory. Saudi Arabians have been deeply, even viscerally, of-

fended by Israel's claims to exclusive jurisdiction over Jerusalem, by their premise that Israel's independence cannot admit of independence for a Palestinian State on the West Bank, and by a close U.S. identification with Israel. Saudi Arabia seeks rapid economic development and wants the highest oil revenues obtainable consistent with uninterrupted large-scale production and stable overseas markets. Saudi Arabia has sought to challenge the Camp David peace plan as well as Egypt's role in it, but has done so within certain restraints which have allowed the peace process to continue. Ties to Arafat have promoted moderation in the PLO while sustaining what most Palestinians perceive to be their rights to the West Bank.

From this perspective, Saudi policies show a commitment to vigorous self-interest, but pursued with circumspection. Any particular Saudi policy cannot be interpreted as proof of hostility to the United States. The larger picture, however, is not so clearcut. Those most eager to indict Saudi Arabia for supporting the PLO, for instance, should not forget that at an earlier date some in the Israeli leadership adopted tactics which were roundly condemned by most of the world.

Saudi Arabia's record in foreign policy does not guarantee a pro-American stance in the future. Only a leap of faith allows anyone to believe this, and I am not prepared to make such a leap. Saudi Arabia views the world from a perspective not all facets of which Americans can support. It remains to be seen whether or not Saudi Arabia's newfound prosperity will reinforce ties and create common interests with the United States.

We should not condemn Saudi Arabia to implacable opposition to U.S. interests simply because of what has happened in the past. Nor, of course, should we accept too confidently assurances that our fundamental interests will converge in the future. The past record should not constitute an indelible obstacle to selling AWACS, nor should hope for a fundamental and permanent reorientation of Saudi policy justify such a sale. The record and prospects are too ambiguous to favor either side of the AWACS debate, but it is equally true that each Senator should consult the question of Saudi Arabian objectives in reaching his decision on the AWACS issue.

The second important concern is the fate of AWACS technology. What is the likelihood that it could fall into enemy hands? The administration's inconsistent responses offer little comfort that such a calamity is remote. It is not easy, to be sure, to declare on one hand that AWACS is central to our military viability in the Middle East and then to dismiss the system as a modest addition to the arsenal of sophisticated weaponry deployed in that region.

I gather, and I hope that I am correct in this, that the system as modified for sale to the Saudis represents a less dramatic leap forward in the state of the art than once was thought. I take little comfort, however, in the cavalier commentary that in 5 years or so the Soviets will possess something similar to AWACS or that the Saudis can now buy a comparable system from the United Kingdom. If all this is true, we seem to have traumatized ourselves into selling a weapons system not worth all the anguish, something the principal merit of which is the enormous cost to a country able to foot the bill.

It is perhaps more realistic to assume that if AWACS fell into enemy hands, the setback to U.S. security interests would be considerable. We must then assess prospects for Saudi stability and opportunities available to the United States to prevent AWACS from falling into hostile hands. On the first point, comparisons between Iran and Saudi Arabia come to mind. Enormous tensions can be detected in both societies, but the comparison should not be pressed too far. In Iran modernization was tied to secularism and thus assaulted a vigorous and growing commitment to conservative Islam. In Saudi Arabia traditional religious institutions and practices are not being challenged and potential for instability comes from rapid modernization of the economy.

To date, the Saudi royal family has demonstrated considerable skill in reconciling these forces. The military establishment is loyal, and the materialist philosophy of the extremists does not yet enjoy widespread popular appeal. To spurn an opportunity to develop closer and mutually beneficial ties with Saudi Arabia, because of fear of the regime's long-term viability, would in effect amount to a self-fulfilling prophecy designed to encourage forces opposed to the present Saudi regime.

I assume that when the dust settles on the debate, the United States and Saudi Arabia could refine procedures which will provide reasonable guarantees that the AWACS will be secured from our opponents. It is unfortunate, however, that the administration did not make more progress on this "command and control" question before proceeding with the proposed sale.

The third crucial question is where the AWACS system fits into larger U.S. foreign policy interests. The administration failed to consult its own best interests and those of the Nation in developing a context to complement the AWACS sale. The very debate on AWACS has metamorphasized the issue by creating a symbol of our relationship to Saudi Arabia. If this symbol is now destroyed it may make impossible the construction, however belated, of a viable Middle Eastern policy which effectively addresses the central problems of the gulf.

I share the conviction of many others that a foreign policy narrowly focused on Israel serves neither our interests nor those of Israel. I therefore deeply regret that the administration has launched AWACS on an uncharted sea, searching as it were for a port or two to serve as harbors for a foreign policy adequate to our growing interests and involvement in the gulf region.

Expectations have been raised. The administration invites the Senate to accept those expectations and to wait confidently for a policy within which Saudi Arabia's objectives will vindicate and complement our own national interests. What would that policy be? Should we proceed with the sale without knowing what are the characteristics of our revised foreign policy for the Middle East?

Fourth, how do we square the sale of AWACS, fuel enhancement packages for the F–18's, and Sidewinder missiles with concern for the introduction of increasingly sophisticated military equipment in the region? We have already supplied potent equipment to Israel on the premise that such weapons are necessary for its survival. Fortunately, in terms of Israel's needs in several wars with its neighbors, such equipment was in place and replenishments from the United States were available when needed. The rationale for supplying Saudi Arabia advanced equipment may be the same, inasmuch as our interests in the region have expanded, and that we now see the survival and safety of Saudi Arabia and protection of its oilfields as vital to to the United States.

More troubling, however, is the proposed sale of fuel-enhancement packages for the advanced fighter aircraft we supplied earlier. Will fuel enhancement packages play a significant role in enabling Saudi Arabia to defend its oilfields more effectively? Probably not, inasmuch as any attack would likely be sudden and of short duration. There is the danger that some states in the Persian Gulf region and bordering Saudi Arabia to the south might cite this sale as sufficient reason for shopping for similar weapons. The tempo of armaments purchases in the region might well be accelerated. This constitutes a serious drawback to the sale to Saudi Arabia, and only enormous countervailing benefits to U.S. interests in that part of the world should be cited to justify the sale.

The final point addresses the relationship between the proposed sale of AWACS and U.S. military objectives and requirements in the Persian Gulf. The question is vital, for the fragile nature of the smaller regimes in the region is to a large extent reduced only by the presence of Saudi Arabia. Many of the very small states are in fact principalities which escaped the annexationist policies practiced by Saudi Arabia prior to World War II only because of their poverty and remote location. Now many are wealthy minor states sitting astride the world's busiest oil transhipment route, anxious about their survival in the face of the revolution in Iran and steadily strengthening Saudi Arabian military power. Where does the United States fit in militarily?

I am assured that Saudi Arabian AWACS will complement those already operating in the region, but I also hear repeatedly that the Saudi system will remain distinct and independent. The sale of AWACS makes a great deal of sense if Saudi Arabia and the United States are in agreement as to who are our adversaries. In this case common attention would certainly be directed toward the Soviet Union and any gulf states which might fall under its influence. The confluence of interests, however, does not yet seem to have occurred.

Saudi Arabia continues to resist suggestions that pro-Western powers enjoy access to its military facilities. Our own forces, barring considerable expansion in the region and redeployment within the gulf itself, would seem least likely to benefit from AWACS ability to offer approximately 15 minutes' warning for an air attack. Much as in the case of U.S. foreign policy priorities in the region, we are asked to visualize the role of AWACS in some sort of an integrated game plan for the gulf, a plan yet to be spelled out by the administration.

I am happy to note that the administration sees no serious obstacles in coordinating Saudi AWACS with our own systems. But in the absence of a military relationship even remotely approximating an alliance, we are asked to look upon the sale as the seed-time of a United States-Saudi military and diplomatic juncture, to bloom, it is hoped, before the AWACS themselves are planted in Saudi soil.

My view of the five criteria upon which I believe the sale of AWACS and other military hardware to Saudi Arabia should be based leaves several key questions unanswered. Saudi foreign policy objectives remain unclear. There is a danger that AWACS technology might fall into enemy hands in the absence of a clearer idea of what will be the long term American operational relationship to AWACS. The administration has not yet defined clearly U.S. foreign policy priorities in the Middle East, nor demonstrated how the proposed sale complements those objectives. The sale may escalate the pace at which sophisticated arms are introduced into the region. The military relationship between the United States and Saudi Arabia, however, has not been defined clearly.

In effect, the Senate must anchor its momentous decision to the persuasive and sincere assurances of the President that such a sale will permit the United States to establish a new basis for securing its vital interests in the region. In any context, I would be reluctant to question such assurances, for they not only promise to remove the impediments which have long hobbled our relations with influential countries in the Arab world, but they offer us a chance to support the President in a task in which the law calls for shared responsibility and present circumstances demand consensus.

As do all my distinguished colleagues in the Senate, I want to believe that the President has unlocked the door to the protection of U.S. vital interests and the promotion of peace in the Middle East. The burden of proof that the President's policies will do this rests on the administration, and it is clear that many doubts remain.

Therefore, Mr. President, I believe that we have an unfortunate proposal before us. Unfortunate because a package could have been designed that would have been acceptable to the President, the U.S. Senate, Saudi Arabia, and the other major countries in the Middle East. The package could have been designed to enhance the Camp David accords and build on the Israeli-Egyptian peace treaty. At the same time, it could have addressed many of the U.S. strategic needs in the Middle East.

Because it does not, I would urge President Reagan to withdraw this proposal before Wednesday's vote. If he does, I will pledge to join with other Senators and the President in a bipartisan effort to design a plan acceptable to all parties. Contrary to the views of many, it is not too late to do this and to avoid a vote on a package which claims total support by only a handful of Senators.

What I have outlined, Mr. President, is a responsible position. I must tell my colleagues, however, that if the package is not withdrawn, I will vote against it. I take no pleasure in such a vote. In fact, I regret that this vote signifies my belief that the administration has not taken an opportunity to begin a Middle East policy.

Notwithstanding this vote, I will stand ready to join any bipartisan effort the administration is willing to make to go forward with a comprehensive Middle East policy. The U.S. interest in such a policy—and the lasting peace it can bring—transcends the interests of either political party. Instead it addresses the interests of all Americans. The sooner we do this, the better.

Mr. CRANSTON addressed the Chair.

The ACTING PRESIDENT pro tempore. The Senator from California.

Mr. CRANSTON. Will the Senator yield?

Mr. LEAHY. I yield.

Mr. CRANSTON. Mr. President, first of all, I congratulate the Senator for the deep and serious thought he has given to this issue. I know how seriously the Senator from Vermont has taken his responsibility to make a wise decision on a very momentous matter. I know how widely he has consulted on the matter. Frankly, I did not know until a moment before the Senator began to speak what decision he had come to, although I was very hopeful that he would come to the decision that he did reach.

He has given a very, very thoughtful analysis to the arguments pro and con and of the crisis that exists in the Middle East, which is, therefore, a crisis for us because of our deep interest, our important friendships, and our hopes for stronger friendships in the Middle East.

The Senator wound up suggesting that the President should withdraw the package from the Senate. I strongly concur in that recommendation, although I would not expect, and I do not urge, the President to make that decision at this precise moment. He is going to see more Members of the Senate, talk with more Members of the Senate, in an effort to turn the rising sentiment against the sale around so that he would have support for the sale from those who presently do not believe it is in the national interest.

The President should make a decision to withdraw the package only when he finally is driven to the conclusion that the Senate will oppose it if we go down to a vote at 5 o'clock on Wednesday afternoon.

I have once again had to revise my own tally of where the votes stand based upon the decision of the Senator from Vermont. I know that they will now have to do the same thing in the White House. Our responsibility, in effect, is to advise and consent on this matter. I do not consent on the matter. The Senator from Vermont does not consent on the matter. I think presently a rising majority of Senators on both sides of the aisle do not give their consent on the matter.

So I would offer this advice for consideration by the President and his advisers: I believe, with the addition of Senator LEAHY, there are 54 Senators presently planning to vote against the package. Two more, I believe, lean that way, for a total of 56.

I recognize that some of those may yield to the arguments of the President and decide to change, but I do not believe that enough will to make it possible for the President to win.

I do not presently believe that the White House even has the support of all the Senators who are not included in that 56 count. The momentum, plainly, is going against the President's position. One Senator a day since Wednesday has come out in opposition to it. All of these were Senators not previously committed on the matter.

Mr. President, somehow the impression has been given that opposition to the F–15 enhancement-AWACS package has been instigated and orchestrated outside of this body. I want to set the record straight. Many Senators were on record in opposition to the proposed enhancement package several weeks before lobbying efforts from outside groups were initiated, and several weeks before Israel Government officials publicly expressed opposition to this proposal.

I want to be very frank about this point.

Two Senators, JOE BIDEN, of Delaware, and I, authored the first public letter to President Reagan against the enhancement package. The letter was signed by a number of our colleagues on the Foreign Relations Committee. It was dated February 19, 1981.

Again, on February 26, in a closed hearing of the Senate Foreign Relations Committee with Under Secretary of State James Buckley, opposition to the proposed F–15 enhancement, which at this point did not even include AWACS—AWACS was not even in the picture then—was expressed by a bipartisan cross section of the committee.

Deep reservations were expressed by member after member of the committee about the proposed F–15 enhancement package. At this point, Israeli officials and concerned American groups in the United States, though concerned about the apparent fact that the administration was prepared to reverse previous assurances and enhance the Saudi F–15's were not on record in opposition to the sale.

Let me interpolate a relevant point: There were those in this body who were concerned that, Saudi Arabia having achieved that package, the original F–15 package, with the understanding that it would not be enhanced, Senators are now concerned that they are seeking enhancement in violation of that agreement.

The Reagan administration has not changed its position on any commitment it made, if the commitment not to enhance was made by the Carter administration. But the Saudis have gone back on the terms of that deal.

Observers noted, going back to what was happening in February, the reluctance of individuals to do battle with the Reagan administration in which many friends of Israel had placed considerable hopes, owing to Candidate Reagan's repeated public pro-Israel campaign statements over a 2-year period. These friends of Israel were particularly reluctant to take on the Reagan administration so soon after the inauguration. The inauguration had only occurred on January 20, and here we were in late February.

When the administration announced on March 6, 1981, its intention to enhance the Saudi's F–15's and to continue study of the AWACS question, no decision yet on AWACS, I went forward with Senator BIDEN to circulate a resolution disapproving this sale. Again, it was by no means clear at that time what the position of others would be on the sale, but we began the process of soliciting cosponsors for a resolution of disapproval because of our deep concerns about F–15 enhancement. The fact is that it was not until some weeks later, after the unwise administration decision to propose enhancement of the Saudi F–15's had been compounded by the addition of AWACS to the package, that opposition swelled from concerned groups throughout the country.

Let me add this on this point, Mr. President: Historically, every nation tries to influence those foreign policy decisions of other nations which may affect them. That is especially true of the United States, whose foreign policy decisions affect so many nations in so many vital ways.

It is only natural and normal that Israel would try to dissuade the United States from making a move that it sees as inimical to its national security—just as it is natural and normal for Saudi Arabia to seek to further its national aims; for our NATO allies, in their self-interest, to spur us into arms negotiations with the Soviet Union; for Mexico to try to change our position on El Salvador; for African nations to attempt to shape our policy toward South Africa, and so on—endlessly and understandably.

In fact, just 2 weeks before President Reagan, in effect, told Israel to mind its own business—as though Israel's security were not its business—Secretary of State Alexander Haig said:

> The Israelis have a perfect right, in fact they have an obligation, to express their concerns and to do it at home and to do it here.

In committing itself to the AWACS package, the Reagan administration made an unwise decision with unwise conditions that is potentially harmful both to Israel and to the United States. Facing the threat of a defeat in Congress, the administration, which has a penchant for seeking scapegoats, is apparently seeking to make a scapegoat of Israel and Israel's friends in the United States.

The administration has no one to blame but itself for its problems with the Saudis arms package. The administration, for reasons still difficult to fathom, insisted on trying to bull the package through Congress. It made no effort to consult Congress on a bipartisan basis on whether to sell AWACS to the Saudis. It did not seek the advice of congressional leaders even on the terms of the sale.

If the administration wants to shift blame elsewhere, Mr. President, I suggest that President Reagan look to the Saudis. If President Reagan wants to reprimand a foreign government for seeking "to make American foreign policy," let him castigate the Saudis for using their control over oil supplies in an effort to pressure the West into hostility toward Israel and support of the terrorist PLO.

Why do the Saudis insist on putting President Reagan and the United States on the spot? Why do the Saudis insist on the most advanced U.S. military equipment, which they do not need, do not know how to use, and cannot adequately safeguard? Why do the Saudis exaggerate the AWACS issue to make it a test of America's dependability as an ally?

President Reagan on Friday, charged that Senators opposing this sale "are not doing their country a service." That view was supported on Sunday and just now on the floor by the majority leader.

Mr. President, I think it is not a service to the country to vote for the package; it is certainly no service to the country to support the President when he is wrong.

The President and his supporters on this issue are patriots. So are their opponents. The President and his supporters simply are wrong.

It is the Reagan administration's scare tactics that are not doing this country a service.

By accusing the Israeli Government of interfering in American politics, by raising the specter of domestic anti-Semitism, by impugning the motives and the patriotism of Members of the U.S. Senate, the Reagan administration is doing a gross disservice to our democratic institutions, to the freedom of speech and debate, to our constitutional process—and to our country.

By acting so overwrought, this administration, which seeks to project a strong international image, ironically is sending the worst possible message to our friends and adversaries abroad.

An administration so panic stricken at the prospect of a fair defeat on the floor of the Senate is not likely to inspire international confidence in its equanimity or maturity—or to inspire domestic confidence, for that matter.

The administration, as well as Jimmy Carter and the Saudis, have referred to this vote as a litmus test for the United States.

They have tried to "put a guilt trip" on the public and the Senate—to use the popular venacular—in the course of the current debate. We are made to feel that America's dependability, America's reliability as a friend and purveyor of weapons is at stake.

I think the emphasis has been wrongly placed, very wrongly placed. We should be concerned less with our reliability and our dependability and more concerned about the dubious governments on whom we showed our military arms and technology.

It is their reliability, their dependability that is at issue. Resolute, steadfast Israel—the only democracy in the Middle East and our only certain friend should be the standard by which they are measured.

This is an instance in which I would reverse the familiar Latin admonishment, caveat emptor—let the buyer beware. I say: "Caveat venditor—let the seller beware."

A litmus test, we remember from our high school chemistry class, determines the existence of acid in a chemical formula.

The so-called AWACS litmus test is revealing a distressing amount of political acidity in the administration.

The White House could use a massive dose of Rolaids.

We have heard the argument floated by some administration officials in recent days that opposition to the Saudi arms package is somehow partisan. I think that charge should be resented. That charge is a further disservice to the Nation. To be sure, certain White House pressure tactics have fallen more heavily on members of the President's party than upon the minority. But how is opposition partisan when more than 60 percent of the House Republicans vote to reject the President's position? How is it partisan when the principal sponsor of the Senate resolution, the Senator from Oregon, is a Republican? How is it partisan when 54 Senators write the President in June saying, "Don't send the Saudi arms package to the Hill * * * it's not in our interests"—and 20 of the signers are Republicans?

Mr. President, I think it is unfortunate that this controversy has become known as the AWACS fight in the press. There are many, many reasons why Senators believe this sale is contrary to our national interests which go far beyond the control of AWACS. There is the Sidewinder missile, which contains such very sophisticated technology. There are the assurances given to Congress and to Israel in 1978 that we would not enhance the offensive capabilities of the Saudi F–15's.

There is the point made by the minority leader, Senator ROBERT C. BYRD, that further erosion of Israel's technological edge will make it more difficult for Israel to be forthcoming and positive in fulfilling the hope and the promise of the Camp David peace process.

There is the point made by Senator BYRD that the consummation of the biggest U.S. arms sale in history could force the Saudis to take actions contrary to U.S. interests so as to demonstrate that they are not an American satellite; so as to demonstrate to radical Arab States Saudi independence of the United States.

There is the fact that spewing more arms into the Persian Gulf will not solve our security concerns there which revolve more around internal instability than about the Soviet threat. And, fi-

nally, there is the basic fact that we should not be selling more sophisticated arms to the Saudis so long as they reject the Camp David peace process. They continue to fund PLO terrorism. And they continue to lead the OPEC price gougers who have raised oil prices from $3 a barrel to more than $34 in the past two decades.

ROUTINE MORNING BUSINESS

The ACTING PRESIDENT pro tempore. There will now be a period for the transaction of routine morning business.

Mr. CRANSTON. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. GORTON. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The ACTING PRESIDENT pro tempore. Without objection, it is so ordered.

COST-OF-LIVING INCREASES FOR FEDERAL EMPLOYEES

Mr. GORTON. Mr. President, I recently received a letter from a constituent, Mr. Earl N. Legge, of Lynnwood, Wash., which illustrates some of the frustrations felt by many retired persons throughout the United States with federally funded retirement benefits.

While he labors under a number of misapprehensions, these are misapprehensions which are widely shared throughout the United States.

I will read the letter, as an illustration of some of the problems with which Congress and the administration must deal during the course of the next year or so:

I am writing to you to protest the taking away of the cost of living increases for federal employees. The main reason is that we pay our hard earned money into the retirement fund for years, pay income tax on it, receive no interest on it and for the first two or three years of retirement we are paid our own money. The government uses that money, or is borrowing it without interest, and when we retire we don't get a living from retirement pay. I was forced to take a disability retirement because of a stroke. The same thing with social security. I paid into it for years and when I tried to draw it, I was turned down because I didn't have enough quarters paid in after a certain date. To me that is stealing from the people—fraud. If all retired federal employees had put the same amount of money in a savings account and left it there, with compounded interest, the money would have doubled.

So, between social security and federal retirement, I figure that the U.S. Government owes me several thousand dollars. I have been thinking of getting a big bunch of federal retirees together and have a class action suit to recover the money owed us. Because of the low retirement pay I receive, I have had to sell the home that I had when I retired, give up my activities in organizations, live in poverty, as compared to when I was working for the stinking Post Office, and deny myself a lot of pleasures. I feel that working for the Post Office is hazardous to your health because a lot of my friends and fellow Post Office employees have suffered heart attacks, strokes and nervous breakdowns because of pressure while working there. Working conditions should be investigated. The government can find the money to waste $222,000 on a study, but can't take care of its retired federal employees who have become disabled and also the veterans too. I challenge you to spend a day with me and see what I went from, to what and where I am now.

I just went through bankruptcy a short time ago because I couldn't pay my bills. There are enough of us, veterans, retired federal employees that if we banded together, we could put most of Congress, the President and Vice President in the unemployment lines. In other words, fire you. I know one way to cut the cost of government, but you wouldn't go for it because it would hurt you and that is to cut out wages and benefits of the President, Vice President, Cabinet Officers, Congressmen, and Senators in half or the same amount of inflation. I would like to have what I have paid into social security plus compounded interest at today's interest rates paid to me in one lump sum. If you have the guts to, I would like to see you read this into the Congressional Record and send me the copy of the Congressional Record that it appears in because I can't afford to buy a Congressional Record.

Sincerely,

EARL N. LEGGE.

LYNNWOOD, WASH.

P.S. I am neither Republican or Democrat, but independent. I vote for the man not political party, as they all stink and every time I have tried to get help from organizations and agencies, that are supposed to help us retired and disabled, I am turned down because I am not old enough or my income is too large. There are thousands of us hurting like this, that is why I am mad. My federal employment totaled 18 years with military plus National Guard time after World War II. I am a member of the American Legion, 41st Inf. Div. Assoc., also a union organization. Frankly, I don't think you are man enough to accept my challenge.

Mr. GORTON. Mr. President, I suggest the absence of a quorum.

The ACTING PRESIDENT pro tempore. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. If there be no further morning business, morning business is closed.

DEPARTMENT OF THE INTERIOR AND RELATED AGENCIES APPROPRIATIONS, 1982

The PRESIDING OFFICER. Under the previous order, the Senate will now resume consideration of the pending business, H.R. 4035, which the clerk will state by title.

The legislative clerk read as follows:

A bill (H.R. 4035) making appropriations for the Department of the Interior and related agencies for the fiscal year ending september 30, 1982, and for other purposes.

The Senate resumed consideration of the bill.

UP AMENDMENT NO. 521

Mr. McCLURE. Mr. President, on Friday the committee submitted a technical amendment (unprinted number 521) which was agreed to en bloc.

In order to agree to all of the committee amendments en bloc, so that the bill thus amended will be considered as original text for the purpose of further amendment, I ask unanimous consent that these amendments agreed to on Friday be agreed to as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

AMENDMENT NOS. 594–616

Mr. McCLURE. Mr. President, let me advise Members as to what our procedure will be. On Friday I indicated the intention of the Senator from Idaho to offer on behalf of the committee a group of amendments en bloc, which were then printed in the RECORD. It is my intention this morning to ask for unanimous consent that they be considered en bloc in the nature of a committee amendment.

It is not my intention to ask that at this particular time, but I want those Members who may be concerned about procedure to be aware that I hope to do that before noon. If they have any concern about those printed amendments or any concern about that procedure, I hope they will let us know so that we will be in position to make that request in the next half hour or so.

Mr. President, I think the Senator from Washington has a colloquy with respect to one of the provisions of the legislation, and I would yield to him for that purpose at this time.

Mr. GORTON. I thank the Senator from Idaho. The chairman of the subcommittee and I do have such a colloquy.

Mr. President, I have a question for the distinguished subcommittee chairman. The House has included $1 million to continue funding the Washington State Department of Game's steelhead data and management program. Funding for this program, which is necessary to manage the steelhead trout resources of Puget Sound, the coastal rivers, and the Columbia, as directed by Federal court decisions, has come from the Fish and Wildlife Service budget both in 1980 and 1981. Management of the steelhead fishery and implementation of court-ordered allocations will be impossible without this program.

I understand that the committee did not include this item because it had been informed that such funding would be premature under the terms of the Salmon and Steelhead Enhancement Act of 1980—Public Law 96–561.

This information was unfortunately incorrect. This steelhead management program is the ongoing effort by the department of game to manage the steelhead fishery in compliance with the Federal court-ordered allocation of the resource between sportsmen and treaty tribal fishermen. This program is unrelated to those programs authorized during the last Congress in the enhancement legislation. This program is in fact essential for continued management of the steelhead fishery and continued implementation of court-ordered allocations.

I hope I have clarified any misunderstanding over this issue.

Mr. McCLURE. I thank the Senator for the clarification.

Mr. GORTON. When the conferees consider resolving the differences on the Interior appropriations bill, will the Senate conferees take this clarification into account?

Mr. McCLURE. The Senator can be assured of that.

Mr. GORTON. And will the Senate conferees give favorable consideration to receding to the House on this matter if receding does not involve exceeding the budget?

Mr. McCLURE. That would be my intention.

Mr. GORTON. I thank the Senator for his consideration and cooperation on this matter.

Mr. McCLURE. I thank the Senator from Washington.

Mr. JOHNSTON. Mr. President, I would like to engage in a brief colloquy with the distinguished manager of the bill. It is my understanding that the House had included $250,000 under interpretation and visitor services in the National Park Service for concerts on the Capitol Grounds. It is also my understanding that no funds were included in the Senate reported bill for this purpose on the assumption that such concerts would be exclusively for the enjoyment of the residents of the Nation's Capitol. Is this the understanding of the Senator from Idaho?

Mr. McCLURE. That is correct. There is funding in the House bill for these concerts, but none is included in the bill we are considering here in the Senate.

Mr. JOHNSTON. I have been informed that a similar concert conducted this past July 4 was televised to approximately 10 million people across the country in addition to the 150,000 who attended the event. If such concerts were to be televised in fiscal year 1982, I believe we would again truly have a national audience for each event. Would the distinguished manager of the bill support these concerts if they were televised?

Mr. McCLURE. I would be sympathetic to such a national approach to these concerts; but, of course, we could not afford four concerts, as contemplated by the House when they earmarked $250,000. It is possible, that two concerts could be conducted and televised with a sum of $250,000 in Federal funding.

Mr. JOHNSTON. Can I have the assurances of the distinguished manager of the bill that he will, then, accept a program of two televised concerts if the House makes such an offer in conference?

Mr. McCLURE. Yes, I would be sympathetic to such a proposal, if it can be justified in the conference.

Mr. JOHNSTON. Mr. President, the distinguished floor manager of the bill correctly stated that on Friday he proposed amendments which he requested be accepted en bloc. It is my purpose to do so and, frankly, in just a few moments, with the one exception of an amendment to which, a part of that amendment to which, the distinguished Senator from New Jersey (Mr. BRADLEY) objected, and which we propose to exercise from the amendment to hold for later disposition, according to the wishes of the distinguished Senator from New Jersey. So I am hereby asking for any of my colleagues on this side of the aisle who have any reservations or objections to these amendments which were offered on Friday, printed in the RECORD, if they have any objections to speak now, in fact speak within the next few minutes, or thereafter forever hold their peace because we propose to accept them unless we get those objections soon.

Mr. McCLURE. Mr. President, I might just identify those Senators' amendments which will be offered en bloc. They are amendments numbered 594 through 616, with the exception of No. 613.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I would also, in the same vein as the discussion we just had concerning the printed amendments that may be considered en bloc, mention that amendment No. 611 and amendment No. 612 are printed correctly in the printed copy of the amendments, but errors were made in the RECORD and people who are concerned about the figures in those particular amendments should consult the printed amendments rather than the RECORD in the verbatim transcript of the proceedings on Friday.

UP AMENDMENT NO. 524

Mr. McCLURE. Mr. President, I send to the desk two amendments and ask for their immediate consideration.

The PRESIDING OFFICER. Is there objection to the consideration of the amendment en bloc?

Mr. McCLURE. Mr. President, before putting that request, let me just state that these two amendments simply take language from one place in the bill and insert it in another place in the bill. One amendment takes it out and the other amendment puts it back in. We have consulted with the other side of the aisle and I understand there is no objection. I did want to offer that explanation before putting the request that they be considered en bloc.

The PRESIDING OFFICER. Without objection, the amendments will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes unprinted amendments en bloc No. 524.

On page 26, line 20, after the semi-colon strike the following: "expenses of the Northern Mariana Islands Federal Laws Commission as authorized by law (Public Law 94-241, 90 stat. 268);"

On page 27, line 9, after the word "Affairs" insert the following: ", and for expenses of the Northern Mariana Islands Federal Laws Commission as authorized by law (Public Law 94-241, 90 stat. 268)"

Mr. McCLURE. Mr. President, these two amendments deal with the expenses of the Northern Mariana Islands Federal Laws Commission. As I indicated earlier, the language was simply put in the bill at the wrong place. These amendments rectify that error. There is no change in substance.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 524) was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that this amendment also be treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 525

Mr. McCLURE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Idaho (Mr. McCLURE) proposes an unprinted amendment numbered 525.

Mr. McCLURE. I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 16, line 8, strike all after the word "to" and insert in lieu thereof "phase-out livestock grazing as provided for in section 3 of Public Law 92-207 (85 Stat. 739)."

Mr. McCLURE. Mr. President, I have another amendment which has been cleared on the other side of the aisle. It is simply an amendment in the text which makes very clear what the subcommittee intended to do with respect to the phaseout of grazing within the National Park Service in the State of Utah. There is no change in the substance. It is simply to make certain that what we intended to do will be done. It was thought by some after we completed action in the subcommittee that the language we used was not sufficiently clear. This clarifies that question.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 525) was agreed to.

Mr. McCLURE. Mr. President, I ask unanimous consent that this amendment also be treated as original text for the purpose of further amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that it be in order to move reconsideration of the votes by which the two amendments just considered were agreed to.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I so move.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I understand that these amendments to which we have made reference have now been cleared by both sides of the aisle, with the exception of amendment No. 601, which the Senator from Montana (Mr. MELCHER) and I think the Senator from Wyoming (Mr. WALLOP) have expressed some concern. The one I mentioned earlier, No. 613, has now been cleared, as I understand. If that understanding is correct, I would propound the following unanimous-consent request:

Mr. President, I ask unanimous consent that printed amendments numbered 594 through 616, with the exception of 601, be agreed to en bloc and that the bill as thus amended be regarded for the purpose of amendment as original text provided that no point of order shall be considered to have been waived by agreeing to this request.

Mr. JOHNSTON. Mr. President, the Senator from Idaho is correct. This has been cleared and we have no objection.

The PRESIDING OFFICER. Is there any other objection? Without objection, the amendments are considered and agreed to.

Amendments numbered 594 through 600 and 602 through 616 were agreed to, as follows:

AMENDMENT No. 594

On page 2, line 18, delete "$12,845,000" and insert in lieu thereof "$12,370,000".

AMENDMENT No. 595

On page 2, line 13, delete "$377,531,000" and insert in lieu thereof "$367,631,000".

AMENDMENT No. 596

On page 8, line 21, delete "$10,118,000" and insert in lieu thereof "$6,873,000".

AMENDMENT No. 597

On page 9, line 13, delete "$221,628,000" and insert in lieu thereof "$219,328,000".

AMENDMENT No. 598

On page 11, line 3, linetype "$75,000" and insert "$100,000" immediately after.

AMENDMENT No. 599

On page 12, line 14, delete "$541,382,000" and insert in lieu thereof $530,982,000".

AMENDMENT No. 600

On page 14, line 7, delete "$108,721,000" and insert in lieu thereof "$88,721,000".

AMENDMENT No. 602

On page 17, line 12, delete "$2,600,000" and insert in lieu thereof "$2,288,000".

AMENDMENT No. 603

On page 19, line 17, delete "$64,418,000" and insert in lieu thereof "$60,838,000".

AMENDMENT No. 604

On page 20, line 5, delete "$114,227,000" and insert in lieu thereof "$105,335,000".

AMENDMENT No. 605

On page 21, line 8, delete "$830,972,581" and insert in lieu thereof "$814,742,581".

On page 21, line 9, linetype the numeral and insert after the numeral "$57,349,000".

AMENDMENT No. 606

On page 29, line 16, delete "$41,631,000" and insert in lieu thereof "$40,834,000".

AMENDMENT No. 607

On page 34, line 10, delete "$105,568,000" and insert in lieu thereof "$103,168,000".

AMENDMENT No. 608

On page 34, line 15, delete "$64,535,000" and insert in lieu thereof "$63,935,000".

AMENDMENT No. 609

On page 34, line 16, delete $59,660,000" and insert in lieu thereof "$59,060,000".

AMENDMENT No. 610

On page 35, line 6, delete "$1,013,500,000" and insert in lieu thereof "$996,410,000".

AMENDMENT No. 611

(1) On page 35, line 14, delete "$507,643,000" and insert in lieu thereof "$265,101,000".

(2) On page 35, line 16, strike "$486,950,000" and insert in lieu thereof "$244,408,000".

(3) On page 35, lines 17 and 18, delete the phrase ". . . and construction and maintenance of forest roads by timber purchasers"

AMENDMENT No. 612

On page 35, line 15, delete "$22,793,000" and insert in lieu thereof "$20,693,000".

AMENDMENT No. 613

On page 40, line 21, delete "$431,990,000" and insert in lieu thereof "$408,490,000".

AMENDMENT No. 614

On page 46, line 18, delete "$623,069,000" and insert in lieu thereof "$606,905,000".

On page 47, line 2, delete the linetype from the words "the first".

On page 47, line 2, after "$15,000,000" insert "$5,000,000".

On page 47, line 2, delete the words "not to exceed $30,000,000".

On page 47, lines 5, 6, and 7, delete the linetype.

AMENDMENT No. 615

On page 50, line 25, delete "$132,106,000" and insert in lieu thereof "$131,766,000".

AMENDMENT No. 616

On page 52, line 9, delete "$7,500,000" and insert in lieu thereof "$7,000,000".

Mr. McCLURE. Mr. President, I move to reconsider the vote by which the amendments were agreed to.

Mr. JOHNSTON. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. McCLURE. A parliamentary inquiry, Mr. President.

The PRESIDING OFFICER. The Senator will state it.

Mr. McCLURE. Those amendments are now part of the bill and will be considered as original text for the purpose of further amendment. Am I correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. McCLURE. I thank the Chair and I thank my colleague.

Mr. President, I want to call attention to an error which appears in the explanation of one of the amendments introduced on Friday and one of those adopted en bloc. It has to do not with the content of the amendment but the explanation of it, which I placed in the RECORD on Friday. It appears on page 25258, and it deals with amendment No. 597.

The figure used in amendment No. 597, as printed, is correct, but the explanation that was inserted into the RECORD at that time erroneously included a reduction of $400,000 for biological services of the Fish and Wildlife Service. That figure and that line are incorrect. That reduction is not included within the amendment. I wanted people looking at the RECORD or looking at the amendment to understand as well as to have the legislative history correctly reflect both the figure is correct in the amendment but the explanation was not completely accurate.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, there are a limited number of amendments of which we are aware—maybe a total of a half dozen that various Senators have indicated to us they might wish to offer during the consideration of this bill. I am also aware of some concern on the part of some Members that they want to make sure that the legislative history is correctly understood so they have some colloquies they wish to undertake with respect to the history of the bill as well as the direction of the bill in certain respects.

Mr. President, I urge every Senator who has such an interest and concern in this bill who wants to take either of those actions to come to the floor and allow us to get that work taken care of. It is not my disposition to move to third reading of the bill without giving them some opportunity to be heard.

The other side of that is that we will, indeed, proceed to third reading of the bill if they do not have enough interest to come and present their amendments or to undertake that colloquy. Mr. President, I hope Senators may be advised that we will be moving in that manner if they do not come.

I thank the Chair and I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BAKER. Mr. President, I call the attention of Senators to the fact that it is now almost noon, and, once again, we do not have any great outpouring of Members wishing to offer their amendments.

What is going to happen is that we are going to end up with these amendments all stacking up late in the day, maybe having to go over until tomorrow, and telescoping the time we have available for the consideration of this bill and other appropriation bills. That would be unfortunate.

This morning, during leader time, I announced that beginning next week, on Monday, Senators are on notice that the regular recess-adjournment hour of 6

p.m., except for Thursday, would no longer apply, unless we can keep these appropriation bills on schedule. We have no other choice.

I do not want to see us in late every night next week and the week after, in an effort to pass appropriation bills. If we do not dispose of these bills as they are scheduled, that is exactly what we will end up with.

This is the time, this is the moment, when Senators should realize that their decisions today will affect their schedules next week. I urge Members to come to the floor now and to offer their amendments, so that we can finish this bill today.

Mr. McCLURE. Mr. President, will the majority leader yield?

Mr. BAKER. I yield.

Mr. McCLURE. Mr. President, I was just looking at my calendar and trying to determine which day in December I should obtain reservations on the airline to return to my home in Idaho for Christmas. I know that it is perhaps a little presumptuous to extend this forecast into the adjournment date; but, if I recall correctly, December 20 is on a Monday. As I understand, we have a number of items of some urgency that will be dealt with in the remainder of this session—not only the appropriation matters. We have another matter, a very tough and unfortunate matter, that will take at least a week of our time in the middle of that schedule.

I understand that we will have a couple of days' recess for Thanksgiving—1 day to eat and another day to recover. [Laughter.] Then we will be at the 1st of December. We have a continuing resolution that expires on November 20, and we must deal either with the appropriation bills between now and then and/or wrestle with that continuing resolution.

Am I safe in getting reservations on the airplane for, say, the 22d or 23d of December?

Mr. BAKER. Mr. President, I devoutly wish for a better result than that, but I have to agree with the Senator from Idaho, the manager of this bill, that that is exactly where we are headed.

Last week, the leadership published a schedule of appropriation bills. If we stick with that schedule, we can be out of here sometime in December. The Speaker and I discussed the possibility of December 8. That date is not fixed for sine die adjournment, but it is a realistic objective. Every day that goes by when we have jumped the track on the schedule of appropriation bills will come out of that period between the 18th of December and Christmas. That is harsh, but it is true.

Mr. President, the Senate should realize that we are no longer in a routine and regular legislative situation. We are racing the clock, and we are trying to finish these appropriation bills in time to get home at some decent period before Christmas.

Mr. JOHNSTON. Mr. President, will the Senator yield?

Mr. BAKER. I yield.

Mr. JOHNSTON. Do I correctly gather that anything prior to December 18 is rather much out of the question now?

Mr. BAKER. I hope not. I should like to improve on the 18th; but, frankly, that is the date that the Speaker and I have discussed, and I rather expect that it is the most realistic appraisal.

The Senator from Louisiana knows as well as I do that not only must we finish these bills, but also we have to finish the conferences on these bills; and after the adoption of the conference reports by both Houses, the bills must be submitted to the President for his signature, to become statute law.

The period from, say, the last week in November to the end of the first 2 weeks in December will be consumed by those efforts, plus the efforts to pass other measures, including perhaps the Department of Justice authorization bill, plus other matters the Senator from Louisiana mercilessly reminds me of from time to time.

So I think it is a realistic estimate. I regret to say so, but I am afraid so.

Mr. JOHNSTON. I thank the Senator.

Mr. BAKER. Mr. President, I do not relish the role I am playing now—that is, to urge Senators to come to the floor—but that is what it comes down to.

I yield the floor.

UP AMENDMENT NO. 526

Mr. STEVENS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER (Mr. COHEN). The amendment will be stated.

The legislative clerk read as follows:

The Senator from Alaska (Mr. STEVENS) proposes an unprinted amendment No. 526.

Mr. STEVENS. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 34, line 1 insert:

SEC. 110. Notwithstanding any other law, the Secretaries of Interior and Agriculture may manage wild free-roaming horses and burros on lands administered by them without regard to the provisions of the Act of December 15, 1971 (85 Stat. 649; 16 U.S.C. 1331) or section 47 of title 18 United States Code. In the management of such horses and burros, the Secretary may provide for capture and disposition of such horses and burros under such humane conditions as the Secretary may prescribe, giving preference where practicable to disposition by adoption and private maintenance.

Mr. STEVENS. Mr. President, I am introducing this amendment to provide the Secretaries of the Interior and Agriculture the same management authority on free-roaming horses and burros on the public lands that they have on lands under jurisdiction of the Fish and Wildlife Service or the National Park Service. The Secretaries must be able to dispose of those animals efficiently through sale or other humane disposition.

In providing this authority to the Secretaries, a restriction is added that they must give preference where practicable to disposition by adoption and private maintenance.

The origin of the amendment is a discussion that I have had with people in the Department of the Interior. It is strange that it is actually not possible under existing law for a person to capture a wild horse, maintain it, and then train it, that is, break it for use as a saddle horse.

Under existing regulations, one must participate in a lengthy adopt-a-horse process. There is no authority for the Secretary to fashion a flexible disposal program.

It is possible for the Secretaries under existing law to just destroy them. Not only do they destroy them, they must do so without being able to commercially dispose of the remains.

But there is no incentive in the existing regulations for people who have farms and ranches nearby to do what their grandparents did, that is to round up some of these wild horses, keep them, and train them for use in the businesses on lands adjoining the public lands in the West.

Existing law requires that where the animals have no adoption demand, they are destroyed. Unlike the Fish and Wildlife Service or the Park Service, however, there is no ability of the Secretaries to deal with commercial organizations in rounding up the horses and burros on public lands and selling them. Horses and burros could, under this amendment, be sold for purposes of breaking them so they will be available as saddle horses, packhorses, or for recreational use.

I do not see why we should have a more humane system on lands under the jurisdiction of the Fish and Wildlife Service within the Department as compared to those animals that are on public lands managed by the Forest Service or Bureau of Land Management.

As I have stated, the purpose of this amendment is to give the Secretary the same authority and the same discretion on the public lands as he has on lands under the jurisdiction of the Fish and Wildlife Service.

I emphasize that there is a budgetary aspect to this. It currently costs about $300 to put one of these animals through the process of adoption. Moreover, $27 million has been expended by the BLM since this act was adopted. My amendment would permit the Government to generate rather than expend funds through more efficient land management.

I think that there should be a system whereby those people in the area who know the animals may acquire them for domestic use. I seek to give that type of disposition preference in this amendment.

I submit to the managers of this bill it is my understanding the amendment has been discussed among Members on the other side of Congress, and I believe the matter could be worked out in conference with sufficient explanation of the meaning of the amendment. This amendment is not creating new legal concepts. Existing law would merely be extended or expanded by our action in adopting this amendment.

Mr. JOHNSTON. Mr. President, the effect of this amendment is to invest the Secretary with the power and the mandate to round up wild horses and burros, notwithstanding the provisions of the act. It would be, I think, legislation on an appropriation bill.

I am advised that Senator JACKSON on our side has some objection to this particular legislation. It is not an overwhelming problem in my State. So I am

not speaking for myself, but we are sending out word to Senator JACKSON at this point and I wish to reserve a little time for him when we can find him.

So if we could perhaps put this over for a few additional minutes, we can get him.

Mr. STEVENS. I certainly have no objection. It is not an overwhelming problem in my State either. We do not happen to have free roaming horses and burros in Alaska any longer. There was a time prior to the deluge I imagine when they were there, but they are not there now.

It was called to my attention in connection with other duties that this is a dichotomy under the existing law, that there actually is a more humane approach to handling free roaming horses and burros on lands under the jurisdiction of the Fish and Wildlife Service than there is with regard to those on the BLM lands. This amendment would create uniformity in the approach of all land management agencies.

Mr. McCLURE. Mr. President, in view of the request by the Senator from Louisiana that we not act on this until at least that opportunity has been afforded to Senator JACKSON to come to the Chamber and discuss it, I will support the request and will request that the Senator from Alaska not press the amendment at this time.

Let me say, however, that while it may not be a matter of pressing importance to the Senators from Alaska or Louisiana in their home States, it is a matter of a great deal of importance to those of us in Idaho. Nothing has been more troublesome than the effort to protect the bands of free roaming horses that do exist on public land and at the same time to give us the opportunity to manage and control their numbers.

We have had any number of well-meaning and well-intentioned people who are very much concerned about the protection of the horses, who do not understand that we can have a moratorium or Federal policy and that we can freeze the status quo, but somehow that word does not get through to the stallions and the mares out there. They keep right on doing what they do in a rather natural way in spite of Government policy or in spite of the absence of Government policy and suddenly we have wild horse bands doubling and quadrupling in size over the period of time the Federal Administrators and Congress wrangle over whether or not the horse wranglers can wrangle horses.

We have more than one area in my State where the number of horses on the public lands has destroyed the range and led to the demands that all domestic livestock be excluded from the range. They are destroying the habitat for wildlife. They are making what is almost irrevocable damage in some of those fragile watersheds with respect to the ground cover that there is that will protect that watershed against erosion and against the siltation of the streams. They are just wreaking havoc because there are no natural predators that control those wild horses.

They are an introduced species, in spite of what we know to be historically the case, that they were there in prehistorical times. The major fossil finds for horses, the ones that provide the skeletal structures for all the museums around the world, happen to come from a fossil dig in southern Idaho. We had horses there a long time ago, and I am sure that the Senator from Alaska is correct that they were perhaps in Alaska also.

But the fact is they are an introduced species in modern times, introduced into an area where they did not have natural predators and, therefore, there are no natural predator controls. So the only thing that controls their numbers is starvation or man. They will breed beyond the level of capacity of the range to hold their numbers and to feed them sufficiently, and absent some action by man they will drive everything else out.

It is a difficult question because there is not just the ordinary conflict between species that are not domesticated, but they also do compete with those that are domestic animals and, therefore, in recent years there has been a tremendous difficulty in arriving at a sane national policy to deal with them.

Those who want to eradicate them, as is the case in some areas, have perhaps been excessive in their zeal. Congress a number of years ago to meet that problem did provide for the maintenance of the bands of wild horses and burros where they then roaming so we would not eliminate what is a rather romantic part of the West in the past but, nevertheless, a very disturbing and difficult part of the present.

In spite of that action by Congress to protect the wild horses and burros, the administration of that law has been almost impossible because of the reaction of those who are still suspicious of the motive of those who wish to restrict the numbers.

I could detail exactly the way in which they have grown over the years, how much the numbers are in one area where everybody admits that the appropriate level for that particular wild horse band should be about 150 and which grew to be over 600, and they then had a removal policy that was so limited that it did not reduce the numbers from 600. It only barely kept even with the annual increase in the herd, and the results, of course, was continued degradation of the range.

Then people coming in looking at a range want to blame the domestic livestock operators for destroying the range when, as a matter of fact, the primary impact in that particular range comes from not the domestic livestock but from the wild horse herd. Those are facts with which we must deal.

I am very sympathetic to the amendment of the Senator from Alaska because it does give the Secretary of the Department of the Interior and the Secretary of the Department of Agriculture authority to deal with the wild horse bands and burro bands on Forest Service lands and on the BLM lands, the same latitude that has been given to the Fish and Wildlife Service on their refuges.

But to indicate that this is something easily accomplished flies in the face of all of our recent experience in this body and in the other body. Those who would protect the wild horses are zealous to a fault in their protection, and that certainly the effort to invest in the administration a greater and broader latitude of discretion is going to inflame their passions and there will be reactions, I am sure, to what is done here.

With respect to the question of the other body, I do not know what the feelings may be in the other body. There is only one way I know to find out and that is if we take this amendment and go to conference we will find out what the other body's attitude is and whether or not they can accept this.

I know Senator HATFIELD, the chairman of the Appropriations Committee, has generally resisted the effort to put legislation on an appropriation bill, and he, too, may have some strong feelings concerning this matter on this particular piece of legislation. Of course, we have not heard from him in that regard.

But I do expect that as the Senator from Washington has expressed his interest, and the Senator from Louisiana has expressed the desire to protect his interests, that we cannot act upon this amendment immediately. I would hope we will have the opportunity to discuss it with those gentlemen in the next few minutes.

Mr. STEVENS. I certainly recognize the importance of the issue and the law allowing the Fish and Wildlife Service, with its delegated authority, to manage wild horses and burros on lands under their jurisdiction in a more humane and appropriate manner.

I was appalled to discover that young colts on public lands, on BLM lands, could not be taken by the children or the people living nearby. If the animals are processed through the adoption program after long administrative delay, it might be possible to obtain the horse. Bear in mind that it costs the taxpayer $300 per horse to administer the program.

On the other hand, there is no apparent difficulty under current authority of the Secretaries or their designated representatives to make the determination that there is no demand for adoption of the animals. In that case they just dig a big trench out in the public lands, shoot the animals, and push them into the trench. There are other equally grisly and wasteful ends for those animals.

There ought to be an interplay between the people who are seeking animals of this type with the land managers. People ought to be free to literally adopt them with little or no bureaucratic constraint.

Unfortunately, when there is demand from communities or ranches adjacent to public lands to take animals and to have them become useful, there is no authority in management of these wild horses and burros on public rangelands to use commercial methods for disposal.

Although, as I have stated, it is perfectly all right to round them up, shoot them, and put them in a trench if there is no demand for adoption.

It seems to me there is a patchwork quilt of management authority for wild horses and burros on lands that belong to the United States. I think there ought to be one comprehensive system govern-

ing disposal of these animals for all Federal lands.

Mr. McCLURE. Mr. President, will the Senator yield?

Mr. STEVENS. Yes.

Mr. McCLURE. Mr. President, the Senator, of course, is correct that the managers of the Fish and Wildlife refuge system do have a program that does work and that they are able to use. The difficulty has been the passions and emotions that have surrounded this issue that have prevented us from using what I think are better management techniques. We have had an adopt-a-horse program.

That adopt-a-horse program, in which we impound excess animals on the public lands and then hold them for adoption by people who might be interested in adopting the animals, has cost the taxpayers of this country hundreds of thousands, yes, millions, of dollars over the past several years just in order that we do not apply other control measures.

The truth of the matter is that there is an excess number of horses, just as there are excess numbers of dogs and cats in the cities, and that somehow those numbers have to be controlled. It is not the desire on the part of people simply to eliminate wild horses and burros. It is the need to manage their numbers, and the present system is not working.

The fact is we must find a system that will work. We have tried to reduce the costs to the taxpayers by increasing the fee that is necessary for someone who would take a horse under the adopt a horse program. We do not know whether that is going to work.

We do not know whether people will pay $250 for one of these horses. Some of them are good animals and some of them are not. Some of them may well be worth $250. A good many of them are not. We simply do not know what the results will be of these new efforts. We will say to the people who wish to save the horses that we do have a program to limit the numbers on the public range, and at the same time give other people the opportunity to take horses that they want. But we need to have a realistic program for the disposal of the excess horses that people simply do not want, that we cannot place, and that have to be removed from the public lands.

Mr. President, I was interested a few years ago in the situation of one of the men who happens to own some land that is surrounded by BLM lands. He had grazing permits on the public lands and he ran his cattle on not only his own land but on the public lands.

The horses became such a problem to him that he surrendered his permits, brought all of his cattle back to his private land, and then notified the Government, "Keep your horses off my land."

The BLM did not want to keep their horses off his lands. They were free roaming. He had to go to court to get a court order to order BLM to control the horses that some people in this country do not want to control at all, in order to keep them off his own private lands. He was successful in that effort. The BLM has spent a lot of money trying to comply with that court order and at the same time comply with the restrictions we have imposed upon them in their attempts to manage the numbers.

I might just indicate that in the adopt a horse program so far the taxpayers of this country have spent $27 million. That $27 million does not come from the people who have a particular interest. It comes from all of the taxpayers of this country; $6.8 million for fiscal year 1982 alone, is the estimate of the cost of this program. So far the average cost is over $550 per horse removed.

Those are pretty good horses if they are worth $550. So far nobody has been willing to pay that kind of a price. We have to start wondering at some point what is the cost of the program, what is the value of the program, how do we balance those rights and interests of the various people who are concerned.

As I said at the outset, I am sympathetic to the thrust of the amendment proposed by the Senator from Alaska, but I am not certain that this is the correct vehicle in view of the compassions that surround the issue, the legislative background and history that does permeate the discussion, and I am certain the interest that will be discussed by others on the floor of the Senate and in the other body.

Again I want to underscore the fact that I am sympathetic to the thrust of what the Senator from Alaska is saying, that we ought to be able to manage this very difficult question and have the BLM be freed up to manage this problem.

Mr. STEVENS. Mr. President, I understand the interest of the distinguished Senator from Washington in this problem. There is no reason for me to persist if there is not an agreement. I thought there would be a general agreement on the need for this type of amendment, although, as the Senator points out, this amendment could easily be misunderstood.

I understand the Senator from Washington would like to have hearings. I ask the Senator from Idaho to be a participant and I will participate where appropriate. I understand the Senator from Washington's interest in holding hearings on this matter. Hearings would be instrumental in determining an effective management approach for wild horses and burros. The current system is clearly deficient. If hearings meet with the approval of the chairman and the ranking minority member of the committee having jurisdiction, it is all right with me.

Mr. JACKSON. Will the Senator yield?

Mr. STEVENS. I yield.

Mr. JACKSON. Mr. President, I appreciate the comments of the distinguished senior Senator from Alaska. We do have some problems, obviously, with this matter.

These are problems that have continued over a period of time. I do believe that hearings could be helpful to determine what changes, if any, should be made in the law.

We do have a number of studies underway by the National Academy of Science, which relate directly to the unresolved issues that the distinguished chairman of the Energy and Natural Resources Committee mentioned in his comments.

I would hope that we could address the subject more effectively through the hearing process. As the ranking minority member on the committee, I will work very closely with the chairman if that is his wish, to have hearings, and with the senior Senator from Alaska.

Mr. STEVENS. I would be delighted to work with the distinguished Senators to resolve this problem. Again, my main interest is I would hope to start a dialog on the handling of these animals. I think we ought to encourage the 4–H Clubs and the young people in the communities near these rangelands to go out and capture these animals when they are young and make them productive animals. Leaving disposal of the animals to an adoption program requiring complicated forms and paperwork in order to acquire the animal has proven burdensome and somewhat ineffective. We must provide for a system allowing productive use of what is in fact a renewable resource.

The alternative is a system where a few horses are adopted. The remainder end up being destroyed without any benefit derived by the public.

There should be a policy where people of the area can use these wild horses and burros, taking them and making them useful. I think this would be a better way to handle the problem of wild horses and burros on the rangelands.

Mr. President, I withdraw my amendment.

The PRESIDING OFFICER. The amendment is withdrawn.

Mr. McCLURE. As I said earlier, I am sympathetic with the amendment. This is a problem that must be dealt with. We have been dancing around with it but we have been afraid to come to grips with it. I think the Congress does have a responsibility. Congress has not been willing to discharge that responsibility in a way which I think addresses the problem sufficiently.

I certainly agree with the Senator from Alaska and the Senator from Washington that we ought to continue the oversight we have tried to give to it in recent years, continue to move toward a rational policy for management and support and direct the administration in the areas where it is necessary and where it will be fruitful in that management effort.

I commend the Senator from Alaska for having raised this issue, and I will say on the record that we will continue to try to work in that direction.

Mr. STEVENS. I thank the Senator.

● Mr. CANNON. Mr. President, Senator STEVENS has offered an amendment to conform BLM wild horse management authority to the authority exercised by the Fish and Wildlife Service. In effect, the amendment would permit local individuals to adopt horses in the traditional method, by rounding them up and taming them, rather than going through the lengthy and frustrating adopt-a-horse process. He withdrew the amendment because it would have been subject to the point of order that it was legislation on an appropriations bill.

I want to commend the Senator for raising the issue and I hope to work with him on devising a more realistic process for controlling the horses in the future.

My State of Nevada is home to almost half of the wild horses in the Nation. It is estimated that some 32,300 wild horses and 1,700 wild burros roam the ranges of Nevada. This is about three times the number which existed in 1971 when the Wild Horse and Burro Protection Act was passed. That act has succeeded too well. Where there once were appropriate and manageable levels, there are now unsupportable herd levels. We have adopted, in effect, no policy of control except a hands-off policy in which the herds, with no natural predators have breeded explosively.

There are areas of my State which have been stripped of all vegetation, where the landscape now resembles the moon, and where starvation and trampling are the only restraints on herd size. I believe we must move to a more responsible and humane management system. I hope a thorough review will be possible in an appropriate legislative setting.●

Mr. STEVENS. Mr. President, I wish to clarify for the record my position regarding certain funding for the Bureau of Land Management and Fish and Wildlife Service funding in Alaska. At the time we dealt with funding for these agencies in committee and subcommittee, I felt that the justification for programs managed by those agencies was not adequate. Therefore, I worked to cut the budgets of these agencies in appropriate places.

It appears now that we may have cut more than is healthy, especially for the Fish and Wildlife Service. The Department of Interior has requested that I reexamine their earlier request in light of more detailed information offered in justification of the budget requests. They have asked that I increase the budget to those levels permitted by the President's budget for Interior.

In particular, the Fish and Wildlife Service has made a compelling case for increasing their planning budget. With 51 million acres of new refuges established by the Alaska lands bill, it is the Department's feeling that more planners will be needed to formulate land management plans and establish compatibility criteria for refuge usage. Hunting, fishing, recreation and other commercial activities including oil and gas, are all dependent upon refuge management.

Interior has also identified Bureau of Land Management programs not currently receiving adequate funding. These programs include acceleration of the White Mountain/Steese Minerals study and expedited review of Alaska Native Claims Settlement Act D–1 withdrawals that impede land conveyancing to the State.

I had intended to offer an amendment supporting needed budget changes to remedy these problems. However, I understand that the House budget levels are considerably higher than ours in these areas. If the distinguished chairman of the Interior Appropriations Subcommittee is agreeable, I would suggest that we seek the needed changes in conference.

Mr. McCLURE. I understand the problems the Senator is raising and will do everything I can to work with him in conference.

Mr. STEVENS. I thank the chairman and will withhold my amendment in lieu of working the problem out in conference.

Mr. JOHNSTON. Mr. President, I would ask the distinguished floor manager of this bill, Senator McCLURE, who is also chairman of the Committee on Energy and Natural Resources, to clarify a point regarding the committee's report on H.R. 4035. The report recommended that no funding be provided for the appliance efficiency standards program. Would he agree that this report language is not intended to have the effect of amending or repealing sections 421–427 of the National Energy Conservation Policy Act, which addresses appliance efficiency standards?

Mr. McCLURE. Yes. I would agree.

Mr. JOHNSTON. Second, the Department of Energy has, since 1978, conducted studies as to what, if any appliance standards would be economically justified, technologically feasible, and result in a significant energy savings. DOE, we understand, is close to completion of this study. There is no intent in this appropriations language to prejudge the technical, economic, or legal findings of this study, is there?

Mr. McCLURE. Yes, there is no such intent.

Mr. JACKSON addressed the Chair.

The PRESIDING OFFICER. The Senator from Washington.

Mr. JACKSON. Mr. President, I rise today to discuss a matter that my colleagues have heard me address on this floor many times in recent years—the Youth Conservation Corps.

The Reagan administration, led by Secretary Watt, has urged that this program be eliminated. Few actions taken by the President and Secretary Watt have troubled me more than this one. The program is cost effective; the taxpayers have consistently received more in terms of the value of services performed than it costs to provide the service; the program is popular both with the youthful participants and the Federal land managers who hire them; the program accomplishes useful and important conservation-related work on our Nation's parks and public lands; and it helps, in admittedly a small way, alleviate the devastating high level of youth unemployment.

What is the fate of a program such as this under the present administration? The answer from Mr. Stockman on down is clear—eliminate it. As puzzling as it may seem, that is the response of this administration to one of the most popular and cost-effective youth programs ever authorized by the Congress.

Mr. President, I have made these arguments before and my colleagues know where I stand on this issue. The House version of this bill includes $20 million for this program. This represents a 67 percent reduction from fiscal year 1981. But evidently a 67-percent reduction was not sufficient, as the bill before us today as reported from the Senate Appropriations Committee contains no money for the Youth Conservation Corps—a 100-percent reduction. I can only hope that the House prevails in conference and that some funding can be made available for this program in fiscal year 1982. I certainly urge my colleagues to view the House action favorably.

Now, Mr. President, I am aware of the action taken by the Congress earlier this year in the Reconciliation Act. I am also aware of the fact that there is nothing magical or mystical about the reconciliation process. Adjustments to what we did during those frantic days with respect to a number of programs are being discussed on both sides of the Hill as well as within the administration. If the Congress decides now to do something different than it did last August, there is no reason why we cannot make those changes. It may be that for substantive reasons we do not want to fund this program next year—that is our prerogative. But let us try not to fool ourselves or the American people into thinking that reconciliation somehow prevents us from taking a favorable action with regard to funding for YCC. That is simply not the case.

Finally, Mr. President, I ask unanimous consent that a letter from Under Secretary of the Interior Hodel to me regarding the YCC and the YACC be included in the RECORD at this point. It is important to note that the Department of the Interior estimates that some $168.6 million of conservation work will go wanting a a result of our failure to provide funding for the YCC. The lost opportunities are even greater for the year-round YACC program. To forgo these investments in our Nation's youth and our Nation's natural resources is very shortsighted indeed.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

U.S. DEPARTMENT OF THE INTERIOR,
Washington, D.C., October 15, 1981.

Hon. HENRY M. JACKSON,
U.S. Senate,
Washington, D.C.

DEAR SENATOR JACKSON: Thank you for your inquiry of July 24, 1981, concerning the impact of the termination of the Youth Conservation Corps (YCC) and Young Adult Conservation Corps (YACC) programs on our efforts to maintain existing National Parks, National Wildlife Refuges and other public lands.

In view of the current severe fiscal constraints, it is our opinion that work accomplished by the YCC and YACC programs is of low budgetary priority. Much of the maintenance and rehabilitation work needed in our National Parks and Refuges is beyond the capabilities of YCC and YACC. Upgrading the electrical wiring of park buildings, installing water and sewer systems, and repaving roads are examples of the kinds of work that are needed. We believe the most effective and efficient way to meet our goal of improving maintenance in existing parks is to use our regular maintenance staff supplemented, where appropriate, by local contractors possessing required skills.

The high priority work presently done by these youth programs will be undertaken by regular agency staff or by contract. The low priority work will not be undertaken immediately, but will be placed in the work schedule for completion at some future date.

We estimate that 10,500 YCC slots and 22,700 YACC slots will not be terminated within the Department due to the closure of these two programs at an appropriation level of $54 million and $200 million respectively.

Based on the fiscal year 1980 benefit/cost ratio for YCC of $1.04, we estimate the value of work that would have been accomplished in each of fiscal years 1982, 1983 and 1984 to be $56.2 million, given a $54 million annual appropriation. For this Department's share (35 percent) of the program, the estimated value of work to be accomplished in each fiscal year is $19.7 million. The fiscal year 1980 benefit/cost ratio for YACC was $1.28. We estimate the value of work that YACC could accomplish in each of fiscal years 1982, 1983 and 1984 to be $256 million, given a $200 million annual appropriation. This Department's share would amount to $89.6 million each year.

Please let me know if I can be of any further assistance.

Sincerely,

DONALD PAUL HODEL,
Acting Secretary.

Mr. JACKSON. Mr. President, I had planned to introduce an amendment to provide funds for the Youth Conservation Corps, which has been zeroed in the administration's budget.

I would point out, Mr. President, that the House has approved $20 million for this program. I realize that we are in a period of obvious budget stringency, but I would also point out, Mr. President, that this program has been a most effective one, not only in terms of preserving our Nation's resources, but in terms of the youth of this country, the most important resource of all.

The program has been successful through the years. I think it would be a tragedy if this program should be terminated at this time, as indicated by the Secretary of the Interior and the OMB in the projection of their policies in connection with our resource program.

I would hope that the distinguished chairman of the committee would make every effort in conference to see that this program is kept alive so that when the budgetary situation has improved, this particular program, being an integral part of our resource and conservation effort, will be able to continue to play the role it has played so effectively in the past.

I think it is one of the finest things which has happened for our Nation's resources and for the resources of the youth of this country. I would like to have the comments of the distinguished chairman of the committee in this regard.

Mr. McCLURE. Mr. President, I understand the concern that the Senator from Washington is expressing. The distinguished senior Senator, of course, is the father of the YCC. He saw the value of it and nourished and protected it. I understand his distress when during a period of budgetary stringency we have found it necessary to eliminate or reduce funding for this program.

The other body, of course, has money in their bill for this program. It is my hope that in the deliberations between the Senate and the other body, the conference on this appropriation, we will be able to resolve this, along with a number of other questions.

Mr. President, I do not mean to unduly alarm the distinguished senior Senator from Washington when I make the following statements, but I want to put this into the context which is appropriate.

While I am sympathetic with this particular request and hope to be able to be sympathetic with the conference, we have a very, very tough conference ahead of us with respect to the rather wide differences that we have between this body and the other body. This bill, as reported, is $7.7 billion in BA and $9.2 billion in BO. Our allocation from the committee for this purpose, the Appropriations Committee, was one-tenth of $1 billion, $100 million, above that in budget authority, and $700 million higher than that in outlays.

That obscures the fact that we took the strategic petroleum reserve off budget in actions that were taken; therefore, those figures are a little misleading in regard to the allocation from the full Appropriations Committee.

The President's only request had been for $7.5 billion in budget authority and $10.4 billion in outlays, so that we are $200 billion above the President's original request and some $1.2 billion below in outlays. However, the September revisions, adjusted for the actions taken with respect to the strategic petroleum reserve, indicate the President's request of a level of $6.6 billion in authority and $8.5 billion in outlays. The bill, as we stand now, is just exactly $1 billion higher than the President's September request in budget authority and is $600 million higher than the President's revised requests in budget outlays.

I say that, Mr. President, because I am going to be very constrained in the conference, but I hope to be able to be responsive to the Senator's request in the conference and perhaps we can take care of it in that context.

Mr. JACKSON. I appreciate the statement by the distinguished chairman of the committee.

INTERAGENCY ARCHEOLOGICAL SERVICES PROGRAM

Mr. President, I am pleased that the chairman and his committee have provided over $2 million in this bill to the National Park Service for its Interagency Archeological Services program. Specifically, I strongly support the outstanding archeological research concentrated on artifacts recovered from the Ozette site adjacent to the Makah Indian Reservation in northwest Washington State. I want to be sure that there is sufficient funding to continue the ongoing task of preserving and documenting the artifacts retrieved from the Ozette site.

I understand that the House report to its appropriation bill contains language that would require $225,000 of available funds be devoted to the work on the Ozette project. I believe that the Senate would be acting responsibly in establishing a similar spending priority for analysis of the Ozette artifacts.

The Ozette site is recognized as one of the top six archeological resources ever discovered in our country. Although in 11 years, only 1 percent of the deposits at Ozette have been excavated, funding constraints currently do not allow for continuation of the research at the site. Nevertheless, I believe it is our responsibility to be sure that the artifacts already recovered are properly preserved, analyzed and documented.

I say to the Chairman, this is not a request for additional appropriations. It is not a request to devote funds to an unworthy project. It is a request that the Senate join with the work already done by the House to insure that we continue the documentation of the Ozette artifacts. I urge that the Senate conferees on this bill consider favorably the language supported by the House that would provide $225,000 of available funds for the Ozette archeological resources.

Mr. McCLURE. Mr. President, I appreciate the continuing support of the Senator from Washington for the Interior Appropriations bill. I understand that the House has earmarked $225,000 within available funds to continue the analysis and documentation of the artifacts already recovered. I recognize the value of the archeological find at Ozette Village and assure the Senator that we shall give every consideration to his request.

Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. NICKLES. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

UP AMENDMENT NO. 527

Mr. NICKLES. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The bill clerk read as follows:

The Senator from Oklahoma (Mr. NICKLES) proposes an unprinted amendment numbered 527.

Mr. NICKLES. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 25, line 25, strike the words "continue academic and"

On page 26 strike lines 1 and 2, insert in lieu thereof the following: "resume elementary or secondary academic and residential education programs for Indian children at the Chilocco, Seneca, or Fort Sill boarding schools, Oklahoma, or the Stewart boarding school,"

Mr. NICKLES. Mr. President, last year, Congress closed four off-reservation boarding schools operated by the Bureau of Indian Affairs. Three of these schools were in Oklahoma. Consolidation was necessary to attempt to reduce the extremely high operating costs of these schools, much of which was caused by shrinking pupil enrollments.

The language in Public Law 96–126 states that no moneys may be spent by the Bureau of Indian Affairs for "academic and residential programs." It is my belief that the intent of Congress was to discontinue only the elementary and secondary education system at these schools.

Mr. President, the amendment I offer today simply states that no portion of any appropriation to the Bureau of Indian Affairs shall be available to resume elementary or secondary academic and

residential education programs for Indian children at the Chilocco, Seneca, or Fort Sill boarding schools, Okla., or the Stewart boarding school, Nev.

By adopting this amendment, Congress will not preclude these institutions from being utilized in some type of constructive training or educational programs to aid the Native Americans in achieving their goal of self-determination.

I would appreciate the support of my fellow colleagues.

Mr. McCLURE. Mr. President, so far as I know, the Department has no objection. This is a clarifying amendment and one which will permit the use of these facilities for purposes other than as elementary and secondary education facilities.

The Senator from Louisiana has been called from the floor temporarily. He has an interest in this amendment, and I ask that we not act on the amendment until he has had an opportunity to return to the floor. For that reason, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The bill clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I ask unanimous consent that the pending amendment be temporarily laid aside.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. ANDREWS. Mr. President, I do not object to the reduction in the appropriations for the Bureau of Indian Affairs General Management and Facilities Administration of $10,000,000; however, I should like a few things clarified.

It appears to me that may be a budgetary slight of hand involved here which is not readily apparent. Of the $10,000,000 reduction for the General Management and Facilities Administration, $3,450,000 of this savings is achieved by reducing the amount for the acquisition and modernization of the automated data processing systems requested in the January 1981 budget submission by the BIA. This reduction is approximately 85 percent of the $4,190,000 requested in the January budget submission.

The justification for this reduction is not that acquisition or procurement of this equipment is unnecessary or will be deferred, but, rather, that "user charges for new equipment procurement" will be established, according to the BIA's September 1981 budget submission. Mr. President, this is not an elimination or deferral of purchase of this ADP equipment. It is a simple shift of the burden of these costs from the line item providing for General Management and Facilities Operation to the programs delivering services to Indians or providing for protection of trust resources. There is no commensurate increase in the budget authority for the operation of these programs.

Mr. President, this proposal to shift to the program operations the major cost for the procurement of this AKP equipment is a significant departure from past departmental practice. The January budget submission was premised on the past accounting practices of the BIA. As explained in that January justification, "The cost of operating existing ADP systems are borne directly by each user. To cover these costs, funds are included within each user's regular operating program. The user pays only for ADP services actually received * * *." (Department of the Interior budget justifications, fiscal year 1982, page BIA–113). The addition to the costs of the operation of the various programs.

This reduction in the budget authority of the General Management and Facilities Administration should be seen for what it really is—a general reduction in the budgetary authority of the various Indian programs by imposing upon those programs a hitherto unborne burden. When viewed in this light, we find a proportionate reduction in the BIA budget authority for Indian program operations and general management and facilities administration almost the reverse of that which first meets the eye—general management and facilities budget authority is reduced by $6,550,000, or about one-third of the total BIA reduction, and Indian programs are reduced by $9,750,000, or about two-thirds of the total reduction. This turnaround does not reflect the sensitivity and concern which we have expressed for the continued operation of vital Indian programs.

Mr. President, I do not object to the reduction in the budget if it has the effect of deleting the acquisition of the ADP equipment. I would like to be assured, however, that the Bureau will not administratively alter its procurement process by charging programs which had no part in the decision to purchase the equipment and which have no budget to pay for such purchases.

Mr. McCLURE. I say to the Senator that I am willing to make this condition clear when the conferees act on this bill. If the reduction is sustained by the conferees, the expenses of the ADP purchases may not be transferred to the program activities. Rather, the BIA will again have to request funds for procurement through the normal budget process.

Mr. ANDREWS. Mr. President, I am very concerned about the proposal to reduce the funding for the community health representatives (CHR) program of the Indian Health Services by $10 million, a cut of 29 percent of the committee's original figure of $34,583,000 and a cut of 36 percent of last year's appropriation level.

The CHR program, initiated in 1968, has proven itself to be a cost-effective and successful method of delivering critical health care services on Indian reservations. In the last 13 years, the program has expanded from community liaison outreach and now encompasses a broad range of health related services, including direct health care. Emphasis shifted, as the program grew, from outreach services to the development of skilled professional and paraprofessional staff. Today, the CHR program includes: registered and licensed practical nurses, emergency medical technicians, environmental health technicians, dental assistants, and audiological and optometric technicians.

These CHR's provide a wide range of services to the local Indian communities: services which include alcohol and drug abuse counseling; assistance in immunization programs; emergency services and treatment; maternal and prenatal counseling and assistance; mental health counseling and conducting of rabies clinics—to name just a few of the services provided.
